AUTHORIZATION FOR THE RELEASE OF PROTECTED HEALTH INFORMATION

Patient Name: EUGENE G. MAURICE Social Security Number (last 4 digits only): 1524
Previous Name, if applicable: _____
Address: 61 SHOCKLEY WAY City: DALLAS State: GA ZIP: 30157
Date of Birth: 01-02-1944 Home Phone: 678-910-2298 Work Phone: NA

1. WELLSTAR HEALTH SYSTEM FACILITY / FACILITIES

I authorize representatives from the following facility / facilities to disclose the above-named individual's health information as directed below:
(Check one or more)

- ☐ Atlanta Medical Center
- ☐ Atlanta Medical Center South
- ☑ Cobb Hospital
- ☐ Douglas Hospital
- ☐ North Fulton Hospital
- ☑ Kennestone Hospital
- ☑ Paulding Hospital
- ☐ Spalding Regional Hospital
- ☐ Sylvan Grove Hospital
- ☐ West Georgia Medical Center
- ☐ Windy Hill Hospital
- ☑ WellStar Medical Group
  Name(s) of provicer(s): SEE ATTACHED
- ☐ Other: _____

2. RECEIVING PARTY

☐ Please send my health information to:

Name: ELECTRONIC DELIVERY
Address: SEE ATTACHED
City: _____ State: _____ ZIP Code: _____
Phone Number: _____ Fax Number (healthcare provider only): _____

☐ I would like to pick up my medical records in person

☐ I authorize _____ to pick up my medical records in person.
(Name of person authorized to receive the record)

3. DESCRIPTION OF HEALTH INFORMATION TO BE DISCLOSED

☑ Complete medical record *(please specify dates of service)* 06-01-09 to DATE

OR

☐ Partial medical record *(please specify records below)*

Information	Dates	Information	Dates
☐ History and Physical		☐ Office Notes	
☐ Consultations		☐ Operative Reports	
☐ Discharge Summary		☐ Pathology Reports	
☐ Lab Results		☐ EKG Reports	
☐ X-rays		☐ HIV / AIDS Information	
☐ Drug / Alcohol Abuse treatment		☐ Mental Health Treatment	

☐ Other: _____ - *please specify dates of service:* _____

770-810-4193

AUTHORIZATION FOR THE RELEASE OF PROTECTED HEALTH INFORMATION - page 2

4. PURPOSE OF DISCLOSURE

☐ My personal records ☐ Attorney ☑ Disability
☐ Other: VA - DoD Disability Claim

5. EXPIRATION OF AUTHORIZATION

Unless I request in writing otherwise, this authorization will expire on 12-31-2020. If I do not specify an expiration date or event, this authorization will expire ninety (90) days from the date on which it was signed.
(insert date or event)

6. RIGHT TO REVOKE AUTHORIZATION

I understand that I have a right to revoke this authorization at any time. I understand that if I revoke this authorization, I must do so in writing and present written revocation to the Health Information Management Department(s) of the WellStar Health System facility or facilities checked above. I understand that the revocation will not apply to any health information that has already been released in response to this authorization.

7. FEES

I understand that federal and state laws allow a fee to be charged for the copying of patient records and I will be responsible for the payment of such fees. The fee schedule may be viewed at www.wellstar.org.

8. REFUSAL TO AUTHORIZE USE AND/OR DISCLOSURE

I understand that authorizing the use or disclosure of the information above is voluntary. I need not sign this form to ensure healthcare treatment. However, if I have been asked to sign this form in order to authorize the disclosure of my health information for purposes related to research, or for other reasons, I understand that WellStar Health System may decline to treat me if I refuse to sign this information only if: (1) the treatment would be related to a research project and this authorization is for the use or disclosure of my health information for such research, or (2) the treatment would be for the sole purpose of creating health information for disclosure to a third party (such as a pre-employment drug screen).

9. RE-DISCLOSURE

I understand that if my health information is disclosed to a party other than a healthcare provider, health plan, or healthcare clearinghouse subject to the federal privacy regulations, my health information disclosed pursuant to this authorization may no longer be protected by the federal privacy regulations.

10. RELEASE AND WAIVER

If the health information that I have requested WellStar Health System to disclose contains any privileged psychiatric or psychological information related to the treatment of physical and/or mental illness, chemical dependency or alcohol abuse, or testing or treatment of any communicable or infectious disease such as acquired immunodeficiency syndrome (AIDS), Immunodeficiency Syndrome Related Complex (ARC), human immunodeficiency virus (HIV), venereal disease, tuberculosis, or hepatitis, I hereby waive any privilege concerning such information for the purpose(s) of releasing it to the party or parties authorized above.

I also release WellStar Health System, each of the WellStar Health System facilities checked above and their officers trustees, agents, and employees from any and all liabilities, damages, and claims which might arise from the release of the health information authorized by me above.

Patient:	Maurice, Eugene	**MR #:**	L000286367	**Gender:**	M
DOB:	01/02/1949 (64yrs)	**Study Date:**	09/17/2013	**Pt. Status:**	Outpatient
Height:		**Weight:**		**BSA:**	
Room/bed:		**Acct #:**	1325902325		

Referring physician: None
Ordering physician: Abdul Sheikh, MD
Interpreting physician: Abdul Sheikh, MD
Sonographer: Melissa Dixon, RDCS

Indications: Other symptoms involving cardiovascular system (785.9).

Study data: Complete study and Doppler flow study including spectral analysis, color and gray scale imaging. Location: Vascular laboratory. Patient status: Outpatient. Study status: Routine.

Impressions

1. 50-69% stenosis involving the right internal carotid artery.
2. 70-79% stenosis involving the left internal carotid artery.
3. The bilateral vertebral arteries are patent with normal antegrade flow.

Findings:
Right common carotid: Mild diffuse disease.
Right internal carotid: Irregular calcific plaque. Moderate diffuse disease. Doppler flow velocities are increased.
Right vertebral: Antegrade flow.
Left vertebral: Antegrade flow.
Left common carotid: Mild diffuse disease.
Left internal carotid: Irregular calcific plaque. Severe diffuse disease. Doppler flow velocities are severely increased.

Arterial flow:

Location	*V sys*	*V ed*
Right CCA - proximal	115 cm/s	14 cm/s
Right CCA - mid	86.6 cm/s	16.1 cm/s
Right CCA - distal	83.1 cm/s	18.9 cm/s

Workforce Obligations Self Pay Program Acknowledgment

The Consumer Self Pay Program is offered for my convenience by [redacted] and is intended to provide me with a method to pay for services in order to avoid the submission of my claim to my insurance carrier. I understand that I am responsible for the charges of each service that my claim(s) would be processed. I understand that certain charges may be excluded from the Workforce Consumer Self Pay Program and will be billed to me. Charges, unless otherwise arranged, are made at the time of service.

Receipt

By initialing below, I acknowledge that I have received, or will receive, the Notice of Privacy Practices and Consent for Treatment, Payment and Health Care Operations.

Initial here to agree to the terms of the Consumer Self Pay Program.

Initial here to acknowledge that I may elect to have my claim processed through the Self Pay Program for my insurance company.

Initial here to acknowledge that I have received the Notice of Privacy Practices.

Payment Policy for Self Pay Patients

Initial here to agree to use the Self Pay Program and understand that by not using my insurance, I will not be billed, or apply for financial assistance.

Initial here to acknowledge that services cannot be rescheduled at this time.

11443477	48015	PIC CT ANGIO NECK W+W/O-CST	433.10-OCL CRTD ART WO INFRCT

F1 cat-STS

CT ANGIOGRAM OF THE HEAD AND NECK WITH Q3D POSTPROCESSED IMAGES:

HISTORY: Atherosclerotic disease status post CABG. Abnormal carotids. ICD-9 code 433.10.

TECHNIQUE: All stenoses graded using NASCET-like criteria.
90 mL Isovue administered for exam.

COMPARISON: No priors.

FINDINGS CT HEAD:

Sensitivity for hemorrhage is diminished on these postcontrast only images. No large extraaxial collection or parenchymal hemorrhage is documented. Cortical gray-white differentiation is bilaterally preserved without evidence of acute cortical infarct. There is no mass effect or midline shift. There is no hydrocephalus. No abnormal parenchymal or extraaxial enhancement is identified.

Imaging of the orbits is unremarkable. Dural venous sinuses are grossly patent, although this is not a CT venogram.

The paranasal sinuses demonstrate concha bullosa of the right middle turbinate, anatomic variant. Mastoid air cells are bilaterally clear.

IMPRESSION CT HEAD:

No acute intracranial pathology. Preserved appearance to the brain parenchyma. If more sensitive assessment of brain parenchyma is desired, consider MRI.

Checkin-Exam Code Summary
11443477-48014,11443477-48015

FINDINGS, CT NECK:

Neck soft tissues are not well assessed on these early arterial phase images. Nasopharyngeal soft tissues are bilaterally symmetric and fossae of Rosenmller are clear. Oropharyngeal soft tissues are not optimally assessed due to streak artifact from dental hardware. Parapharyngeal fat planes are preserved. There is no discrete enhancing oropharyngeal mass identified. There is a somewhat tortuous course to the bilateral external carotid artery and branch vessels, not to be confused with retropharyngeal lesions. The hypopharynx, including the valleculae and epiglottis, is preserved. The vocal cords are medialized and poorly assessed. There is asymmetry of the piriform sinuses more effaced on the left than right. This may be within normal limits. The subglottic airway is maintained.

Sternotomy wires and CABG grafts are documented including LIMA graft. These are grossly patent, not imaged in their entirety. Prominence to the main pulmonary arteries is noted.

Imaging of the lung apices demonstrates bronchial wall thickening, for example series 7 image 1, bilaterally.

Osseous structures in the neck demonstrate spinal canal and neural foraminal narrowing at multiple levels on a degenerative basis. There is straightening of the cervical lordotic curve which may be positional or reflect muscle spasm. Canal narrowing would be greatest at C4-5 and C5-6. Osseous union of C3-4 and C2-3 anteriorly by osteophytes is suspected.

The bilateral parotid glands are preserved. Submandibular glands are unremarkable. Thyroid is normal in size, not well assessed. No phlegmon, lymphadenopathy or drainable fluid collection is identified in the neck.

IMPRESSION CT NECK:

FC: AA FINAL

Name: MAURICE,EUGENE G Location: DIS - ODC
DOB: 01/02/49 Age: 64Y Sex: M MR# L000286367
Ordered Date/Time: 12/06/13 1448 Acct#: L1333900413

AUSTELL GA 30106 Ref. Dr:

Checkin-Exam Code Summary
11443477-48014,11443477-48015

Status post CABG with grossly patent grafts.

Probable pulmonary arterial hypertension.

Nonspecific bronchial wall thickening may reflect reactive airways disease or acute and/or chronic bronchitis. May be correlated with any respiratory symptoms and smoking history.

Medialized, poorly assessed vocal cords as described.

FINDINGS CT ANGIOGRAM:

Q3D postprocessed images are available. There is a 3-vessel configuration to the aortic arch. On the right, the innominate artery is preserved. There is narrowing of the distal common carotid artery by calcified and noncalcified plaque up to 60%. There is stenosis in the internal carotid artery at its origin of up to 60-70% using NASCET-like criteria. The right vertebral artery remains patent.

On the left, the common carotid artery at its origin is preserved. There is narrowing by calcified and noncalcified plaque distally up to 65%. Artifact degrades images of the internal carotid artery, but narrowing of up to 80% at the left internal carotid artery is suspected by calcified and noncalcified plaque, reference series 604 images 54 and 55.

The left vertebral artery is hypoplastic compared to the right. There is heavily calcified plaque at its origin and its origin may be occluded, although the vessel distal to the origin is patent, series 6 image 194, suggesting that this is just a significant stenosis.

Intracranially, the right vertebral artery remains dominant and the left

FC: AA FINAL

AUSTELL GA 30106 Ref. Dr:

Checkin-Exam Code Summary
11443477-48014,11443477-48015

vertebral is extremely hypoplastic with majority of flow in a posterior inferior cerebellar artery. Basilar artery remains patent. There is fetal type origin of the bilateral posterior cerebral arteries which remain patent. In the anterior circulation, there is preserved enhancement of bilateral internal carotid arteries, middle cerebral arteries and anterior cerebral arteries. The anterior communicating artery is patent. Atherosclerotic plaquing in the intracranial carotids and cavernous carotids is noted without hemodynamically significant stenosis.

IMPRESSION:

Atherosclerotic disease intracranially with preserved intracranial vessels. Variant intracranial vascular anatomy as described.

Disease in the bilateral carotid arterial systems. On the right, stenosis of up to 60% in the common carotid artery distally and 60-70% in the internal carotid artery.

On the left, stenosis of the common carotid artery of up to 65% distally and up to 80% in the proximal internal carotid artery. Possible high-grade stenosis of the vertebral artery, poorly assessed due to heavy calcification of the atherosclerotic plaque, as well as diminutive vessel caliber. Please see body of report for additional details.

The requesting physician or his or her representative will be informed of the availability of these results through the WellStar F1 system.

WellStar Outpatient Self Pay Program Acknowledgment

The Outpatient Self Pay Program option for my services on (date) 12/6/13 has been explained to me. I understand the estimate provided to me by WellStar is only an estimate of what my out-of-pocket responsibility may be based upon what information my health insurance has provided to WellStar.

I understand that exams may be changed or added to meet my clinical needs per physician's orders and that some charges may be excluded from WellStar's Outpatient Self Pay Program and will be billed at full charges, unless other arrangements are made at the time of service.

Accept

By initialing below, I (on behalf of myself as the patient, or as the legally financial responsible person) am agreeing to pay WellStar's discounted cash price for the services provided by WellStar.

I agree NOT to file a bill for these services with a commercial health insurance or government payer and am agreeing that WellStar also will NOT file a claim for these services with a commercial health insurance or government payer now or at any time in the future for this service.

Please Initial All Lines Below:

_____ (initials) I **choose** to use the Self Pay Program for eligible exams.

_____ (initials) I understand that I may elect to have some exams billed through the Self Pay Program and others to my health insurance company.

_____ (initials) I understand this decision cannot be reversed at a later date.

Decline

By initialing below, I (on behalf of myself as the patient, or as the legally financial responsible person) am choosing NOT to pay WellStar's discounted cash price for the services provided by WellStar.

Please Initial All Lines Below:

X EBM (initials) I **decline** to use the Self Pay Program and choose to bill my applicable health insurance, pay out of pocket, or apply for financial assistance.

X EBM (initials) I understand this decision cannot be reversed at a later date.

X Eugene Bill Maurice

Rev. 8/2012
HIM Approved 8/2012

IV. FINANCIAL AGREEMENT AND ASSIGNMENT OF BENEFITS:

- In consideration of the amount of medical expenses to be incurred, Patient hereby assigns all hospital and medical provider benefits payable (i.e. "Payor": Insurance Coverage, ERISA, Medicare, Medicaid, Social Security, etc.) and related rights existing under the Payor coverage that Patient has identified or will identify in connection with the services provided directly to WellStar. This is a direct assignment of Patient's rights and benefits under this policy.
- Patient understands that any payment received by WellStar for this period may be applied to any unpaid bill(s) for which Patient is liable.
- Patient understands that different Payors have different requirements for payment including, but not limited to, pre-certifications, authorizations within 24 hours of admission or that the services be medically necessary. Patient understands that verification of benefits from Patient's Insurance Company is not a guarantee that services are covered or will be paid by the Insurance Company.
- **Patient understands that it is Patient's obligation to know his/her Payor's requirements and ensure that they have been fulfilled.**
- Patient understands and agrees that Patient is financially responsible for any charges not covered by this assignment and agrees to pay WellStar the full balance that is not reimbursed by Patient's medical provider benefits (certain regulations and exceptions apply for Medicare and Medicaid Beneficiaries)
- If Patient's insurance company provides payment for covered services in a check made payable to Patient, Patient agrees that these funds are owed to WellStar. Patient further agrees to pay the hospital in full for any funds received in this manner.
- Patient authorizes and designates WellStar or any of its affiliated business organizations ("Affiliates") to be Patient's Authorized Personal Representative, which allows WellStar or its Affiliates to: (1) submit any and all appeals, including arbitration, when Patient's benefits company denies benefits to which Patient is entitled, (2) submit any and all requests for benefit information from Patient's benefits company, and (3) initiate formal complaints to any applicable State or Federal agency or court that has jurisdiction over Patient's benefits. Patient further agrees to execute any and all additional documents or forms that may be required by Patient's benefits company to effectuate such designation as Patient's Authorized Personal Representative. This assignment and designation will remain in effect until revoked by Patient in writing.
- **Patient understands and agrees that it is Patient's responsibility to contact Customer Service at 770-792-5400 within 12 hours to provide any insurance information not provided today.**

V. ASSIGNMENT OF MEDICARE AND MEDICAID BENEFITS, PATIENT CERTIFICATION AND PAYMENT REQUEST: Patient hereby certifies that the information given by Patient in applying for payment under title XVII and XIX of the Social Security Act is correct. Patient requests that payment of the authorized benefits be made and assigned the benefits payable for services rendered during this admission to the physician or organization furnishing the services. The undersigned, if not the patient, is also responsible for and agrees to pay charges not covered by this assignment, including any Medicare deductibles.

VI. FINANCIAL ADVISOR: Patient understands that WellStar will charge Patient its standard chargemaster rates for all services that are not covered by a Payor or that are self-pay. Patient understands that Patient may qualify for financial assistance in connection with Patient's payment obligations and that WellStar offers various payment programs and provides Financial Counselors to discuss these options. (Please contact WellStar at 770-792-5400 for more information on charity care policies, uncompensated services, assistance through various state and federal programs, or if Patient wants information on payment plan options that may be available).

VII. RELEASE OF INFORMATION: Patient hereby acknowledges and gives express permission for WellStar to release all of Patient's protected health information, including privileged information (i.e. mental health, alcohol/drug abuse or HIV/AIDS), for payment purposes. Patient consents to the videotaping, photographing, televising or publishing related to this treatment/operation/procedure, which shall only be done for treatment, payment or healthcare operation purposes or as otherwise permitted by law. This release will remain in effect until revoked by Patient in writing.

VIII. PERSONAL VALUABLES: WellStar shall not be liable for the loss or damage of any personal belongings including, but not limited to, money, jewelry, hearing aids, or dentures, unless placed within a WellStar safe.

GENERAL CONSENT TO TREAT & FINANCIAL RESPONSIBILITY STATEMENT

IMPORTANT: PLEASE READ THIS DOCUMENT AND SIGN. Mark out and initial any Procedure on this Form for which you do not consent.

Patient, or the undersigned representative acting on behalf of Patient (as used in this Form, the "Patient" includes a representative signing or acting on behalf of Patient), agrees and consents as follows:

I. CONSENT TO TREATMENT:

- Patient hereby consents to medical or hospital care encompassing diagnostic procedures and medical treatments including but not limited to: examinations, x-rays, laboratory procedures, medications, infusions, transfusions of blood and blood products, anesthesia, surgical procedures, radiation therapy, and other services which Patient may require, and as may be ordered by physicians responsible for such medical or hospital care.
- Patient further consents to treatment by authorized employees or agents of WellStar Health System ("WellStar") assigned to Patient's care. Patient understands the practice of medicine is not an exact science and acknowledges that no guarantees have been made as to the results of treatments, examinations or medical care at WellStar.
- Patient acknowledges that Patient can ask questions about Patient's medical care. Patient understands there are some independent medical professionals and their employees on the medical staff of WellStar providing medical care who are NOT employees or agents of WellStar, including but not limited to, Emergency Department physicians, radiologists, and surgeons. Patient further understands that services provided by independent medical professionals, exercising independent medical judgment, with staff privileges at a WellStar facility in no way creates any type of employment, partnership, joint venture, franchise, or other relationship with a WellStar facility other than as independent contractor. Patient acknowledges that Patient has the opportunity to question any provider of medical services as to his or her affiliation with the WellStar facility.
- Patient certifies that any personal information provided is correct and accurate.
- Patient understands that WellStar's mission includes training physicians and other medical personnel and conducting medical research. Patient acknowledges that students may participate in Patient's care. If Patient is asked to participate in a research study, Patient may refuse to participate and such refusal will not affect or compromise Patient's access to medical services.

II. EXPLANATION OF RISKS AND TREATMENT ALTERNATIVES:

- As part of Patient's consent to treatment, Patient consents to healthcare professionals performing Procedures deemed reasonably necessary or desirable in the exercise of the healthcare professional's professional judgment, including those Procedures that may be unforeseen or not known to be needed at the time this consent is obtained. Patient acknowledges that Patient has been informed in general terms of the nature and purpose of the Procedures, the material risks of the Procedures, and practical alternatives to the Procedures. The Procedures may include the following:
  - Needle Sticks: including shots, injections, peripheral intravenous catheter insertions, or intravenous injections (IV's). Material risks include, but are not limited to: nerve damage, infection, infiltration (which is fluid leakage into surrounding tissue), disfiguring scarring, loss of limb function, paralysis or partial paralysis or death. Alternatives (if available) include: oral, rectal, nasal, or topical medications (each of which may be less effective) or refusal of treatment.
  - Physical tests, assessments and treatments: including vital signs, internal body examinations, wound cleansing, wound dressing, surgical debridement, range of motion checks, and other similar procedures. Material risks include, but are not limited to: allergic reactions, infection, severe loss of blood, muscular-skeletal or internal injuries, nerve damage, loss of limb function, paralysis or partial paralysis, disfiguring scarring, worsening of the condition and death. Apart from using modified Procedures and/or refusal of treatment, no practical alternatives exist.
  - Administration of Medications: including oral, rectal, topical or through Patient's eye, ear or nose. Material risks include, but are not limited to: perforation, puncture, infection, allergic reaction, brain damage or death. Apart from varying the method of administration and/or refusal of treatment, no practical alternatives exist.
  - Drawing Blood, Bodily Fluids, or Tissue Samples: including laboratory testing and analysis. Material risks include, but are not limited to: paralysis, or partial paralysis, nerve damage, infection, bleeding and loss of limb function. Apart from long-term observation and/or refusal of treatment, no practical alternatives exist.
  - Insertion of internal tubes: including bladder catheterizations, nasogastric tubes, rectal tubes, drainage tubes, enemas, etc. Material risks include, but are not limited to: internal injuries, bleeding, infection, allergic reaction, loss of bladder control, and/or difficulty urinating after catheter removal. Apart from external collection devices or refusal of treatment, no practical alternatives exist.
  - X-rays and other radiological studies _____
  - Other: _____
- If Patient has any questions or concerns regarding these Procedures, Patient will ask Patient's attending provider to provide additional information. Patient also understands that Patient's attending or other provider may ask Patient to sign additional informed consent documents concerning these or other procedures.

III. CONTINUOUS CONSENTS: The above consents are applicable to all recurring in- or outpatient services, including **Maternity Patients** for prenatal course of treatment, and any repetitive services provided hereafter for the term of one (1) year from this date.

INITIALS (patient or patient representative): X EBM

Nuclear Stress Test

Bruce protocol

Patient: Maurice, Eugene G MR #: 561253820 Height: 67 in
DOB: 01/02/1949 (65yrs) Study Date: 04/22/2014 Weight: 225 lb
Acct #: 40000026329 Gender: M
Referring physician: Abdul Sheikh, MD
Ordering physician: Abdul Sheikh, MD
Interpreting physician: Alan Cheng, MD
Nuclear tech: Jeremy Smith CNMT

Clinical indication: Coronary atherosclerosis of unspecified type of vessel native or graft (414.00).

Impressions: Positive: risk/extent of ischemia is low.
Summary:

1. Procedure narrative: The image quality was good. Rotating projection images reveal diaphragmatic attenuation.
2. Stress ECG conclusions: The stress ECG is non-diagnostic. There are resting inferolateral downsloping ST depression and T wave inversions that are highly exagerrated with stress.
3. Myocardial perfusion imaging: There are 2 perfusion defects:

   1) Small, partially reversible, inferior and inferolateral defect of mild severity. There is some diaphramatic artifact here.
   2) Small basal anterior reversible defect of mild severity.
4. Gated SPECT: The calculated left ventricular ejection fraction is 47%. LV global systolic function is depressed.

Study data: Nuclear stress test. Study status: Routine. Consent: The risks, benefits, and alternatives to the procedure were explained to the patient and informed consent was obtained. Procedure: Initial setup. Intravenous access was obtained. Treadmill exercise testing was performed using the Bruce protocol. The patient exercised for 7 min 15 sec, to protocol stage 3, to a maximal work rate of 8.8 mets.

Cardiology Diag (Merge Interp) - Orders and Results (continued)

Baseline ECG: Q waves in I and aVL. ST/T wave changes in inferolateral leads. Normal sinus rhythm. There was an old myocardial infarction.
Stress results: Maximal heart rate during stress was 133 bpm (86% of maximal predicted heart rate). The maximal predicted heart rate was 155 bpm.The target heart rate was achieved. The heart rate response to stress is normal. There is a normal resting blood pressure with an appropriate response to stress. Mild stress-induced chest pain which resolved spontaneously.
Stress ECG: The stress ECG is non-diagnostic. There are resting inferolateral downsloping ST depression and T wave inversions that are highly exagerrated with stress.
Image properties: The image quality was good. Rotating projection images reveal diaphragmatic attenuation.
Myocardial perfusion imaging: Left ventricular size is normal. The TID ratio is 1.12. There are 2 perfusion defects:

1) Small, partially reversible, inferior and inferolateral defect of mild severity. There is some diaphramatic artifact here.
2) Small basal anterior reversible defect of mild severity.
Gated SPECT: The calculated left ventricular ejection fraction is 47%. LV global systolic function is depressed.
Stress protocol:

Stage	HR	BP (mmHg)	Comments
Supine	56	142/76 (98)	weakness, exhaustion, dyspnea, chest tightness at peak, myoview injected at 6min and 50sec into nuclear test
Standing	66	148/74 (99)	
1; 1.7 mph, 10degrees	95	142/78 (99)	
2; 2.5 mph, 12degrees	119	150/84 (106)	
3; 3.4 mph, 14degrees	133		
Immediate post stress	119	158/90 (113)	
Recovery; 2 min	99	144/88 (107)	
Recovery; 5 min	87	136/84 (101)	

Isotope administration:

- Rest Tc[99m]-tetrofosmin 10.9 mCi Prior to imaging
- Stress Tc[99m]-tetrofosmin 30.9 mCi Peak exercise stress

Resulted by: Paul C Guichard, DO
Performed: 05/20/15 0833 - 05/20/15 1127
Resulting lab: NM/ECHO STRESS

Nuclear Stress Test

Bruce protocol

Patient: Maurice, Eugene G MR #: 561253820 Height: 67 in
DOB: 01/02/1949 (66yrs) Study Date: 05/20/2015 Weight: 215 lb
Acct #: 40000335677 Gender: M
Referring physician: Jeffrey Tharp, MD
Sheikh, M
Ordering physician: Abdul Sheikh, MD
Interpreting physician: Paul Guichard, DO
Nuclear tech: Anitra Laury, CNMT

Clinical indication: Coronary atherosclerosis of native coronary artery (414.01).

Impressions: Positive: risk/extent of ischemia is high.
Summary:

1. Stress ECG conclusions: Duke scoring: exercise time of 8 min; maximum ST deviation of 1.5 mm; angina present but did not limit exercise; resulting score is -3.5. This score predicts a moderate risk of cardiac events.
2. Myocardial perfusion imaging: The TID ratio is 0.71. There is a large, moderate, partially reversible defect involving the basal and mid inferolateral wall(s).
3. Gated SPECT: The calculated left ventricular ejection fraction is 39%.

Study data: Nuclear stress test. Study status: Routine. Consent: The risks, benefits, and alternatives to the procedure were explained to the patient and informed consent was obtained. Procedure: Initial setup. Intravenous access was obtained. Treadmill exercise testing was performed using the Bruce protocol. The patient exercised for 8 min, to a maximal work rate of 10.1 mets.

Baseline ECG: There was an old myocardial infarction.
Stress results: Maximal heart rate during stress was 133 bpm (86% of maximal predicted heart rate). The maximal predicted heart rate was 154 bpm. There is

Cardiology Diag (Merge Interp) - Orders and Results (continued)

a normal resting blood pressure with a hypotensive response to stress.
Stress ECG: Duke scoring: exercise time of 8 min; maximum ST deviation of 1.5 mm; angina present but did not limit exercise; resulting score is -3.5. This score predicts a moderate risk of cardiac events.
Image properties: The image quality was good.
Myocardial perfusion imaging: The TID ratio is 0.71. There is a large, moderate, partially reversible defect involving the basal and mid inferolateral wall(s).
Gated SPECT: The calculated left ventricular ejection fraction is 39%.
Stress protocol:

Stage	HR	BP (mmHg)	ST/T	Rhythm	Symptoms	Comments
Supine	52					
Standing	62	132/60 (84)				
1; 1.7 mph, 10degrees	99	130/60 (83)	Anterior facilicular block	Ventricular bigeminy	2 out of 10 chest discomfort	
2; 2.5 mph, 12degrees	122	122/60 (81)	Inverted T-waves, 0.5-1 mm in V4, V5 and V6, II, III, aVL, aVF		Exhaustion	injected at 7:00
3; 3.4 mph, 14degrees	133					
Immediate post stress		126/70 (89)				
Recovery; 2 min	83	160/60 (93)				
Recovery; 5 min	60	150/70 (97)				

Isotope administration:

- Rest Tc[99m]-tetrofosmin 11 mCi Prior to imaging
- Stress Tc[99m]-tetrofosmin 31 mCi Peak exercise stress

Education

Title: Acute MI (MCB) (Not Started)

Topic: Pain Management (Not Started)

Point: Pain Medication Actions & Side Effects (Not Started)

Description:
Provide medication specific handouts when available.

Learner Progress: Not documented in this visit.

Point: Discuss Significance of VAS Scores (Not Started)

Description:
Refer to rating score of 0-10.

Learner Progress: Not documented in this visit.

Point: Discuss the Use of Pain Control Measures Before Pain Becomes Severe (MCB) (Not Started)

Description:
Take time to reiterate to patient that he/she should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time before pain becomes severe.

Patient Friendly Description:
Please inform staff that if you are having any difficulty breathing, pain or any discomfort at any time before the pain gets severe.

Please read over the items and let anyone on your Care Team know there are any questions about the material by marking below that "I HAVE QUESTIONS".

If once you have received the items and understand the material you can mark this as "I understand".
Learner Progress: Not documented in this visit.

Point: Non-Pharmacological Comfort Measures (Not Started)

Description:
Explain there are other ways of controlling pain than medication. The following are suggestions: position change, aromatherapy, deep slow breathing, distraction, quiet environment, imagery, heat therapy and/or cold therapy, laughter, massage, music, physical therapy, and touch therapy.

Learner Progress: Not documented in this visit.

Point: Patient Controlled Analgesia (Not Started)

Description:
Give the patient written information on Patient Controlled Analgesia. Explain how the pump works. Demonstrate pushing the button to give pain medicine to the patient. Caution the patient and other family/visitors that only the patient should press the PCA button for pain relief to decrease the chance of getting too much pain medicine.

Learner Progress: Not documented in this visit.

Point: Epidural Information (Not Started)

Description:
Give the patient written information on Epidural Analgesia. Explain why an epidural is used, how the epidural is placed and how the medication is given. If the epidural is PCA, demonstrate pushing the button to give pain medicine to the patient. Caution the patient and other family/visitors that only the patient should press the button for pain relief to decrease the chance of getting too much pain medicine.

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Topic: Signs and Symptoms - Acute MI (Not Started)

Point: Recognizing a Heart Attack (MCB) (Not Started)

Description:
Be sure patient reviews video on Coronary Artery Disease

Patient Friendly Description:
Please watch the video and/or read over the documented material and let anyone on your Care Team know if there are any questions by marking below.
If after watching the video and/or reading the material you have questions, please mark below I have question to let the staff know you have additional questions about a topic and they will be in to discuss your questions.

This will inform you of what to expect if you are diagnosed with a Heart Attack.
Learner Progress: Not documented in this visit.

Point: Risk Factors (Not Started)

Description:
Educate the patient/family/caregiver on coronary risk factors. Explain the controllable and non-controllable risk factors to Coronary Artery Disease. Review how to control coronary artery disease by altering the controllable risk factors. Some examples include: controlling blood pressure, reducing fat and cholesterol in the diet, stopping smoking, exercising regularly, maintaining ideal body weight, dealing with stress in an appropriate manner, drinking alcohol and coffee in moderation and controlling blood sugar levels (if applicable).

Learner Progress: Not documented in this visit.

Topic: Acute MI (MCB) (Not Started)

Point: Emergency Plan for Heart Attack Symptoms (Not Started)

Description:
Educate the patient/family/caregiver on how to get help immediately if heart attack symptoms occur. The patient should call 911 or the Emergency Medical Service number. Reinforce that the patient should not delay in obtaining help.

Learner Progress: Not documented in this visit.

Point: Home Activity (Not Started)

Description:
Educate the patient/family/caregiver on home activity guidelines that apply after having had a recent heart attack. Do things in moderation, rest about 30 minutes after eating, pace activities, allow for 7-8 hours of sleep at night, start with short walks 3-5 times a day. Consult with Cardiac Rehab staff, if applicable.

Learner Progress: Not documented in this visit.

Point: Limitations to Activity (Not Started)

Description:
Educate the patient/family/caregiver reagrding the following limitations to activity for 4-6 weeks after discharge. No lifting over 10 pounds (weight of a milk jug), no pushing or pulling motions with the arms (sweeping, vacuuming or raking), no driving (may be changed after talking to the doctor), no bathing in very hot or very cold water.

Learner Progress: Not documented in this visit.

Point: Sexual Activity (Not Started)

Description:
Educate the patient/family/caregiver on the following: Wait 4 weeks before resuming sexual activity. If the patient can climb 2 flights of steps, he/she can assume it is ok to resume sexual activity. Choose a comfortable position. Wait at least 1 hour after a meal. If sex brings on angina, stop and rest. Discuss chest pain during sex with the physician. Some medications can affect sexual desire. If this is the case, talk with the physician.

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Point: Influenza Vaccine (Not Started)

Description:
Educate the patient/family/caregiver on obatining a yearly influenza vaccine.

Learner Progress: Not documented in this visit.

Point: Smoking Cessation (Not Started)

Description:
Educate the patient/family/caregiver on smoking cessation and smoking cessation programs offered in the community. Explain effects smoking and second hand smoke have on the body. Encourage the patient to ask people that smoke around him/her to smoke outside or in another room. Refer patient to Cardiopulmonary Rehabilitation, if applicable.

Learner Progress: Not documented in this visit.

Diagnosis (Indication for Monitoring)
R00.2: Palpitations

Enrollment Info
Period (21 Days)
05/11/2017 - 05/31/2017

Event Counts

Critical: 0	**Total: 5**
Serious: 1	**Manual: 2**
Stable: 4	**Auto Trigger: 3**

Summarized Findings

Agree with findings: ☐

Interpreting Physician: _____
I have personally reviewed and interpreted this report.

Summary:
The patient's monitoring period was 05/11/2017 - 05/31/2017. Baseline sample showed Sinus Rhythm w/PACs with a heart rate of 61.6 bpm. There were 0 critical, 1 serious, and 4 stable events that occurred. The report analysis of the critical, serious, stable and manually triggered events are listed below.

Automatically Detected Events:
1 Serious: Sinus Rhythm, Atrial Flutter with Variable Conduction
1 Stable: Sinus Rhythm w/PACs
1 Stable: Atrial Fibrillation RVR Sustained

Manually Detected Events:
1 Stable: Atrial Fibrillation RVR Sustained w/PVCs (1)
• Irregular Heartbeat
1 Stable: Sinus Rhythm w/PVCs (1)/PACs/Artifact/Lead Loss
• No Symptom or Accidental Push

End of summarized findings.

Patient Education

Education

Title: General Patient Education (MCB) (Not Started)

Topic: Psycho/Social/Spiritual Support (Not Started)

Point: Coping Mechanisms (Not Started)

Description:
Help patient identify healthy coping mechanisms. Refer to Social Service, Case Management, or Spiritual Care, if needed.

Learner Progress: Not documented in this visit.

Point: Support Systems (Not Started)

Description:
Help patient identify available support systems. Refer to Social Service, Case Management, or Spiritual Care, if needed.

Learner Progress: Not documented in this visit.

Point: Spiritual/Emotional Needs (Not Started)

Description:
Offer resources to meet spiritual/emotional needs. Refer to Spiritual Care, if needed.

Learner Progress: Not documented in this visit.

Point: Anxiety Reduction (Not Started)

Description:
Explain the definition of anxiety, signs and symptoms, and examples of ways to reduce anxiety. Inform patient that Spiritual Care and Social Services are available.

Learner Progress: Not documented in this visit.

Topic: Pain Management (MCB) (Not Started)

Point: Encourage Patient to Monitor Own Pain (Not Started)

Description:
Provide patient with information on the Pain Rating Scale. Explain the rating scale of 0 to 10.

Learner Progress: Not documented in this visit.

Point: Discuss Significance of VAS Scores (Not Started)

Description:
Refer to rating score of 0-10.

Learner Progress: Not documented in this visit.

Point: Discuss the Use of Pain Control Measures Before Pain Becomes Severe (MCB) (Not Started)

Description:
Take time to reiterate to patient that he/she should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time before pain becomes severe.

Patient Education (continued)

Education (continued)

Patient Friendly Description:
Please inform staff that if you are having any difficulty breathing, pain or any discomfort at any time before the pain gets severe.

Please read over the items and let anyone on your Care Team know there are any questions about the material by marking below that "I HAVE QUESTIONS".

If once you have received the items and understand the material you can mark this as "I understand".
Learner Progress: Not documented in this visit.

Topic: Prevention (MCB) (Not Started)

Point: When to Call the Doctor (Not Started)

Description:
Educate patient/family/caregiver on when to call the doctor.

Learner Progress: Not documented in this visit.

Point: Protect Others from Infection (Not Started)

Description:
Educate patient/family/caregiver on respiratory hygiene and cough etiquette. To protect from further infection and to protect others from getting an infection, patient should cover nose and mouth with tissues when coughing. Encourage patient to place used tissues in a plastic bag that will not allow secretions to soak through. Patient should always wash his/her hands after using or handling used tissues.

Learner Progress: Not documented in this visit.

Point: Protect Yourself from Further Infection (MCB) (Not Started)

Description:
Educate patient/family/caregiver that because patient is in a weakened condition he/she needs to avoid others who are sick as to not acquire another illness. Family/caregiver should wear gloves, gown and face shield/eye protection.

Patient Friendly Description:
Information on Flu.
Information on Pneumonia and Pneumococcal Vaccination.
Learner Progress: Not documented in this visit.

Point: Falls education, precautions, prevention at home and in the hospital (MCB) (Not Started)

Description:
Patient was given information on preventing falls both while in the hospital and when they are at home.

Patient Friendly Description:
Things to help you prevent falls while you are in the hospital and when you are home.
Learner Progress: Not documented in this visit.

Point: Demonstrate Handwashing (MCB) (Not Started)

Description:
Educate patient/family/caregiver on how to perform proper hand hygiene. Explain that hand washing is the single most important step in preventing the spread of germs. Have the patient/family/caregiver demonstrate proper hand washing technique using soap, water, friction, clean nails under running water, and dry hands on clean towel without touching dirty surfaces.

Patient Friendly Description:
This will explain the importance of washing and cleansing your hands to prevent infection.
Learner Progress: Not documented in this visit.

Topic: Self Care (MCB) (Not Started)

Point: General Self Care (Not Started)

Patient Education (continued)

Education (continued)

Description:
Instruct patient on self care needs. These may include: hygiene, how to take a blood pressure, how to change a dressing, etc.

Learner Progress: Not documented in this visit.

Point: Demonstrate Handwashing (MCB) (Not Started)

Description:
Educate patient/family/caregiver on how to perform proper hand hygiene. Explain that hand washing is the single most important step in preventing the spread of germs. Have the patient/family/caregiver demonstrate proper hand washing technique using soap, water, friction, clean nails under running water, and dry hands on clean towel without touching dirty surfaces.

Patient Friendly Description:
This will explain the importance of washing and cleansing your hands to prevent infection.

Learner Progress: Not documented in this visit.

History

Chief Complaint
oral abscess

History provided by: patient.
Nursing note reviewed and I agree with the documentation of the past medical, past surgical, social, and family histories.Vitals reviewed.
Oral Swelling
This is a new problem. The current episode started more than 2 days ago. The onset was gradual. The incident occurred at home. The problem occurs constantly. The problem has been gradually worsening. Pertinent negatives include no shortness of breath. The symptoms are aggravated by eating. He has tried nothing for the

ED Course

Procedures

No consult orders placed this encounter

11:12 AM
- appears there is a periapical abscess secondary to dental decay + subQ hemorrhage related to eliquis rx.
- I do no think pt is best served by I&D at this time - I am not certain there is a drainable abscess at this time - the fluctuant area is probably hematoma
- will rx with abx > monitor symptoms > f/u oral surgery
- pt to return if worse / no improvement

Point: Anxiety Reduction (Resolved)

Description:
Explain the definition of anxiety, signs and symptoms, and examples of ways to reduce anxiety. Inform patient that Spiritual Care and Social Services are available.

Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Topic: Prevention (MCB) (Resolved)

Point: When to Call the Doctor (Resolved)

Description:
Educate patient/family/caregiver on when to call the doctor.

Learner Progress: Not documented in this visit.

Point: Protect Others from Infection (Resolved)

Description:
Educate patient/family/caregiver on respiratory hygiene and cough etiquette. To protect from further infection and to protect others from getting an infection, patient should cover nose and mouth with tissues when coughing. Encourage patient to place used tissues in a plastic bag that will not allow secretions to soak through. Patient should always wash his/her hands after using or handling used tissues.

Learner Progress: Not documented in this visit.

Point: Protect Yourself from Further Infection (MCB) (Resolved)

Description:
Educate patient/family/caregiver that because patient is in a weakened condition he/she needs to avoid others who are sick as to not acquire another illness. Family/caregiver should wear gloves, gown and face shield/eye protection.

Patient Friendly Description:
Information on Flu.
Information on Pneumonia and Pneumococcal Vaccination.
Learner Progress: Not documented in this visit.

Point: Demonstrate Handwashing (MCB) (Resolved)

Description:
Educate patient/family/caregiver on how to perform proper hand hygiene. Explain that hand washing is the single most important step in preventing the spread of germs. Have the patient/family/caregiver demonstrate proper hand washing technique using soap, water, friction, clean nails under running water, and dry hands on clean towel without touching dirty surfaces.

Patient Friendly Description:
This will explain the importance of washing and cleansing your hands to prevent infection.
Learner Progress: Not documented in this visit.

Topic: Self Care (MCB) (Resolved)

Point: General Self Care (Resolved)

Description:
Instruct patient on self care needs. These may include: hygiene, how to take a blood pressure, how to change a dressing, etc.

Learner Progress: Not documented in this visit.

Point: Demonstrate Handwashing (MCB) (Resolved)

Description:
Educate patient/family/caregiver on how to perform proper hand hygiene. Explain that hand washing is the single most important step in preventing the spread of germs. Have the patient/family/caregiver demonstrate proper hand washing technique using soap, water, friction, clean nails under running water, and dry hands on clean towel without touching dirty surfaces.

Patient Friendly Description:
This will explain the importance of washing and cleansing your hands to prevent infection.
Learner Progress: Not documented in this visit.

Topic: Pain Management (Resolved)

Point: Pain Medication Actions & Side Effects (Resolved)

Patient Education (continued)

Education (continued)

Description:
Provide medication specific handouts when available.

Learner Progress: Not documented in this visit.

Point: Discuss Significance of VAS Scores (Resolved)

Description:
Refer to rating score of 0-10.

Learner Progress: Not documented in this visit.

Point: Discuss the Use of Pain Control Measures Before Pain Becomes Severe (MCB) (Resolved)

Description:
Take time to reiterate to patient that he/she should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time before pain becomes severe.

Patient Friendly Description:
Please inform staff that if you are having any difficulty breathing, pain or any discomfort at any time before the pain gets severe.

Please read over the items and let anyone on your Care Team know there are any questions about the material by marking below that "I HAVE QUESTIONS".

If once you have received the items and understand the material you can mark this as "I understand".
Learner Progress: Not documented in this visit.

Point: Non-Pharmacological Comfort Measures (Resolved)

Description:
Explain there are other ways of controlling pain than medication. The following are suggestions: position change, aromatherapy, deep slow breathing, distraction, quiet environment, imagery, heat therapy and/or cold therapy, laughter, massage, music, physical therapy, and touch therapy.

Learner Progress: Not documented in this visit.

Point: Patient Controlled Analgesia (Resolved)

Description:
Give the patient written information on Patient Controlled Analgesia. Explain how the pump works. Demonstrate pushing the button to give pain medicine to the patient. Caution the patient and other family/visitors that only the patient should press the PCA button for pain relief to decrease the chance of getting too much pain medicine.

Learner Progress: Not documented in this visit.

Point: Epidural Information (Resolved)

Description:
Give the patient written information on Epidural Analgesia. Explain why an epidural is used, how the epidural is placed and how the medication is given. If the epidural is PCA, demonstrate pushing the button to give pain medicine to the patient. Caution the patient and other family/visitors that only the patient should press the button for pain relief to decrease the chance of getting too much pain medicine.

Learner Progress: Not documented in this visit.

Topic: Signs and Symptoms - Acute MI (Resolved)

Point: Recognizing a Heart Attack (MCB) (Resolved)

Description:
Be sure patient reviews video on Coronary Artery Disease

Patient Friendly Description:
Please watch the video and/or read over the documented material and let anyone on your Care Team know if there are any questions by marking below.

Patient Education (continued)

Education (continued)

If after watching the video and/or reading the material you have questions, please mark below I have question to let the staff know you have additional questions about a topic and they will be in to discuss your questions.

This will inform you of what to expect if you are diagnosed with a Heart Attack.
Learner Progress: Not documented in this visit.

Point: Risk Factors (Resolved)

Description:
Educate the patient/family/caregiver on coronary risk factors. Explain the controllable and non-controllable risk factors to Coronary Artery Disease. Review how to control coronary artery disease by altering the controllable risk factors. Some examples include: controlling blood pressure, reducing fat and cholesterol in the diet, stopping smoking, exercising regularly, maintaining ideal body weight, dealing with stress in an appropriate manner, drinking alcohol and coffee in moderation and controlling blood sugar levels (if applicable).

Learner Progress: Not documented in this visit.

Topic: Acute MI (MCB) (Resolved)

Point: Emergency Plan for Heart Attack Symptoms (Resolved)

Description:
Educate the patient/family/caregiver on how to get help immediately if heart attack symptoms occur. The patient should call 911 or the Emergency Medical Service number. Reinforce that the patient should not delay in obtaining help.

Learner Progress: Not documented in this visit.

Point: Home Activity (Resolved)

Description:
Educate the patient/family/caregiver on home activity guidelines that apply after having had a recent heart attack. Do things in moderation, rest about 30 minutes after eating, pace activities, allow for 7-8 hours of sleep at night, start with short walks 3-5 times a day. Consult with Cardiac Rehab staff, if applicable.

Learner Progress: Not documented in this visit.

Point: Limitations to Activity (Resolved)

Description:
Educate the patient/family/caregiver reagrding the following limitations to activity for 4-6 weeks after discharge. No lifting over 10 pounds (weight of a milk jug), no pushing or pulling motions with the arms (sweeping, vacuuming or raking), no driving (may be changed after talking to the doctor), no bathing in very hot or very cold water.

Learner Progress: Not documented in this visit.

Point: Sexual Activity (Resolved)

Description:
Educate the patient/family/caregiver on the following: Wait 4 weeks before resuming sexual activity. If the patient can climb 2 flights of steps, he/she can assume it is ok to resume sexual activity. Choose a comfortable position. Wait at least 1 hour after a meal. If sex brings on angina, stop and rest. Discuss chest pain during sex with the physician. Some medications can affect sexual desire. If this is the case, talk with the physician.

Learner Progress: Not documented in this visit.

Point: Influenza Vaccine (Resolved)

Description:
Educate the patient/family/caregiver on obatining a yearly influenza vaccine.

Learner Progress: Not documented in this visit.

Point: Smoking Cessation (Resolved)

Patient Education (continued)

Education (continued)

Description:
Educate the patient/family/caregiver on smoking cessation and smoking cessation programs offered in the community. Explain effects smoking and second hand smoke have on the body. Encourage the patient to ask people that smoke around him/her to smoke outside or in another room. Refer patient to Cardiopulmonary Rehabilitation, if applicable.

Learner Progress: Not documented in this visit.

Title: WS Cardiac Rehab (Resolved)

Topic: PCI (Resolved)

Point: Books/Educational Material (Resolved)

Description:
Current standardized written information provided specific to diagnosis, recovery, disease progression and prevention.

Learner Progress: Not documented in this visit.

Point: Exercise (Resolved)

Description:
Information regarding the benefits of exercise provided. Exercise guidelines provided for initial recovery from acute heart event and long term goals of exercise.

Learner Progress: Not documented in this visit.

Point: Medications (Resolved)

Description:
Medication compliance encouraged. Organization tools discussed and medication information and resources provided.

Learner Progress: Not documented in this visit.

Point: Risk Factors (Resolved)

Description:
Written and verbal information provided on modifiable and non-modifiable factors associated with increased risk of heart disease and stroke.

Learner Progress: Not documented in this visit.

Point: Activity guidelines (Resolved)

Description:
Appropriate activity and/or limitations for diagnosis specific recovery provided.

Learner Progress: Not documented in this visit.

Point: Signs/symptoms/activate EMS (Resolved)

Description:
Information provided on the signs and symptoms which commonly occur with a heart attack or stroke. Emphasis placed on appropriate activation of EMS with recognition of signs and symptoms.

Learner Progress: Not documented in this visit.

Point: Cardiac Rehab participation/location options (Resolved)

Description:
Cardiac rehabilitation benefits highlighted and participation encouraged.

Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Point: Cardiac Diet/low fat/low sodium (Resolved)

Description:
American Heart Association guidelines provided for a reduced fat and reduced sodium diet.

Learner Progress: Not documented in this visit.

Point: Endocarditis education/card (Resolved)

Description:
Written and verbal instruction provided on endocarditis prevention. Temporary Valve card provided.

Learner Progress: Not documented in this visit.

Point: Outpatient education classes/Heart Smart/Device Advice/Heart of the Matter (Resolved)

Description:
Description and registration details of outpatient education classes provided. Participation encouraged.

Learner Progress: Not documented in this visit.

Title: Cardiac Surgery (Resolved)

Topic: PCI (Resolved)

Additional Points For This Title

Point: ACTIVITY (Resolved)

Learner Progress: Not documented in this visit.

Point: SIGNS AND SYMPTOMS/ACTIVATE EMS (Resolved)

Learner Progress: Not documented in this visit.

Point: BOOKS/EDUCATION MATERIAL (Resolved)

Learner Progress: Not documented in this visit.

Point: CARDIAC REHAB (Resolved)

Learner Progress: Not documented in this visit.

Point: DIET (Resolved)

Learner Progress: Not documented in this visit.

Point: EXERCISE (Resolved)

Learner Progress: Not documented in this visit.

Point: Medications (Resolved)

Learner Progress: Not documented in this visit.

Point: POST OP CARE (Resolved)

Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Point: RISK FACTORS (Resolved)

Learner Progress: Not documented in this visit.

Title: General Patient Education (MCB) (Not Started)

Topic: Psycho/Social/Spiritual Support (Not Started)

Point: Coping Mechanisms (Not Started)

Description:
Help patient identify healthy coping mechanisms. Refer to Social Service, Case Management, or Spiritual Care, if needed.

Learner Progress: Not documented in this visit.

Point: Support Systems (Not Started)

Description:
Help patient identify available support systems. Refer to Social Service, Case Management, or Spiritual Care, if needed.

Learner Progress: Not documented in this visit.

Point: Spiritual/Emotional Needs (Not Started)

Description:
Offer resources to meet spiritual/emotional needs. Refer to Spiritual Care, if needed.

Learner Progress: Not documented in this visit.

Point: Anxiety Reduction (Not Started)

Description:
Explain the definition of anxiety, signs and symptoms, and examples of ways to reduce anxiety. Inform patient that Spiritual Care and Social Services are available.

Learner Progress: Not documented in this visit.

Topic: Pain Management (MCB) (Not Started)

Point: Encourage Patient to Monitor Own Pain (Not Started)

Description:
Provide patient with information on the Pain Rating Scale. Explain the rating scale of 0 to 10.

Learner Progress: Not documented in this visit.

Point: Discuss Significance of VAS Scores (Not Started)

Description:
Refer to rating score of 0-10.

Learner Progress: Not documented in this visit.

Point: Discuss the Use of Pain Control Measures Before Pain Becomes Severe (MCB) (Not Started)

Description:
Take time to reiterate to patient that he/she should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time before pain becomes severe.

Patient Friendly Description:
Please inform staff that if you are having any difficulty breathing, pain or any discomfort at any time before the pain gets severe.

Patient Education (continued)

Education (continued)

Please read over the items and let anyone on your Care Team know there are any questions about the material by marking below that "I HAVE QUESTIONS".

If once you have received the items and understand the material you can mark this as "I understand".
Learner Progress: Not documented in this visit.

Topic: Prevention (MCB) (Not Started)

Point: When to Call the Doctor (Not Started)

Description:
Educate patient/family/caregiver on when to call the doctor.

Learner Progress: Not documented in this visit.

Point: Protect Others from Infection (Not Started)

Description:
Educate patient/family/caregiver on respiratory hygiene and cough etiquette. To protect from further infection and to protect others from getting an infection, patient should cover nose and mouth with tissues when coughing. Encourage patient to place used tissues in a plastic bag that will not allow secretions to soak through. Patient should always wash his/her hands after using or handling used tissues.

Learner Progress: Not documented in this visit.

Point: Protect Yourself from Further Infection (MCB) (Not Started)

Description:
Educate patient/family/caregiver that because patient is in a weakened condition he/she needs to avoid others who are sick as to not acquire another illness. Family/caregiver should wear gloves, gown and face shield/eye protection.

Patient Friendly Description:
Information on Flu.
Information on Pneumonia and Pneumococcal Vaccination.
Learner Progress: Not documented in this visit.

Point: Falls education, precautions, prevention at home and in the hospital (MCB) (Not Started)

Description:
Patient was given information on preventing falls both while in the hospital and when they are at home.

Patient Friendly Description:
Things to help you prevent falls while you are in the hospital and when you are home.
Learner Progress: Not documented in this visit.

Point: Demonstrate Handwashing (MCB) (Not Started)

Description:
Educate patient/family/caregiver on how to perform proper hand hygiene. Explain that hand washing is the single most important step in preventing the spread of germs. Have the patient/family/caregiver demonstrate proper hand washing technique using soap, water, friction, clean nails under running water, and dry hands on clean towel without touching dirty surfaces.

Patient Friendly Description:
This will explain the importance of washing and cleansing your hands to prevent infection.
Learner Progress: Not documented in this visit.

Topic: Self Care (MCB) (Not Started)

Point: General Self Care (Not Started)

Description:
Instruct patient on self care needs. These may include: hygiene, how to take a blood pressure, how to change a dressing, etc.

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Point: Demonstrate Handwashing (MCB) (Not Started)

Description:
Educate patient/family/caregiver on how to perform proper hand hygiene. Explain that hand washing is the single most important step in preventing the spread of germs. Have the patient/family/caregiver demonstrate proper hand washing technique using soap, water, friction, clean nails under running water, and dry hands on clean towel without touching dirty surfaces.

Patient Friendly Description:
This will explain the importance of washing and cleansing your hands to prevent infection.

Learner Progress: Not documented in this visit.

Topic: Medications (MCB) (Resolved)

Point: Anticoagulant Therapy (Resolved)

Description:
1-Educate patient/family/caregiver on anticoagulant being prescribed and provide educational materials.
2-Explain action of medication, reason for taking, and importance of adherence to correct medication dose and schedule,
3-Explain potential for adverse drug reactions, signs of allergic reaction, potential for drug-drug and drug-food interactions, and when physician should be called.
4-Reinforce that the medication should be taken exactly as the physician has prescribed.
5-Explain importance of maintaining follow-up appointments and adhering to laboratory testing as prescribed by physician.
6-Explain that the dose of the anticoagulant being prescribed may change depending on the results of the laboratory testing.

Learner Progress: Not documented in this visit.

Point: Insulin (MCB) (Resolved)

Description:
Educate patient/family/caregiver on the insulin prescribed. Explain how insulin works in the body. Explain the action of insulin, reason for taking, side effects, signs of allergic reaction and when physician should be called. Reinforce that insulin should be taken exactly as the physician has prescribed. Explain the proper storage of insulin, that extreme temperatures can damage insulin and never take insulin that has expired. Explain that the patient's primary care physician may change the dosage depending on the results of blood glucose tests and/or A1C level.

Patient Friendly Description:
This will inform you of why you are prescribed insulin if you have Diabetes Type II.

Learner Progress: Not documented in this visit.

Point: Hypoglycemic Agents (Resolved)

Description:
Educate patient/family/caregiver on the oral and/or injectable hypoglycemic(s) prescribed. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, as well as when the physician should be called. Reinforce that this medication(s) should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Non-Steroidal Anti-Inflammatory Drugs (Resolved)

Description:
Educate patient/family/caregiver on the NSAID prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Psychotropic Medications (Resolved)

Description:
Educate patient/family/caregiver on the Psychotropic medication prescribed. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Point: ACE Inhibitors (Resolved)

Description:
Educate patient/family/caregiver on the ACE Inhibitor prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Angiotensin II Receptor Blockers (Resolved)

Description:
Educate patient/family/caregiver on the Angiotensin II Receptor Blockers prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Beta Blockers (Resolved)

Description:
Educate patient/family/caregiver on the Beta Blocker prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Digoxin (Resolved)

Description:
Educate patient/family/caregiver on Digoxin and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed. The physician will order a blood test to monitor the concentration of the drug in the patient's blood. The dose of this medication may be changed according to the results of this test.

Learner Progress: Not documented in this visit.

Point: Diuretics (Resolved)

Description:
Educate patient/family/caregiver on the Diuretic prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Inotropes (Resolved)

Description:
Educate patient/family/caregiver on the Inotropes prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Vasodilators (Resolved)

Description:
Educate patient/family/caregiver on the Vasodilator prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Point: Antibiotics (Resolved)

Description:
Educate patient/family/caregiver on the Antibiotics prescribed. Explain how antibiotics works in the body. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Your Medication List

apixaban 5 mg tablet Commonly known as: ELIQUIS	Take 1 tablet (5 mg total) by mouth 2 (two) times a day
aspirin, buffered 81 mg Tab	Take 81 mg by mouth daily.
atorvastatin 80 MG tablet Commonly known as: LIPITOR	Take 1 tablet (80 mg total) by mouth nightly
* **blood sugar diagnostic** strip Commonly known as: glucose blood	cvs true test blood glucose strip; test blood sugar ac breakfast and then once more daily as needed..
* **blood sugar diagnostic** strip	True metrix - test blood sugar ac breakfast and then once more daily as needed.. Dx E11.9
carvedilol 12.5 MG tablet Commonly known as: COREG	Take 1 tablet (12.5 mg total) by mouth 2 (two) times a day with meals
chlorthalidone 50 MG tablet Commonly known as: HYGROTEN	Take 1 tablet (50 mg total) by mouth daily
cilostazol 100 MG tablet Commonly known as: PLETAL	Take 1 tablet (100 mg total) by mouth 2 (two) times a day
clindamycin 300 MG capsule Commonly known as: CLEOCIN	Take 1 capsule (300 mg total) by mouth 3 (three) times a day for 7 days
HYDROcodone-acetaminophen 5-325 mg per tablet Commonly known as: NORCO	Take 1 tablet by mouth every 6 (six) hours as needed for pain for up to 10 days
isosorbide mononitrate 30 MG 24 hr tablet Commonly known as: IMDUR	Take 2 tablets (60 mg total) by mouth 2 (two) times a day

Your Medication List (continued)

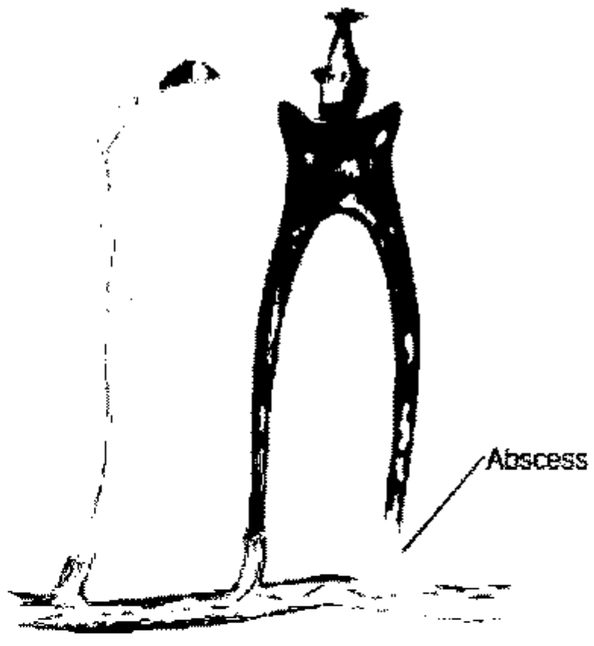
metFORMIN 500 MG tablet Commonly known as: GLUCOPHAGE	2 tablets in am and 1 tablet in pm
nitroglycerin 0.4 MG SL tablet Commonly known as: NITROSTAT	Place 1 tablet (0.4 mg total) under the tongue every 5 (five) minutes as needed for chest pain
ramipril 10 MG capsule Commonly known as: ALTACE	Take 1 capsule (10 mg total) by mouth 2 (two) times a day

*** This list has 2 medication(s) that are the same as other medications prescribed for you. Read the directions carefully, and ask your doctor or other care provider to review them with you.**

Attached Information

DENTAL ABSCESS (ENGLISH)

Dental Abscess



An abscess is a pocket of pus at the tip of a tooth root in your jaw bone. It is caused by an infection at the root of the tooth. It can cause pain and swelling of the gum, cheek, or jaw. Pain may spread from the tooth to your ear or the area of your jaw on the same side. If the abscess isn't treated, it appears as a bubble or swelling on the gum near the tooth. The pressure that builds in this swelling is the source of the pain. More serious infections cause your face to swell.

An abscess can be caused by a crack in the tooth, a cavity, a gum infection, or a combination of these. Once the pulp of the tooth is exposed, bacteria can spread down the roots to the tip. If the bacteria are not stopped, they can damage the bone and soft tissue, and an abscess can form.

Home care

Follow these guidelines when caring for yourself at home:

- Avoid hot and cold foods and drinks. Your tooth may be sensitive to changes in temperature. Don't chew on the side of the infected tooth.
- If your tooth is chipped or cracked, or if there is a large open cavity, put oil of cloves directly on the tooth to relieve pain. You can buy oil of cloves at drugstores. Some pharmacies carry an over-the-counter "toothache kit." This contains a paste that you can put on the exposed tooth to make it less sensitive.
- Put a cold pack on your jaw over the sore area to help reduce pain.
- You may use over-the-counter medicine to ease pain, unless another medicine was prescribed. If you have chronic liver or kidney disease, talk with your healthcare provider before using acetaminophen or ibuprofen. Also talk with your provider if you've had a stomach ulcer or GI bleeding.
- An antibiotic will be prescribed. Take it until finished, even if you are feeling better after a few days.

Follow-up care

Follow up with your dentist or an oral surgeon, or as advised. Once an infection occurs in a tooth, it will continue to be a problem until the infection is drained. This is done through surgery or a root canal. Or you may need to have your tooth pulled.

Call 911

Call 911 if any of these occur:

- Unusual drowsiness
- Headache or stiff neck
- Weakness or fainting
- Difficulty swallowing, breathing, or opening your mouth
- Swollen eyelids

When to seek medical advice

Call your healthcare provider right away if any of these occur:

- Your face becomes more swollen or red
- Pain gets worse or spreads to your neck
- Fever of 100.4° F (38.0° C) or higher, or as directed by your healthcare provider
- Pus drains from the tooth

Post-op Problem; Hematuria

ED Provider Notes - ED Notes (continued)

ED Provider Notes by Joni L Baumann, NP at 1/16/2018 9:22 PM (continued)

69 year old male presents with anuria since prostate biopsy this morning. States he has passed a couple bloody clots per urethra, but not urine. States he has intense suprapubic pain and feels urgency and "fullness." Requests catheterization.

History provided by: patient. No language interpreter was used.
Nursing note reviewed and I agree with the documentation of the past medical, past surgical, social, and family histories.Vitals reviewed.
This is a new problem. The current episode started 6 to 12 hours ago. The problem occurs every urination. The problem has not changed since onset.The quality of the pain is described as aching. Associated symptoms include hematuria and urgency. Pertinent negatives include no chills, no nausea, no vomiting and no flank pain. His past medical history is significant for urological procedure.

Past Medical History:

Diagnosis	Date
• CAD (coronary artery disease)	
• Coronary atherosclerosis of native coronary artery	
• Diabetes mellitus (HCC)	
• Essential hypertension, benign	
• Family history of ischemic heart disease	
• Hyperlipidemia	
• Hypertension	
• Infectious viral hepatitis *as teen/cannont recall what type*	
• Obesity	
• Other and unspecified hyperlipidemia	
• Other symptoms involving cardiovascular system	
• PVD (peripheral vascular disease) (HCC)	

Past Surgical History:

Procedure	Laterality	Date
• APPENDECTOMY		
• CAROTID ENDARTERECTOMY *x2*		
• COLONOSCOPY *as of 9/2014 has not had this*		
• CORONARY ARTERY BYPASS GRAFT *X6*		1992
• CORONARY STENT PLACEMENT *sheikh*		2014
• shingles		9/2015

Family History

	total) by mouth 2 (two) times a day
aspirin, buffered 81 mg Tab	Take 81 mg by mouth daily.
atorvastatin (LIPITOR) 80 MG tablet	Take 1 tablet (80 mg total) by mouth nightly
blood sugar diagnostic (GLUCOSE BLOOD) strip	cvs true test blood glucose strip; test blood sugar ac breakfast and then once more daily as needed..
blood sugar diagnostic strip	True metrix - test blood sugar ac breakfast and then once more daily as needed.. Dx E11.9
carvedilol (COREG) 12.5 MG tablet	Take 1 tablet (12.5 mg total) by mouth 2 (two) times a day with meals
chlorthalidone (HYGROTEN) 50 MG tablet	Take 1 tablet (50 mg total) by mouth daily
cilostazol (PLETAL) 100 MG tablet	Take 1 tablet (100 mg total) by mouth 2 (two) times a day
isosorbide mononitrate (IMDUR) 30 MG 24 hr tablet	Take 2 tablets (60 mg total) by mouth 2 (two) times a day
metFORMIN (GLUCOPHAGE) 500 MG tablet	2 tablets po in am and 2 in pm
nitroglycerin (NITROSTAT) 0.4 MG SL tablet	Place 1 tablet (0.4 mg total) under the tongue every 5 (five) minutes as needed for chest pain
ramipril (ALTACE) 10 MG capsule	Take 1 capsule (10 mg total) by mouth 2 (two) times a day

Review of Systems
Constitutional: Negative for chills and fever.
HENT: Negative for congestion, rhinorrhea and sore throat.
Eyes: Negative for visual disturbance.
Respiratory: Negative for apnea, cough, choking, chest tightness, shortness of breath, wheezing and stridor.
Cardiovascular: Negative for chest pain, palpitations and leg swelling.
Gastrointestinal: Positive for abdominal distention and abdominal pain. Negative for anal bleeding, blood in stool, constipation, diarrhea, nausea, rectal pain and vomiting.
Endocrine: Negative for polydipsia, polyphagia and polyuria.
Genitourinary: Positive for difficulty urinating, hematuria and urgency. Negative for flank pain, penile pain, penile swelling, scrotal swelling and testicular pain.
Musculoskeletal: Negative for back pain and neck pain.
Skin: Negative for rash.
Neurological: Negative for dizziness, tremors, seizures, syncope, light-headedness and headaches.
All other systems reviewed and are negative.

Physical Exam

Visit Vitals

BP	189/80
Pulse	72
Temp	97.4 °F (36.3 °C)
Resp	18
Ht	67" (1.702 m)
Wt	102.4 kg (225 lb 12.8 oz)
SpO2	98%
BMI	35.37 kg/m²

Physical Exam
Nursing note reviewed and I agree with the documentation of the past medical, past surgical, social, and family histories.Vitals reviewed.
Constitutional: He is oriented to person, place, and time. He appears well-developed and well-nourished. No distress.
HENT:
Head: Normocephalic and atraumatic.
Eyes: Conjunctivae and EOM are normal. Pupils are equal, round, and reactive to light. Right eye exhibits no discharge. Left eye exhibits no discharge. No scleral icterus.
Neck: Normal range of motion. Neck supple. No JVD present. No tracheal deviation present. No thyromegaly present.
Cardiovascular: Normal rate, regular rhythm and intact distal pulses. Exam reveals no gallop and no friction rub.
No murmur heard.
Pulses:
Dorsalis pedis pulses are 2+ on the right side, and 2+ on the left side.
Pulmonary/Chest: Effort normal and breath sounds normal. No stridor. No respiratory distress. He has no wheezes. He has no rales. He exhibits no tenderness.
Abdominal: Soft. Bowel sounds are normal. He exhibits distension. He exhibits no mass. There is tenderness. There is guarding. There is no rebound.
Genitourinary: Penis normal. No penile tenderness.
Musculoskeletal: Normal range of motion. He exhibits no edema, tenderness or deformity.
Neurological: He is alert and oriented to person, place, and time. No cranial nerve deficit. Coordination normal.
Skin: Skin is warm and dry. No rash noted. He is not diaphoretic. No erythema. No pallor.
Psychiatric: He has a normal mood and affect. His behavior is normal. Judgment and thought content normal.

Patient Education

Education

Title: Acute MI (MCB) (Resolved)

Topic: Psycho/Social/Spiritual Support (Resolved)

Point: Coping Mechanisms (Resolved)

Description:
Help patient identify healthy coping mechanisms. Refer to Social Service, Case Management, or Spiritual Care, if needed.

Learner Progress: Not documented in this visit.

Point: Support Systems (Resolved)

Description:
Help patient identify available support systems. Refer to Social Service, Case Management, or Spiritual Care, if needed.

Learner Progress: Not documented in this visit.

Point: Spiritual/Emotional Needs (Resolved)

Description:
Offer resources to meet spiritual/emotional needs. Refer to Spiritual Care, if needed.

Learner Progress: Not documented in this visit.

Point: Anxiety Reduction (Resolved)

Description:
Explain the definition of anxiety, signs and symptoms, and examples of ways to reduce anxiety. Inform patient that Spiritual Care and Social Services are available.

Learner Progress: Not documented in this visit.

Topic: Prevention (MCB) (Resolved)

Point: When to Call the Doctor (Resolved)

Description:
Educate patient/family/caregiver on when to call the doctor.

Learner Progress: Not documented in this visit.

Point: Protect Others from Infection (Resolved)

Description:
Educate patient/family/caregiver on respiratory hygiene and cough etiquette. To protect from further infection and to protect others from getting an infection, patient should cover nose and mouth with tissues when coughing. Encourage patient to place used tissues in a plastic bag that will not allow secretions to soak through. Patient should always wash his/her hands after using or handling used tissues.

Learner Progress: Not documented in this visit.

Point: Protect Yourself from Further Infection (MCB) (Resolved)

Description:
Educate patient/family/caregiver that because patient is in a weakened condition he/she needs to avoid others who are sick as to not acquire another illness. Family/caregiver should wear gloves, gown and face shield/eye protection.

Patient Education (continued)

Education (continued)

Patient Friendly Description:
Information on Flu.
Information on Pneumonia and Pneumococcal Vaccination.
Learner Not documented in this visit.
Progress:

Point: Demonstrate Handwashing (MCB) (Resolved)

Description:
Educate patient/family/caregiver on how to perform proper hand hygiene. Explain that hand washing is the single most important step in preventing the spread of germs. Have the patient/family/caregiver demonstrate proper hand washing technique using soap, water, friction, clean nails under running water, and dry hands on clean towel without touching dirty surfaces.

Patient Friendly Description:
This will explain the importance of washing and cleansing your hands to prevent infection.
Learner Not documented in this visit.
Progress:

Topic: Self Care (MCB) (Resolved)

Point: General Self Care (Resolved)

Description:
Instruct patient on self care needs. These may include: hygiene, how to take a blood pressure, how to change a dressing, etc.

Learner Not documented in this visit.
Progress:

Point: Demonstrate Handwashing (MCB) (Resolved)

Description:
Educate patient/family/caregiver on how to perform proper hand hygiene. Explain that hand washing is the single most important step in preventing the spread of germs. Have the patient/family/caregiver demonstrate proper hand washing technique using soap, water, friction, clean nails under running water, and dry hands on clean towel without touching dirty surfaces.

Patient Friendly Description:
This will explain the importance of washing and cleansing your hands to prevent infection.
Learner Not documented in this visit.
Progress:

Topic: Pain Management (Resolved)

Point: Pain Medication Actions & Side Effects (Resolved)

Description:
Provide medication specific handouts when available.

Learner Not documented in this visit.
Progress:

Point: Discuss Significance of VAS Scores (Resolved)

Description:
Refer to rating score of 0-10.

Learner Not documented in this visit.
Progress:

Point: Discuss the Use of Pain Control Measures Before Pain Becomes Severe (MCB) (Resolved)

Description:
Take time to reiterate to patient that he/she should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time before pain becomes severe.

Patient Friendly Description:
Please inform staff that if you are having any difficulty breathing, pain or any discomfort at any time before the pain gets severe.

Patient Education (continued)

Education (continued)

Please read over the items and let anyone on your Care Team know there are any questions about the material by marking below that "I HAVE QUESTIONS".

If once you have received the items and understand the material you can mark this as "I understand".
Learner Progress: Not documented in this visit.

Point: Non-Pharmacological Comfort Measures (Resolved)

Description:
Explain there are other ways of controlling pain than medication. The following are suggestions: position change, aromatherapy, deep slow breathing, distraction, quiet environment, imagery, heat therapy and/or cold therapy, laughter, massage, music, physical therapy, and touch therapy.

Learner Progress: Not documented in this visit.

Point: Patient Controlled Analgesia (Resolved)

Description:
Give the patient written information on Patient Controlled Analgesia. Explain how the pump works. Demonstrate pushing the button to give pain medicine to the patient. Caution the patient and other family/visitors that only the patient should press the PCA button for pain relief to decrease the chance of getting too much pain medicine.

Learner Progress: Not documented in this visit.

Point: Epidural Information (Resolved)

Description:
Give the patient written information on Epidural Analgesia. Explain why an epidural is used, how the epidural is placed and how the medication is given. If the epidural is PCA, demonstrate pushing the button to give pain medicine to the patient. Caution the patient and other family/visitors that only the patient should press the button for pain relief to decrease the chance of getting too much pain medicine.

Learner Progress: Not documented in this visit.

Topic: Signs and Symptoms - Acute MI (Resolved)

Point: Recognizing a Heart Attack (MCB) (Resolved)

Description:
Be sure patient reviews video on Coronary Artery Disease

Patient Friendly Description:
Please watch the video and/or read over the documented material and let anyone on your Care Team know if there are any questions by marking below.
If after watching the video and/or reading the material you have questions, please mark below I have question to let the staff know you have additional questions about a topic and they will be in to discuss your questions.

This will inform you of what to expect if you are diagnosed with a Heart Attack.
Learner Progress: Not documented in this visit.

Point: Risk Factors (Resolved)

Description:
Educate the patient/family/caregiver on coronary risk factors. Explain the controllable and non-controllable risk factors to Coronary Artery Disease. Review how to control coronary artery disease by altering the controllable risk factors. Some examples include: controlling blood pressure, reducing fat and cholesterol in the diet, stopping smoking, exercising regularly, maintaining ideal body weight, dealing with stress in an appropriate manner, drinking alcohol and coffee in moderation and controlling blood sugar levels (if applicable).

Learner Progress: Not documented in this visit.

Topic: Acute MI (MCB) (Resolved)

Point: Emergency Plan for Heart Attack Symptoms (Resolved)

Patient Education (continued)

Education (continued)

Description:
Educate the patient/family/caregiver on how to get help immediately if heart attack symptoms occur. The patient should call 911 or the Emergency Medical Service number. Reinforce that the patient should not delay in obtaining help.

Learner Progress: Not documented in this visit.

Point: Home Activity (Resolved)

Description:
Educate the patient/family/caregiver on home activity guidelines that apply after having had a recent heart attack. Do things in moderation, rest about 30 minutes after eating, pace activities, allow for 7-8 hours of sleep at night, start with short walks 3-5 times a day. Consult with Cardiac Rehab staff, if applicable.

Learner Progress: Not documented in this visit.

Point: Limitations to Activity (Resolved)

Description:
Educate the patient/family/caregiver reagrding the following limitations to activity for 4-6 weeks after discharge. No lifting over 10 pounds (weight of a milk jug), no pushing or pulling motions with the arms (sweeping, vacuuming or raking), no driving (may be changed after talking to the doctor), no bathing in very hot or very cold water.

Learner Progress: Not documented in this visit.

Point: Sexual Activity (Resolved)

Description:
Educate the patient/family/caregiver on the following: Wait 4 weeks before resuming sexual activity. If the patient can climb 2 flights of steps, he/she can assume it is ok to resume sexual activity. Choose a comfortable position. Wait at least 1 hour after a meal. If sex brings on angina, stop and rest. Discuss chest pain during sex with the physician. Some medications can affect sexual desire. If this is the case, talk with the physician.

Learner Progress: Not documented in this visit.

Point: Influenza Vaccine (Resolved)

Description:
Educate the patient/family/caregiver on obatining a yearly influenza vaccine.

Learner Progress: Not documented in this visit.

Point: Smoking Cessation (Resolved)

Description:
Educate the patient/family/caregiver on smoking cessation and smoking cessation programs offered in the community. Explain effects smoking and second hand smoke have on the body. Encourage the patient to ask people that smoke around him/her to smoke outside or in another room. Refer patient to Cardiopulmonary Rehabilitation, if applicable.

Learner Progress: Not documented in this visit.

Point: Support Systems (Resolved)

Description:
Help patient identify available support systems. Refer to Social Service, Case Management, or Spiritual Care, if needed.

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Point: Spiritual/Emotional Needs (Resolved)

Description:
Offer resources to meet spiritual/emotional needs. Refer to Spiritual Care, if needed.

Learner Progress: Not documented in this visit.

Point: Stress Management and Support Systems (Resolved)

Description:
Explain the importance of stress management and support systems in diabetes management. Refer to WellStar diabetes support groups, social services, case management or spiritual care, if needed.

Learner Progress: Not documented in this visit.

Point: Anxiety Reduction (Resolved)

Description:
Explain the definition of anxiety, signs and symptoms, and examples of ways to reduce anxiety. Inform patient that Spiritual Care and Social Services are available.

Learner Progress: Not documented in this visit.

Topic: Pain Management (MCB) (Resolved)

Point: Encourage Patient to Monitor Own Pain (Resolved)

Description:
Provide patient with information on the Pain Rating Scale. Explain the rating scale of 0 to 10.

Learner Progress: Not documented in this visit.

Point: Discuss Significance of VAS Scores (Resolved)

Description:
Refer to rating score of 0-10.

Learner Progress: Not documented in this visit.

Point: Discuss the Use of Pain Control Measures Before Pain Becomes Severe (MCB) (Resolved)

Description:
Take time to reiterate to patient that he/she should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time before pain becomes severe.

Patient Friendly Description:
Please inform staff that if you are having any difficulty breathing, pain or any discomfort at any time before the pain gets severe.

Please read over the items and let anyone on your Care Team know there are any questions about the material by marking below that "I HAVE QUESTIONS".

If once you have received the items and understand the material you can mark this as "I understand".
Learner Progress: Not documented in this visit.

Topic: Prevention (MCB) (Resolved)

Point: When to Call the Doctor (Resolved)

Description:
Educate patient/family/caregiver on when to call the doctor.

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Point: Protect Others from Infection (Resolved)

Description:
Educate patient/family/caregiver on respiratory hygiene and cough etiquette. To protect from further infection and to protect others from getting an infection, patient should cover nose and mouth with tissues when coughing. Encourage patient to place used tissues in a plastic bag that will not allow secretions to soak through. Patient should always wash his/her hands after using or handling used tissues.

Learner Progress: Not documented in this visit.

Point: Protect Yourself from Further Infection (MCB) (Resolved)

Description:
Educate patient/family/caregiver that because patient is in a weakened condition he/she needs to avoid others who are sick as to not acquire another illness. Family/caregiver should wear gloves, gown and face shield/eye protection.

Patient Friendly Description:
Information on Flu.
Information on Pneumonia and Pneumococcal Vaccination.
Learner Progress: Not documented in this visit.

Point: Falls education, precautions, prevention at home and in the hospital (MCB) (Resolved)

Description:
Patient was given information on preventing falls both while in the hospital and when they are at home.

Patient Friendly Description:
Things to help you prevent falls while you are in the hospital and when you are home.
Learner Progress: Not documented in this visit.

Point: Prevention Deep Vein Thrombosis after surgery (MCB) (Resolved)

Description:
Educate patient/family/caregiver to prevent DVT and PE after Suergery

Patient Friendly Description:
In the days and weeks after surgery, you have a higher chance of developing a deep vein thrombosis (DVT).
This is a condition in which a blood clot or thrombus develops in a deep vein.
They are most common in the leg. But, a DVT may develop in an arm, or another deep vein in the body.
A piece of the clot, called an embolus, can separate from the vein and travel to the lungs.
A blood clot in the lungs is called a pulmonary embolus (PE).
This can cut off the flow of blood to the lungs.
It is a medical emergency and may cause death.
Learner Progress: Not documented in this visit.

Point: Demonstrate Handwashing (MCB) (Resolved)

Description:
Educate patient/family/caregiver on how to perform proper hand hygiene. Explain that hand washing is the single most important step in preventing the spread of germs. Have the patient/family/caregiver demonstrate proper hand washing technique using soap, water, friction, clean nails under running water, and dry hands on clean towel without touching dirty surfaces.

Patient Friendly Description:
This will explain the importance of washing and cleansing your hands to prevent infection.
Learner Progress: Not documented in this visit.

Topic: Self Care (MCB) (Resolved)

Point: General Self Care (Resolved)

Description:
Instruct patient on self care needs. These may include: hygiene, how to take a blood pressure, how to change a dressing, etc.

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Point: Demonstrate Handwashing (MCB) (Resolved)

Description:
Educate patient/family/caregiver on how to perform proper hand hygiene. Explain that hand washing is the single most important step in preventing the spread of germs. Have the patient/family/caregiver demonstrate proper hand washing technique using soap, water, friction, clean nails under running water, and dry hands on clean towel without touching dirty surfaces.

Patient Friendly Description:
This will explain the importance of washing and cleansing your hands to prevent infection.

Learner Progress: Not documented in this visit.

Topic: Medications (MCB) (Resolved)

Point: Anticoagulant Therapy (Resolved)

Description:
1-Educate patient/family/caregiver on anticoagulant being prescribed and provide educational materials.
2-Explain action of medication, reason for taking, and importance of adherence to correct medication dose and schedule,
3-Explain potential for adverse drug reactions, signs of allergic reaction, potential for drug-drug and drug-food interactions, and when physician should be called.
4-Reinforce that the medication should be taken exactly as the physician has prescribed.
5-Explain importance of maintaining follow-up appointments and adhering to laboratory testing as prescribed by physician.
6-Explain that the dose of the anticoagulant being prescribed may change depending on the results of the laboratory testing.

Learner Progress: Not documented in this visit.

Point: Insulin (MCB) (Resolved)

Description:
Educate patient/family/caregiver on the insulin prescribed. Explain how insulin works in the body. Explain the action of insulin, reason for taking, side effects, signs of allergic reaction and when physician should be called. Reinforce that insulin should be taken exactly as the physician has prescribed. Explain the proper storage of insulin, that extreme temperatures can damage insulin and never take insulin that has expired. Explain that the patient's primary care physician may change the dosage depending on the results of blood glucose tests and/or A1C level.

Patient Friendly Description:
This will inform you of why you are prescribed insulin if you have Diabetes Type II.

Learner Progress: Not documented in this visit.

Point: Hypoglycemic Agents (Resolved)

Description:
Educate patient/family/caregiver on the oral and/or injectable hypoglycemic(s) prescribed. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, as well as when the physician should be called. Reinforce that this medication(s) should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Non-Steroidal Anti-Inflammatory Drugs (Resolved)

Description:
Educate patient/family/caregiver on the NSAID prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Psychotropic Medications (Resolved)

Description:
Educate patient/family/caregiver on the Psychotropic medication prescribed. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Point: ACE Inhibitors (Resolved)

Description:
Educate patient/family/caregiver on the ACE Inhibitor prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Angiotensin II Receptor Blockers (Resolved)

Description:
Educate patient/family/caregiver on the Angiotensin II Receptor Blockers prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Beta Blockers (Resolved)

Description:
Educate patient/family/caregiver on the Beta Blocker prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Digoxin (Resolved)

Description:
Educate patient/family/caregiver on Digoxin and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed. The physician will order a blood test to monitor the concentration of the drug in the patient's blood. The dose of this medication may be changed according to the results of this test.

Learner Progress: Not documented in this visit.

Point: Diuretics (Resolved)

Description:
Educate patient/family/caregiver on the Diuretic prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Inotropes (Resolved)

Description:
Educate patient/family/caregiver on the Inotropes prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Vasodilators (Resolved)

Description:
Educate patient/family/caregiver on the Vasodilator prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Point: Antibiotics (Resolved)

Description:
Educate patient/family/caregiver on the Antibiotics prescribed. Explain how antibiotics works in the body. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Medication purpose, side effects, schedule, administration (MCB) (Resolved)

Description:
Discussed purpose and possible side effects of medication.

Learner Progress: Not documented in this visit.

AFTER VISIT SUMMARY

Eugene G. Maurice DoB: 1/2/1949

1/16/2018
WellStar Paulding Hospital (PH EMERGENCY) 470-644-7170

Instructions

Read the attached information
1. Urinary Retention, Male (English)
2. Foley Catheter, Care (English)

Schedule an appointment with Beau N Dusseault, MD as soon as possible for a visit
Why: follow up on Monday with urology office.
Specialty: Urology
Contact: 55 Whitcher Street
Suite 250
Marietta GA 30060
770-428-4475

Today's Visit

You were seen by Arthur R. Curran, III, MD

Reason for Visit
- Post-op Problem
- Hematuria

Diagnosis
Urinary retention

Lab Tests Completed
POC Chem8 performed 2 times

Done Today
Urinary Catheter - Insert

Your Medication List

apixaban 5 mg tablet Commonly known as: ELIQUIS	Take 1 tablet (5 mg total) by mouth 2 (two) times a day
aspirin, buffered 81 mg Tab	Take 81 mg by mouth daily.
atorvastatin 80 MG tablet Commonly known as: LIPITOR	Take 1 tablet (80 mg total) by mouth nightly
* **blood sugar diagnostic** strip Commonly known as: glucose blood	cvs true test blood glucose strip; test blood sugar ac breakfast and then once more daily as needed..
* **blood sugar diagnostic** strip	True metrix - test blood sugar ac breakfast and then once more daily as needed.. Dx E11.9
carvedilol 12.5 MG tablet Commonly known as: COREG	Take 1 tablet (12.5 mg total) by mouth 2 (two) times a day with meals
chlorthalidone 50 MG tablet Commonly known as: HYGROTEN	Take 1 tablet (50 mg total) by mouth daily
cilostazol 100 MG tablet Commonly known as: PLETAL	Take 1 tablet (100 mg total) by mouth 2 (two) times a day
isosorbide mononitrate 30 MG 24 hr tablet Commonly known as: IMDUR	Take 2 tablets (60 mg total) by mouth 2 (two) times a day
metFORMIN 500 MG tablet Commonly known as: GLUCOPHAGE	2 tablets po in am and 2 in pm
nitroglycerin 0.4 MG SL tablet Commonly known as: NITROSTAT	Place 1 tablet (0.4 mg total) under the tongue every 5 (five) minutes as needed for chest pain
ramipril 10 MG capsule Commonly known as: ALTACE	Take 1 capsule (10 mg total) by mouth 2 (two) times a day

*** This list has 2 medication(s) that are the same as other medications prescribed for you. Read the directions carefully, and ask your doctor or other care provider to review them with you.**

Attached Information

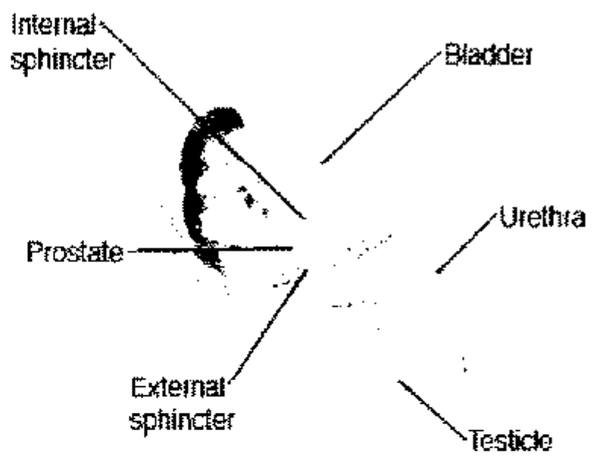
Urinary Retention, Male (English)

Urinary Retention (Male)

Urinary retention is the medical term for difficulty or inability to pass urine, even though your bladder is full.

Causes

The most common cause of urinary retention in men is the bladder outlet being blocked. This can be due to an enlarged prostate gland or a bladder infection. Certain medicines can also cause this problem. This condition is more likely to occur as men get older.



This condition is treated by insertion of a catheter into the bladder to drain the urine. This provides immediate relief. The catheter may need to remain in place for a few days to prevent a recurrence. The catheter has a balloon on the tip which was inflated after insertion. This prevents the catheter from falling out.

Symptoms

Common symptoms of urinary retention include:

- Pain (not experienced by everyone)
- Frequent urination
- Feeling that the bladder is still full after urinating
- Incontinence (not being able to control the release of urine)

- Swollen abdomen

Treatment

This condition is treated by inserting a tube (catheter) into the bladder to drain the urine. This provides immediate relief. The catheter may need to stay in place for a few days. The catheter has a balloon on the tip, which is inflated after insertion. This prevents the catheter from falling out.

Home care

- If you were given antibiotics, take them until they are used up, or your healthcare provider tells you to stop. It is important to finish the antibiotics even though you feel better. This is to make sure your infection has cleared.
- If a catheter was left in place, it is important to keep bacteria from getting into the collection bag. Do not disconnect the catheter from the collection bag.
- Use a leg band to secure the drainage tube, so it does not pull on the catheter. Drain the collection bag when it becomes full using the drain spout at the bottom of the bag.
- Do not pull on or try to remove your catheter. This will injure your urethra. The catheter must be removed by a healthcare provider.

Follow-up care

Follow up with your healthcare provider, or as advised.

If a catheter was left in place, it can usually be removed within 3 to 7 days. Some conditions require the catheter to stay in longer. Your healthcare provider will tell you when to return to have the catheter removed.

When to seek medical advice

Call your healthcare provider right away if any of these occur:

- Fever of 100.4°F (38°C) or higher, or as directed by your healthcare provider
- Bladder or lower-abdominal pain or fullness
- Abdominal swelling, nausea, vomiting, or back pain
- Blood or urine leakage around the catheter
- Bloody urine coming from the catheter (if a new symptom)
- Weakness, dizziness, or fainting
- Confusion or change in usual level of alertness

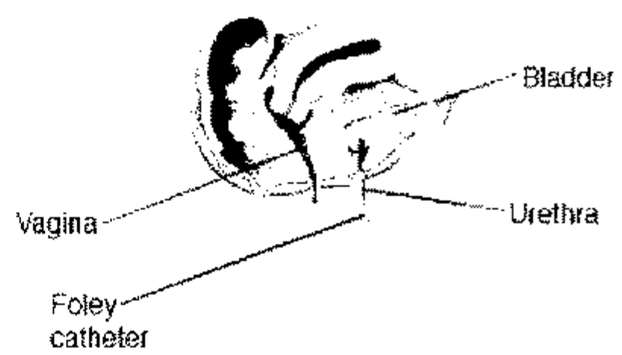
- If a catheter was left in place, return if:
  - Catheter falls out
  - Catheter stops draining for 6 hours

Date Last Reviewed: 7/26/2015

Attached Information

Foley Catheter, Care (English)

Foley Catheter Care



A Foley catheter is a rubber tube that is placed through the urethra (opening where urine comes out) and into the bladder. This helps drain urine from the bladder. There is a small balloon on the end of the tube that is inflated after insertion. This keeps the catheter from sliding out of the bladder.

A Foley catheter is used to treat urinary retention (unable to pass urine). It is also used when there is incontinence (loss of bladder control).

Home care

- Finish taking any prescribed antibiotic even if you are feeling better before then.
- It is important to keep bacteria from getting into the collection bag. Do not disconnect the catheter from the collection bag.
- Use a leg band to secure the drainage tube, so it does not pull on the catheter. Drain the collection bag when it becomes full using the drain spout at the bottom of the bag.
- Do not try to pull or remove your catheter. This will injure your urethra. It must be removed by your healthcare provider or nurse.

Follow-up care

Follow up with your healthcare provider as advised for repeat urine testing and catheter removal or replacement.

When to seek medical advice

Call your healthcare provider right away if any of these occur:

- Fever of 100.4°F (38°C) or higher, or as directed by your healthcare provider
- Bladder pain or fullness
- Abdominal swelling, nausea or vomiting, or back pain
- Blood or urine leakage around the catheter
- Bloody urine coming from the catheter (if a new symptom)
- Catheter falls out
- Catheter stops draining for 6 hours
- Weakness, dizziness, or fainting

CT ANGIOGRAM NECK/CAROTIDS WITH IV CONTRAST(CREATININE DRAW IF NEEDED)

[735098262] Resulted: 04/06/18 0836, Result status: Final result

Order status: Completed Resulted by: Robert H Stephenson Jr., MD
Filed by: Interface, Rad Powerscribe 04/06/18 0837 Performed: 04/05/18 1554 - 04/05/18 1607
Accession number: 29361787 Result details
Narrative:
EXAM: CT ANGIOGRAM NECK WITH IV CONTRAST

CLINICAL INDICATION: I65.23 (Occlusion and stenosis of bilateral carotid arteries) .

TECHNIQUE: Following IV administration of 120 cc Omnipaque 350, CT angiogram of the neck with multiplanar and MIP reformatted images generated from the data set. NASCET-like criteria used to determine the degree of vascular stenosis. Multiplanar reformatted images and 3-D volume rendered images were generated from the data set by the Quantum 3-D laboratory on an independent workstation. Dose reduction techniques were utilized.

COMPARISON: CT angiogram 2/17/2014

FINDINGS:

CTA NECK:

AORTA: There is moderate atherosclerotic calcification of the aortic arch. Calcified plaque is noted at the origins of the brachiocephalic, left subclavian and left common carotid arteries, with no flow-limiting stenosis. There is mild stenosis of the left subclavian artery proximal to the origin of the vertebral artery.

RIGHT CAROTID SYSTEM: Calcified plaque at the CCA bifurcation and in the proximal ICA. Stenosis of the distal CCA at the bifurcation is 50-60% luminal diameter, 50-60% by NASCET criteria. Stenosis at the origin of the ICA is 75-85% luminal, 65-75% by NASCET criteria. This has not changed appreciably compared with the prior study.

LEFT CAROTID SYSTEM: Postoperative changes from prior carotid endarterectomy. The low density area along the lateral carotid sheath at the area of surgery is no longer identified. There is no significant carotid stenosis.

VERTEBRAL ARTERIES: The right vertebral artery is dominant. There is calcified plaque adjacent to the origin on both sides. The origin are difficult to visualize but there is mild stenosis on the right, possibly 40-50% luminal diameter. There is a diminutive V4 segment on the left, with calcified plaque proximally resulting in a moderate to high-grade stenosis (difficult to quantitate due to small vessel size).

NECK: Postoperative changes are noted from prior CABG. There is chronic enlargement of the proximal pulmonary arteries suggesting pulmonary arterial hypertension. No mass is evident in the neck.

Impression:

-

Status post left carotid endarterectomy. No significant left carotid stenosis.

Chronic calcified plaque at the right CCA bifurcation and proximal ICA resulting in 65-75% stenosis by NASCET criteria, not significantly change from 2/17/2014. Please see above for additional details.

Patient Education

Education

Title: Acute MI (MCB) (Resolved)

Topic: Psycho/Social/Spiritual Support (Resolved)

Point: Coping Mechanisms (Resolved)

Description:
Help patient identify healthy coping mechanisms. Refer to Social Service, Case Management, or Spiritual Care, if needed.

Learner Progress: Not documented in this visit.

Point: Support Systems (Resolved)

Description:
Help patient identify available support systems. Refer to Social Service, Case Management, or Spiritual Care, if needed.

Learner Progress: Not documented in this visit.

Point: Spiritual/Emotional Needs (Resolved)

Description:
Offer resources to meet spiritual/emotional needs. Refer to Spiritual Care, if needed.

Learner Progress: Not documented in this visit.

Point: Anxiety Reduction (Resolved)

Description:
Explain the definition of anxiety, signs and symptoms, and examples of ways to reduce anxiety. Inform patient that Spiritual Care and Social Services are available.

Learner Progress: Not documented in this visit.

Topic: Prevention (MCB) (Resolved)

Point: When to Call the Doctor (Resolved)

Description:
Educate patient/family/caregiver on when to call the doctor.

Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Point: Protect Others from Infection (Resolved)

Description:
Educate patient/family/caregiver on respiratory hygiene and cough etiquette. To protect from further infection and to protect others from getting an infection, patient should cover nose and mouth with tissues when coughing. Encourage patient to place used tissues in a plastic bag that will not allow secretions to soak through. Patient should always wash his/her hands after using or handling used tissues.

Learner Progress: Not documented in this visit.

Point: Protect Yourself from Further Infection (MCB) (Resolved)

Description:
Educate patient/family/caregiver that because patient is in a weakened condition he/she needs to avoid others who are sick as to not acquire another illness. Family/caregiver should wear gloves, gown and face shield/eye protection.

Patient Friendly Description:
Information on Flu.
Information on Pneumonia and Pneumococcal Vaccination.
Learner Progress: Not documented in this visit.

Point: Demonstrate Handwashing (MCB) (Resolved)

Description:
Educate patient/family/caregiver on how to perform proper hand hygiene. Explain that hand washing is the single most important step in preventing the spread of germs. Have the patient/family/caregiver demonstrate proper hand washing technique using soap, water, friction, clean nails under running water, and dry hands on clean towel without touching dirty surfaces.

Patient Friendly Description:
This will explain the importance of washing and cleansing your hands to prevent infection.
Learner Progress: Not documented in this visit.

Topic: Self Care (MCB) (Resolved)

Point: General Self Care (Resolved)

Description:
Instruct patient on self care needs. These may include: hygiene, how to take a blood pressure, how to change a dressing, etc.

Learner Progress: Not documented in this visit.

Point: Demonstrate Handwashing (MCB) (Resolved)

Description:
Educate patient/family/caregiver on how to perform proper hand hygiene. Explain that hand washing is the single most important step in preventing the spread of germs. Have the patient/family/caregiver demonstrate proper hand washing technique using soap, water, friction, clean nails under running water, and dry hands on clean towel without touching dirty surfaces.

Patient Friendly Description:
This will explain the importance of washing and cleansing your hands to prevent infection.
Learner Progress: Not documented in this visit.

Topic: Pain Management (Resolved)

Point: Pain Medication Actions & Side Effects (Resolved)

Description:
Provide medication specific handouts when available.

Learner Progress: Not documented in this visit.

Point: Discuss Significance of VAS Scores (Resolved)

Description:
Refer to rating score of 0-10.

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Point: Discuss the Use of Pain Control Measures Before Pain Becomes Severe (MCB) (Resolved)

Description:
Take time to reiterate to patient that he/she should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time before pain becomes severe.

Patient Friendly Description:
Please inform staff that if you are having any difficulty breathing, pain or any discomfort at any time before the pain gets severe.
Please read over the items and let anyone on your Care Team know there are any questions about the material by marking below that "I HAVE QUESTIONS".

If once you have received the items and understand the material you can mark this as "I understand".
Learner Progress: Not documented in this visit.

Point: Non-Pharmacological Comfort Measures (Resolved)

Description:
Explain there are other ways of controlling pain than medication. The following are suggestions: position change, aromatherapy, deep slow breathing, distraction, quiet environment, imagery, heat therapy and/or cold therapy, laughter, massage, music, physical therapy, and touch therapy.

Learner Progress: Not documented in this visit.

Point: Patient Controlled Analgesia (Resolved)

Description:
Give the patient written information on Patient Controlled Analgesia. Explain how the pump works. Demonstrate pushing the button to give pain medicine to the patient. Caution the patient and other family/visitors that only the patient should press the PCA button for pain relief to decrease the chance of getting too much pain medicine.

Learner Progress: Not documented in this visit.

Point: Epidural Information (Resolved)

Description:
Give the patient written information on Epidural Analgesia. Explain why an epidural is used, how the epidural is placed and how the medication is given. If the epidural is PCA, demonstrate pushing the button to give pain medicine to the patient. Caution the patient and other family/visitors that only the patient should press the button for pain relief to decrease the chance of getting too much pain medicine.

Learner Progress: Not documented in this visit.

Topic: Signs and Symptoms - Acute MI (Resolved)

Point: Recognizing a Heart Attack (MCB) (Resolved)

Description:
Be sure patient reviews video on Coronary Artery Disease

Patient Friendly Description:
Please watch the video and/or read over the documented material and let anyone on your Care Team know if there are any questions by marking below.
If after watching the video and/or reading the material you have questions, please mark below I have question to let the staff know you have additional questions about a topic and they will be in to discuss your questions.

This will inform you of what to expect if you are diagnosed with a Heart Attack.
Learner Progress: Not documented in this visit.

Point: Risk Factors (Resolved)

Patient Education (continued)

Education (continued)

Description:
Educate the patient/family/caregiver on coronary risk factors. Explain the controllable and non-controllable risk factors to Coronary Artery Disease. Review how to control coronary artery disease by altering the controllable risk factors. Some examples include: controlling blood pressure, reducing fat and cholesterol in the diet, stopping smoking, exercising regularly, maintaining ideal body weight, dealing with stress in an appropriate manner, drinking alcohol and coffee in moderation and controlling blood sugar levels (if applicable).

Learner Progress: Not documented in this visit.

Topic: Acute MI (MCB) (Resolved)

Point: Emergency Plan for Heart Attack Symptoms (Resolved)

Description:
Educate the patient/family/caregiver on how to get help immediately if heart attack symptoms occur. The patient should call 911 or the Emergency Medical Service number. Reinforce that the patient should not delay in obtaining help.

Learner Progress: Not documented in this visit.

Point: Home Activity (Resolved)

Description:
Educate the patient/family/caregiver on home activity guidelines that apply after having had a recent heart attack. Do things in moderation, rest about 30 minutes after eating, pace activities, allow for 7-8 hours of sleep at night, start with short walks 3-5 times a day. Consult with Cardiac Rehab staff, if applicable.

Learner Progress: Not documented in this visit.

Point: Limitations to Activity (Resolved)

Description:
Educate the patient/family/caregiver reagrding the following limitations to activity for 4-6 weeks after discharge. No lifting over 10 pounds (weight of a milk jug), no pushing or pulling motions with the arms (sweeping, vacuuming or raking), no driving (may be changed after talking to the doctor), no bathing in very hot or very cold water.

Learner Progress: Not documented in this visit.

Point: Sexual Activity (Resolved)

Description:
Educate the patient/family/caregiver on the following: Wait 4 weeks before resuming sexual activity. If the patient can climb 2 flights of steps, he/she can assume it is ok to resume sexual activity. Choose a comfortable position. Wait at least 1 hour after a meal. If sex brings on angina, stop and rest. Discuss chest pain during sex with the physician. Some medications can affect sexual desire. If this is the case, talk with the physician.

Learner Progress: Not documented in this visit.

Point: Influenza Vaccine (Resolved)

Description:
Educate the patient/family/caregiver on obatining a yearly influenza vaccine.

Learner Progress: Not documented in this visit.

Point: Smoking Cessation (Resolved)

Description:
Educate the patient/family/caregiver on smoking cessation and smoking cessation programs offered in the community. Explain effects smoking and second hand smoke have on the body. Encourage the patient to ask people that smoke around him/her to smoke outside or in another room. Refer patient to Cardiopulmonary Rehabilitation, if applicable.

Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Title: WS Cardiac Rehab (Resolved)

Topic: PCI (Resolved)

Point: Books/Educational Material (Resolved)

Description:
Current standardized written information provided specific to diagnosis, recovery, disease progression and prevention.

Learner Progress: Not documented in this visit.

Point: Exercise (Resolved)

Description:
Information regarding the benefits of exercise provided. Exercise guidelines provided for initial recovery from acute heart event and long term goals of exercise.

Learner Progress: Not documented in this visit.

Point: Medications (Resolved)

Description:
Medication compliance encouraged. Organization tools discussed and medication information and resources provided.

Learner Progress: Not documented in this visit.

Point: Risk Factors (Resolved)

Description:
Written and verbal information provided on modifiable and non-modifiable factors associated with increased risk of heart disease and stroke.

Learner Progress: Not documented in this visit.

Point: Activity guidelines (Resolved)

Description:
Appropriate activity and/or limitations for diagnosis specific recovery provided.

Learner Progress: Not documented in this visit.

Point: Signs/symptoms/activate EMS (Resolved)

Description:
Information provided on the signs and symptoms which commonly occur with a heart attack or stroke. Emphasis placed on appropriate activation of EMS with recognition of signs and symptoms.

Learner Progress: Not documented in this visit.

Point: Cardiac Rehab participation/location options (Resolved)

Description:
Cardiac rehabilitation benefits highlighted and participation encouraged.

Learner Progress: Not documented in this visit.

Point: Cardiac Diet/low fat/low sodium (Resolved)

Description:
American Heart Association guidelines provided for a reduced fat and reduced sodium diet.

Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Point: Endocarditis education/card (Resolved)

Description:
Written and verbal instruction provided on endocarditis prevention. Temporary Valve card provided.

Learner Progress: Not documented in this visit.

Point: Outpatient education classes/Heart Smart/Device Advice/Heart of the Matter (Resolved)

Description:
Description and registration details of outpatient education classes provided. Participation encouraged.

Learner Progress: Not documented in this visit.

Title: Cardiac Surgery (Resolved)

Topic: PCI (Resolved)

Additional Points For This Title

Point: ACTIVITY (Resolved)

Learner Progress: Not documented in this visit.

Point: SIGNS AND SYMPTOMS/ACTIVATE EMS (Resolved)

Learner Progress: Not documented in this visit.

Point: BOOKS/EDUCATION MATERIAL (Resolved)

Learner Progress: Not documented in this visit.

Point: CARDIAC REHAB (Resolved)

Learner Progress: Not documented in this visit.

Point: DIET (Resolved)

Learner Progress: Not documented in this visit.

Point: EXERCISE (Resolved)

Learner Progress: Not documented in this visit.

Point: Medications (Resolved)

Learner Progress: Not documented in this visit.

Point: POST OP CARE (Resolved)

Learner Progress: Not documented in this visit.

Point: RISK FACTORS (Resolved)

Learner Progress: Not documented in this visit.

Title: First-Dose Education (Not Started)

Patient Education (continued)

Education (continued)

Points For This Title

Point: iohexol (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: Ringer's solution,lactated (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: morphine sulfate (Resolved)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: aspirin (Resolved)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: atropine sulfate (Resolved)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: gentamicin sulfate (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: 0.9 % sodium chloride (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: gadobenate dimeglumine (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Title: General Patient Education (MCB) (Resolved)

Topic: Psycho/Social/Spiritual Support (Resolved)

Point: Coping Mechanisms (Resolved)

Description:
Help patient identify healthy coping mechanisms. Refer to Social Service, Case Management, or Spiritual Care, if needed.

Learner Progress: Not documented in this visit.

Point: Support Systems (Resolved)

Description:
Help patient identify available support systems. Refer to Social Service, Case Management, or Spiritual Care, if needed.

Learner Progress: Not documented in this visit.

Point: Spiritual/Emotional Needs (Resolved)

Description:
Offer resources to meet spiritual/emotional needs. Refer to Spiritual Care, if needed.

Learner Progress: Not documented in this visit.

Point: Stress Management and Support Systems (Resolved)

Description:
Explain the importance of stress management and support systems in diabetes management. Refer to WellStar diabetes support groups, social services, case management or spiritual care, if needed.

Learner Progress: Not documented in this visit.

Point: Anxiety Reduction (Resolved)

Description:
Explain the definition of anxiety, signs and symptoms, and examples of ways to reduce anxiety. Inform patient that Spiritual Care and Social Services are available.

Learner Progress: Not documented in this visit.

Topic: Pain Management (MCB) (Resolved)

Point: Encourage Patient to Monitor Own Pain (Resolved)

Description:
Provide patient with information on the Pain Rating Scale. Explain the rating scale of 0 to 10.

Learner Progress: Not documented in this visit.

Point: Discuss Significance of VAS Scores (Resolved)

Description:
Refer to rating score of 0-10.

Learner Progress: Not documented in this visit.

Point: Discuss the Use of Pain Control Measures Before Pain Becomes Severe (MCB) (Resolved)

Patient Education (continued)

Education (continued)

Description:
Take time to reiterate to patient that he/she should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time before pain becomes severe.

Patient Friendly Description:
Please inform staff that if you are having any difficulty breathing, pain or any discomfort at any time before the pain gets severe.

Please read over the items and let anyone on your Care Team know there are any questions about the material by marking below that "I HAVE QUESTIONS".

If once you have received the items and understand the material you can mark this as "I understand".
Learner Not documented in this visit.
Progress:

Topic: Prevention (MCB) (Resolved)

Point: When to Call the Doctor (Resolved)

Description:
Educate patient/family/caregiver on when to call the doctor.

Learner Not documented in this visit.
Progress:

Point: Protect Others from Infection (Resolved)

Description:
Educate patient/family/caregiver on respiratory hygiene and cough etiquette. To protect from further infection and to protect others from getting an infection, patient should cover nose and mouth with tissues when coughing. Encourage patient to place used tissues in a plastic bag that will not allow secretions to soak through. Patient should always wash his/her hands after using or handling used tissues.

Progress:

Point: Protect Yourself from Further Infection (MCB) (Resolved)

Description:
Educate patient/family/caregiver that because patient is in a weakened condition he/she needs to avoid others who are sick as to not acquire another illness. Family/caregiver should wear gloves, gown and face shield/eye protection.

Patient Friendly Description:
Information on Flu.
Information on Pneumonia and Pneumococcal Vaccination.
Learner Not documented in this visit.
Progress:

Point: Falls education, precautions, prevention at home and in the hospital (MCB) (Resolved)

Description:
Patient was given information on preventing falls both while in the hospital and when they are at home.

Patient Friendly Description:
Things to help you prevent falls while you are in the hospital and when you are home.
Learner Not documented in this visit.
Progress:

Point: Prevention Deep Vein Thrombosis after surgery (MCB) (Resolved)

Description:
Educate patient/family/caregiver to prevent DVT and PE after Suergery

Patient Friendly Description:
In the days and weeks after surgery, you have a higher chance of developing a deep vein thrombosis (DVT).
This is a condition in which a blood clot or thrombus develops in a deep vein.
They are most common in the leg. But, a DVT may develop in an arm, or another deep vein in the body.
A piece of the clot, called an embolus, can separate from the vein and travel to the lungs.
A blood clot in the lungs is called a pulmonary embolus (PE).
This can cut off the flow of blood to the lungs.
It is a medical emergency and may cause death.

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Point: Demonstrate Handwashing (MCB) (Resolved)

Description:
Educate patient/family/caregiver on how to perform proper hand hygiene. Explain that hand washing is the single most important step in preventing the spread of germs. Have the patient/family/caregiver demonstrate proper hand washing technique using soap, water, friction, clean nails under running water, and dry hands on clean towel without touching dirty surfaces.

Patient Friendly Description:
This will explain the importance of washing and cleansing your hands to prevent infection.

Learner Progress: Not documented in this visit.

Topic: Self Care (MCB) (Resolved)

Point: General Self Care (Resolved)

Description:
Instruct patient on self care needs. These may include: hygiene, how to take a blood pressure, how to change a dressing, etc.

Learner Progress: Not documented in this visit.

Point: Demonstrate Handwashing (MCB) (Resolved)

Description:
Educate patient/family/caregiver on how to perform proper hand hygiene. Explain that hand washing is the single most important step in preventing the spread of germs. Have the patient/family/caregiver demonstrate proper hand washing technique using soap, water, friction, clean nails under running water, and dry hands on clean towel without touching dirty surfaces.

Patient Friendly Description:
This will explain the importance of washing and cleansing your hands to prevent infection.

Learner Progress: Not documented in this visit.

Topic: Medications (MCB) (Resolved)

Point: Anticoagulant Therapy (Resolved)

Description:
1-Educate patient/family/caregiver on anticoagulant being prescribed and provide educational materials.
2-Explain action of medication, reason for taking, and importance of adherence to correct medication dose and schedule,
3-Explain potential for adverse drug reactions, signs of allergic reaction, potential for drug-drug and drug-food interactions, and when physician should be called.
4-Reinforce that the medication should be taken exactly as the physician has prescribed.
5-Explain importance of maintaining follow-up appointments and adhering to laboratory testing as prescribed by physician.
6-Explain that the dose of the anticoagulant being prescribed may change depending on the results of the laboratory testing.

Learner Progress: Not documented in this visit.

Point: Insulin (MCB) (Resolved)

Description:
Educate patient/family/caregiver on the insulin prescribed. Explain how insulin works in the body. Explain the action of insulin, reason for taking, side effects, signs of allergic reaction and when physician should be called. Reinforce that insulin should be taken exactly as the physician has prescribed. Explain the proper storage of insulin, that extreme temperatures can damage insulin and never take insulin that has expired. Explain that the patient's primary care physician may change the dosage depending on the results of blood glucose tests and/or A1C level.

Patient Friendly Description:
This will inform you of why you are prescribed insulin if you have Diabetes Type II.

Learner Progress: Not documented in this visit.

Point: Hypoglycemic Agents (Resolved)

Patient Education (continued)

Education (continued)

Description:
Educate patient/family/caregiver on the oral and/or injectable hypoglycemic(s) prescribed. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, as well as when the physician should be called. Reinforce that this medication(s) should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Non-Steroidal Anti-Inflammatory Drugs (Resolved)

Description:
Educate patient/family/caregiver on the NSAID prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Psychotropic Medications (Resolved)

Description:
Educate patient/family/caregiver on the Psychotropic medication prescribed. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: ACE Inhibitors (Resolved)

Description:
Educate patient/family/caregiver on the ACE Inhibitor prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Angiotensin II Receptor Blockers (Resolved)

Description:
Educate patient/family/caregiver on the Angiotensin II Receptor Blockers prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Beta Blockers (Resolved)

Description:
Educate patient/family/caregiver on the Beta Blocker prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Digoxin (Resolved)

Description:
Educate patient/family/caregiver on Digoxin and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed. The physician will order a blood test to monitor the concentration of the drug in the patient's blood. The dose of this medication may be changed according to the results of this test.

Learner Progress: Not documented in this visit.

Point: Diuretics (Resolved)

Patient Education (continued)

Education (continued)

Description:
Educate patient/family/caregiver on the Diuretic prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Inotropes (Resolved)

Description:
Educate patient/family/caregiver on the Inotropes prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Vasodilators (Resolved)

Description:
Educate patient/family/caregiver on the Vasodilator prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Antibiotics (Resolved)

Description:
Educate patient/family/caregiver on the Antibiotics prescribed. Explain how antibiotics works in the body. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Medication purpose, side effects, schedule, administration (MCB) (Resolved)

Description:
Discussed purpose and possible side effects of medication.

Learner Progress: Not documented in this visit.

Progress Notes - Encounter Notes

Progress Notes by Darsi Knowles, RN at 6/12/2018 2:58 PM

Author: Darsi Knowles, RN | Service: — | Author Type: Registered Nurse
Filed: 6/12/2018 2:59 PM | Date of Service: 6/12/2018 2:58 PM | Status: Signed
Editor: Darsi Knowles, RN (Registered Nurse)

Patient on stretcher resting comfortably. Wife at bedside. Patient provided apple juice and ice. Breathing easy and unlabored.

Electronically Signed by Darsi Knowles, RN on 6/12/2018 2:59 PM

Progress Notes by Darsi Knowles, RN at 6/12/2018 3:38 PM

Author: Darsi Knowles, RN | Service: — | Author Type: Registered Nurse
Filed: 6/12/2018 3:42 PM | Date of Service: 6/12/2018 3:38 PM | Status: Signed
Editor: Darsi Knowles, RN (Registered Nurse)

Dr. Edupuganti requested patient be ambulated with pulse oximetry post recovery. Patient ambulated down pre/post hall with portable vital signs machine. Patient's pulse ox reading dropped to low 90s during ambulation and then to 85% while resting on side of bed afterwards. Dr. Edupuganti notified by Jay, RN. MD gave instructions to discharge per plan and patient follow up per directions.

Electronically Signed by Darsi Knowles, RN on 6/12/2018 3:42 PM

PNDS Information

Outcomes - Pre-op

Used?	Description (Code)
Yes	The patient participates in decisions affecting his or her perioperative plan of care. (O23)
Yes	The patient demonstrates knowledge of the expected responses to the operative or invasive procedure. (O31)

Outcomes - Intra-op

Used?	Description (Code)
Yes	The patient is free from signs and symptoms of injury caused by extraneous objects. (O2)
Yes	The patient is free from signs and symptoms of injury related to positioning. (O5)
Yes	The patient is free from signs and symptoms of infection. (O10)

Outcomes - Post-op

Used?	Description (Code)
Yes	The patient is at or returning to normothermia at the conclusion of the immediate postoperative period. (O12)
Yes	The patient's respiratory function is consistent with or improved from baseline levels established preoperatively. (O14)
Yes	The patient demonstrates knowledge of pain management. (O20)
Yes	The patient demonstrates knowledge of wound management. (O22)
Yes	The patient demonstrates and/or reports adequate pain control throughout the perioperative period. (O29)

Status: Addendum

Anesthesia Pre-op Evaluation

Patient Name: Eugene G Maurice **MRN:** 561253820
Date of Birth: 1/2/1949 **Age:** 69 yrs **Sex:** Male
Height: 67" (1.702 m) **Weight:** 99.1 kg (218 lb 7.6 oz) **BMI:** Body mass index is 34.22 kg/m².

Pre-Assessment Information

No Known Allergies

Relevant Problems

(+) Controlled type 2 diabetes mellitus with diabetic peripheral angiopathy without gangrene, without long-term current use of insulin (HCC)
(+) Coronary arteriosclerosis
(+) Coronary artery disease involving native coronary artery of native heart without angina pectoris
(+) Essential hypertension with goal blood pressure less than 130/85

Past Medical History:

Diagnosis	Date
• CAD (coronary artery disease)	
• Cancer of prostate with low recurrence risk (stage T1-2a and Gleason < 7 and PSA < 10) (HCC)	1/30/2018
• Coronary atherosclerosis of native coronary artery	

Anesthesia Encounter - Episode ID 28758373 (continued)

Preprocedure Note (continued)

- Diabetes mellitus (HCC)
- Essential hypertension, benign
- Family history of ischemic heart disease
- Hyperlipidemia
- Hypertension
- Infectious viral hepatitis
  as teen/cannont recall what type
- Obesity
- Other and unspecified hyperlipidemia
- Other symptoms involving cardiovascular system
- PVD (peripheral vascular disease) (HCC)

Past Surgical History:

Procedure	Laterality	Date
• APPENDECTOMY		
• CAROTID ENDARTERECTOMY *x2*		
• COLONOSCOPY *as of 9/2014 has not had this*		
• CORONARY ARTERY BYPASS GRAFT *X6*		1992
• CORONARY STENT PLACEMENT *sheikh*		2014
• shingles		9/2015

Social History Main Topics	
• Smoking status:	Former Smoker
Packs/day:	1.00
Years:	25.00
Types:	Cigarettes
Quit date:	4/7/1992
• Smokeless tobacco:	Never Used
• Alcohol use	2.4 oz/week
2 Glasses of wine, 2 Shots of liquor per week	
• Drug use:	No
• Sexual activity:	Not on file

Documented NPO status:
Date of last liquid: 06/11/18
Time of last liquid: 2220
Date of last solid: 06/11/18
Time of last solid: 2220

Pre-operative Evaluation

Review of Systems/Medical History

General: Patient summary reviewed.
Anesthesia History:
Cardiovascular:
(+) hypertension: CAD, angina, CABG/stent,

Comments: Results for orders placed or performed during the hospital encounter of 04/09/18
-Echo 2D complete panel (contrast/bubble PRN per protocol)

Narrative
· The left ventricular systolic function is normal, ejection fraction is 50-55%.
· The left ventricular cavity size is normal.
· Left ventricular diastolic function is normal.
· The right ventricular cavity size and systolic function is/are normal.
· There is mild mitral and tricuspid valve regurgitation present.

Results for orders placed or performed during the hospital encounter of 03/29/16
-Echo 2D complete panel (contrast/bubble PRN per protocol)

Narrative
· Left ventricular systolic function is normal, ejection fraction is 50-55%.
· The left ventricle cavity is normal size. Mildly increased concentric left ventricle hypertrophy.
· Right ventricle has normal size and normal systolic function.
· There is mild mitral valve regurgitation present.

Pulmonary:
(+) shortness of breath,

Neuro/Psych: - Negative ROS

GI/Hepatic/Renal: Negative renal ROS
(+) hepatitis, liver disease,

Endo/Other:
(+) diabetes mellitus Type 2,

Physical Exam

Airway:
Mallampati: II
Neck ROM: full
TM distance: >3 FB

Dental: normal exam

Cardiovascular: normal exam
Rhythm: regular
Rate: normal

Pulmonary: normal exam
Respiratory Effort: normal and unlabored breathing
Breath sounds clear to auscultation.

Anesthesia Plan

ASA: 4
Anesthetic Plan: MAC

Airway Management: supplemental O2
Premedication planned: none
Induction: Intravenous
PONV Risk Assessment: Risk(s): Non-Smoker / Score: 1
Postoperative Plan: Plan for postoperative opioids intended.

Anesthetic plan and risks discussed with: Patient and spouse.

TEE COMPLETE W/ AND/OR W/O CONTRAST PRN [749935484]
Resulted: 06/12/18 2329, Result status: Final result

Order status: Completed
Resulted by: Ravi Edupuganti, MD
Filed by: Ravi Edupuganti, MD 06/12/18 2356
Performed: 06/12/18 1339 - 06/12/18 1445
Accession number: 29653107
Resulting lab: NONINV CARDIOLOGY
Result details
Narrative:
· The left ventricular systolic function is normal, ejection fraction is 55-60%.
· The left ventricular cavity size is normal.
· Unable to assess left ventricular diastolic function. Unable to assess left atrial pressure.
· The right ventricular cavity size and systolic function is/are normal.
· There is no evidence of thrombus in the left atrial appendage. There is no spontaneous echo contrast in the left atrial appendage.
· Mild- moderate central MR(2 small jets), likely related to tethering of posterior leaflet, MR determined by color jet area, color jet not adequate for ERO and VC determination
· Suboptimal , but negative bubble study for PFO

Patient Education

Education

Title: Acute MI (MCB) (Resolved)

Topic: Psycho/Social/Spiritual Support (Resolved)

Point: Coping Mechanisms (Resolved)

Description:
Help patient identify healthy coping mechanisms. Refer to Social Service, Case Management, or Spiritual Care, if needed.

Learner Progress: Not documented in this visit.

Point: Support Systems (Resolved)

Description:
Help patient identify available support systems. Refer to Social Service, Case Management, or Spiritual Care, if needed.

Learner Progress: Not documented in this visit.

Point: Spiritual/Emotional Needs (Resolved)

Description:
Offer resources to meet spiritual/emotional needs. Refer to Spiritual Care, if needed.

Learner Progress: Not documented in this visit.

Point: Anxiety Reduction (Resolved)

Description:
Explain the definition of anxiety, signs and symptoms, and examples of ways to reduce anxiety. Inform patient that Spiritual Care and Social Services are available.

Learner Progress: Not documented in this visit.

Topic: Prevention (MCB) (Resolved)

Point: When to Call the Doctor (Resolved)

Description:
Educate patient/family/caregiver on when to call the doctor.

Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Point: Protect Others from Infection (Resolved)

Description:
Educate patient/family/caregiver on respiratory hygiene and cough etiquette. To protect from further infection and to protect others from getting an infection, patient should cover nose and mouth with tissues when coughing. Encourage patient to place used tissues in a plastic bag that will not allow secretions to soak through. Patient should always wash his/her hands after using or handling used tissues.

Learner Progress: Not documented in this visit.

Point: Protect Yourself from Further Infection (MCB) (Resolved)

Description:
Educate patient/family/caregiver that because patient is in a weakened condition he/she needs to avoid others who are sick as to not acquire another illness. Family/caregiver should wear gloves, gown and face shield/eye protection.

Patient Friendly Description:
Information on Flu.
Information on Pneumonia and Pneumococcal Vaccination.
Learner Progress: Not documented in this visit.

Point: Demonstrate Handwashing (MCB) (Resolved)

Description:
Educate patient/family/caregiver on how to perform proper hand hygiene. Explain that hand washing is the single most important step in preventing the spread of germs. Have the patient/family/caregiver demonstrate proper hand washing technique using soap, water, friction, clean nails under running water, and dry hands on clean towel without touching dirty surfaces.

Patient Friendly Description:
This will explain the importance of washing and cleansing your hands to prevent infection.
Learner Progress: Not documented in this visit.

Topic: Self Care (MCB) (Resolved)

Point: General Self Care (Resolved)

Description:
Instruct patient on self care needs. These may include: hygiene, how to take a blood pressure, how to change a dressing, etc.

Learner Progress: Not documented in this visit.

Point: Demonstrate Handwashing (MCB) (Resolved)

Description:
Educate patient/family/caregiver on how to perform proper hand hygiene. Explain that hand washing is the single most important step in preventing the spread of germs. Have the patient/family/caregiver demonstrate proper hand washing technique using soap, water, friction, clean nails under running water, and dry hands on clean towel without touching dirty surfaces.

Patient Friendly Description:
This will explain the importance of washing and cleansing your hands to prevent infection.
Learner Progress: Not documented in this visit.

Topic: Pain Management (Resolved)

Point: Pain Medication Actions & Side Effects (Resolved)

Description:
Provide medication specific handouts when available.

Learner Progress: Not documented in this visit.

Point: Discuss Significance of VAS Scores (Resolved)

Description:
Refer to rating score of 0-10.

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Point: Discuss the Use of Pain Control Measures Before Pain Becomes Severe (MCB) (Resolved)

Description:
Take time to reiterate to patient that he/she should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time before pain becomes severe.

Patient Friendly Description:
Please inform staff that if you are having any difficulty breathing, pain or any discomfort at any time before the pain gets severe.
Please read over the items and let anyone on your Care Team know there are any questions about the material by marking below that "I HAVE QUESTIONS".

If once you have received the items and understand the material you can mark this as "I understand".
Learner Progress: Not documented in this visit.

Point: Non-Pharmacological Comfort Measures (Resolved)

Description:
Explain there are other ways of controlling pain than medication. The following are suggestions: position change, aromatherapy, deep slow breathing, distraction, quiet environment, imagery, heat therapy and/or cold therapy, laughter, massage, music, physical therapy, and touch therapy.

Learner Progress: Not documented in this visit.

Point: Patient Controlled Analgesia (Resolved)

Description:
Give the patient written information on Patient Controlled Analgesia. Explain how the pump works. Demonstrate pushing the button to give pain medicine to the patient. Caution the patient and other family/visitors that only the patient should press the PCA button for pain relief to decrease the chance of getting too much pain medicine.

Learner Progress: Not documented in this visit.

Point: Epidural Information (Resolved)

Description:
Give the patient written information on Epidural Analgesia. Explain why an epidural is used, how the epidural is placed and how the medication is given. If the epidural is PCA, demonstrate pushing the button to give pain medicine to the patient. Caution the patient and other family/visitors that only the patient should press the button for pain relief to decrease the chance of getting too much pain medicine.

Learner Progress: Not documented in this visit.

Topic: Signs and Symptoms - Acute MI (Resolved)

Point: Recognizing a Heart Attack (MCB) (Resolved)

Description:
Be sure patient reviews video on Coronary Artery Disease

Patient Friendly Description:
Please watch the video and/or read over the documented material and let anyone on your Care Team know if there are any questions by marking below.
If after watching the video and/or reading the material you have questions, please mark below I have question to let the staff know you have additional questions about a topic and they will be in to discuss your questions.

This will inform you of what to expect if you are diagnosed with a Heart Attack.
Learner Progress: Not documented in this visit.

Point: Risk Factors (Resolved)

Patient Education (continued)

Education (continued)

Description:
Educate the patient/family/caregiver on coronary risk factors. Explain the controllable and non-controllable risk factors to Coronary Artery Disease. Review how to control coronary artery disease by altering the controllable risk factors. Some examples include: controlling blood pressure, reducing fat and cholesterol in the diet, stopping smoking, exercising regularly, maintaining ideal body weight, dealing with stress in an appropriate manner, drinking alcohol and coffee in moderation and controlling blood sugar levels (if applicable).

Learner Progress: Not documented in this visit.

Topic: Acute MI (MCB) (Resolved)

Point: Emergency Plan for Heart Attack Symptoms (Resolved)

Description:
Educate the patient/family/caregiver on how to get help immediately if heart attack symptoms occur. The patient should call 911 or the Emergency Medical Service number. Reinforce that the patient should not delay in obtaining help.

Learner Progress: Not documented in this visit.

Point: Home Activity (Resolved)

Description:
Educate the patient/family/caregiver on home activity guidelines that apply after having had a recent heart attack. Do things in moderation, rest about 30 minutes after eating, pace activities, allow for 7-8 hours of sleep at night, start with short walks 3-5 times a day. Consult with Cardiac Rehab staff, if applicable.

Learner Progress: Not documented in this visit.

Point: Limitations to Activity (Resolved)

Description:
Educate the patient/family/caregiver reagrding the following limitations to activity for 4-6 weeks after discharge. No lifting over 10 pounds (weight of a milk jug), no pushing or pulling motions with the arms (sweeping, vacuuming or raking), no driving (may be changed after talking to the doctor), no bathing in very hot or very cold water.

Learner Progress: Not documented in this visit.

Point: Sexual Activity (Resolved)

Description:
Educate the patient/family/caregiver on the following: Wait 4 weeks before resuming sexual activity. If the patient can climb 2 flights of steps, he/she can assume it is ok to resume sexual activity. Choose a comfortable position. Wait at least 1 hour after a meal. If sex brings on angina, stop and rest. Discuss chest pain during sex with the physician. Some medications can affect sexual desire. If this is the case, talk with the physician.

Learner Progress: Not documented in this visit.

Point: Influenza Vaccine (Resolved)

Description:
Educate the patient/family/caregiver on obatining a yearly influenza vaccine.

Learner Progress: Not documented in this visit.

Point: Smoking Cessation (Resolved)

Description:
Educate the patient/family/caregiver on smoking cessation and smoking cessation programs offered in the community. Explain effects smoking and second hand smoke have on the body. Encourage the patient to ask people that smoke around him/her to smoke outside or in another room. Refer patient to Cardiopulmonary Rehabilitation, if applicable.

Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Title: WS Cardiac Rehab (Resolved)

Topic: PCI (Resolved)

Point: Books/Educational Material (Resolved)

Description:
Current standardized written information provided specific to diagnosis, recovery, disease progression and prevention.

Learner Progress: Not documented in this visit.

Point: Exercise (Resolved)

Description:
Information regarding the benefits of exercise provided. Exercise guidelines provided for initial recovery from acute heart event and long term goals of exercise.

Learner Progress: Not documented in this visit.

Point: Medications (Resolved)

Description:
Medication compliance encouraged. Organization tools discussed and medication information and resources provided.

Learner Progress: Not documented in this visit.

Point: Risk Factors (Resolved)

Description:
Written and verbal information provided on modifiable and non-modifiable factors associated with increased risk of heart disease and stroke.

Learner Progress: Not documented in this visit.

Point: Activity guidelines (Resolved)

Description:
Appropriate activity and/or limitations for diagnosis specific recovery provided.

Learner Progress: Not documented in this visit.

Point: Signs/symptoms/activate EMS (Resolved)

Description:
Information provided on the signs and symptoms which commonly occur with a heart attack or stroke. Emphasis placed on appropriate activation of EMS with recognition of signs and symptoms.

Learner Progress: Not documented in this visit.

Point: Cardiac Rehab participation/location options (Resolved)

Description:
Cardiac rehabilitation benefits highlighted and participation encouraged.

Learner Progress: Not documented in this visit.

Point: Cardiac Diet/low fat/low sodium (Resolved)

Description:
American Heart Association guidelines provided for a reduced fat and reduced sodium diet.

Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Point: Endocarditis education/card (Resolved)

Description:
Written and verbal instruction provided on endocarditis prevention. Temporary Valve card provided.

Learner Progress: Not documented in this visit.

Point: Outpatient education classes/Heart Smart/Device Advice/Heart of the Matter (Resolved)

Description:
Description and registration details of outpatient education classes provided. Participation encouraged.

Learner Progress: Not documented in this visit.

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Title: General Patient Education (MCB) (Resolved)

Topic: Psycho/Social/Spiritual Support (Resolved)

Point: Coping Mechanisms (Resolved)

Description:
Help patient identify healthy coping mechanisms. Refer to Social Service, Case Management, or Spiritual Care, if needed.

Learner Progress: Not documented in this visit.

Point: Support Systems (Resolved)

Description:
Help patient identify available support systems. Refer to Social Service, Case Management, or Spiritual Care, if needed.

Learner Progress: Not documented in this visit.

Point: Spiritual/Emotional Needs (Resolved)

Description:
Offer resources to meet spiritual/emotional needs. Refer to Spiritual Care, if needed.

Learner Progress: Not documented in this visit.

Point: Stress Management and Support Systems (Resolved)

Description:
Explain the importance of stress management and support systems in diabetes management. Refer to WellStar diabetes support groups, social services, case management or spiritual care, if needed.

Learner Progress: Not documented in this visit.

Point: Anxiety Reduction (Resolved)

Description:
Explain the definition of anxiety, signs and symptoms, and examples of ways to reduce anxiety. Inform patient that Spiritual Care and Social Services are available.

Learner Progress: Not documented in this visit.

Topic: Pain Management (MCB) (Resolved)

Point: Encourage Patient to Monitor Own Pain (Resolved)

Description:
Provide patient with information on the Pain Rating Scale. Explain the rating scale of 0 to 10.

Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Point: Discuss Significance of VAS Scores (Resolved)

Description:
Refer to rating score of 0-10.

Learner Progress: Not documented in this visit.

Point: Discuss the Use of Pain Control Measures Before Pain Becomes Severe (MCB) (Resolved)

Description:
Take time to reiterate to patient that he/she should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time before pain becomes severe.

Patient Friendly Description:
Please inform staff that if you are having any difficulty breathing, pain or any discomfort at any time before the pain gets severe.

Please read over the items and let anyone on your Care Team know there are any questions about the material by marking below that "I HAVE QUESTIONS".

If once you have received the items and understand the material you can mark this as "I understand".
Learner Progress: Not documented in this visit.

Topic: Prevention (MCB) (Resolved)

Point: When to Call the Doctor (Resolved)

Description:
Educate patient/family/caregiver on when to call the doctor.

Learner Progress: Not documented in this visit.

Point: Protect Others from Infection (Resolved)

Description:
Educate patient/family/caregiver on respiratory hygiene and cough etiquette. To protect from further infection and to protect others from getting an infection, patient should cover nose and mouth with tissues when coughing. Encourage patient to place used tissues in a plastic bag that will not allow secretions to soak through. Patient should always wash his/her hands after using or handling used tissues.

Learner Progress: Not documented in this visit.

Point: Protect Yourself from Further Infection (MCB) (Resolved)

Description:
Educate patient/family/caregiver that because patient is in a weakened condition he/she needs to avoid others who are sick as to not acquire another illness. Family/caregiver should wear gloves, gown and face shield/eye protection.

Patient Friendly Description:
Information on Flu.
Information on Pneumonia and Pneumococcal Vaccination.
Learner Progress: Not documented in this visit.

Point: Falls education, precautions, prevention at home and in the hospital (MCB) (Resolved)

Description:
Patient was given information on preventing falls both while in the hospital and when they are at home.

Patient Friendly Description:
Things to help you prevent falls while you are in the hospital and when you are home.
Learner Progress: Not documented in this visit.

Point: Prevention Deep Vein Thrombosis after surgery (MCB) (Resolved)

Description:
Educate patient/family/caregiver to prevent DVT and PE after Suergery

Patient Education (continued)

Education (continued)

Patient Friendly Description:
In the days and weeks after surgery, you have a higher chance of developing a deep vein thrombosis (DVT).
This is a condition in which a blood clot or thrombus develops in a deep vein.
They are most common in the leg. But, a DVT may develop in an arm, or another deep vein in the body.
A piece of the clot, called an embolus, can separate from the vein and travel to the lungs.
A blood clot in the lungs is called a pulmonary embolus (PE).
This can cut off the flow of blood to the lungs.
It is a medical emergency and may cause death.
Learner Not documented in this visit.
Progress:

Point: Demonstrate Handwashing (MCB) (Resolved)

Description:
Educate patient/family/caregiver on how to perform proper hand hygiene. Explain that hand washing is the single most important step in preventing the spread of germs. Have the patient/family/caregiver demonstrate proper hand washing technique using soap, water, friction, clean nails under running water, and dry hands on clean towel without touching dirty surfaces.

Patient Friendly Description:
This will explain the importance of washing and cleansing your hands to prevent infection.
Learner Not documented in this visit.
Progress:

Topic: Self Care (MCB) (Resolved)

Point: General Self Care (Resolved)

Description:
Instruct patient on self care needs. These may include: hygiene, how to take a blood pressure, how to change a dressing, etc.

Learner Not documented in this visit.
Progress:

Point: Demonstrate Handwashing (MCB) (Resolved)

Description:
Educate patient/family/caregiver on how to perform proper hand hygiene. Explain that hand washing is the single most important step in preventing the spread of germs. Have the patient/family/caregiver demonstrate proper hand washing technique using soap, water, friction, clean nails under running water, and dry hands on clean towel without touching dirty surfaces.

Patient Friendly Description:
This will explain the importance of washing and cleansing your hands to prevent infection.
Learner Not documented in this visit.
Progress:

Topic: Medications (MCB) (Resolved)

Point: Anticoagulant Therapy (Resolved)

Description:
1-Educate patient/family/caregiver on anticoagulant being prescribed and provide educational materials.
2-Explain action of medication, reason for taking, and importance of adherence to correct medication dose and schedule,
3-Explain potential for adverse drug reactions, signs of allergic reaction, potential for drug-drug and drug-food interactions, and when physician should be called.
4-Reinforce that the medication should be taken exactly as the physician has prescribed.
5-Explain importance of maintaining follow-up appointments and adhering to laboratory testing as prescribed by physician.
6-Explain that the dose of the anticoagulant being prescribed may change depending on the results of the laboratory testing.

Learner Not documented in this visit.
Progress:

Point: Insulin (MCB) (Resolved)

Description:
Educate patient/family/caregiver on the insulin prescribed. Explain how insulin works in the body. Explain the action of insulin, reason for taking, side effects, signs of allergic reaction and when physician should be called. Reinforce that insulin should be taken exactly as the physician has prescribed. Explain the proper storage of insulin, that extreme temperatures can damage insulin and never take insulin that has expired. Explain that the patient's primary care physician may change the dosage depending on the results of blood glucose tests and/or A1C level.

Patient Education (continued)

Education (continued)

Patient Friendly Description:
This will inform you of why you are prescribed insulin if you have Diabetes Type II.

Learner Progress: Not documented in this visit.

Point: Hypoglycemic Agents (Resolved)

Description:
Educate patient/family/caregiver on the oral and/or injectable hypoglycemic(s) prescribed. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, as well as when the physician should be called. Reinforce that this medication(s) should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Non-Steroidal Anti-Inflammatory Drugs (Resolved)

Description:
Educate patient/family/caregiver on the NSAID prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Psychotropic Medications (Resolved)

Description:
Educate patient/family/caregiver on the Psychotropic medication prescribed. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: ACE Inhibitors (Resolved)

Description:
Educate patient/family/caregiver on the ACE Inhibitor prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Angiotensin II Receptor Blockers (Resolved)

Description:
Educate patient/family/caregiver on the Angiotensin II Receptor Blockers prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Beta Blockers (Resolved)

Description:
Educate patient/family/caregiver on the Beta Blocker prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Digoxin (Resolved)

Description:
Educate patient/family/caregiver on Digoxin and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed. The physician will order a blood test to monitor the concentration of the drug in the patient's blood. The dose of this medication may be changed according to the results of this test.

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Point: Diuretics (Resolved)

Description:
Educate patient/family/caregiver on the Diuretic prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Inotropes (Resolved)

Description:
Educate patient/family/caregiver on the Inotropes prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Vasodilators (Resolved)

Description:
Educate patient/family/caregiver on the Vasodilator prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Antibiotics (Resolved)

Description:
Educate patient/family/caregiver on the Antibiotics prescribed. Explain how antibiotics works in the body. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Medication purpose, side effects, schedule, administration (MCB) (Resolved)

Description:
Discussed purpose and possible side effects of medication.

Learner Progress: Not documented in this visit.

Transesophageal Echocardiography (TEE)

Transesophageal echocardiography (TEE) is a test done to record images of your heart with a probe inside your esophagus. These images help your healthcare provider find and treat problems such as infection, disease, or defects in your heart's function, walls or valves. This test may be done when a chest echocardiogram (transthoracic) does not give your provider enough information.

Before your test

- Tell your provider about all the medicines you take. Ask if it's OK to take them before the test.
- Don't eat or drink for 6 to 8 hours before the test. This includes water.
- Tell your healthcare provider if you have ulcers, a hiatal hernia, or problems swallowing. Also report a history of narrowing of the esophagus, or any other previous gastrointestinal problems. Also, let him or her know of any allergies to medicines or sedatives.
- Also let your provider know if you have dental implants or dentures that should be removed before the test.
- Arrange to have someone drive you home after the exam.

During your TEE

- When you arrive for your TEE, you will change into a hospital gown, and then be taken to the testing room.
- Your provider will spray your throat with a numbing medicine. You may be given a medicine through an IV (intravenous) in your arm to help you relax. You may also be given oxygen. Then you'll be asked to lie on your left side.
- The healthcare provider gently inserts the small, lubricated probe into your mouth. As you swallow, he or she will slowly guide the tube into your esophagus.
- You may feel the healthcare provider moving the probe, but it shouldn't hurt or interfere with your breathing. A nurse checks your heart rate, blood pressure, and breathing. The test usually takes 20 to 40 minutes.
- The nurse or assistant will suction any saliva out of your mouth, similar to when you have a dental cleaning.

After the test

- Tell your healthcare provider about any pain, or if you cough up or vomit blood, or have trouble swallowing.
- You can eat and drink again when your throat is no longer numb.
- Do not drive a car or run heavy machinery for at least 24 hours after getting sedation. After 24 hours you can return to normal activity unless your healthcare provider tells you otherwise.
- Be sure to keep your follow-up appointment to go over the results with your healthcare provider.
- Your next appointment is: _____

Date Last Reviewed: 12/1/2016

Post TEE Patient
Discharge Instructions

1. The numbness in your throat will gradually disappear. You may notice a slight soreness in your throat temporarily. You may eat and drink 30 minutes to 1 hour after your procedure.

2. Do not drive, drink alcoholic beverages or make any major personal or business decisions for 24 hours because of the medications that you have received. You will probably be sleepy the remainder of the day and are advised to rest.

3. Unless your doctor instructs otherwise, you may return to your regular activities (including work) in 24 hours. A light diet is advised for the next 12 hours.

4. Call your physician the day you go home to set up a follow up appointment.

5. If you have new prescriptions have them filled today.

6. If you have any question or concerns, you may call the Cardiac Admit Recovery Unit at 770-793-9350, or contact your physician.

7. Other instructions: DR. SHEIKH
   I have read and understand the above instructions and have had all my questions answered adequately. I agree to take these instructions to my physician who will be assuming my care. I am being accompanied at discharge by _____ who is at least 18 years of age.

CONSENT TO ROUTINE PROCEDURES AND TREATMENTS & FINANCIAL RESPONSIBILITY STATEMENT

Section I CONSENT TO ROUTINE PROCEDURES AND TREATMENTS

I consent to routine procedures and treatments at a WellStar Health System "WellStar" facility as an outpatient, inpatient, or emergency department patient, depending on my medical needs. Routine procedures and treatments can include testing (for example, x-rays and blood tests), routine care and procedures (for example, intravenous fluids, injections, or bladder or stomach tubes) and evaluation (for example, interviews and physical exams). However, this consent to routine procedures and treatments does not include consent for other invasive procedures (for example, surgery, amniocentesis, or diagnostic tests such as colonoscopy or those requiring the use of contrast material), consent for blood or blood products, general anesthesia, or my participation in research. These circumstances require a separate consent process. I understand it is the responsibility of my physician or surgeon to obtain any required separate consent(s).

I understand that I may receive treatment and healthcare services given by WellStar employees (such as nurses and technicians) and by physicians and other independent medical professionals on the medical staff of WellStar facilities (for example, Emergency Department physicians, radiologists, and surgeons) who are NOT WellStar employees. I understand that the healthcare services provided by these independent medical professionals, using independent medical judgment, at a WellStar facility in no way create any type of employment, partnership, or other relationship other than as an independent contractor. These independent contractors are responsible for their own actions and WellStar shall not be liable for the acts or omissions of any such independent contractors.

While I am a patient at a WellStar facility, I understand that I may be observed by or receive healthcare services from students enrolled in training programs. Students are supervised by instructors, WellStar employees, or other independent medical professionals on the medical staff of the WellStar facility, depending on the type of training program the students are enrolled in. I understand that I have the right to request that someone other than a student provide my care.

I understand that I retain no property rights to any tissue samples or bodily fluids removed from my body (specimens) as part of procedures or treatment given to me. I further understand that WellStar has no obligation to preserve these specimens; that it will retain or dispose of specimens according to its usual practices.

I understand that I have the right to ask questions about a proposed procedure or treatment (including the identity of any person providing or observing treatment and his or her affiliation with WellStar) at any time. I understand the practice of medicine is not an exact science and diagnosis and outcomes of treatment depend upon my medical condition and may involve risks or even death. I understand that no guarantees can be made as to the outcome of my care.

Section II MATERNITY PATIENTS

If I deliver an infant(s) while I am a patient at a WellStar facility, I agree that this same Consent to Routine Procedures and Treatments applies to the infant(s).

Section III EMERGENCY OR LABORING PATIENTS

In accordance with federal law, I understand my right to receive an appropriate medical screening examination performed by a physician or other qualified medical professional to determine whether I am suffering from an emergency medical condition. If such a condition exists, stabilizing treatment will be provided within the capabilities of this WellStar facility and its staff, even if I cannot pay for these services, do not have medical insurance coverage, or am not entitled to Medicare or Medicaid.

Eugene G Maurice	
Patient's Signature	Relationship to Patient
E G Maurice	Self

All Scans (continued)

Encounter-Level E-Signatures: (continued)

Section IV **ASSIGNMENT OF BENEFITS/FINANCIAL RESPONSIBILITY**

I assign any right I may have to receive payment from a health insurance plan, ERISA, Medicare, Medicaid, Social Security, or other payor(s) for services rendered by WellStar and the medical professionals caring for me during my treatment. I understand that I am financially responsible for all healthcare services, including amounts that are not covered by my health insurance plan or payor, as appropriate, based on the terms of the health plan contracts or the law. For example, the payment of non-covered services, deductibles, and co-payments is the patient's responsibility. For healthcare services provided by independent medical professionals, I understand that I will receive separate bills and that I am responsible for paying them. I agree to provide WellStar with all health insurance coverage information if I choose to use my insurance for payment of services. I agree to respond to all requests for benefit information and complete any forms required by my insurance plan. I am responsible for understanding and following the terms of my health insurance plan. I authorize WellStar and its medical professionals to submit appeals for payment, including arbitration and formal complaints, on my behalf as required by my insurance company. I also understand that I am financially responsible for collection costs if my account becomes delinquent and that all delinquent accounts will bear interest at the legal rate, unless prohibited by law. I understand that WellStar may request and use data from third parties such as credit reporting agencies in order to verify demographic data or evaluate financial options.

For Medicare/Medicaid Patients: I certify that the information given by me in applying for payment under Title XVII and XIX of the Social Security Act is correct. I authorize release of any information needed to act on this request. I request that payment of authorized benefits be made on my behalf. I assign payment for the unpaid charges to WellStar or the independent medical professionals providing healthcare services to me. I understand that I am responsible for any remaining balance not covered by other insurance.
If I am signing this form and am not the patient, I understand that I am also responsible for and agree to pay charges not covered by the assignments made in this Section IV, including any Medicare deductibles.

Section V **FINANCIAL ASSISTANCE STATEMENT**

It is WellStar's policy to provide medical care at no cost to qualified members of the WellStar-served communities, and to provide significantly discounted medical care to certain qualified members of our communities faced with financial hardship due to medical misfortune, according to policy. I understand that if payment of my bill creates a financial hardship, I may qualify for assistance with all or part of my medical expenses associated with my treatment at a WellStar facility and that I can call 678-838-5750 for more information.

(Patient Initials)

Section VI **CONSENT TO PHOTOGRAPHY AND VIDEOTAPING**

Sometimes, WellStar facilities and physicians use patient photographs and videos for identification, clinical, educational, or research-related purposes. These photographs, recordings or videos could be in digital or other formats and may be reproduced for scientific or treatment reasons. I consent to having photographs, recordings or videos taken for patient care, educational, research, or other clinical benefits.

Section VII **NOTICE REGARDING RELEASE OF HEALTH INFORMATION**

As explained in WellStar's Notice of Privacy Practices, WellStar may use and disclose medical information including privileged information (i.e. mental health, alcohol/drug abuse or HIV/AIDS), to physicians or other healthcare providers for the purposes of providing treatment, and to payors for the purposes of payment for medical treatment. HIPAA also permits WellStar and its affiliated companies to use medical information for healthcare operations. I expressly authorize WellStar's use and disclosure of my medical information as described in this Section VII.

All Scans (continued)

Encounter-Level E-Signatures: (continued)

Section VIII INPATIENT INFORMATION

I have received a copy of the Patient Admission Packet that includes "Patient Rights and Responsibilities" and information regarding Advance Care Planning. If I am a Medicare beneficiary, I have also received a notice entitled "Important Message from Medicare."

Section IX ADVANCE DIRECTIVE

I have an Advance Directive

Yes:

No: x

If yes; I will provide a copy to WellStar. I have been advised that WellStar does not honor Advance Directives in Pre-admission Testing or in the Outpatient Diagnostics and Treatment setting.

Section X PERSONAL VALUABLES

I understand that WellStar is not liable or responsible for lost or damaged personal belongings and valuables (for example, money, jewelry, hearing aids, or dentures) unless placed in a WellStar safe. I will ask family members or friends to take home my personal belongings and valuables. I also understand and will inform the staff if I have dentures, eyeglasses, contact lenses, prosthetics or other items that I need to retain close by for personal functioning to assure safekeeping.

Section XI CONSENT TO CONTACT

By providing a telephone number, I expressly consent and authorize WellStar Health System, any practitioner or clinical provider as well as any of their related entities, agents, or contractors including but not limited to schedulers, marketers, advertisers, debt collectors, and other contracted staff (collectively referred to herein as "Provider") to contact me through the use of any dialing equipment (including a dialer, automatic telephone dialing system, and/or interactive voice recognition system) and/or artificial or prerecorded voice or message. I expressly agree that such automated calls may be made to any telephone number (including numbers assigned to any cellular or other service for which I may be charged for the call) used by or associated with me and obtained through any source including but not limited to any number I am providing today, have provided previously, or may provide in the future in connection with the medical goods and services and/or my account. By providing this express consent, I specifically waive any claim I may have to the making of such calls, including any claim under federal or state law and specifically any claim under the Telephone Consumer Protection Act, 47 U.S.C. § 227. By providing a telephone number, I represent that I am the subscriber or owner or have the authority to use and provide consent to call the number.

By providing a telephone number, I expressly consent to the receipt of text messages from Provider at any telephone number (including numbers assigned to any cellular or other service for which I may be charged for the call) used by or associated with me and obtained through any source including but not limited to any number I have provided previously or may provide in the future in connection with my account. By providing this express consent, I specifically waive any claim I may have for the making of such calls, including any claim under federal or state law and specifically and claim under the Telephone Consumer Protection Act, 47 U.S.C. § 227. By providing a telephone number, I represent that I am the subscriber or owner or have the authority to use and provide consent to call the number.

By providing my email address now or at any time in the future in connection with the medical goods and services provided and/or my account, I expressly opt-in to the receipt of email communications from Provider for or related to the medical goods or services provided, my account, and other services such as financial, clinical, and education information including exchange news, changes to health care law, health care coverage, care followup, and other health care opportunities, goods, and services. By providing this express consent, I specifically waive any claim I may have for the sending of such emails, including any claim under federal or state law and specifically any claim under the CAN-SPAM Act, 15 U.S.C. § 7701, et seq. By providing an email address, I represent that I am the subscriber or owner or have the authority to use and provide consent to contact the email address.

All Scans (continued)

Encounter-Level E-Signatures: (continued)

I understand that providing a telephone number and/or email address is not a condition of receiving medical services. I also understand that I may revoke my consent to contact at any time by directly contacting Provider or using the opt-out method that will be identified in the applicable communication. I also understand that it is my responsibility to notify Provider immediately of any change in telephone number or email address.

I confirm that I have read and understood and accept the terms of this document, that I am the patient or patient's representative, and that I am authorized to sign this document and accept its terms.

CMS IM for Patient Signature (E-Sig) - Received on 6/12/2018

DEPARTMENT OF HEALTH AND HUMAN SERVICES
Centers for medicare & Medicaid Services
OMB Approval No. 0938-0692

AN IMPORTANT MESSAGE FORM MEDICARE ABOUT YOUR RIGHTS

AS A HOSPITAL INPATIENT, YOU HAVE THE RIGHT TO:

Receive Medicare covered services. This includes medically necessary hospital services and services you may need after you are discharged, if ordered by your doctor. You have a right to know about these services, who will pay for them, and where you can get them.

- Be involved in any decisions about your hospital stay, and know who will pay for it.
- Report any concerns you have about the quality of care you receive to KEPRO:
  1-844-455-8708
  KEPRO, 5201 W. Kennedy Blvd., Suite 900, Tampa, FL 33609

YOUR MEDICARE DISCHARGE RIGHTS

Planning For Your Discharge: During your hospital stay, the hospital staff will be working with you to prepare for your safe discharge and arrange for services you may need after you leave the hospital. When you no longer need inpatient hospital care, your doctor or the hospital staff will inform you of your planned discharge date.

If you think you are being discharged too soon:

- You can talk to the hospital staff, your doctor and your managed care plan (if you belong to one) about your concerns.
- You also have the right to an appeal, that is, a review of your case by KEPRO. This reviewer was hired by Medicare to look at your case to decide whether you are ready to leave the hospital.
  - **If you want to appeal, you must contact KEPRO no later than your planned discharge date and before you leave the hospital.**
  - If you do this, you will not have to pay for the services you receive during the appeal (except for charges like copays and deductibles).
- If you do not appeal, but decide to stay in the hospital past your planned discharge date, you may have to pay for any services you receive after that date.
- **Step by step instructions for calling the KEPRO and filing an appeal are on page 2.**

To speak with someone at the hospital about this notice, call (770) 443-7068.

Please sign and date here to show you received this notice and understand your rights.

Patient Name

L. D ma

CMS-R-193 (approved 07/10)
WMG Cardiovascular Medicine Hiram
An Important Message from Medicare
About Your Rights

STEPS TO APPEAL YOUR DISCHARGE

- **STEP 1:** You must contact the KEPRO no later than your planned discharge date and before you leave the hospital. If you do this, you will not have to pay for the services you receive during the appeal (except for charges like copays and deductibles).
  - Here is the contact information: 1-844-455-8708

All Scans (continued)

Encounter-Level E-Signatures: (continued)

KEPRO, 5201 W. Kennedy Blvd., Suite 900, Tampa, FL 33609

- You can file a request for an appeal any day of the week. Once you speak to someone or leave a message, your appeal has begun.
- Ask the hospital if you need help contacting KEPRO.
- The name of this hospital is **WMG Cardiovascular Medicine Hiram 110042**

- **STEP 2:** You will receive a detailed notice from the hospital or your Medicare Advantage or other Medicare managed care plan (if you belong to one) that explains the reasons they think you are ready to be discharged.

- **STEP 3:** The KEPRO will ask for your opinion. You or your representative need to be available to speak with KEPRO, if requested. You or your representative may give KEPRO a written statement, but you are not required to do so.

- **STEP 4:** The KEPRO will review your medical records and other important information about your case.

- **STEP 5:** KEPRO will notify you of its decision within 1 day after it receives all necessary information.
  - If KEPRO finds that you are not ready to be discharged, Medicare will continue to cover your hospital services.
  - If KEPRO finds you are ready to be discharged, Medicare will continue to cover your services until noon of the day after KEPRO notifies you of its decision.

IF YOU MISS THE DEADLINE TO APPEAL, YOU HAVE OTHER APPEAL RIGHTS:

- You can still ask the KEPRO or your plan (if you belong to one) for a review of your case:
  - If you have Original Medicare: Call the KEPRO listed above.
  - If you belong to a Medicare Advantage Plan or other Medicare managed care plan: Call your plan.

- If you stay in the hospital, the hospital may charge you for any services you receive after your planned discharge date.

For more information, call 1-800-MEDICARE (1-800-633-4227), or TTY: 1-877-486-2048.
Additional Information: I have received my second notice and understand my appeal rights.

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0938-0692. The time required to complete this information collection is estimated to average 15 minutes per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. Reason for Exam:	amiodarone tx

XR CHEST PA AND LATERAL (2 VIEWS) [749935510] Resulted: 06/15/18 1512, Result status: Final result

Order status: Completed Resulted by: Timothy S Hanes, MD
Filed by: Interface, Rad Powerscribe 06/15/18 1514 Performed: 06/15/18 1122 - 06/15/18 1129
Accession number: 29698821 Result details
Narrative:
EXAM: PIC XR CHEST PA AND LATERAL (2 VIEWS)

CLINICAL INDICATION: R06.02 (Shortness of breath)
amiodarone tx.

COMPARISON: No comparisons are available at this time.

FINDINGS: Lung volumes are somewhat low there is mild pulmonary vascular congestion. There is some mild blunting of the posterior sulcus on the right. Post CABG changes noted. Lungs are otherwise clear.

Impression:

Mild CHF pattern.

Date of Service: 6/22/2018 11:23 AM

Author Type: Registered Nurse
Status: Signed

Patient is awake, a/o x 4, denies pain. Patient d/c from Kennestone yesterday for anemia, received blood, GI bleed, and UTI, is taking Eliquis. Found old ulcers with EGD. Patient stated that prior to d/c Eliquis was stopped for one day and took yesterday at 1900, did not take today. Woke up at 3:00am today, blew nose and it started to bleed. Had a constant flow of blood until 7:00am then it stopped for one hour then started again. Patient noted to have packed both nares with gauze and pulled them out, large clots noted, however, bleeding continues with bright red blood. Condition stable.

Patient Education

Education

Title: Diabetes (MCB) (Not Started)

Topic: Psycho/Social/Spiritual Support (Not Started)

Point: Stress Management and Support Systems (Not Started)

Description:
Explain the importance of stress management and support systems in diabetes management. Refer to WellStar diabetes support groups, social services, case management or spiritual care, if needed.

Learner Progress: Not documented in this visit.

Point: Anxiety Reduction (Not Started)

Description:
Explain the definition of anxiety, signs and symptoms, and examples of ways to reduce anxiety. Inform patient that Spiritual Care and Social Services are available.

Learner Progress: Not documented in this visit.

Topic: Treatments/Procedures (MCB) (Not Started)

Point: Introduction to Diabetes (MCB) (Not Started)

Description:
Give patient/family/caregiver written information on diabetes. Explain the definition of the type of diabetes with which the patient was diagnosed, how diabetes works in the body, risk factors, signs and symptoms, and if newly diagnosed, diagnostic criteria. Encourage viewing of diabetes on-demand videos when applicable. Refer to inpatient diabetes educator when applicable.

Patient Friendly Description:
You will receive a booklet entitled Diabetes survival skills. There are also two links to documents about Diabetes for you to read over noted below.

Please read over the items and let anyone on your Care Team know there are any questions about the material by marking below that "I HAVE QUESTIONS".

If once you have received the items and understand the material you can mark this as "I understand".
Learner Progress: Not documented in this visit.

Point: Diabetes Type II management (MCB) (Not Started)

Description:
Patient will watch a video that will discuss information on what to expect if they have Diabetes type II.

Patient Education (continued)

Education (continued)

Patient Friendly Description:
This will inform you of what to expect if you have Diabetes type II.
Learner Not documented in this visit.
Progress:

Point: Diabetic long term complications (MCB) (Not Started)

Description:
Patient will have information from Krames on the long term complications of Diabetes Type II.

Patient Friendly Description:
Some information on the long term complications of Diabetes Type II.
Learner Not documented in this visit.
Progress:

Topic: Medications (MCB) (Not Started)

Point: Insulin (MCB) (Not Started)

Description:
Educate patient/family/caregiver on the insulin prescribed. Explain how insulin works in the body. Explain the action of insulin, reason for taking, side effects, signs of allergic reaction and when physician should be called. Reinforce that insulin should be taken exactly as the physician has prescribed. Explain the proper storage of insulin, that extreme temperatures can damage insulin and never take insulin that has expired. Explain that the patient's primary care physician may change the dosage depending on the results of blood glucose tests and/or A1C level.

Patient Friendly Description:
This will inform you of why you are prescribed insulin if you have Diabetes Type II.
Learner Not documented in this visit.
Progress:

Point: Hypoglycemic Agents (Not Started)

Description:
Educate patient/family/caregiver on the oral and/or injectable hypoglycemic(s) prescribed. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, as well as when the physician should be called. Reinforce that this medication(s) should be taken exactly as the physician has prescribed.

Learner Not documented in this visit.
Progress:

Point: Giving Insulin Injection (Not Started)

Description:
Explain and demonstrate how the injection is given. Allow enough time for the patient/family/caregiver to practice. Have the patient return-demonstrate the technique using normal saline (vial and syringe only unless sterile demonstration pen is also available). Teach the patient how to choose and rotate injection sites. Instruct patient on safe disposal of used needles and syringes.
Learner Not documented in this visit.
Progress:

Point: Drawing up Insulin (Not Started)

Description:
Instruct patient/family/caregiver to wash hands before drawing up insulin. Demonstrate and have the patient return-demonstrate drawing up the correct amount of insulin prescribed. If the patient is going to use an insulin pen, demonstrate use and have the patient return-demonstrate. If the patient is going to mix different types of insulin, demonstrate and have the patient return-demonstrate the correct way to draw up and mix the insulin.

Learner Not documented in this visit.
Progress:

Topic: Self Care (MCB) (Not Started)

Point: Exercise (Not Started)

Description:
Encourage patient/family/caregiver to discuss activity limitations, if any, with physician before starting an exercise routine. Stress the importance of regular exercise and activity to control blood sugar levels and weight. Instruct the patient to carry single carohydrates while exercising in case of hypoglycemic reaction. Explain that both concentrated physical activity (such as walking, swimming, running, cycling, strength training) and being more active through the entire day are equally important to blood sugar control and weight management.

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Point: Blood Glucose Monitoring (MCB) (Not Started)

Description:
Instruct patient/family/caregiver to wash hands before checking blood glucose. Explain and, if possible to use a complementary glucometer, demonstrate how to check and record blood sugars. Instruct the patient to check blood sugars as frequently as ordered by the physician. Explain that stress or illness will increase blood sugar, making it necesary to check blood sugars more often than usual. Instruct patient on blood glucose target ranges and A1C target range. Discuss care of the meter and supplies, including how to obtain supplies. If using a complementary glucometer, have the patient return-demonstrate checking the blood sugar. Instruct the patient on safe disposal of lancets. Refer to inpatient diabetes educator if applicable.

Patient Friendly Description:
Why is it important to check my blood sugar?

Learner Progress: Not documented in this visit.

Point: Diabetic Foot Care (MCB) (Not Started)

Description:
Explain importance of foot care. Patient should have feet examined by a health care provider at least twice a year. Persons with foot problems should have feet examined at every visit. Explain daily foot care. Review importance of wearing well-fitting shoes and stockings/socks. Reinforce the importance of wearing shoes, even indoors, to prevent injury.

Patient Friendly Description:
This will inform you of why you should check your feet if you have diabetes.

Learner Progress: Not documented in this visit.

Point: Diabetes Identification Jewelry (Not Started)

Description:
Encourage the patient to wear a piece of jewelry that identifies patient as a person with diabetes. This will inform medical personnel that patient has diabetes if unable to communicate.

Learner Progress: Not documented in this visit.

Topic: Prevention/Discharge (Not Started)

Point: Signs and Symptoms of Hypoglycemia (Not Started)

Description:
Define and explain causes of hypoglycemia. Discuss signs and symptoms.

Learner Progress: Not documented in this visit.

Point: Treatment of Hypoglycemia (Not Started)

Description:
Instruct the patient on how to treat low blood sugar using the Rule of 15. Encourage patient to carry a blood sugar treatment at all time.

Learner Progress: Not documented in this visit.

Point: When to Call the Doctor (Not Started)

Description:
Instruct the patient/family/caregiver to call their health care provider if there are symptoms of hypo- or hyperglycemia or if blood sugars are trending high or low and are not controlled by simple measures.

Learner Progress: Not documented in this visit.

Point: Signs and Symptoms of Hyperglycemia (Not Started)

Description:
Define and explain causes of hyperglycemia. Discuss signs and symptoms (mild, moderate, severe, and ketoacidosis).

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Point: Prevention of Hyperglycemia (Not Started)

Description:
Encourage patient/family/caregiver to follow healthcare providers' instructions for diet, activity and medications. Explain the importance of good diabetes management and learning to detect and treat hyperglycemia early before it worsens. Refer to registered dietitian, when applicable, for meal planning assistance.

Learner Progress: Not documented in this visit.

Point: Prevention of Hypoglycemia (Not Started)

Description:
Encourage patient/family/caregiver to follow healthcare providers' instructions for diet, activity and medications. Explain the importantce of good diabetes management and learning to detect and treat hypoglycemia early before it worsens.

Learner Progress: Not documented in this visit.

Point: WellStar Outpatient Diabetes Education (Not Started)

Description:
Provide information on WellStar Outpatient Diabetes Education when applicable. Information includes a list of classes offered and how to register.

Learner Progress: Not documented in this visit.

Point: Follow-up Appointments (Not Started)

Description:
Give the patient/family written information on when to make follow-up appointments. Reinforce importance of making and keeping the appointments. If appointments were made during the visit, give the patient a written reminder of the time and location.

Learner Progress: Not documented in this visit.

Topic: Diabetic Diet (MCB) (Not Started)

Point: Meal Planning and Portion Sizes (MCB) (Not Started)

Description:
The patient will view documents in Krames talking about meal planning as well learning about serving and portion sizes.

Patient Friendly Description:
This will inform you of ways to stay on track with your diet.

Learner Progress: Not documented in this visit.

Point: Eating well with Diabetes (MCB) (Not Started)

Description:
Patient will watch a video on healthy eating for people with DM.

Patient Friendly Description:
Healthy eating for people with Diabetes.

Learner Progress: Not documented in this visit.

Point: Carbohydrate Counting (MCB) (Not Started)

Description:
Patient will read Krames documents on healthy meals and meal planing for Diabetes.

Patient Friendly Description:
Learn about counting your carbohydrates.

Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Topic: Survival Skills (Not Started)

Point: Review Diagnosis (Not Started)

Description:
Review the diabetes disagnosis, specific to patient's diabetes type.
Diabetes Survival Skills Booklet provided.

Patient Friendly Description:
.

Learner Progress: Not documented in this visit.

Point: Nutrition (Not Started)

Description:
Importance of consistent nutrition habits.

Learner Progress: Not documented in this visit.

Point: Appointments (Not Started)

Description:
Importance of follow up appointment with the health care provider who will provide diabetes care after discharge.

Learner Progress: Not documented in this visit.

Point: Sick Day (Not Started)

Description:
Sick day management

Learner Progress: Not documented in this visit.

Point: Insulin Administration (if applicable) (Not Started)

Description:
Insulin administration and proper use and disposal of needles and syringes. How to schedule outpatient diabetes education. Review self-monitoring of blood glucose and home blood glucose goals.

Learner Progress: Not documented in this visit.

Point: Hyperglycemia (Not Started)

Description:
Definition, recognition, treatment and prevention of hyperglycemia.

Learner Progress: Not documented in this visit.

Point: Hypoglycemia (Not Started)

Description:
Definition, recognition, treatment and prevention of hypoglycemia.

Learner Progress: Not documented in this visit.

Point: Glucose Lowering Medications (Not Started)

Description:
When and how to take blood glucose-lowering medications.

Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Topic: Diabetes Zones for Management (Not Started)

Point: Diabetes Zones for Management reviewed (Not Started)

Description:
Diabetes Zones for Management reviewed.

Learner Progress: Not documented in this visit.

Point: Diabetes Zones for Management handout provided (Not Started)

Description:
Diabetes Zones for Management handout provided.

Learner Progress: Not documented in this visit.

Title: Cardiac Arrhythmia (MCB) (Not Started)

Topic: Treatment for Atrial Fibrillation/Atrial Flutter (MCB) (Not Started)

Point: Chemical cardioversion (MCB) (Not Started)

Description:
Provide written education on why and how a chemical cardioversion is done. As well as accociated risks.

Patient Friendly Description:
Why and how a chemical cardioversion is done and associated risks.

Learner Progress: Not documented in this visit.

Point: Electrical cardioversion (MCB) (Not Started)

Description:
Provide written education on why and how an electrical cardioversion is done. As well as accociated risks.

Patient Friendly Description:
Why and how a electrical cardioversion is done and associated risks.

Learner Progress: Not documented in this visit.

Point: Ablation (MCB) (Not Started)

Description:
Provide written education on the catheter ablation procedure and discharge instructions.

Patient Friendly Description:
How an ablation is done, and what to do after the procedure.

Learner Progress: Not documented in this visit.

Topic: Prevention/Discharge (MCB) (Not Started)

Point: Anticoagulation (MCB) (Not Started)

Description:
Provide written education on anticoagulation use including contraindications, side effects, interactions, and medication safety.

Patient Friendly Description:
Information on taking blood thinners safely.

Learner Progress: Not documented in this visit.

Point: Discharge with A Fib/Flutter (MCB) (Not Started)

Patient Education (continued)

Education (continued)

Description:
Provide written education on treatment options, home care, and follow up care for discharging with atrial fibrillation.

Patient Friendly Description:
Information on treatment options, home care, and when to call your healthcare provider after going home with atrial fibrillation/flutter.
Learner Progress: Not documented in this visit.

Point: Atrial fib/flutter: stroke prevention (MCB) (Not Started)

Description:
"Provide written education on risk factors, medication, and prevention of A. Fib.
Hyperlink education materials provided to patient/family/caregiver. "

Patient Friendly Description:
Preventing stroke caused by A. Fib.
Learner Progress: Not documented in this visit.

Topic: What is atrial fibrillation/flutter (MCB) (Not Started)

Point: You have atrial fibrillation (MCB) (Not Started)

Description:
Provide video education on the signs/symptoms of A. Fib, causes, medication(s), risk factors, prevention, and treatment.

Patient Friendly Description:
What to expect if you are diagnosed with A. Fib: causes, symptoms, and treatment.
Learner Progress: Not documented in this visit.

Point: You have Atrial Flutter (MCB) (Not Started)

Description:
Provide written education on the signs/symptoms of A. Flutter, causes, medication(s), risk factors, prevention, and treatment.

Patient Friendly Description:
What to expect if you are diagnosed with A. Flutter: causes, symptoms, and treatment
Learner Progress: Not documented in this visit.

Title: MyChart Bedside Teaching completed (Not Started)

Points For This Title

Point: All MCB content reviewed with patient and teachback completed. The patient verbalized understanding. (Not Started)

Description:
Go over all the Eduction for the patient in the Education activity. The Education that was provided to the patient via MCB was included as well as education that was noted within the Eduction activity as Education that was beneifical to the patient during this hospital stay.

Learner Progress: Not documented in this visit.

Title: Coronary Artery Disease (MCB) (Not Started)

Topic: WS Cardiac Rehabilitation for Arrhythmia (MCB)--This is CAD and AMI Cardiac Rehab Program Information for the Patient (Not Started)

Point: Exercise for a Healthier Heart (MCB) (Not Started)

Description:
Explain how exercising regularly offers many health rewards. Provide exercise tips to beginning a new exercise routine; Set Small goals and aim for 150 minutes a week.

Patient Friendly Description:
This provides healthy heart tips on why exercise is important.

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Point: WellStar Cardiac Rehabilitation Program (MCB) (Not Started)

Description:
At WellStar, our cardiac rehab patients are individually assessed to review medical history, evaluate risk factors, analyze functional abilities and set goals. Ongoing assessments are conducted to ensure patients are making progress toward their goals, educational needs are being met, and any problems or concerns are being addressed with the referring physician.

Patient Friendly Description:
This will help you better understand Cardiac Rehabilitation. At WellStar, our cardiac rehab programs provide education, supervised exercise, lifestyle modification and emotional support to help patients increase physical fitness, reduce cardiac symptoms and improve health and wellbeing.
Learner Progress: Not documented in this visit.

Point: Cardiac Rehabilitation: Emotional Issue (MCB) (Not Started)

Description:
Explain how having heart disease can be stressful. Encourage patient not to ignore feelings of sadness, worry, and depression. Patient should know when to ask for help and/or support.

Patient Friendly Description:
This will explain some emotional feelings related to heart disease.
Learner Progress: Not documented in this visit.

Topic: Heart Healthy Diet- DASH Diet (MCB) (Not Started)

Point: Eating Heart Healthy Food: Using DASH Plan (MCB) (Not Started)

Description:
Review diet information and explain that eating a low salt, low fat and low cholesterol diet with plenty of fruits and vegetables can reduce risk of complications from CAD.

Patient Friendly Description:
This will help you follow a healthy eating plan that can reduce your risk of complications associated with Coronary Artery Disease.

Please watch video/read over the material and let anyone on your Care Team know if there are any questions by marking below.

If you understand all material, mark I understand below.
Learner Progress: Not documented in this visit.

Topic: Questions your patient may have for you (MCB) (Not Started)

Point: Questions your patient may have about the AMI (MCB) (Not Started)

Description:
This is information about diet, exercise and medications for patients and it encourages them to ask staff questions.

Patient Friendly Description:
After reading this, you can write down any questions that you have for staff under the Notes section as a reference.
Learner Progress: Not documented in this visit.

Topic: Coronary Artery Disease (MCB) (Not Started)

Point: Recognizing signs and symptoms of Heart Disease (MCB) (Not Started)

Description:
Provide written education on the signs/symptoms of CAD, causes, medication(s), risk factors, prevention and treatment.

Patient Friendly Description:
This will explain some of the causes of Coronary Artery Disease.
Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Point: Understanding Coronary Artery Disease (MCB) (Not Started)

Description:
Give patient written information on CAD. Explain the definition of CAD, causes, signs and symptoms.

Patient Friendly Description:
This will inform you of what to expect if you are diagnosed with Coronary Artery Disease (CAD).

Please watch video/read over the material and let anyone on your Care Team know if there are any questions by marking below.

If you understand all material, mark I understand below.
Learner Not documented in this visit.
Progress:

Topic: Risk factors for Heart Disease (MCB) (Not Started)

Point: Tobacco/Smoking Cessation (MCB) (Not Started)

Description:
Give patient written information on Quitting Smoking

Educate the patient/family/caregiver on smoking cessation and smoking cessation programs offered in the community. Explain effects smoking and second hand smoke have on the body. Encourage the patient to ask people that smoke around him/her to smoke outside or in another room. Refer patient to Cardiopulmonary Rehabilitation, if applicable.

Patient Friendly Description:
This will give you some getting started tips to kick the smoking habit.

This will help you plan how to quit the smoking habit.
Learner Not documented in this visit.
Progress:

Title: First-Dose Education (Not Started)

Points For This Title

Point: hydralazine HCl (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Not documented in this visit.
Progress:

Point: Iohexol (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Point: dextrose (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: dextrose 50 % in water (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: calcium carbonate (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: morphine sulfate (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: hydrocodone/acetaminophen (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: acetaminophen (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: labetalol HCl (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: metoclopramide HCl (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Point: furosemide (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: gentamicin sulfate (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: diphenhydramine HCl (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: 0.9 % sodium chloride (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: piperacillin sodium/tazobactam (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: insulin lispro (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: ondansetron (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: glucagon,human recombinant (Not Started)

Patient Education (continued)

Education (continued)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: gadobenate dimeglumine (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: pantoprazole sodium (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: polyethylene glycol 3350 (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: perflutren lipid microspheres (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: fentanyl citrate/PF (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: ondansetron HCl/PF (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Title: Congestive Heart Failure (MCB) (Not Started)

Topic: Psycho/Social/Spiritual Support (Not Started)

Point: Stress Management and Support Systems (Not Started)

Description:
Explain the importance of stress management and support systems in diabetes management. Refer to WellStar diabetes support groups, social services, case management or spiritual care, if needed.

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Point: Anxiety Reduction (Not Started)

Description:
Explain the definition of anxiety, signs and symptoms, and examples of ways to reduce anxiety. Inform patient that Spiritual Care and Social Services are available.

Learner Progress: Not documented in this visit.

Topic: Treatments/Procedures (MCB) (Not Started)

Point: Oxygen (Not Started)

Description:
Educate patient/family/caregiver on why oxygen is needed and how it will be delivered (nasal cannula, mask, etc.). Instruct patient/family/caregiver that the patent should not be smoking while on oxygen.

Learner Progress: Not documented in this visit.

Point: Medical Equipment (Not Started)

Description:
Educate patient/family/caregiver on use of medical equipment and provide educational materials.

Learner Progress: Not documented in this visit.

Point: Introduction to Heart Failure (MCB) (Not Started)

Description:
Give patient written information on congestive heart failure. Explain the definition of CHF, causes, signs and symptoms, expected length of stay and criteria for discharge.

Patient Friendly Description:
This will inform you of what to expect if you are diagnosed with heart failure.

You will be receiving the Congestive Heart Failure red booklet.

Please watch video/read over the material and let anyone on your Care Team know if there are any questions by marking below.

If you understand all material, mark I understand below.
Learner Progress: Not documented in this visit.

Point: Echocardiogram (Not Started)

Description:
Educate patient/family/caregiver on echocardiograms, to include: what the test is, how the test will be performed, and what to expect during the test.

Learner Progress: Not documented in this visit.

Topic: Pain Management (Not Started)

Point: Pain Medication Actions & Side Effects (Not Started)

Description:
Provide medication specific handouts when available.

Learner Progress: Not documented in this visit.

Point: Pain Rating Scale (Not Started)

Patient Education (continued)

Education (continued)

Description:
Provide patient with information on the Pain Rating Scale. Explain the rating scale of 0 to 10.

Learner Progress: Not documented in this visit.

Point: Non-Pharmacological Comfort Measures (Not Started)

Description:
Explain there are other ways of controlling pain than medication. The following are suggestions: position change, aromatherapy, deep slow breathing, distraction, quiet environment, imagery, heat therapy and/or cold therapy, laughter, massage, music, physical therapy, and touch therapy.

Learner Progress: Not documented in this visit.

Topic: Self Care (MCB) (Not Started)

Point: Eating well with High Blood Pressure (MCB) (Not Started)

Description:
Information provided to patient to explain what their diet should consist of when they have Heart Failure.

Patient Friendly Description:
This will help you make heart healthy eating choices if you have a diagnosis with heart failure.

Learner Progress: Not documented in this visit.

Point: Heart Failure:Being Active (MCB) (Not Started)

Description:
Explain to the patient how to be active with heart failure.

Patient Friendly Description:
This will explain how to safely be active with heart failure.

Learner Progress: Not documented in this visit.

Point: Heart Failure: Dealing with Sleep problems (MCB) (Not Started)

Description:
Provide tips and ideas to help patient sleep better.

Patient Friendly Description:
This will provide tips on sleeping better with heart failure.

Learner Progress: Not documented in this visit.

Point: Heart Failure: Know your Baselines (MCB) (Not Started)

Description:
Explain to patient how to identify their baseline and recognize changes.

Patient Friendly Description:
This will help you understand what's normal for you and how to watch for changes.

Learner Progress: Not documented in this visit.

Point: Heart Failure : Know your Zones (Not Started)

Description:
Review heart failure zones with patient and educate them on how to know which zone they are in each day.

Learner Progress: Not documented in this visit.

Point: Dealing with Heart Failure: Helping the patient cope (MCB) (Not Started)

Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Point: Daily Weights (MCB) (Not Started)

Description:
Give written information about daily weights. Instruct the patient to weigh on the same scale every day at the same time, wearing the same amount of clothing. Explain why it is important to check weight. Inform the patient that gaining weight from fluid build up may be an early sign that heart failure is getting worse. The patient should call a care provider if there is a weight gain of more than 2-3 pounds in one day or 4-5 pounds in five days.

Patient Friendly Description:
Information on the importance of Daily weights.

Learner Progress: Not documented in this visit.

Point: How to check your Heart Rate and Blood Pressure (MCB) (Not Started)

Description:
Give patient written information on how to take a pulse. Explain the definition of a pulse, normal range, reason for taking a pulse, where pulses can be found. Demonstrate how to find a pulse. Once found, instruct the patient to count the beats for a full minute. Tell the patient to keep a record of the pulse rate, date and time taken, which site (right/left, wrist/neck) and strength of beats (weak, strong or missing beats).

Patient Friendly Description:
This will explain the importance of understanding your vital signs and show you how to take them.

Learner Progress: Not documented in this visit.

Topic: WellStar Cardiac Rehabilitation (MCB) (Not Started)

Point: Exercise for a Healthier Heart (MCB) (Not Started)

Description:
Explain how exercising regularly offers many health rewards. Provide exercise tips to beginning a new exercise routine; Set Small goals and aim for 150 minutes a week.

Patient Friendly Description:
This provides healthy heart tips on why exercise is important.

Learner Progress: Not documented in this visit.

Point: WellStar Cardiac Rehabilitation Program (MCB) (Not Started)

Description:
At WellStar, our cardiac rehab patients are individually assessed to review medical history, evaluate risk factors, analyze functional abilities and set goals. Ongoing assessments are conducted to ensure patients are making progress toward their goals, educational needs are being met, and any problems or concerns are being addressed with the referring physician.

Patient Friendly Description:
This will help you better understand Cardiac Rehabilitation. At WellStar, our cardiac rehab programs provide education, supervised exercise, lifestyle modification and emotional support to help patients increase physical fitness, reduce cardiac symptoms and improve health and wellbeing.

Learner Progress: Not documented in this visit.

Topic: Review Plan of Care (Not Started)

Point: Review Plan of Care - Day 5 (Not Started)

Description:
Review plan of care including provider roles, health history, IV and medications, labs and tests, and discharge planning. Take extra time to reiterate to patient that he/she may ask questions at any time and should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time.

Learner Progress: Not documented in this visit.

Point: Review Plan of Care - Day 1 (Not Started)

Description:
Review plan of care including provider roles, health history, IV and medications, labs and tests, and discharge planning. Take extra time to reiterate to patient that he/she may ask questions at any time and should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time.

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Point: Review Plan of Care - Day 2 (Not Started)

Description:
Review plan of care including provider roles, health history, IV and medications, labs and tests, and discharge planning. Take extra time to reiterate to patient that he/she may ask questions at any time and should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time.

Learner Progress: Not documented in this visit.

Point: Review Plan of Care - Day 3 (Not Started)

Description:
Review plan of care including provider roles, health history, IV and medications, labs and tests, and discharge planning. Take extra time to reiterate to patient that he/she may ask questions at any time and should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time.

Learner Progress: Not documented in this visit.

Point: Review Plan of Care - Day 4 (Not Started)

Description:
Review plan of care including provider roles, health history, IV and medications, labs and tests, and discharge planning. Take extra time to reiterate to patient that he/she may ask questions at any time and should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time.

Learner Progress: Not documented in this visit.

Topic: Medications (MCB) (Not Started)

Point: Heart Failure Medications (MCB) (Not Started)

Description:
Educate patient on the drug type, purpose for medication, and common side effects.

Educate patient on Prescribed Medications

Patient Friendly Description:
This will inform you of medications that you may be taking if you are diagnosed with Heart Failure.

Learner Progress: Not documented in this visit.

Point: ACE Inhibitors (Not Started)

Description:
Educate patient/family/caregiver on the ACE Inhibitor prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Angiotensin II Receptor Blockers (Not Started)

Description:
Educate patient/family/caregiver on the Angiotensin II Receptor Blockers prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Aspirin (Not Started)

Patient Education (continued)

Education (continued)

Description:
Give patient written information on Aspirin. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the doctor should be called. Reinforce that this medication should be taken exactly as the doctor has prescribed.

Learner Progress: Not documented in this visit.

Point: Beta Blockers (Not Started)

Description:
Educate patient/family/caregiver on the Beta Blocker prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Digoxin (Not Started)

Description:
Educate patient/family/caregiver on Digoxin and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed. The physician will order a blood test to monitor the concentration of the drug in the patient's blood. The dose of this medication may be changed according to the results of this test.

Learner Progress: Not documented in this visit.

Point: Diuretics (Not Started)

Description:
Educate patient/family/caregiver on the Diuretic prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Inotropes (Not Started)

Description:
Educate patient/family/caregiver on the Inotropes prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Vasodilators (Not Started)

Description:
Educate patient/family/caregiver on the Vasodilator prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Topic: Prevention / Discharge (MCB) (Not Started)

Point: Community Resources (Not Started)

Description:
Give written information on available community resources. Refer to Social Services or Case Management, if needed.

Learner Progress: Not documented in this visit.

Point: Home Health Care Services (Not Started)

Patient Education (continued)

Education (continued)

Description:
Give patient written information on Home Health Care Services that have been arranged. Review the role of the home care nurse and when to expect the first visit. Refer to Case Management or Social Services, if needed.

Learner Progress: Not documented in this visit.

Point: Follow-up Appointments (Not Started)

Description:
Give the patient/family written information on their next appointment and when to make follow-up appointments. Reinforce importance of making and keeping the appointments. If appointments were made during the visit, give the patient a written reminder of the time and location.

Learner Progress: Not documented in this visit.

Point: Influenza Vaccine (Not Started)

Description:
Educate the patient/family/caregiver on obatining a yearly influenza vaccine.

Learner Progress: Not documented in this visit.

Point: Discharge Medications (Not Started)

Description:
Ensure that there are no barriers to obtain medications prior to discharge. Notify Care Coordination if there are any needs for additional resources prior to discharging the patient.

Learner Progress: Not documented in this visit.

Point: When to Call the Doctor (MCB) (Not Started)

Description:
Provide written documentation instructing the patient to call the doctor if the patient has:

1. Ankles and legs that become more swollen.
2. Shoes and socks that get tight suddenly.
3. Shortness of breath that does not go away with rest.
4. Weight gain of 2 - 3 pounds in one day.
5. Weight gain of 4 - 5 pounds in one week.
6. No energy for normal activities.
7. Dizziness or weakness.
8. Yellowish or blue green vision.
9. Heartbeat changes (feels like a butterfly in the chest).
10. Chest pain.
11. Blurred vision.
12. Passing out.
13. Cough that does not go away.

Patient Friendly Description:
Heart Failure symptoms to know and when to call your healthcare provider.
Lifestyle changes to help you feel and live better with Heart Failure.
Learner Progress: Not documented in this visit.

Point: Review Discharge Plan (Not Started)

Description:
Review the discharge plan with patient and primary care giver including: diet, activity, medications, and special precautions. Refer to Case Management, if needed.

Learner Progress: Not documented in this visit.

Point: Smoking Cessation (Not Started)

Description:
Educate the patient/family/caregiver on smoking cessation and smoking cessation programs offered in the community. Explain effects smoking and second hand smoke have on the body. Encourage the patient to ask people that smoke around him/her to smoke outside or in another room. Refer patient to Cardiopulmonary Rehabilitation, if applicable.

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Point: Diet Instructions for CHF Prevention (Not Started)

Description:
Review diet information and explain that eating a low fat and low cholesterol diet with plenty of fruits and vegetables can reduce their chance of suffering a future heart attack.

Learner Progress: Not documented in this visit.

Topic: Heart Failure Discharge Instructions (Not Started)

Point: Follow-up Appointments (Not Started)

Description:
Give the patient/family written information on their next appointment and when to make follow-up appointments. Reinforce importance of making and keeping the appointments. If appointments were made during the visit, give the patient a written reminder of the time and location.

Learner Progress: Not documented in this visit.

Point: Daily Weights (MCB) (Not Started)

Description:
Give written information about daily weights. Instruct the patient to weigh on the same scale every day at the same time, wearing the same amount of clothing. Explain why it is important to check weight. Inform the patient that gaining weight from fluid build up may be an early sign that heart failure is getting worse. The patient should call a care provider if there is a weight gain of more than 2-3 pounds in one day or 4-5 pounds in five days.

Patient Friendly Description:
Information on the importance of Daily weights.

Learner Progress: Not documented in this visit.

Point: When to Call the Doctor (MCB) (Not Started)

Description:
Provide written documentation instructing the patient to call the doctor if the patient has:

1. Ankles and legs that become more swollen.
2. Shoes and socks that get tight suddenly.
3. Shortness of breath that does not go away with rest.
4. Weight gain of 2 - 3 pounds in one day.
5. Weight gain of 4 - 5 pounds in one week.
6. No energy for normal activities.
7. Dizziness or weakness.
8. Yellowish or blue green vision.
9. Heartbeat changes (feels like a butterfly in the chest).
10. Chest pain.
11. Blurred vision.
12. Passing out.
13. Cough that does not go away.

Patient Friendly Description:
Heart Failure symptoms to know and when to call your healthcare provider.
Lifestyle changes to help you feel and live better with Heart Failure.

Learner Progress: Not documented in this visit.

Point: Review Discharge Plan (Not Started)

Description:
Review the discharge plan with patient and primary care giver including: diet, activity, medications, and special precautions. Refer to Case Management, if needed.

Learner Progress: Not documented in this visit.

Point: Diet Instructions for CHF Prevention (Not Started)

Patient Education (continued)

Education (continued)

Description:
Review diet information and explain that eating a low fat and low cholesterol diet with plenty of fruits and vegetables can reduce their chance of suffering a future heart attack.

Learner Progress: Not documented in this visit.

Title: General Patient Education (MCB) (Not Started)

Topic: Psycho/Social/Spiritual Support (Not Started)

Point: Stress Management and Support Systems (Not Started)

Description:
Explain the importance of stress management and support systems in diabetes management. Refer to WellStar diabetes support groups, social services, case management or spiritual care, if needed.

Learner Progress: Not documented in this visit.

Point: Anxiety Reduction (Not Started)

Description:
Explain the definition of anxiety, signs and symptoms, and examples of ways to reduce anxiety. Inform patient that Spiritual Care and Social Services are available.

Learner Progress: Not documented in this visit.

Topic: Pain Management (MCB) (Not Started)

Point: Encourage Patient to Monitor Own Pain (Not Started)

Description:
Provide patient with information on the Pain Rating Scale. Explain the rating scale of 0 to 10.

Learner Progress: Not documented in this visit.

Point: Discuss Significance of VAS Scores (Not Started)

Description:
Refer to rating score of 0-10.

Learner Progress: Not documented in this visit.

Point: Discuss the Use of Pain Control Measures Before Pain Becomes Severe (MCB) (Not Started)

Description:
Take time to reiterate to patient that he/she should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time before pain becomes severe.

Patient Friendly Description:
Please inform staff that if you are having any difficulty breathing, pain or any discomfort at any time before the pain gets severe.

Please read over the items and let anyone on your Care Team know there are any questions about the material by marking below that "I HAVE QUESTIONS".

If once you have received the items and understand the material you can mark this as "I understand".
Learner Progress: Not documented in this visit.

Topic: Prevention (MCB) (Not Started)

Point: When to Call the Doctor (Not Started)

Patient Education (continued)

Education (continued)

Description:
Educate patient/family/caregiver on when to call the doctor.

Learner Progress: Not documented in this visit.

Point: Protect Others from Infection (Not Started)

Description:
Educate patient/family/caregiver on respiratory hygiene and cough etiquette. To protect from further infection and to protect others from getting an infection, patient should cover nose and mouth with tissues when coughing. Encourage patient to place used tissues in a plastic bag that will not allow secretions to soak through. Patient should always wash his/her hands after using or handling used tissues.

Learner Progress: Not documented in this visit.

Point: Protect Yourself from Further Infection (MCB) (Not Started)

Description:
Educate patient/family/caregiver that because patient is in a weakened condition he/she needs to avoid others who are sick as to not acquire another illness. Family/caregiver should wear gloves, gown and face shield/eye protection.

Patient Friendly Description:
Information on Flu.
Information on Pneumonia and Pneumococcal Vaccination.
Learner Progress: Not documented in this visit.

Point: Falls education, precautions, prevention at home and in the hospital (MCB) (Not Started)

Description:
Patient was given information on preventing falls both while in the hospital and when they are at home.

Patient Friendly Description:
Things to help you prevent falls while you are in the hospital and when you are home.
Learner Progress: Not documented in this visit.

Point: Prevention Deep Vein Thrombosis after surgery (MCB) (Not Started)

Description:
Educate patient/family/caregiver to prevent DVT and PE after Suergery

Patient Friendly Description:
In the days and weeks after surgery, you have a higher chance of developing a deep vein thrombosis (DVT).
This is a condition in which a blood clot or thrombus develops in a deep vein.
They are most common in the leg. But, a DVT may develop in an arm, or another deep vein in the body.
A piece of the clot, called an embolus, can separate from the vein and travel to the lungs.
A blood clot in the lungs is called a pulmonary embolus (PE).
This can cut off the flow of blood to the lungs.
It is a medical emergency and may cause death.
Learner Progress: Not documented in this visit.

Point: Demonstrate Handwashing (MCB) (Not Started)

Description:
Educate patient/family/caregiver on how to perform proper hand hygiene. Explain that hand washing is the single most important step in preventing the spread of germs. Have the patient/family/caregiver demonstrate proper hand washing technique using soap, water, friction, clean nails under running water, and dry hands on clean towel without touching dirty surfaces.

Patient Friendly Description:
This will explain the importance of washing and cleansing your hands to prevent infection.
Learner Progress: Not documented in this visit.

Topic: Self Care (MCB) (Not Started)

Point: General Self Care (Not Started)

Patient Education (continued)

Education (continued)

Description:
Instruct patient on self care needs. These may include: hygiene, how to take a blood pressure, how to change a dressing, etc.

Learner Progress: Not documented in this visit.

Point: Demonstrate Handwashing (MCB) (Not Started)

Description:
Educate patient/family/caregiver on how to perform proper hand hygiene. Explain that hand washing is the single most important step in preventing the spread of germs. Have the patient/family/caregiver demonstrate proper hand washing technique using soap, water, friction, clean nails under running water, and dry hands on clean towel without touching dirty surfaces.

Patient Friendly Description:
This will explain the importance of washing and cleansing your hands to prevent infection.

Learner Progress: Not documented in this visit.

Topic: Medications (MCB) (Not Started)

Point: Antibiotic Education (Not Started)

Description:
If an antibiotic was prescribed, educate patient/family/caregiver on the antibiotics prescribed. Explain how antibiotics work in the body. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed

If a viral diagnosis was made, the patient/family was educated on their viral diagnosis and the reason for no antibiotic this visit.

Learner Progress: Not documented in this visit.

Point: Anticoagulant Therapy (Not Started)

Description:
1-Educate patient/family/caregiver on anticoagulant being prescribed and provide educational materials.
2-Explain action of medication, reason for taking, and importance of adherence to correct medication dose and schedule.
3-Explain potential for adverse drug reactions, signs of allergic reaction, potential for drug-drug and drug-food interactions, and when physician should be called.
4-Reinforce that the medication should be taken exactly as the physician has prescribed.
5-Explain importance of maintaining follow-up appointments and adhering to laboratory testing as prescribed by physician.
6-Explain that the dose of the anticoagulant being prescribed may change depending on the results of the laboratory testing.

Learner Progress: Not documented in this visit.

Point: Insulin (MCB) (Not Started)

Description:
Educate patient/family/caregiver on the insulin prescribed. Explain how insulin works in the body. Explain the action of insulin, reason for taking, side effects, signs of allergic reaction and when physician should be called. Reinforce that insulin should be taken exactly as the physician has prescribed. Explain the proper storage of insulin, that extreme temperatures can damage insulin and never take insulin that has expired. Explain that the patient's primary care physician may change the dosage depending on the results of blood glucose tests and/or A1C level.

Patient Friendly Description:
This will inform you of why you are prescribed insulin if you have Diabetes Type II.

Learner Progress: Not documented in this visit.

Point: Hypoglycemic Agents (Not Started)

Description:
Educate patient/family/caregiver on the oral and/or injectable hypoglycemic(s) prescribed. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, as well as when the physician should be called. Reinforce that this medication(s) should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Non-Steroidal Anti-Inflammatory Drugs (Not Started)

Patient Education (continued)

Education (continued)

Description:
Educate patient/family/caregiver on the NSAID prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Psychotropic Medications (Not Started)

Description:
Educate patient/family/caregiver on the Psychotropic medication prescribed. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: ACE Inhibitors (Not Started)

Description:
Educate patient/family/caregiver on the ACE Inhibitor prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Angiotensin II Receptor Blockers (Not Started)

Description:
Educate patient/family/caregiver on the Angiotensin II Receptor Blockers prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Beta Blockers (Not Started)

Description:
Educate patient/family/caregiver on the Beta Blocker prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Digoxin (Not Started)

Description:
Educate patient/family/caregiver on Digoxin and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed. The physician will order a blood test to monitor the concentration of the drug in the patient's blood. The dose of this medication may be changed according to the results of this test.

Learner Progress: Not documented in this visit.

Point: Diuretics (Not Started)

Description:
Educate patient/family/caregiver on the Diuretic prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Inotropes (Not Started)

Patient Education (continued)

Education (continued)

Description:
Educate patient/family/caregiver on the Inotropes prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Vasodilators (Not Started)

Description:
Educate patient/family/caregiver on the Vasodilator prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Antibiotics (Not Started)

Description:
Educate patient/family/caregiver on the Antibiotics prescribed. Explain how antibiotics works in the body. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Medication purpose, side effects, schedule, administration (MCB) (Not Started)

Description:
Discussed purpose and possible side effects of medication.

Learner Progress: Not documented in this visit.

CONTINUE taking these medications (continued)

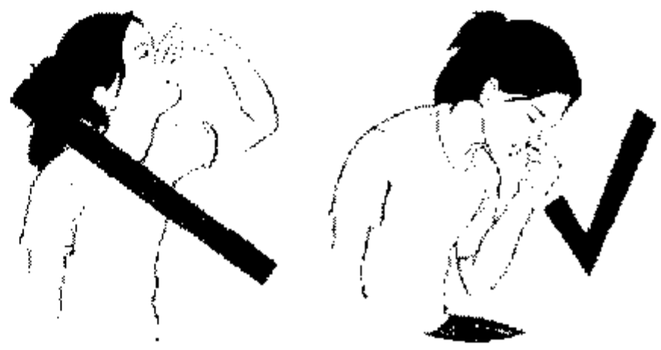
oxymetazoline 0.05 % nasal spray Commonly known as: AFRIN	2 sprays by Nasal route 2 (two) times a day as needed (nose bleed)
pantoprazole 40 MG EC tablet Commonly known as: PROTONIX	Take 1 tablet (40 mg total) by mouth 2 (two) times a day before meals
sotalol 80 MG tablet Commonly known as: BETAPACE	Take 0.5 tablets (40 mg total) by mouth 2 (two) times a day
VITAMIN B12 ORAL	Take 1 tablet by mouth daily

*** DUPLICATE WARNING: This list has medications that are the same as other medications prescribed for you. Read the directions carefully, and ask your doctor or other care provider to review them with you.**

Attached Information

Epistaxis (Adult) (English)

Nosebleed (Adult)



Bleeding from the nose most commonly occurs because of injury or drying and cracking of the inner lining of the nose. Most nosebleeds are because of dry air or nose-picking. They can occur during a common cold or an allergy attack. They can also occur on a very hot day, or from dry air in the winter.

If the bleeding site is found, it may be cauterized. This means it is treated to cause a blood clot to form. This may be done with a chemical, heat, or electricity. If the bleeding continues after the site is cauterized, or if the site cannot be found, packing may be put in your nose. This is to apply pressure and stop the bleeding. The packing may be made of gauze or sponge. A small balloon catheter is sometimes used. These must be removed by your healthcare provider. Some types of packing dissolve on their own. If you are taking blood thinning (anticoagulant) medicine, you may have a blood test.

Home care

- If packing was put in your nose, unless told otherwise, do not pull on it or try to remove it yourself. You will be given an appointment to have it removed. You may also have been given antibiotics to prevent a sinus infection. If so, finish all of the medicine.
- Don't blow your nose for 12 hours after the bleeding stops. This will allow a strong blood clot to form. Don't pick your nose. This may restart bleeding.
- Don't drink alcohol or hot liquids for the next 2 days. Alcohol or hot liquids in your mouth can dilate blood vessels in your nose. This can cause bleeding to start again.

- Don't take ibuprofen, naproxen, or medicines that contain aspirin. These thin the blood and may cause your nose to bleed. You may take acetaminophen for pain, unless another pain medicine was prescribed.
- If the bleeding starts again, sit up and lean forward to prevent swallowing blood. Pinch your nose tightly on both sides, as shown above, for 10 to 15 minutes. Time yourself. Don't release the pressure on your nose until 10 minutes is up. If bleeding does not stop, continue to pinch your nose and call your healthcare provider or return to this facility.
- If you have a cold, allergies, or dry nasal membranes, lubricate the nasal passages. Apply a small amount of petroleum jelly inside the nose with a cotton swab twice a day (morning and night).
- Don't overheat your home. This can dry the air and make your condition worse.
- Put a humidifier in the room where you sleep. This will add moisture to the air. Clean the humidifier as advised by the manufacturer.
- Use a saline nasal spray to keep nasal passages moist.
- Don't pick your nose. Keep fingernails trimmed to decrease risk of bleeds.
- Don't smoke.

Follow-up care

Follow up with your healthcare provider, or as advised. Nasal packing should be rechecked or removed within 2 to 3 days.

When to seek medical advice

Call your healthcare provider right away if any of these occur.

- You have another nosebleed that you cannot control
- Dizziness, weakness, or fainting
- You become tired or confused
- Fever of 100.4°F (38°C) or higher, or as directed by your healthcare provider
- Headache
- Sinus or facial pain
- Shortness of breath or trouble breathing

AN IMPORTANT MESSAGE FORM MEDICARE ABOUT YOUR RIGHTS

AS A HOSPITAL INPATIENT, YOU HAVE THE RIGHT TO:

Receive Medicare covered services. This includes medically necessary hospital services and services you may need after you are discharged, if ordered by your doctor. You have a right to know about these services, who will pay for them, and where you can get them.

- Be involved in any decisions about your hospital stay, and know who will pay for it.
- Report any concerns you have about the quality of care you receive to KEPRO:
  1-844-455-8708
  KEPRO, 5201 W. Kennedy Blvd., Suite 900, Tampa, FL 33609

YOUR MEDICARE DISCHARGE RIGHTS

Planning For Your Discharge: During your hospital stay, the hospital staff will be working with you to prepare for your safe discharge and arrange for services you may need after you leave the hospital. When you no longer need inpatient hospital care, your doctor or the hospital staff will inform you of your planned discharge date.

If you think you are being discharged too soon:

- You can talk to the hospital staff, your doctor and your managed care plan (if you belong to one) about your concerns.
- You also have the right to an appeal, that is, a review of your case by KEPRO. This reviewer was hired by Medicare to look at your case to decide whether you are ready to leave the hospital.
  - **If you want to appeal, you must contact KEPRO no later than your planned discharge date and before you leave the hospital.**
  - If you do this, you will not have to pay for the services you receive during the appeal (except for charges like copays and deductibles).
- If you do not appeal, but decide to stay in the hospital past your planned discharge date, you may have to pay for any services you receive after that date.
- **Step by step instructions for calling the KEPRO and filing an appeal are on page 2.**

To speak with someone at the hospital about this notice, call (770) 443-7068.

Please sign and date here to show you received this notice and understand your rights.

About Your Rights

STEPS TO APPEAL YOUR DISCHARGE

- **STEP 1:** You must contact the KEPRO no later than your planned discharge date and before you leave the hospital. If you do this, you will not have to pay for the services you receive during the appeal (except for charges like copays and deductibles).
  - Here is the contact information: 1-844-455-8708

All Scans (continued)

Encounter-Level E-Signatures: (continued)

KEPRO, 5201 W. Kennedy Blvd., Suite 900, Tampa, FL 33609

- You can file a request for an appeal any day of the week. Once you speak to someone or leave a message, your appeal has begun.
- Ask the hospital if you need help contacting KEPRO.
- The name of this hospital is **WMG Cardiovascular Medicine Hiram 110042**

- **STEP 2:** You will receive a detailed notice from the hospital or your Medicare Advantage or other Medicare managed care plan (if you belong to one) that explains the reasons they think you are ready to be discharged.

- **STEP 3:** The KEPRO will ask for your opinion. You or your representative need to be available to speak with KEPRO, if requested. You or your representative may give KEPRO a written statement, but you are not required to do so.

- **STEP 4:** The KEPRO will review your medical records and other important information about your case.

- **STEP 5:** KEPRO will notify you of its decision within 1 day after it receives all necessary information.
  - If KEPRO finds that you are not ready to be discharged, Medicare will continue to cover your hospital services.
  - If KEPRO finds you are ready to be discharged, Medicare will continue to cover your services until noon of the day after KEPRO notifies you of its decision.

IF YOU MISS THE DEADLINE TO APPEAL, YOU HAVE OTHER APPEAL RIGHTS:

- You can still ask the KEPRO or your plan (if you belong to one) for a review of your case:
  - If you have Original Medicare: Call the KEPRO listed above.
  - If you belong to a Medicare Advantage Plan or other Medicare managed care plan: Call your plan.

- If you stay in the hospital, the hospital may charge you for any services you receive after your planned discharge date.

For more information, call 1-800-MEDICARE (1-800-633-4227), or TTY: 1-877-486-2048.
Additional Information: I have received my second notice and understand my appeal rights.

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0938-0692. The time required to complete this information collection is estimated to average 15 minutes per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have comments concerning the accuracy of the ime estimate(s) or suggestions for improving this form, please write to: CMS, 7500 Security Boulevard, ATTN: PRA Reports Clearance Officer, Mail Stop C4-26-05, Baltimore, MD 21244-1850.

Cobb Eye Center Post-Op Instructions

Activity

- Do not lift anything over 20 pounds.
- No strenuous activity, this includes swimming until your doctor give you permission.
- Driving a car is permitted depending on your vision. Please check with our doctor before you resume driving.
- You may resume all normal daily activities. For example: reading, watching television, walking, and riding in a car or plane.

Medications

- Resume all your daily medications.

General Information

- Wash your hands before treating your operative eye.
- Wear the protective eye shield over your eye at bedtime and naps until otherwise instructed by your doctor. When putting on your glasses, be careful not to hit your eye with the earpiece.
- Do not touch or rub the upper lid of the operative eye at anytime.
- Unless otherwise instructed by your doctor, keep the patch on your operative eye. It will be removed the day after surgery. You will also be given further instructions on the eye drops and caring for your eye.
- On the day of surgery, you will need someone to drive you home from the surgery center and to our office the next day.
- No eye make-up for 1 week.
- Your eye may feel irritated (like sand is in it) for the first 24-48 hours. You may take Tylenol or Advil to control the discomfort. If over the counter medication does not help, please call our office.

Bathing

- You may bathe or shower. You may shampoo your hair the day after surgery. Keep your operative eye protected from soap and water.

Call You Doctor

- Sudden decrease in you vision.
- Increased redness or pain.

Follow-Up Appointment

Discharge Instr - Activity - Encounter Notes (continued)

Discharge Instr - Activity by Kimberly R Swanson, RN at 4/3/2019 11:51 AM (continued)

- Your first follow-up appointment will be the day after surgery.
- Bring all your eye drops to each follow-up visit.

OPERATIVE REPORT

PATIENT: Eugene G Maurice
DOB: 1/2/1949
MRN: 561253820
CSN: 2101351666

DATE OF ADMISSION: **4/3/2019**

DATE OF OPERATION: **4/3/2019**

SURGEON: Bruce P Crowley, MD

PRE-OPERATIVE DIAGNOSIS: Cataract Right eye.

POST-OPERATIVE DIAGNOSIS: Cataract Right eye.

PROCEDURE: Phacoemulsification of a cataract with a posterior chamber intraocular lens, Right eye.

ANESTHESIA: Local MAC

ANESTHEIOLOGIST: Turry

ANESTHETIST: Measel

COMPLICATIONS: None

ESTIMATED BLOOD LOSS: Nil

DESCRIPTION OF PROCEDURE: The patient was prepped and draped in the usual sterile fashion. After Tetracaine was applied, a wire lid speculum was placed into the eye. A 15-degree blade was used to make a paracentesis. Preservative-Free 2% Lidocaine was injected intracamerally as well as topically. Viscoat was used to fill the anterior chamber. A 2.75 keratome was used to enter the anterior chamber at 180-degrees and a circular tear capsulorrhexis was done with Utrata forceps and a cystitome. Balanced salt solution was then used to hydrodissect the nucleus and a Balanced phacoemulsification tip was used in a 2-handed chopping technique with a CDE of 5.99. The irrigation/aspiration machine was then used to remove the remaining cortical material and capsular polishing was not done. Provisc was then used to fill the capsular bag and then

Op Note - Encounter Notes (continued)

Op Note by Bruce P Crowley, MD at 4/3/2019 11:47 AM (continued)

the Alcon Acrysof SN60WF Intraocular lens in a power of 23.00 diopters was inserted into the eye and moved into position within the capsular bag with a Kuglen hook. The I and A was then used to remove the remaining Provisc and vacuum the underside of the anterior capsule where able. The eye was reinflated with a balanced salt solution and the wound was hydrated and found to be watertight. Pilocarpine and Maxitrol were placed in the eye, a shield was placed and the patient was taken to the recovery room in good condition.

PNDS Information

Outcomes - Pre-op

Used?	Description (Code)
Yes	The patient participates in decisions affecting his or her perioperative plan of care. (O23)
Yes	Confirms identity before the operative or invasive procedure. (I26)
Yes	The patient demonstrates knowledge of the expected responses to the operative or invasive procedure. (O31)
Yes	Assesses pain control. (I16)

Outcomes - Intra-op

Used?	Description (Code)
Yes	The patient is free from signs and symptoms of injury caused by extraneous objects. (O2)
Yes	The patient is free from signs and symptoms of injury related to positioning. (O5)
Yes	The patient is free from signs and symptoms of infection. (O10)

Outcomes - Post-op

Used?	Description (Code)
Yes	The patient is at or returning to normothermia at the conclusion of the immediate postoperative period. (O12)
Yes	The patient's respiratory function is consistent with or improved from baseline levels established preoperatively. (O14)
Yes	The patient demonstrates knowledge of pain management. (O20)
Yes	The patient demonstrates knowledge of wound management. (O22)
Yes	The patient demonstrates and/or reports adequate pain control throughout the perioperative period. (O29)

Diagnoses

Anesthesia Encounters

Anesthesia Encounter - Episode ID 34943327

Anesthesia Summary - Maurice, Eugene George [561253820] Male 70 y.o.

Current as of 04/03/19 1150

Height: 67" (1.702 m) (04/03/19)
Weight: 96.6 kg (212 lb 15.4 oz) (04/03/19)
BMI: 33.3 (04/03/19)
NPO Status: 2300
Allergies: No Known Allergies

Procedure Summary

Date: 04/03/19
Room / Location: PH OR 08 / PH MAIN OR
Anesthesia Start: 1126
Anesthesia Stop: 1152
Procedure: CATARACT PHACOEMULSIFICATION IMPLANTATION
Diagnosis:

Anesthesia Encounter - Episode ID 34943327 (continued)

Procedure Summary (continued)

INTRAOCULAR LENS (Right Eye)

Surgeon: Bruce P Crowley, MD
Anesthesia Type: MAC

Nuclear sclerotic cataract of right eye
(Nuclear sclerotic cataract of right eye [H25.11])
Responsible Provider: Paul K Turry, MD
ASA Status: 3

Anesthesia Medical History

Other symptoms involving cardiovascular system	Coronary atherosclerosis of native coronary artery
Family history of ischemic heart disease	Other and unspecified hyperlipidemia
Essential hypertension, benign	PVD (peripheral vascular disease) (HCC)
Obesity	Hypertension
Hyperlipidemia	CAD (coronary artery disease)
Infectious viral hepatitis	Diabetes mellitus (HCC)
Cancer of prostate with low recurrence risk (stage T1-2a and Gleason < 7 and PSA < 10) (HCC)	AKI (acute kidney injury) (HCC)
Cataracts, both eyes	Gout

Substance History

Smoking Status: Former Smoker - 25 pack years
Quit Smoking: 04/07/92
Smokeless Tobacco Status: Never Used
Alcohol use: Yes; 4.0 standard drinks per week
Drug use: No

Surgical History

APPENDECTOMY	CORONARY ARTERY BYPASS GRAFT
CAROTID ENDARTERECTOMY	CORONARY STENT PLACEMENT
COLONOSCOPY	shingles
EGD	VASCULAR SURGERY

Facility Administered Medications

Taken on 04/03/19

cyclopentolate (CYCLOGYL) 2 % ophthalmic solution	diclofenac (VOLTAREN) ophthalmic solution 0.1%
lidocaine (PF) 3.5 % eye gel	phenylephrine (NEO-SYNEPHRINE) 10 % ophthalmic solution
tetracaine (PF) (PONTOCAINE) 0.5 % eye drops	~~BSS 500 mL + epinephrine 1:1000 0.5 mL (Discontinued)~~
fentaNYL (PF) (SUBLIMAZE) injection 50 mcg/mL	~~lidocaine (PF) (XYLOCAINE-MPF) injection 2 % (Discontinued)~~
midazolam (VERSED) injection 1 mg/mL	~~neomycin-polymyxin-dexamethasone (MAXITROL) ophthalmic suspension (Discontinued)~~
~~pilocarpine (PILOCAR) 2 % ophthalmic solution (Discontinued)~~	~~sod hyaluronate-sod chondroitin-sod hyaluronate (DUOVISC) intra-ocular kit (Discontinued)~~
sodium chloride 0.9% (NS) infusion	~~sodium chloride bacteriostatic injection 0.9 % (Discontinued)~~

Preprocedure Note

Last edited 03/30/19 1008 by Paul K Turry, MD
Date of Service 03/30/19 1007
Status: Signed

Anesthesia Pre-op Evaluation

Patient Name: Eugene G Maurice **MRN:** 561253820
Date of Birth: 1/2/1949 **Age:** 70 yrs **Sex:** Male
Height: 1.702 m (5' 7") **Weight:** 93 kg (205 lb) **BMI:** Body mass index is 32.11 kg/m².

Pre-Assessment Information

No Known Allergies

Relevant Problems

(+) Acute GI bleeding
(+) Acute on chronic congestive heart failure, unspecified congestive heart failure type
(+) Anemia
(+) Angina pectoris (HCC)
(+) Controlled type 2 diabetes mellitus with diabetic

Anesthesia Encounter - Episode ID 34943327 (continued)

Preprocedure Note (continued)

peripheral angiopathy without gangrene, without long-term current use of insulin (HCC)
(+) Coronary arteriosclerosis
(+) Coronary artery disease involving native coronary artery of native heart without angina pectoris
(+) Essential hypertension
(+) Localized edema
(+) Obesity
(+) PAF (paroxysmal atrial fibrillation) (HCC)

Past Medical History:

Diagnosis	Date
• AKI (acute kidney injury) (HCC)	
• CAD (coronary artery disease)	
• Cancer of prostate with low recurrence risk (stage T1-2a and Gleason < 7 and PSA < 10) (HCC)	1/30/2018
• Coronary atherosclerosis of native coronary artery	
• Diabetes mellitus (HCC)	
• Essential hypertension, benign	
• Family history of ischemic heart disease	
• Hyperlipidemia	
• Hypertension	
• Infectious viral hepatitis *as teen/cannont recall what type*	
• Obesity	
• Other and unspecified hyperlipidemia	
• Other symptoms involving cardiovascular system	
• PVD (peripheral vascular disease) (HCC)	

Past Surgical History:

Procedure	Laterality	Date
• APPENDECTOMY		
• CAROTID ENDARTERECTOMY *x2*		
• COLONOSCOPY *as of 9/2014 has not had this*		
• CORONARY ARTERY BYPASS GRAFT *X6*		1992
• CORONARY STENT PLACEMENT *sheikh*		2014
• EGD *Procedure: GI-EGD (LVL5) W/ BX; Surgeon: Sohail Asfandiyar, MD; Location: KH GI/BRONCH; Service: Gastroenterology; Laterality: N/A;*	N/A	6/19/2018
• shingles		9/2015
• VASCULAR SURGERY *right leg*		

Anesthesia Encounter - Episode ID 34943327 (continued)

Preprocedure Note (continued)

Social History Main Topics

- Smoking status: Former Smoker
  - Packs/day: 1.00
  - Years: 25.00
  - Types: Cigarettes
  - Quit date: 4/7/1992
- Smokeless tobacco: Never Used
- Alcohol use: 2.4 oz/week
  - 2 Glasses of wine, 2 Shots of liquor per week
  - *Comment: rarely*
- Drug use: No
- Sexual activity: Yes
  - Partners: Female
  - Birth control/ protection: None

Documented NPO status:
No Data Recorded

Pre-operative Evaluation

Review of Systems/Medical History

General: Patient summary reviewed and Nursing notes reviewed.
Anesthesia History: No history of anesthetic complications. Patient has no family history of anesthetic complications. No PONV
Cardiovascular:
(+) hypertension: controlled, CAD,

Comments: Results for orders placed or performed during the hospital encounter of 04/09/18
-Echo 2D complete panel (contrast/bubble PRN per protocol)

Narrative
· The left ventricular systolic function is normal, ejection fraction is 50-55%.
· The left ventricular cavity size is normal.
· Left ventricular diastolic function is normal.
· The right ventricular cavity size and systolic function is/are normal.
· There is mild mitral and tricuspid valve regurgitation present.

Results for orders placed or performed during the hospital encounter of 03/29/16
-Echo 2D complete panel (contrast/bubble PRN per protocol)

Narrative
· Left ventricular systolic function is normal, ejection fraction is 50-55%.

Anesthesia Encounter - Episode ID 34943327 (continued)

Preprocedure Note (continued)

· The left ventricle cavity is normal size. Mildly increased concentric left ventricle hypertrophy.
· Right ventricle has normal size and normal systolic function.
· There is mild mitral valve regurgitation present.

Pulmonary: Negative ROS

Neuro/Psych: - Negative ROS

GI/Hepatic/Renal:
(+) hepatitis, liver disease, chronic renal disease: CRI

Endo/Other:
(+) diabetes mellitus: *well controlled*, Type 2,

Physical Exam

Airway:
Mallampati: II
Neck ROM: full
TM distance: >3 FB

Cardiovascular: normal exam

Pulmonary:

Breath sounds clear to auscultation.

Anesthesia Encounter - Episode ID 34943327 (continued)

Preprocedure Note (continued)

Anesthesia Plan

ASA: 3
Anesthetic Plan: MAC

Airway Management: supplemental O2
Premedication Plan: none

Anesthetic plan and risks discussed with: Patient and spouse.

Plan discussed with: Anesthetist

Status: Signed

Patient Name: Eugene G Maurice

Procedure Summary

Date: 04/03/19
Anesthesia Start: 1126
Procedure: CATARACT PHACOEMULSIFICATION IMPLANTATION INTRAOCULAR LENS (Right Eye)

Surgeon: Bruce P Crowley, MD
Anesthesia Type: MAC

Room / Location: PH OR 08 / PH MAIN OR
Anesthesia Stop: 1152
Diagnosis:
Nuclear sclerotic cataract of right eye
(Nuclear sclerotic cataract of right eye [H25.11])
Responsible Provider: Paul K Turry, MD
ASA Status: 3

Final Anesthesia Type: MAC

Patient location: PACU
Post vital signs: post-procedure vital signs reviewed and stable
Level of consciousness: awake, alert and oriented
Post-anesthesia pain:
Pain Status: adequate analgesia

Airway patency: patent
Respiratory: room air and unassisted
Cardiovascular: blood pressure at baseline and stable

Anesthesia Encounter - Episode ID 34943327 (continued)

All Postprocedure Notes (continued)

Hydration: euvolemic
Nausea and vomiting: no signs of nausea and vomiting
Anesthetic complications: No

BSS 500 mL + epinephrine 1:1000 0.5 mL [807984229]

Ordering Provider: Bruce P Crowley, MD
Ordered On: 04/03/19 1138
Status: Discontinued (Past End Date/Time), Reason: (Patient Transfer - Internal Use Only)
Frequency: As needed

Timestamps	Action	Dose	Route / Site	Other Information
Performed 04/03/19 1137 Documented: 04/03/19 1138	Given	500 mL	Irrigation Right Eye	Performed by: Bruce P Crowley, MD Documented by: Sandy M Bobb, RN

neomycin-polymyxin-dexamethasone (MAXITROL) ophthalmic suspension [807984230]

Ordering Provider: Bruce P Crowley, MD
Ordered On: 04/03/19 1146
Status: Discontinued (Past End Date/Time), Reason: (Patient Transfer - Internal Use Only)
Frequency: As needed

Timestamps	Action	Dose	Route	Other Information
Performed 04/03/19 1145 Documented: 04/03/19 1146	Given	2 drop	Right Eye	Performed by: Bruce P Crowley, MD Documented by: Sandy M Bobb, RN

pilocarpine (PILOCAR) 2 % ophthalmic solution [807984231]

Ordering Provider: Bruce P Crowley, MD
Ordered On: 04/03/19 1146
Status: Discontinued (Past End Date/Time), Reason: (Patient Transfer - Internal Use Only)
Frequency: As needed

Timestamps	Action	Dose	Route	Other Information
Performed 04/03/19 1146 Documented: 04/03/19 1146	Given	2 drop	Right Eye	Performed by: Bruce P Crowley, MD Documented by: Sandy M Bobb, RN

Patient Education

Education

Title: Acute MI (MCB) (Resolved)

Topic: Psycho/Social/Spiritual Support (Resolved)

Point: Coping Mechanisms (Resolved)

Description:
Help patient identify healthy coping mechanisms. Refer to Social Service, Case Management, or Spiritual Care, if needed.

Learner Progress: Not documented in this visit.

Point: Support Systems (Resolved)

Description:
Help patient identify available support systems. Refer to Social Service, Case Management, or Spiritual Care, if needed.

Learner Progress: Not documented in this visit.

Point: Spiritual/Emotional Needs (Resolved)

Description:
Offer resources to meet spiritual/emotional needs. Refer to Spiritual Care, if needed.

Learner Progress: Not documented in this visit.

Point: Anxiety Reduction (Resolved)

Description:
Explain the definition of anxiety, signs and symptoms, and examples of ways to reduce anxiety. Inform patient that Spiritual Care and Social Services are available.

Learner Progress: Not documented in this visit.

Topic: Prevention (MCB) (Resolved)

Point: When to Call the Doctor (Resolved)

Description:
Educate patient/family/caregiver on when to call the doctor.

Learner Progress: Not documented in this visit.

Point: Protect Others from Infection (Resolved)

Description:
Educate patient/family/caregiver on respiratory hygiene and cough etiquette. To protect from further infection and to protect others from getting an infection, patient should cover nose and mouth with tissues when coughing. Encourage patient to place used tissues in a plastic bag that will not allow secretions to soak through. Patient should always wash his/her hands after using or handling used tissues.

Learner Progress: Not documented in this visit.

Point: Protect Yourself from Further Infection (MCB) (Resolved)

Patient Education (continued)

Education (continued)

Description:
Educate patient/family/caregiver that because patient is in a weakened condition he/she needs to avoid others who are sick as to not acquire another illness. Family/caregiver should wear gloves, gown and face shield/eye protection.

Patient Friendly Description:
Information on Flu.
Information on Pneumonia and Pneumococcal Vaccination.
Learner Not documented in this visit.
Progress:

Point: Demonstrate Handwashing (MCB) (Resolved)

Description:
Educate patient/family/caregiver on how to perform proper hand hygiene. Explain that hand washing is the single most important step in preventing the spread of germs. Have the patient/family/caregiver demonstrate proper hand washing technique using soap, water, friction, clean nails under running water, and dry hands on clean towel without touching dirty surfaces.

Patient Friendly Description:
This will explain the importance of washing and cleansing your hands to prevent infection.
Learner Not documented in this visit.
Progress:

Topic: Self Care (MCB) (Resolved)

Point: General Self Care (Resolved)

Description:
Instruct patient on self care needs. These may include: hygiene, how to take a blood pressure, how to change a dressing, etc.

Learner Not documented in this visit.
Progress:

Point: Demonstrate Handwashing (MCB) (Resolved)

Description:
Educate patient/family/caregiver on how to perform proper hand hygiene. Explain that hand washing is the single most important step in preventing the spread of germs. Have the patient/family/caregiver demonstrate proper hand washing technique using soap, water, friction, clean nails under running water, and dry hands on clean towel without touching dirty surfaces.

Patient Friendly Description:
This will explain the importance of washing and cleansing your hands to prevent infection.
Learner Not documented in this visit.
Progress:

Topic: Pain Management (Resolved)

Point: Pain Medication Actions & Side Effects (Resolved)

Description:
Provide medication specific handouts when available.

Learner Not documented in this visit.
Progress:

Point: Discuss Significance of VAS Scores (Resolved)

Description:
Refer to rating score of 0-10.

Learner Not documented in this visit.
Progress:

Point: Discuss the Use of Pain Control Measures Before Pain Becomes Severe (MCB) (Resolved)

Description:
Take time to reiterate to patient that he/she should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time before pain becomes severe.

Patient Education (continued)

Education (continued)

Patient Friendly Description:
Please inform staff that if you are having any difficulty breathing, pain or any discomfort at any time before the pain gets severe.

Please read over the items and let anyone on your Care Team know there are any questions about the material by marking below that "I HAVE QUESTIONS".

If once you have received the items and understand the material you can mark this as "I understand".
Learner Progress: Not documented in this visit.

Point: Non-Pharmacological Comfort Measures (Resolved)

Description:
Explain there are other ways of controlling pain than medication. The following are suggestions: position change, aromatherapy, deep slow breathing, distraction, quiet environment, imagery, heat therapy and/or cold therapy, laughter, massage, music, physical therapy, and touch therapy.

Learner Progress: Not documented in this visit.

Point: Patient Controlled Analgesia (Resolved)

Description:
Give the patient written information on Patient Controlled Analgesia. Explain how the pump works. Demonstrate pushing the button to give pain medicine to the patient. Caution the patient and other family/visitors that only the patient should press the PCA button for pain relief to decrease the chance of getting too much pain medicine.

Learner Progress: Not documented in this visit.

Point: Epidural Information (Resolved)

Description:
Give the patient written information on Epidural Analgesia. Explain why an epidural is used, how the epidural is placed and how the medication is given. If the epidural is PCA, demonstrate pushing the button to give pain medicine to the patient. Caution the patient and other family/visitors that only the patient should press the button for pain relief to decrease the chance of getting too much pain medicine.

Learner Progress: Not documented in this visit.

Topic: Signs and Symptoms - Acute MI (Resolved)

Point: Recognizing a Heart Attack (MCB) (Resolved)

Description:
Be sure patient reviews video on Coronary Artery Disease

Patient Friendly Description:
Please watch the video and/or read over the documented material and let anyone on your Care Team know if there are any questions by marking below.
If after watching the video and/or reading the material you have questions, please mark below I have question to let the staff know you have additional questions about a topic and they will be in to discuss your questions.

This will inform you of what to expect if you are diagnosed with a Heart Attack.
Learner Progress: Not documented in this visit.

Point: Risk Factors (Resolved)

Description:
Educate the patient/family/caregiver on coronary risk factors. Explain the controllable and non-controllable risk factors to Coronary Artery Disease. Review how to control coronary artery disease by altering the controllable risk factors. Some examples include: controlling blood pressure, reducing fat and cholesterol in the diet, stopping smoking, exercising regularly, maintaining ideal body weight, dealing with stress in an appropriate manner, drinking alcohol and coffee in moderation and controlling blood sugar levels (if applicable).

Learner Progress: Not documented in this visit.

Topic: Acute MI (MCB) (Resolved)

Patient Education (continued)

Education (continued)

Point: Emergency Plan for Heart Attack Symptoms (Resolved)

Description:
Educate the patient/family/caregiver on how to get help immediately if heart attack symptoms occur. The patient should call 911 or the Emergency Medical Service number. Reinforce that the patient should not delay in obtaining help.

Learner Progress: Not documented in this visit.

Point: Home Activity (Resolved)

Description:
Educate the patient/family/caregiver on home activity guidelines that apply after having had a recent heart attack. Do things in moderation, rest about 30 minutes after eating, pace activities, allow for 7-8 hours of sleep at night, start with short walks 3-5 times a day. Consult with Cardiac Rehab staff, if applicable.

Learner Progress: Not documented in this visit.

Point: Limitations to Activity (Resolved)

Description:
Educate the patient/family/caregiver reagrding the following limitations to activity for 4-6 weeks after discharge. No lifting over 10 pounds (weight of a milk jug), no pushing or pulling motions with the arms (sweeping, vacuuming or raking), no driving (may be changed after talking to the doctor), no bathing in very hot or very cold water.

Learner Progress: Not documented in this visit.

Point: Sexual Activity (Resolved)

Description:
Educate the patient/family/caregiver on the following: Wait 4 weeks before resuming sexual activity. If the patient can climb 2 flights of steps, he/she can assume it is ok to resume sexual activity. Choose a comfortable position. Wait at least 1 hour after a meal. If sex brings on angina, stop and rest. Discuss chest pain during sex with the physician. Some medications can affect sexual desire. If this is the case, talk with the physician.

Learner Progress: Not documented in this visit.

Point: Influenza Vaccine (Resolved)

Description:
Educate the patient/family/caregiver on obatining a yearly influenza vaccine.

Learner Progress: Not documented in this visit.

Point: Smoking Cessation (Resolved)

Description:
Educate the patient/family/caregiver on smoking cessation and smoking cessation programs offered in the community. Explain effects smoking and second hand smoke have on the body. Encourage the patient to ask people that smoke around him/her to smoke outside or in another room. Refer patient to Cardiopulmonary Rehabilitation, if applicable.

Learner Progress: Not documented in this visit.

Title: Diabetes (MCB) (Not Started)

Topic: Psycho/Social/Spiritual Support (Not Started)

Point: Stress Management and Support Systems (Not Started)

Description:
Explain the importance of stress management and support systems in diabetes management. Refer to WellStar diabetes support groups, social services, case management or spiritual care, if needed.

Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Point: Anxiety Reduction (Not Started)

Description:
Explain the definition of anxiety, signs and symptoms, and examples of ways to reduce anxiety. Inform patient that Spiritual Care and Social Services are available.

Learner Progress: Not documented in this visit.

Topic: Treatments/Procedures (MCB) (Not Started)

Point: Introduction to Diabetes (MCB) (Not Started)

Description:
Give patient/family/caregiver written information on diabetes. Explain the definition of the type of diabetes with which the patient was diagnosed, how diabetes works in the body, risk factors, signs and symptoms, and if newly diagnosed, diagnostic criteria. Encourage viewing of diabetes on-demand videos when applicable. Refer to inpatient diabetes educator when applicable.

Patient Friendly Description:
You will receive a booklet entitled Diabetes survival skills. There are also two links to documents about Diabetes for you to read over noted below.

Please read over the items and let anyone on your Care Team know there are any questions about the material by marking below that "I HAVE QUESTIONS".

If once you have received the items and understand the material you can mark this as "I understand".
Learner Progress: Not documented in this visit.

Point: Diabetes Type II management (MCB) (Not Started)

Description:
Patient will watch a video that will discuss information on what to expect if they have Diabetes type II.

Patient Friendly Description:
This will inform you of what to expect if you have Diabetes type II.
Learner Progress: Not documented in this visit.

Point: Diabetic long term complications (MCB) (Not Started)

Description:
Patient will have information from Krames on the long term complications of Diabetes Type II.

Patient Friendly Description:
Some information on the long term complications of Diabetes Type II.
Learner Progress: Not documented in this visit.

Topic: Medications (MCB) (Not Started)

Point: Insulin (MCB) (Not Started)

Description:
Educate patient/family/caregiver on the insulin prescribed. Explain how insulin works in the body. Explain the action of insulin, reason for taking, side effects, signs of allergic reaction and when physician should be called. Reinforce that insulin should be taken exactly as the physician has prescribed. Explain the proper storage of insulin, that extreme temperatures can damage insulin and never take insulin that has expired. Explain that the patient's primary care physician may change the dosage depending on the results of blood glucose tests and/or A1C level.

Patient Friendly Description:
This will inform you of why you are prescribed insulin if you have Diabetes Type II.
Learner Progress: Not documented in this visit.

Point: Hypoglycemic Agents (Not Started)

Description:
Educate patient/family/caregiver on the oral and/or injectable hypoglycemic(s) prescribed. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, as well as when the physician should be called. Reinforce that this medication(s) should be taken exactly as the physician has prescribed.

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Point: Giving Insulin Injection (Not Started)

Description:
Explain and demonstrate how the injection is given. Allow enough time for the patient/family/caregiver to practice. Have the patient return-demonstrate the technique using normal saline (vial and syringe only unless sterile demonstration pen is also available). Teach the patient how to choose and rotate injection sites. Instruct patient on safe disposal of used needles and syringes.

Learner Progress: Not documented in this visit.

Point: Drawing up Insulin (Not Started)

Description:
Instruct patient/family/caregiver to wash hands before drawing up insulin. Demonstrate and have the patient return-demonstrate drawing up the correct amount of insulin prescribed. If the patient is going to use an insulin pen, demonstrate use and have the patient return-demonstrate. If the patient is going to mix different types of insulin, demonstrate and have the patient return-demonstrate the correct way to draw up and mix the insulin.

Learner Progress: Not documented in this visit.

Topic: Self Care (MCB) (Not Started)

Point: Exercise (Not Started)

Description:
Encourage patient/family/caregiver to discuss activity limitations, if any, with physician before starting an exercise routine. Stress the importance of regular exercise and activity to control blood sugar levels and weight. Instruct the patient to carry single carohydrates while exercising in case of hypoglycemic reaction. Explain that both concentrated physical activity (such as walking, swimming, running, cycling, strength training) and being more active through the entire day are equally important to blood sugar control and weight management.

Learner Progress: Not documented in this visit.

Point: Blood Glucose Monitoring (MCB) (Not Started)

Description:
Instruct patient/family/caregiver to wash hands before checking blood glucose. Explain and, if possible to use a complementary glucometer, demonstrate how to check and record blood sugars. Instruct the patient to check blood sugars as frequently as ordered by the physician. Explain that stress or illness will increase blood sugar, making it necesary to check blood sugars more often than usual. Instruct patient on blood glucose target ranges and A1C target range. Discuss care of the meter and supplies, including how to obtain supplies. If using a complementary glucometer, have the patient return-demonstrate checking the blood sugar. Instruct the patient on safe disposal of lancets. Refer to inpatient diabetes educator if applicable.

Patient Friendly Description:
Why is it important to check my blood sugar?

Learner Progress: Not documented in this visit.

Point: Diabetic Foot Care (MCB) (Not Started)

Description:
Explain importance of foot care. Patient should have feet examined by a health care provider at least twice a year. Persons with foot problems should have feet examined at every visit. Explain daily foot care. Review importance of wearing well-fitting shoes and stockings/socks. Reinforce the importance of wearing shoes, even indoors, to prevent injury.

Patient Friendly Description:
This will inform you of why you should check your feet if you have diabetes.

Learner Progress: Not documented in this visit.

Point: Diabetes Identification Jewelry (Not Started)

Description:
Encourage the patient to wear a piece of jewelry that identifies patient as a person with diabetes. This will inform medical personnel that patient has diabetes if unable to communicate.

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Topic: Prevention/Discharge (Not Started)

Point: Signs and Symptoms of Hypoglycemia (Not Started)

Description:
Define and explain causes of hypoglycemia. Discuss signs and symptoms.

Learner Progress: Not documented in this visit.

Point: Treatment of Hypoglycemia (Not Started)

Description:
Instruct the patient on how to treat low blood sugar using the Rule of 15. Encourage patient to carry a blood sugar treatment at all time.

Learner Progress: Not documented in this visit.

Point: When to Call the Doctor (Not Started)

Description:
Instruct the patient/family/caregiver to call their health care provider if there are symptoms of hypo- or hyperglycemia or if blood sugars are trending high or low and are not controlled by simple measures.

Learner Progress: Not documented in this visit.

Point: Signs and Symptoms of Hyperglycemia (Not Started)

Description:
Define and explain causes of hyperglycemia. Discuss signs and symptoms (mild, moderate, severe, and ketoacidosis).

Learner Progress: Not documented in this visit.

Point: Prevention of Hyperglycemia (Not Started)

Description:
Encourage patient/family/caregiver to follow healthcare providers' instructions for diet, activity and medications. Explain the importance of good diabetes management and learning to detect and treat hyperglycemia early before it worsens. Refer to registered dietitian, when applicable, for meal planning assistance.

Learner Progress: Not documented in this visit.

Point: Prevention of Hypoglycemia (Not Started)

Description:
Encourage patient/family/caregiver to follow healthcare providers' instructions for diet, activity and medications. Explain the importantce of good diabetes management and learning to detect and treat hypoglycemia early before it worsens.

Learner Progress: Not documented in this visit.

Point: WellStar Outpatient Diabetes Education (Not Started)

Description:
Provide information on WellStar Outpatient Diabetes Education when applicable. Information includes a list of classes offered and how to register.

Learner Progress: Not documented in this visit.

Point: Follow-up Appointments (Not Started)

Description:
Give the patient/family written information on when to make follow-up appointments. Reinforce importance of making and keeping the appointments. If appointments were made during the visit, give the patient a written reminder of the time and location.

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Topic: Diabetic Diet (MCB) (Not Started)

Point: Meal Planning and Portion Sizes (MCB) (Not Started)

Description:
The patient will view documents in Krames talking about meal planning as well learning about serving and portion sizes.

Patient Friendly Description:
This will inform you of ways to stay on track with your diet.

Learner Progress: Not documented in this visit.

Point: Eating well with Diabetes (MCB) (Not Started)

Description:
Patient will watch a video on healthy eating for people with DM.

Patient Friendly Description:
Healthy eating for people with Diabetes.

Learner Progress: Not documented in this visit.

Point: Carbohydrate Counting (MCB) (Not Started)

Description:
Patient will read Krames documents on healthy meals and meal planing for Diabetes.

Patient Friendly Description:
Learn about counting your carbohydrates.

Learner Progress: Not documented in this visit.

Topic: Survival Skills (Not Started)

Point: Review Diagnosis (Not Started)

Description:
Review the diabetes disagnosis, specific to patient's diabetes type.
Diabetes Survival Skills Booklet provided.

Patient Friendly Description:

Learner Progress: Not documented in this visit.

Point: Nutrition (Not Started)

Description:
Importance of consistent nutrition habits.

Learner Progress: Not documented in this visit.

Point: Appointments (Not Started)

Description:
Importance of follow up appointment with the health care provider who will provide diabetes care after discharge.

Learner Progress: Not documented in this visit.

Point: Sick Day (Not Started)

Description:
Sick day management

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Point: Insulin Administration (if applicable) (Not Started)

Description:
Insulin administration and proper use and disposal of needles and syringes. How to schedule outpatient diabetes education. Review self-monitoring of blood glucose and home blood glucose goals.

Learner Progress: Not documented in this visit.

Point: Hyperglycemia (Not Started)

Description:
Definition, recognition, treatment and prevention of hyperglycemia.

Learner Progress: Not documented in this visit.

Point: Hypoglycemia (Not Started)

Description:
Definition, recognition, treatment and prevention of hypoglycemia.

Learner Progress: Not documented in this visit.

Point: Glucose Lowering Medications (Not Started)

Description:
When and how to take blood glucose-lowering medications.

Learner Progress: Not documented in this visit.

Topic: Diabetes Zones for Management (Not Started)

Point: Diabetes Zones for Management reviewed (Not Started)

Description:
Diabetes Zones for Management reviewed.

Learner Progress: Not documented in this visit.

Point: Diabetes Zones for Management handout provided (Not Started)

Description:
Diabetes Zones for Management handout provided.

Learner Progress: Not documented in this visit.

Title: WS Cardiac Rehab (Resolved)

Topic: PCI (Resolved)

Point: Books/Educational Material (Resolved)

Description:
Current standardized written information provided specific to diagnosis, recovery, disease progression and prevention.

Learner Progress: Not documented in this visit.

Point: Exercise (Resolved)

Patient Education (continued)

Education (continued)

Description:
Information regarding the benefits of exercise provided. Exercise guidelines provided for initial recovery from acute heart event and long term goals of exercise.

Learner Progress: Not documented in this visit.

Point: Medications (Resolved)

Description:
Medication compliance encouraged. Organization tools discussed and medication information and resources provided.

Learner Progress: Not documented in this visit.

Point: Risk Factors (Resolved)

Description:
Written and verbal information provided on modifiable and non-modifiable factors associated with increased risk of heart disease and stroke.

Learner Progress: Not documented in this visit.

Point: Activity guidelines (Resolved)

Description:
Appropriate activity and/or limitations for diagnosis specific recovery provided.

Learner Progress: Not documented in this visit.

Point: Signs/symptoms/activate EMS (Resolved)

Description:
Information provided on the signs and symptoms which commonly occur with a heart attack or stroke. Emphasis placed on appropriate activation of EMS with recognition of signs and symptoms.

Learner Progress: Not documented in this visit.

Point: Cardiac Rehab participation/location options (Resolved)

Description:
Cardiac rehabilitation benefits highlighted and participation encouraged.

Learner Progress: Not documented in this visit.

Point: Cardiac Diet/low fat/low sodium (Resolved)

Description:
American Heart Association guidelines provided for a reduced fat and reduced sodium diet.

Learner Progress: Not documented in this visit.

Point: Endocarditis education/card (Resolved)

Description:
Written and verbal instruction provided on endocarditis prevention. Temporary Valve card provided.

Learner Progress: Not documented in this visit.

Point: Outpatient education classes/Heart Smart/Device Advice/Heart of the Matter (Resolved)

Description:
Description and registration details of outpatient education classes provided. Participation encouraged.

Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Title: Cardiac Arrhythmia (MCB) (Not Started)

Topic: Treatment for Atrial Fibrillation/Atrial Flutter (MCB) (Not Started)

Point: Chemical cardioversion (MCB) (Not Started)

Description:
Provide written education on why and how a chemical cardioversion is done. As well as accociated risks.

Patient Friendly Description:
Why and how a chemical cardioversion is done and associated risks.
Learner Progress: Not documented in this visit.

Point: Electrical cardioversion (MCB) (Not Started)

Description:
Provide written education on why and how an electrical cardioversion is done. As well as accociated risks.

Patient Friendly Description:
Why and how a electrical cardioversion is done and associated risks.
Learner Progress: Not documented in this visit.

Point: Ablation (MCB) (Not Started)

Description:
Provide written education on the catheter ablation procedure and discharge instructions.

Patient Friendly Description:
How an ablation is done, and what to do after the procedure.
Learner Progress: Not documented in this visit.

Topic: Prevention/Discharge (MCB) (Not Started)

Point: Anticoagulation (MCB) (Not Started)

Description:
Provide written education on anticoagulation use including contraindications, side effects, interactions, and medication safety.

Patient Friendly Description:
Information on taking blood thinners safely.
Learner Progress: Not documented in this visit.

Point: Discharge with A Fib/Flutter (MCB) (Not Started)

Description:
Provide written education on treatment options, home care, and follow up care for discharging with atrial fibrillation.

Patient Friendly Description:
Information on treatment options, home care, and when to call your healthcare provider after going home with atrial fibrillation/flutter.
Learner Progress: Not documented in this visit.

Point: Atrial fib/flutter: stroke prevention (MCB) (Not Started)

Description:
"Provide written education on risk factors, medication, and prevention of A. Fib.
Hyperlink education materials provided to patient/family/caregiver. "

Patient Friendly Description:
Preventing stroke caused by A. Fib.
Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Topic: What is atrial fibrillation/flutter (MCB) (Not Started)

Point: You have atrial fibrillation (MCB) (Not Started)

Description:
Provide video education on the signs/symptoms of A. Fib, causes, medication(s), risk factors, prevention, and treatment.

Patient Friendly Description:
What to expect if you are diagnosed with A. Fib: causes, symptoms, and treatment.

Learner Progress: Not documented in this visit.

Point: You have Atrial Flutter (MCB) (Not Started)

Description:
Provide written education on the signs/symptoms of A. Flutter, causes, medication(s), risk factors, prevention, and treatment.

Patient Friendly Description:
What to expect if you are diagnosed with A. Flutter: causes, symptoms, and treatment

Learner Progress: Not documented in this visit.

Title: MyChart Bedside Teaching completed (Not Started)

Points For This Title

Point: All MCB content reviewed with patient and teachback completed. The patient verbalized understanding. (Not Started)

Description:
Go over all the Eduction for the patient in the Education activity. The Education that was provided to the patient via MCB was included as well as education that was noted within the Eduction activity as Education that was beneifical to the patient during this hospital stay.

Learner Progress: Not documented in this visit.

Title: Cardiac Surgery (Resolved)

Topic: PCI (Resolved)

Additional Points For This Title

Point: ACTIVITY (Resolved)

Learner Progress: Not documented in this visit.

Point: SIGNS AND SYMPTOMS/ACTIVATE EMS (Resolved)

Learner Progress: Not documented in this visit.

Point: BOOKS/EDUCATION MATERIAL (Resolved)

Learner Progress: Not documented in this visit.

Point: CARDIAC REHAB (Resolved)

Learner Progress: Not documented in this visit.

Point: DIET (Resolved)

Learner Progress: Not documented in this visit.

Point: EXERCISE (Resolved)

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Point: Medications (Resolved)

Learner Progress: Not documented in this visit.

Point: POST OP CARE (Resolved)

Learner Progress: Not documented in this visit.

Point: RISK FACTORS (Resolved)

Learner Progress: Not documented in this visit.

Title: Coronary Artery Disease (MCB) (Not Started)

Topic: WS Cardiac Rehabilitation for Arrhythmia (MCB)--This is CAD and AMI Cardiac Rehab Program Information for the Patient (Not Started)

Point: Exercise for a Healthier Heart (MCB) (Not Started)

Description:
Explain how exercising regularly offers many health rewards. Provide exercise tips to beginning a new exercise routine; Set Small goals and aim for 150 minutes a week.

Patient Friendly Description:
This provides healthy heart tips on why exercise is important.

Learner Progress: Not documented in this visit.

Point: WellStar Cardiac Rehabilitation Program (MCB) (Not Started)

Description:
At WellStar, our cardiac rehab patients are individually assessed to review medical history, evaluate risk factors, analyze functional abilities and set goals. Ongoing assessments are conducted to ensure patients are making progress toward their goals, educational needs are being met, and any problems or concerns are being addressed with the referring physician.

Patient Friendly Description:
This will help you better understand Cardiac Rehabilitation. At WellStar, our cardiac rehab programs provide education, supervised exercise, lifestyle modification and emotional support to help patients increase physical fitness, reduce cardiac symptoms and improve health and wellbeing.

Learner Progress: Not documented in this visit.

Point: Cardiac Rehabilitation: Emotional Issue (MCB) (Not Started)

Description:
Explain how having heart disease can be stressful. Encourage patient not to ignore feelings of sadness, worry, and depression. Patient should know when to ask for help and/or support.

Patient Friendly Description:
This will explain some emotional feelings related to heart disease.

Learner Progress: Not documented in this visit.

Topic: Heart Healthy Diet- DASH Diet (MCB) (Not Started)

Point: Eating Heart Healthy Food: Using DASH Plan (MCB) (Not Started)

Description:
Review diet information and explain that eating a low salt, low fat and low cholesterol diet with plenty of fruits and vegetables can reduce risk of complications from CAD.

Patient Friendly Description:
This will help you follow a healthy eating plan that can reduce your risk of complications associated with Coronary Artery Disease.

Please watch video/read over the material and let anyone on your Care Team know if there are any questions by marking below.

Patient Education (continued)

Education (continued)

If you understand all material, mark I understand below.
Learner Not documented in this visit.
Progress:

Topic: Questions your patient may have for you (MCB) (Not Started)

Point: Questions your patient may have about the AMI (MCB) (Not Started)

Description:
This is information about diet, exercise and medications for patients and it encourages them to ask staff questions.

Patient Friendly Description:
After reading this, you can write down any questions that you have for staff under the Notes section as a reference.
Learner Not documented in this visit.
Progress:

Topic: Coronary Artery Disease (MCB) (Not Started)

Point: Recognizing signs and symptoms of Heart Disease (MCB) (Not Started)

Description:
Provide written education on the signs/symptoms of CAD, causes, medication(s), risk factors, prevention and treatment.

Patient Friendly Description:
This will explain some of the causes of Coronary Artery Disease.
Learner Not documented in this visit.
Progress:

Point: Understanding Coronary Artery Disease (MCB) (Not Started)

Description:
Give patient written information on CAD. Explain the definition of CAD, causes, signs and symptoms.

Patient Friendly Description:
This will inform you of what to expect if you are diagnosed with Coronary Artery Disease (CAD).

Please watch video/read over the material and let anyone on your Care Team know if there are any questions by marking below.

If you understand all material, mark I understand below.
Learner Not documented in this visit.
Progress:

Topic: Risk factors for Heart Disease (MCB) (Not Started)

Point: Tobacco/Smoking Cessation (MCB) (Not Started)

Description:
Give patient written information on Quitting Smoking

Educate the patient/family/caregiver on smoking cessation and smoking cessation programs offered in the community. Explain effects smoking and second hand smoke have on the body. Encourage the patient to ask people that smoke around him/her to smoke outside or in another room. Refer patient to Cardiopulmonary Rehabilitation, if applicable.

Patient Friendly Description:
This will give you some getting started tips to kick the smoking habit.

This will help you plan how to quit the smoking habit.
Learner Not documented in this visit.
Progress:

Title: First-Dose Education (Not Started)

Points For This Title

Point: hydralazine HCl (Not Started)

Patient Education (continued)

Education (continued)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: iohexol (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: nitroglycerin (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: Ringer's solution,lactated (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: dextrose (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: dextrose 50 % in water (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: calcium carbonate (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: morphine sulfate (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: hydrocodone/acetaminophen (Not Started)

Patient Education (continued)

Education (continued)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: aspirin (Resolved)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: acetaminophen (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: atropine sulfate (Resolved)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: phenylephrine HCl (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: labetalol HCl (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: metoclopramide HCl (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: cyclopentolate HCl (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Point: furosemide (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: diclofenac sodium (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: gentamicin sulfate (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: diphenhydramine HCl (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: 0.9 % sodium chloride (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: piperacillin sodium/tazobactam (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: insulin lispro (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: ondansetron (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Point: glucagon,human recombinant (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: gadobenate dimeglumine (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: pantoprazole sodium (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: polyethylene glycol 3350 (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: perflutren lipid microspheres (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: fentanyl citrate/PF (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: lidocaine HCl/PF (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: ondansetron HCl/PF (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Point: tetracaine HCl/PF (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Title: Congestive Heart Failure (MCB) (Not Started)

Topic: Psycho/Social/Spiritual Support (Not Started)

Point: Stress Management and Support Systems (Not Started)

Description:
Explain the importance of stress management and support systems in diabetes management. Refer to WellStar diabetes support groups, social services, case management or spiritual care, if needed.

Learner Progress: Not documented in this visit.

Point: Anxiety Reduction (Not Started)

Description:
Explain the definition of anxiety, signs and symptoms, and examples of ways to reduce anxiety. Inform patient that Spiritual Care and Social Services are available.

Learner Progress: Not documented in this visit.

Topic: Treatments/Procedures (MCB) (Not Started)

Point: Oxygen (Not Started)

Description:
Educate patient/family/caregiver on why oxygen is needed and how it will be delivered (nasal cannula, mask, etc.). Instruct patient/family/caregiver that the patent should not be smoking while on oxygen.

Learner Progress: Not documented in this visit.

Point: Medical Equipment (Not Started)

Description:
Educate patient/family/caregiver on use of medical equipment and provide educational materials.

Learner Progress: Not documented in this visit.

Point: Introduction to Heart Failure (MCB) (Not Started)

Description:
Give patient written information on congestive heart failure. Explain the definition of CHF, causes, signs and symptoms, expected length of stay and criteria for discharge.

Patient Friendly Description:
This will inform you of what to expect if you are diagnosed with heart failure.

You will be receiving the Congestive Heart Failure red booklet.

Please watch video/read over the material and let anyone on your Care Team know if there are any questions by marking below.

If you understand all material, mark I understand below.
Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Point: Echocardiogram (Not Started)

Description:
Educate patient/family/caregiver on echocardiograms, to include: what the test is, how the test will be performed, and what to expect during the test.

Learner Progress: Not documented in this visit.

Topic: Pain Management (Not Started)

Point: Pain Medication Actions & Side Effects (Not Started)

Description:
Provide medication specific handouts when available.

Learner Progress: Not documented in this visit.

Point: Pain Rating Scale (Not Started)

Description:
Provide patient with information on the Pain Rating Scale. Explain the rating scale of 0 to 10.

Learner Progress: Not documented in this visit.

Point: Non-Pharmacological Comfort Measures (Not Started)

Description:
Explain there are other ways of controlling pain than medication. The following are suggestions: position change, aromatherapy, deep slow breathing, distraction, quiet environment, imagery, heat therapy and/or cold therapy, laughter, massage, music, physical therapy, and touch therapy.

Learner Progress: Not documented in this visit.

Topic: Self Care (MCB) (Not Started)

Point: Eating well with High Blood Pressure (MCB) (Not Started)

Description:
Information provided to patient to explain what their diet should consist of when they have Heart Failure.

Patient Friendly Description:
This will help you make heart healthy eating choices if you have a diagnosis with heart failure.

Learner Progress: Not documented in this visit.

Point: Heart Failure:Being Active (MCB) (Not Started)

Description:
Explain to the patient how to be active with heart failure.

Patient Friendly Description:
This will explain how to safely be active with heart failure.

Learner Progress: Not documented in this visit.

Point: Heart Failure: Dealing with Sleep problems (MCB) (Not Started)

Description:
Provide tips and ideas to help patient sleep better.

Patient Friendly Description:
This will provide tips on sleeping better with heart failiure.

Learner Progress: Not documented in this visit.

Point: Heart Failure: Know your Baselines (MCB) (Not Started)

Patient Education (continued)

Education (continued)

Description:
Explain to patient how to identify their baseline and recognize changes.

Patient Friendly Description:
This will help you understand what's normal for you and how to watch for changes.
Learner Progress: Not documented in this visit.

Point: Heart Failure : Know your Zones (Not Started)

Description:
Review heart failure zones with patient and educate them on how to know which zone they are in each day.
Learner Progress: Not documented in this visit.

Point: Dealing with Heart Failure: Helping the patient cope (MCB) (Not Started)

Learner Progress: Not documented in this visit.

Point: Daily Weights (MCB) (Not Started)

Description:
Give written information about daily weights. Instruct the patient to weigh on the same scale every day at the same time, wearing the same amount of clothing. Explain why it is important to check weight. Inform the patient that gaining weight from fluid build up may be an early sign that heart failure is getting worse. The patient should call a care provider if there is a weight gain of more than 2-3 pounds in one day or 4-5 pounds in five days.

Patient Friendly Description:
Information on the importance of Daily weights.
Learner Progress: Not documented in this visit.

Point: How to check your Heart Rate and Blood Pressure (MCB) (Not Started)

Description:
Give patient written information on how to take a pulse. Explain the definition of a pulse, normal range, reason for taking a pulse, where pulses can be found. Demonstrate how to find a pulse. Once found, instruct the patient to count the beats for a full minute. Tell the patient to keep a record of the pulse rate, date and time taken, which site (right/left, wrist/neck) and strength of beats (weak, strong or missing beats).

Patient Friendly Description:
This will explain the importance of understanding your vital signs and show you how to take them.
Learner Progress: Not documented in this visit.

Topic: WellStar Cardiac Rehabilitation (MCB) (Not Started)

Point: Exercise for a Healthier Heart (MCB) (Not Started)

Description:
Explain how exercising regularly offers many health rewards. Provide exercise tips to beginning a new exercise routine; Set Small goals and aim for 150 minutes a week.

Patient Friendly Description:
This provides healthy heart tips on why exercise is important.
Learner Progress: Not documented in this visit.

Point: WellStar Cardiac Rehabilitation Program (MCB) (Not Started)

Description:
At WellStar, our cardiac rehab patients are individually assessed to review medical history, evaluate risk factors, analyze functional abilities and set goals. Ongoing assessments are conducted to ensure patients are making progress toward their goals, educational needs are being met, and any problems or concerns are being addressed with the referring physician.

Patient Friendly Description:
This will help you better understand Cardiac Rehabilitation. At WellStar, our cardiac rehab programs provide education, supervised exercise, lifestyle modification and emotional support to help patients increase physical fitness, reduce cardiac symptoms and improve health and wellbeing.
Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Topic: Review Plan of Care (Not Started)

Point: Review Plan of Care - Day 5 (Not Started)

Description:
Review plan of care including provider roles, health history, IV and medications, labs and tests, and discharge planning. Take extra time to reiterate to patient that he/she may ask questions at any time and should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time.

Learner Progress: Not documented in this visit.

Point: Review Plan of Care - Day 1 (Not Started)

Description:
Review plan of care including provider roles, health history, IV and medications, labs and tests, and discharge planning. Take extra time to reiterate to patient that he/she may ask questions at any time and should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time.

Learner Progress: Not documented in this visit.

Point: Review Plan of Care - Day 2 (Not Started)

Description:
Review plan of care including provider roles, health history, IV and medications, labs and tests, and discharge planning. Take extra time to reiterate to patient that he/she may ask questions at any time and should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time.

Learner Progress: Not documented in this visit.

Point: Review Plan of Care - Day 3 (Not Started)

Description:
Review plan of care including provider roles, health history, IV and medications, labs and tests, and discharge planning. Take extra time to reiterate to patient that he/she may ask questions at any time and should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time.

Learner Progress: Not documented in this visit.

Point: Review Plan of Care - Day 4 (Not Started)

Description:
Review plan of care including provider roles, health history, IV and medications, labs and tests, and discharge planning. Take extra time to reiterate to patient that he/she may ask questions at any time and should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time.

Learner Progress: Not documented in this visit.

Topic: Medications (MCB) (Not Started)

Point: Heart Failure Medications (MCB) (Not Started)

Description:
Educate patient on the drug type, purpose for medication, and common side effects.

Educate patient on Prescribed Medications

Patient Friendly Description:
This will inform you of medications that you may be taking if you are diagnosed with Heart Failure.

Learner Progress: Not documented in this visit.

Point: ACE Inhibitors (Not Started)

Patient Education (continued)

Education (continued)

Description:
Educate patient/family/caregiver on the ACE Inhibitor prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Angiotensin II Receptor Blockers (Not Started)

Description:
Educate patient/family/caregiver on the Angiotensin II Receptor Blockers prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Aspirin (Not Started)

Description:
Give patient written information on Aspirin. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the doctor should be called. Reinforce that this medication should be taken exactly as the doctor has prescribed.

Learner Progress: Not documented in this visit.

Point: Beta Blockers (Not Started)

Description:
Educate patient/family/caregiver on the Beta Blocker prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Digoxin (Not Started)

Description:
Educate patient/family/caregiver on Digoxin and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed. The physician will order a blood test to monitor the concentration of the drug in the patient's blood. The dose of this medication may be changed according to the results of this test.

Learner Progress: Not documented in this visit.

Point: Diuretics (Not Started)

Description:
Educate patient/family/caregiver on the Diuretic prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Inotropes (Not Started)

Description:
Educate patient/family/caregiver on the Inotropes prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Vasodilators (Not Started)

Patient Education (continued)

Education (continued)

Description:
Educate patient/family/caregiver on the Vasodilator prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Topic: Prevention / Discharge (MCB) (Not Started)

Point: Community Resources (Not Started)

Description:
Give written information on available community resources. Refer to Social Services or Case Management, if needed.

Learner Progress: Not documented in this visit.

Point: Home Health Care Services (Not Started)

Description:
Give patient written information on Home Health Care Services that have been arranged. Review the role of the home care nurse and when to expect the first visit. Refer to Case Management or Social Services, if needed.

Learner Progress: Not documented in this visit.

Point: Follow-up Appointments (Not Started)

Description:
Give the patient/family written information on their next appointment and when to make follow-up appointments. Reinforce importance of making and keeping the appointments. If appointments were made during the visit, give the patient a written reminder of the time and location.

Learner Progress: Not documented in this visit.

Point: Influenza Vaccine (Not Started)

Description:
Educate the patient/family/caregiver on obatining a yearly influenza vaccine.

Learner Progress: Not documented in this visit.

Point: Discharge Medications (Not Started)

Description:
Ensure that there are no barriers to obtain medications prior to discharge. Notify Care Coordination if there are any needs for additional resources prior to discharging the patient.

Learner Progress: Not documented in this visit.

Point: When to Call the Doctor (MCB) (Not Started)

Description:
Provide written documentation instructing the patient to call the doctor if the patient has:

1. Ankles and legs that become more swollen.
2. Shoes and socks that get tight suddenly.
3. Shortness of breath that does not go away with rest.
4. Weight gain of 2 - 3 pounds in one day.
5. Weight gain of 4 - 5 pounds in one week.
6. No energy for normal activities.
7. Dizziness or weakness.
8. Yellowish or blue green vision.
9. Heartbeat changes (feels like a butterfly in the chest).
10. Chest pain.
11. Blurred vision.
12. Passing out.
13. Cough that does not go away.

Patient Education (continued)

Education (continued)

Patient Friendly Description:
Heart Failure symptoms to know and when to call your healthcare provider.
Lifestyle changes to help you feel and live better with Heart Failure.
Learner Progress: Not documented in this visit.

Point: Review Discharge Plan (Not Started)

Description:
Review the discharge plan with patient and primary care giver including: diet, activity, medications, and special precautions. Refer to Case Management, if needed.

Learner Progress: Not documented in this visit.

Point: Smoking Cessation (Not Started)

Description:
Educate the patient/family/caregiver on smoking cessation and smoking cessation programs offered in the community. Explain effects smoking and second hand smoke have on the body. Encourage the patient to ask people that smoke around him/her to smoke outside or in another room. Refer patient to Cardiopulmonary Rehabilitation, if applicable.

Learner Progress: Not documented in this visit.

Point: Diet Instructions for CHF Prevention (Not Started)

Description:
Review diet information and explain that eating a low fat and low cholesterol diet with plenty of fruits and vegetables can reduce their chance of suffering a future heart attack.

Learner Progress: Not documented in this visit.

Topic: Heart Failure Discharge Instructions (Not Started)

Point: Follow-up Appointments (Not Started)

Description:
Give the patient/family written information on their next appointment and when to make follow-up appointments. Reinforce importance of making and keeping the appointments. If appointments were made during the visit, give the patient a written reminder of the time and location.

Learner Progress: Not documented in this visit.

Point: Daily Weights (MCB) (Not Started)

Description:
Give written information about daily weights. Instruct the patient to weigh on the same scale every day at the same time, wearing the same amount of clothing. Explain why it is important to check weight. Inform the patient that gaining weight from fluid build up may be an early sign that heart failure is getting worse. The patient should call a care provider if there is a weight gain of more than 2-3 pounds in one day or 4-5 pounds in five days.

Patient Friendly Description:
Information on the importance of Daily weights.
Learner Progress: Not documented in this visit.

Point: When to Call the Doctor (MCB) (Not Started)

Description:
Provide written documentation instructing the patient to call the doctor if the patient has:

1. Ankles and legs that become more swollen.
2. Shoes and socks that get tight suddenly.
3. Shortness of breath that does not go away with rest.
4. Weight gain of 2 - 3 pounds in one day.
5. Weight gain of 4 - 5 pounds in one week.
6. No energy for normal activities.
7. Dizziness or weakness.
8. Yellowish or blue green vision.
9. Heartbeat changes (feels like a butterfly in the chest).

Patient Education (continued)

Education (continued)

10. Chest pain.
11. Blurred vision.
12. Passing out.
13. Cough that does not go away.

Patient Friendly Description:
Heart Failure symptoms to know and when to call your healthcare provider.
Lifestyle changes to help you feel and live better with Heart Failure.
Learner Not documented in this visit.
Progress:

Point: Review Discharge Plan (Not Started)

Description:
Review the discharge plan with patient and primary care giver including: diet, activity, medications, and special precautions. Refer to Case Management, if needed.

Learner Not documented in this visit.
Progress:

Point: Diet Instructions for CHF Prevention (Not Started)

Description:
Review diet information and explain that eating a low fat and low cholesterol diet with plenty of fruits and vegetables can reduce their chance of suffering a future heart attack.

Learner Not documented in this visit.
Progress:

Title: General Patient Education (MCB) (Not Started)

Topic: Psycho/Social/Spiritual Support (Not Started)

Point: Coping Mechanisms (Resolved)

Description:
Help patient identify healthy coping mechanisms. Refer to Social Service, Case Management, or Spiritual Care, if needed.

Learner Not documented in this visit.
Progress:

Point: Support Systems (Resolved)

Description:
Help patient identify available support systems. Refer to Social Service, Case Management, or Spiritual Care, if needed.

Learner Not documented in this visit.
Progress:

Point: Spiritual/Emotional Needs (Resolved)

Description:
Offer resources to meet spiritual/emotional needs. Refer to Spiritual Care, if needed.

Learner Not documented in this visit.
Progress:

Point: Stress Management and Support Systems (Not Started)

Description:
Explain the importance of stress management and support systems in diabetes management. Refer to WellStar diabetes support groups, social services, case management or spiritual care, if needed.

Learner Not documented in this visit.
Progress:

Point: Anxiety Reduction (Not Started)

Patient Education (continued)

Education (continued)

Description:
Explain the definition of anxiety, signs and symptoms, and examples of ways to reduce anxiety. Inform patient that Spiritual Care and Social Services are available.

Learner Progress: Not documented in this visit.

Topic: Pain Management (MCB) (Resolved)

Point: Encourage Patient to Monitor Own Pain (Resolved)

Description:
Provide patient with information on the Pain Rating Scale. Explain the rating scale of 0 to 10.

Learner Progress: Not documented in this visit.

Point: Discuss Significance of VAS Scores (Resolved)

Description:
Refer to rating score of 0-10.

Learner Progress: Not documented in this visit.

Point: Discuss the Use of Pain Control Measures Before Pain Becomes Severe (MCB) (Resolved)

Description:
Take time to reiterate to patient that he/she should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time before pain becomes severe.

Patient Friendly Description:
Please inform staff that if you are having any difficulty breathing, pain or any discomfort at any time before the pain gets severe.

Please read over the items and let anyone on your Care Team know there are any questions about the material by marking below that "I HAVE QUESTIONS".

If once you have received the items and understand the material you can mark this as "I understand".
Learner Progress: Not documented in this visit.

Topic: Prevention (MCB) (Not Started)

Point: When to Call the Doctor (Not Started)

Description:
Educate patient/family/caregiver on when to call the doctor.

Learner Progress: Not documented in this visit.

Point: Protect Others from Infection (Not Started)

Description:
Educate patient/family/caregiver on respiratory hygiene and cough etiquette. To protect from further infection and to protect others from getting an infection, patient should cover nose and mouth with tissues when coughing. Encourage patient to place used tissues in a plastic bag that will not allow secretions to soak through. Patient should always wash his/her hands after using or handling used tissues.

Learner Progress: Not documented in this visit.

Point: Protect Yourself from Further Infection (MCB) (Not Started)

Description:
Educate patient/family/caregiver that because patient is in a weakened condition he/she needs to avoid others who are sick as to not acquire another illness. Family/caregiver should wear gloves, gown and face shield/eye protection.

Patient Friendly Description:
Information on Flu.

Patient Education (continued)

Education (continued)

Information on Pneumonia and Pneumococcal Vaccination.
Learner Not documented in this visit.
Progress:

Point: Falls education, precautions, prevention at home and in the hospital (MCB) (Not Started)

Description:
Patient was given information on preventing falls both while in the hospital and when they are at home.

Patient Friendly Description:
Things to help you prevent falls while you are in the hospital and when you are home.
Learner Not documented in this visit.
Progress:

Point: Prevention Deep Vein Thrombosis after surgery (MCB) (Not Started)

Description:
Educate patient/family/caregiver to prevent DVT and PE after Suergery

Patient Friendly Description:
In the days and weeks after surgery, you have a higher chance of developing a deep vein thrombosis (DVT).
This is a condition in which a blood clot or thrombus develops in a deep vein.
They are most common in the leg. But, a DVT may develop in an arm, or another deep vein in the body.
A piece of the clot, called an embolus, can separate from the vein and travel to the lungs.
A blood clot in the lungs is called a pulmonary embolus (PE).
This can cut off the flow of blood to the lungs.
It is a medical emergency and may cause death.
Learner Not documented in this visit.
Progress:

Point: Demonstrate Handwashing (MCB) (Not Started)

Description:
Educate patient/family/caregiver on how to perform proper hand hygiene. Explain that hand washing is the single most important step in preventing the spread of germs. Have the patient/family/caregiver demonstrate proper hand washing technique using soap, water, friction, clean nails under running water, and dry hands on clean towel without touching dirty surfaces.

Patient Friendly Description:
This will explain the importance of washing and cleansing your hands to prevent infection.
Learner Not documented in this visit.
Progress:

Topic: Self Care (MCB) (Not Started)

Point: General Self Care (Not Started)

Description:
Instruct patient on self care needs. These may include: hygiene, how to take a blood pressure, how to change a dressing, etc.

Learner Not documented in this visit.
Progress:

Point: Demonstrate Handwashing (MCB) (Not Started)

Description:
Educate patient/family/caregiver on how to perform proper hand hygiene. Explain that hand washing is the single most important step in preventing the spread of germs. Have the patient/family/caregiver demonstrate proper hand washing technique using soap, water, friction, clean nails under running water, and dry hands on clean towel without touching dirty surfaces.

Patient Friendly Description:
This will explain the importance of washing and cleansing your hands to prevent infection.
Learner Not documented in this visit.
Progress:

Topic: Medications (MCB) (Not Started)

Point: Antibiotic Education (Not Started)

Patient Education (continued)

Education (continued)

Description:
If an antibiotic was prescribed, educate patient/family/caregiver on the antibiotics prescribed. Explain how antibiotics work in the body. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed

If a viral diagnosis was made, the patient/family was educated on their viral diagnosis and the reason for no antibiotic this visit.

Learner Progress: Not documented in this visit.

Point: Anticoagulant Therapy (Not Started)

Description:
1-Educate patient/family/caregiver on anticoagulant being prescribed and provide educational materials.
2-Explain action of medication, reason for taking, and importance of adherence to correct medication dose and schedule,
3-Explain potential for adverse drug reactions, signs of allergic reaction, potential for drug-drug and drug-food interactions, and when physician should be called.
4-Reinforce that the medication should be taken exactly as the physician has prescribed.
5-Explain importance of maintaining follow-up appointments and adhering to laboratory testing as prescribed by physician.
6-Explain that the dose of the anticoagulant being prescribed may change depending on the results of the laboratory testing.

Learner Progress: Not documented in this visit.

Point: Insulin (MCB) (Not Started)

Description:
Educate patient/family/caregiver on the insulin prescribed. Explain how insulin works in the body. Explain the action of insulin, reason for taking, side effects, signs of allergic reaction and when physician should be called. Reinforce that insulin should be taken exactly as the physician has prescribed. Explain the proper storage of insulin, that extreme temperatures can damage insulin and never take insulin that has expired. Explain that the patient's primary care physician may change the dosage depending on the results of blood glucose tests and/or A1C level.

Patient Friendly Description:
This will inform you of why you are prescribed insulin if you have Diabetes Type II.

Learner Progress: Not documented in this visit.

Point: Hypoglycemic Agents (Not Started)

Description:
Educate patient/family/caregiver on the oral and/or injectable hypoglycemic(s) prescribed. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, as well as when the physician should be called. Reinforce that this medication(s) should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Non-Steroidal Anti-Inflammatory Drugs (Not Started)

Description:
Educate patient/family/caregiver on the NSAID prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Psychotropic Medications (Not Started)

Description:
Educate patient/family/caregiver on the Psychotropic medication prescribed. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: ACE Inhibitors (Not Started)

Patient Education (continued)

Education (continued)

Description:
Educate patient/family/caregiver on the ACE Inhibitor prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Angiotensin II Receptor Blockers (Not Started)

Description:
Educate patient/family/caregiver on the Angiotensin II Receptor Blockers prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Beta Blockers (Not Started)

Description:
Educate patient/family/caregiver on the Beta Blocker prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Digoxin (Not Started)

Description:
Educate patient/family/caregiver on Digoxin and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed. The physician will order a blood test to monitor the concentration of the drug in the patient's blood. The dose of this medication may be changed according to the results of this test.

Learner Progress: Not documented in this visit.

Point: Diuretics (Not Started)

Description:
Educate patient/family/caregiver on the Diuretic prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Inotropes (Not Started)

Description:
Educate patient/family/caregiver on the Inotropes prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Vasodilators (Not Started)

Description:
Educate patient/family/caregiver on the Vasodilator prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Antibiotics (Not Started)

Patient Education (continued)

Education (continued)

Description:
Educate patient/family/caregiver on the Antibiotics prescribed. Explain how antibiotics works in the body. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Medication purpose, side effects, schedule, administration (MCB) (Not Started)

Description:
Discussed purpose and possible side effects of medication.

Learner Progress: Not documented in this visit.

No active allergies

Cobb Eye Center Post-Op Instructions

Activity

- Do not lift anything over 20 pounds.
- No strenuous activity, this includes swimming until your doctor give you permission.
- Driving a car is permitted depending on your vision. Please check with our doctor before you resume driving.
- You may resume all normal daily activities. For example: reading, watching television, walking, and riding in a car or plane.

Medications

- Resume all your daily medications.

General Information

- Wash your hands before treating your operative eye.
- Wear the protective eye shield over your eye at bedtime and naps until otherwise instructed by your doctor. When putting on your glasses, be careful not to hit your eye with the earpiece.
- Do not touch or rub the upper lid of the operative eye at anytime.

View your After Visit Summary and more online at

- Unless otherwise instructed by your doctor, keep the patch on your operative eye. It will be removed the day after surgery. You will also be given further instructions on the eye drops and caring for your eye.
- On the day of surgery, you will need someone to drive you home from the surgery center and to our office the next day.
- No eye make-up for 1 week.
- Your eye may feel irritated (like sand is in it) for the first 24-48 hours. You may take Tylenol or Advil to control the discomfort. If over the counter medication does not help, please call our office.

Bathing

- You may bathe or shower. You may shampoo your hair the day after surgery. Keep your operative eye protected from soap and water.

Call You Doctor

- Sudden decrease in you vision.
- Increased redness or pain.

Follow-Up Appointment

- Your first follow-up appointment will be the day after surgery
- Bring all your eye drops to each follow-up visit.

OMB Approval No. 0938-0692

AN IMPORTANT MESSAGE FORM MEDICARE ABOUT YOUR RIGHTS

AS A HOSPITAL INPATIENT, YOU HAVE THE RIGHT TO:

Receive Medicare covered services. This includes medically necessary hospital services and services you may need after you are discharged, if ordered by your doctor. You have a right to know about these services, who will pay for them, and where you can get them.

- Be involved in any decisions about your hospital stay, and know who will pay for it.
- Report any concerns you have about the quality of care you receive to KEPRO:
  1-844-455-8708
  KEPRO, 5201 W. Kennedy Blvd., Suite 900, Tampa, FL 33609

YOUR MEDICARE DISCHARGE RIGHTS

Planning For Your Discharge: During your hospital stay, the hospital staff will be working with you to prepare for your safe discharge and arrange for services you may need after you leave the hospital. When you no longer need inpatient hospital care, your doctor or the hospital staff will inform you of your planned discharge date.

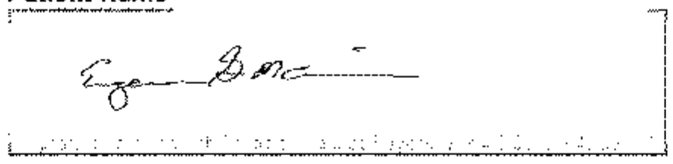
If you think you are being discharged too soon:

- You can talk to the hospital staff, your doctor and your managed care plan (if you belong to one) about your concerns.
- You also have the right to an appeal, that is, a review of your case by KEPRO. This reviewer was hired by Medicare to look at your case to decide whether you are ready to leave the hospital.
  - **If you want to appeal, you must contact KEPRO no later than your planned discharge date and before you leave the hospital.**
  - If you do this, you will not have to pay for the services you receive during the appeal (except for charges like copays and deductibles).
- If you do not appeal, but decide to stay in the hospital past your planned discharge date, you may have to pay for any services you receive after that date.
- **Step by step instructions for calling the KEPRO and filing an appeal are on page 2.**

To speak with someone at the hospital about this notice, call (770) 443-7068.

Please sign and date here to show you received this notice and understand your rights.

Patient Name



CMS-R-193 (approved 07/10)
WS Paulding Hospital
An Important Message from Medicare
About Your Rights

STEPS TO APPEAL YOUR DISCHARGE

- **STEP 1:** You must contact the KEPRO no later than your planned discharge date and before you leave the hospital. If you do this, you will not have to pay for the services you receive during the appeal (except for charges like copays and deductibles).
  - Here is the contact information: 1-844-455-8708
    KEPRO, 5201 W. Kennedy Blvd., Suite 900, Tampa, FL 33609

- You can file a request for an appeal any day of the week. Once you speak to someone or leave a message, your appeal has begun.
- Ask the hospital if you need help contacting KEPRO.
- The name of this hospital is **WS Paulding Hospital 110042**
-

- **STEP 2:** You will receive a detailed notice from the hospital or your Medicare Advantage or other Medicare managed care plan (if you belong to one) that explains the reasons they think you are ready to be discharged.

- **STEP 3:** The KEPRO will ask for your opinion. You or your representative need to be available to speak with KEPRO, if requested. You or your representative may give KEPRO a written statement, but you are not required to do so.

- **STEP 4:** The KEPRO will review your medical records and other important information about your case.

- **STEP 5:** KEPRO will notify you of its decision within 1 day after it receives all necessary information.
  - If KEPRO finds that you are not ready to be discharged, Medicare will continue to cover your hospital services.
  - If KEPRO finds you are ready to be discharged, Medicare will continue to cover your services until noon of the day after KEPRO notifies you of its decision.

IF YOU MISS THE DEADLINE TO APPEAL, YOU HAVE OTHER APPEAL RIGHTS:

- You can still ask the KEPRO or your plan (if you belong to one) for a review of your case:
  - If you have Original Medicare: Call the KEPRO listed above.
  - If you belong to a Medicare Advantage Plan or other Medicare managed care plan: Call your plan
- If you stay in the hospital, the hospital may charge you for any services you receive after your planned discharge date.

For more information, call 1-800-MEDICARE (1-800-633-4227), or TTY: 1-877-486-2048.
Additional Information: I have received my second notice and understand my appeal rights.

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0938-0692. The time required to complete this information collection is estimated to average 15 minutes per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: CMS, 7500 Security Boulevard, ATTN: PRA Reports Clearance Officer, Mail Stop C4-26-05, Baltimore, MD 21244-1850.

Cobb Eye Center Post-Op Instructions

Activity

- Do not lift anything over 20 pounds.
- No strenuous activity, this includes swimming until your doctor give you permission.
- Driving a car is permitted depending on your vision. Please check with our doctor before you resume driving.
- You may resume all normal daily activities. For example: reading, watching television, walking, and riding in a car or plane.

Medications

- Resume all your daily medications.

General Information

- Wash your hands before treating your operative eye.
- Wear the protective eye shield over your eye at bedtime and naps until otherwise instructed by your doctor. When putting on your glasses, be careful not to hit your eye with the earpiece.
- Do not touch or rub the upper lid of the operative eye at anytime.
- Unless otherwise instructed by your doctor, keep the patch on your operative eye. It will be removed the day after surgery. You will also be given further instructions on the eye drops and caring for your eye.
- On the day of surgery, you will need someone to drive you home from the surgery center and to our office the next day.
- No eye make-up for 1 week.
- Your eye may feel irritated (like sand is in it) for the first 24-48 hours. You may take Tylenol or Advil to control the discomfort. If over the counter medication does not help, please call our office.

Bathing

- You may bathe or shower. You may shampoo your hair the day after surgery. Keep your operative eye protected from soap and water.

Call You Doctor

- Sudden decrease in you vision.
- Increased redness or pain.

Follow-Up Appointment

- Your first follow-up appointment will be the day after surgery.
- Bring all your eye drops to each follow-up visit.

OPERATIVE REPORT

PATIENT: Eugene G Maurice
DOB: 1/2/1949
MRN: 561253820
CSN: 2101351746

DATE OF ADMISSION: **4/17/2019**
DATE OF OPERATION: **4/17/2019**

SURGEON: Bruce P Crowley, MD

PRE-OPERATIVE DIAGNOSIS: Cataract left eye.

POST-OPERATIVE DIAGNOSIS: Cataract left eye.

PROCEDURE: Phacoemulsification of a cataract with a posterior chamber intraocular lens, left eye.

ANESTHESIA: Local MAC

ANESTHEIOLOGIST: Turry

ANESTHETIST: Gurney

COMPLICATIONS: None

ESTIMATED BLOOD LOSS: Nil

DESCRIPTION OF PROCEDURE: The patient was prepped and draped in the usual sterile fashion. After Tetracaine was applied, a wire lid speculum was placed into the eye. A 15-degree blade was used to make a paracentesis. Preservative-Free 2% Lidocaine was injected intracamerally as well as topically. Viscoat was used to fill the anterior chamber. A 2.75 keratome was used to enter the anterior chamber at 180-degrees and a circular tear capsulorrhexis was done with Utrata forceps and a cystitome. Balanced salt solution was then used to hydrodissect the nucleus and a Balanced phacoemulsification tip was used in a 2-handed chopping technique with a CDE of 5.26. The irrigation/aspiration machine was then used to remove the remaining cortical material and capsular polishing was done. Provisc was then used to fill the capsular bag and then the Alcon Acrysof SN60WF Intraocular lens in a power of 24.5 diopters was inserted into the eye and moved into position within the capsular bag with a Kuglen hook. The I and A was then used to remove the remaining Provisc and vacuum the underside of the anterior capsule where able. The eye was reinflated with a balanced salt solution and the wound was hydrated and found to be watertight. Pilocarpine and Maxitrol were placed in the eye, a shield was placed and the patient was taken to the recovery room in good condition.

PREOPERATIVE INSTRUCTIONS
EYE PATIENTS

Day Before Surgery

- Drink plenty of fluids during the day and evening until midnight. Eat a light evening meal the night before surgery, unless instructed differently by your physician.
- **DO NOT EAT OR DRINK ANYTHING AFTER 12 MIDNIGHT.**
- **Take a shower the night before or morning of procedure and wash face with an antibacterial soap, such as "*Dial*"**
- Notify your physician if there is any change in your physical condition, such as a cold, fever, infection, nausea, vomiting, and/or diarrhea.
- Please call **470-644-7252** the morning of your surgery if you have any questions or concerns.
- STOP your metformin 24 hours prior to procedure
- Stop vitamins and supplements,stop any NSAID products.
- NO diabetic medications or Insulins the morning of your surgery.
- Blood thinners (Plavix and Asa)as per your Dr. Recommendations.

Morning of Surgery

- Please report to the **Paulding Outpatient Pavilion North / GREEN PARKING ZONE**
  Date: Wednesday 04/17/2019 Arrive @: 09:30AM Approx. Surgery Time: 11:00AM
- You may take the following medications with a sip of water: **Sotalol, and your Imdur and use your eye drops.**
- You may brush your teeth, but **do not swallow** any water or toothpaste.
- **Do not** chew gum or suck on candy.
- **Do not wear any makeup, mascara, eye shadow, eyeliner, or false eyelashes.**
- **Do not apply any facial lotion/ moisturizer after washing your face with an antibacterial soap.**
- Remove all fingernail and toenail polish, except clear.
- Bring a container for your dentures, glasses, and contacts (w/ saline solution)
- Wear loose fitting clothing such as a jogging suit. Wear warm socks (you will wear them into the operating room). Wear a button-down or zipper front top or a top that will fit easily over your head. If you are to be admitted after surgery, please leave your suitcase in the car.
- Leave all valuables and jewelry at home. All jewelry, including body piercings, **must be removed.**
- For outpatient surgery, **you must have a responsible adult stay throughout your surgery, recovery, and drive you home and stay with you for 24 hours.** Driving a car, operating machinery or power tools is not recommended for 24 hours after any type of anesthesia. Your surgery may be **canceled or delayed** if you do not have a ride. If you choose public transportation, you will still be required to have a friend or family member accompany you.
- Please, no visitors under the age of twelve. No more than **Two visitors** are allowed in the Surgical Pre/Post-Op Rooms. Additional visitors will be asked to remain in the waiting room area and will be allowed to take turns visiting if time permits.

Pre-Procedure Instructions - Encounter Notes (continued)

Pre-Procedure Instructions by Sandra Cody, RN at 4/12/2019 4:06 PM (continued)

- Additional instructions: **Do not bring your eye drops with you to the hospital the day of your procedure, BUT you will need to take them with you to your post- op appointment the next day.**

PNDS Information

Outcomes - Pre-op

Used?	Description (Code)
Yes	The patient participates in decisions affecting his or her perioperative plan of care. (O23)
Yes	Confirms identity before the operative or invasive procedure. (I26)
	The patient demonstrates knowledge of the expected responses to the operative or invasive procedure. (O31)

Outcomes - Intra-op

Used?	Description (Code)
Yes	The patient is free from signs and symptoms of injury caused by extraneous objects. (O2)
Yes	The patient is free from signs and symptoms of injury related to positioning. (O5)
Yes	The patient is free from signs and symptoms of infection. (O10)

Outcomes - Post-op

Used?	Description (Code)
Yes	The patient is at or returning to normothermia at the conclusion of the immediate postoperative period. (O12)
Yes	The patient's respiratory function is consistent with or improved from baseline levels established preoperatively. (O14)
Yes	The patient demonstrates knowledge of pain management. (O20)
Yes	The patient demonstrates knowledge of wound management. (O22)
Yes	The patient demonstrates and/or reports adequate pain control throughout the perioperative period. (O29)

Diagnoses

Present?	Description (Code)
Yes	Anxiety (X4)
	Ineffective breathing pattern (X7)
	Risk for infection (X28)
	Risk for injury (X29)
	Deficient knowledge (X30)
	Acute pain (X38)
	Risk for impaired skin integrity (X51)
	Risk for imbalanced body temperature (X57)

Last edited 04/17/19 1018 by Paul K Turry, MD
Date of Service 04/17/19 1017
Status: Addendum

Anesthesia Pre-op Evaluation

Patient Name: Eugene G Maurice **MRN:** 561253820
Date of Birth: 1/2/1949 **Age:** 70 yrs **Sex:** Male
Height: 1.702 m (5' 7") **Weight:** 96.6 kg (212 lb 15.4 oz) **BMI:** Body mass index is 33.35 kg/m².

Pre-Assessment Information

No Known Allergies

Anesthesia Encounter - Episode ID 35322107 (continued)

Preprocedure Note (continued)

Relevant Problems

(+) Acute GI bleeding
(+) Acute on chronic congestive heart failure, unspecified congestive heart failure type
(+) Anemia
(+) Angina pectoris (HCC)
(+) Atherosclerosis of native coronary artery of native heart with stable angina pectoris (HCC)
(+) Controlled type 2 diabetes mellitus with diabetic peripheral angiopathy without gangrene, without long-term current use of insulin (HCC)
(+) Essential hypertension
(+) Localized edema
(+) Obesity
(+) PAF (paroxysmal atrial fibrillation) (HCC)

Past Medical History:

Diagnosis	Date
• AKI (acute kidney injury) (HCC)	
• CAD (coronary artery disease)	
• Cancer of prostate with low recurrence risk (stage T1-2a and Gleason < 7 and PSA < 10) (HCC)	1/30/2018
• Cataracts, both eyes	
• Coronary atherosclerosis of native coronary artery	
• Diabetes mellitus (HCC)	
• Essential hypertension, benign	
• Family history of ischemic heart disease	
• Hyperlipidemia	
• Hypertension	
• Infectious viral hepatitis *as teen/cannont recall what type*	
• Obesity	
• Other and unspecified hyperlipidemia	
• Other symptoms involving cardiovascular system	
• PVD (peripheral vascular disease) (HCC)	

Past Surgical History:

Procedure	Laterality	Date
• APPENDECTOMY		
• CAROTID ENDARTERECTOMY *x2*		
• COLONOSCOPY *as of 9/2014 has not had this*		
• CORONARY ARTERY BYPASS GRAFT *X6*		1992
• CORONARY STENT PLACEMENT		2014

- VASCULAR SURGERY
  right leg

Social History Main Topics

- Smoking status: Former Smoker
  - Packs/day: 1.00
  - Years: 25.00
  - Types: Cigarettes
  - Quit date: 4/7/1992
- Smokeless tobacco: Never Used
- Alcohol use 2.4 oz/week
  2 Glasses of wine, 2 Shots of liquor per week
  Comment: rarely
- Drug use: No
- Sexual activity: Yes
  - Partners: Female
  - Birth control/ protection: None

Documented NPO status:
No Data Recorded

Pre-operative Evaluation

Review of Systems/Medical History

General: Patient summary reviewed and Nursing notes reviewed.
Anesthesia History: No history of anesthetic complications. Patient has no family history of anesthetic complications. No PONV
Cardiovascular: Patient's ECG and ECHO reviewed.
(+) hypertension: controlled, CAD,

Comments: Results for orders placed or performed during the hospital encounter of 04/09/18
-Echo 2D complete panel (contrast/bubble PRN per protocol)

Narrative
· The left ventricular systolic function is normal, ejection fraction is 50-55%.
· The left ventricular cavity size is normal.
· Left ventricular diastolic function is normal.
· The right ventricular cavity size and systolic function is/are normal.
· There is mild mitral and tricuspid valve regurgitation present.

Results for orders placed or performed during the hospital encounter of 03/29/16
-Echo 2D complete panel (contrast/bubble PRN per protocol)

Narrative
· Left ventricular systolic function is normal, ejection fraction is 50-55%.
· The left ventricle cavity is normal size. Mildly increased concentric left ventricle hypertrophy.
· Right ventricle has normal size and normal systolic function.
· There is mild mitral valve regurgitation present.

Pulmonary: Negative ROS

Neuro/Psych: - Negative ROS

GI/Hepatic/Renal: Negative GI/hepatic ROS
(+) chronic renal disease:

Endo/Other:
(+) diabetes mellitus: *well controlled*, Type 2,

Physical Exam

Airway:
Mallampati: II
Neck ROM: full
TM distance: >3 FB

Cardiovascular: normal exam

Anesthesia Encounter - Episode ID 35322107 (continued)

Preprocedure Note (continued)

Pulmonary:

Breath sounds clear to auscultation.

Anesthesia Plan

ASA: 3
Anesthetic Plan: MAC

Airway Management: supplemental O2
Premedication Plan: none

Anesthetic plan and risks discussed with: Patient and spouse.

Plan discussed with: Anesthetist

Status: Signed

Patient Name: Eugene G Maurice

Procedure Summary

Date: 04/17/19
Anesthesia Start: 1045
Procedure: CATARACT PHACOEMULSIFICATION IMPLANTATION INTRAOCULAR LENS (Left Eye)

Surgeon: Bruce P Crowley, MD
Anesthesia Type: MAC

Room / Location: PH OR 08 / PH MAIN OR
Anesthesia Stop: 1110
Diagnosis:
Nuclear sclerotic cataract of left eye
(Nuclear sclerotic cataract of left eye [H25.12])
Responsible Provider: Paul K Turry, MD
ASA Status: 3

Final Anesthesia Type: MAC

Patient location: PACU
Post vital signs: post-procedure vital signs reviewed and stable

Anesthesia Encounter - Episode ID 35322107 (continued)

All Postprocedure Notes (continued)

Level of consciousness: awake, alert and oriented
Post-anesthesia pain:
Pain Status: adequate analgesia

Airway patency: patent
Respiratory: room air and unassisted
Cardiovascular: blood pressure at baseline and stable
Hydration: euvolemic
Nausea and vomiting: no signs of nausea and vomiting
Anesthetic complications: No

Patient Education

Education

Title: Acute MI (MCB) (Resolved)

Topic: Psycho/Social/Spiritual Support (Resolved)

Point: Coping Mechanisms (Resolved)

Description:
Help patient identify healthy coping mechanisms. Refer to Social Service, Case Management, or Spiritual Care, if needed.

Learner Progress: Not documented in this visit.

Point: Support Systems (Resolved)

Description:
Help patient identify available support systems. Refer to Social Service, Case Management, or Spiritual Care, if needed.

Learner Progress: Not documented in this visit.

Point: Spiritual/Emotional Needs (Resolved)

Description:
Offer resources to meet spiritual/emotional needs. Refer to Spiritual Care, if needed.

Learner Progress: Not documented in this visit.

Point: Anxiety Reduction (Resolved)

Description:
Explain the definition of anxiety, signs and symptoms, and examples of ways to reduce anxiety. Inform patient that Spiritual Care and Social Services are available.

Learner Progress: Not documented in this visit.

Topic: Prevention (MCB) (Resolved)

Point: When to Call the Doctor (Resolved)

Description:
Educate patient/family/caregiver on when to call the doctor.

Learner Progress: Not documented in this visit.

Point: Protect Others from Infection (Resolved)

Description:
Educate patient/family/caregiver on respiratory hygiene and cough etiquette. To protect from further infection and to protect others from getting an infection, patient should cover nose and mouth with tissues when coughing. Encourage patient to place used tissues in a plastic bag that will not allow secretions to soak through. Patient should always wash his/her hands after using or handling used tissues.

Learner Progress: Not documented in this visit.

Point: Protect Yourself from Further Infection (MCB) (Resolved)

Patient Education (continued)

Education (continued)

Description:
Educate patient/family/caregiver that because patient is in a weakened condition he/she needs to avoid others who are sick as to not acquire another illness. Family/caregiver should wear gloves, gown and face shield/eye protection.

Patient Friendly Description:
Information on Flu.
Information on Pneumonia and Pneumococcal Vaccination.
Learner Not documented in this visit.
Progress:

Point: Demonstrate Handwashing (MCB) (Resolved)

Description:
Educate patient/family/caregiver on how to perform proper hand hygiene. Explain that hand washing is the single most important step in preventing the spread of germs. Have the patient/family/caregiver demonstrate proper hand washing technique using soap, water, friction, clean nails under running water, and dry hands on clean towel without touching dirty surfaces.

Patient Friendly Description:
This will explain the importance of washing and cleansing your hands to prevent infection.
Learner Not documented in this visit.
Progress:

Topic: Self Care (MCB) (Resolved)

Point: General Self Care (Resolved)

Description:
Instruct patient on self care needs. These may include: hygiene, how to take a blood pressure, how to change a dressing, etc.

Learner Not documented in this visit.
Progress:

Point: Demonstrate Handwashing (MCB) (Resolved)

Description:
Educate patient/family/caregiver on how to perform proper hand hygiene. Explain that hand washing is the single most important step in preventing the spread of germs. Have the patient/family/caregiver demonstrate proper hand washing technique using soap, water, friction, clean nails under running water, and dry hands on clean towel without touching dirty surfaces.

Patient Friendly Description:
This will explain the importance of washing and cleansing your hands to prevent infection.
Learner Not documented in this visit.
Progress:

Topic: Pain Management (Resolved)

Point: Pain Medication Actions & Side Effects (Resolved)

Description:
Provide medication specific handouts when available.

Learner Not documented in this visit.
Progress:

Point: Discuss Significance of VAS Scores (Resolved)

Description:
Refer to rating score of 0-10.

Learner Not documented in this visit.
Progress:

Point: Discuss the Use of Pain Control Measures Before Pain Becomes Severe (MCB) (Resolved)

Description:
Take time to reiterate to patient that he/she should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time before pain becomes severe.

Patient Education (continued)

Education (continued)

Patient Friendly Description:
Please inform staff that if you are having any difficulty breathing, pain or any discomfort at any time before the pain gets severe.

Please read over the items and let anyone on your Care Team know there are any questions about the material by marking below that "I HAVE QUESTIONS".

If once you have received the items and understand the material you can mark this as "I understand".
Learner Progress: Not documented in this visit.

Point: Non-Pharmacological Comfort Measures (Resolved)

Description:
Explain there are other ways of controlling pain than medication. The following are suggestions: position change, aromatherapy, deep slow breathing, distraction, quiet environment, imagery, heat therapy and/or cold therapy, laughter, massage, music, physical therapy, and touch therapy.

Learner Progress: Not documented in this visit.

Point: Patient Controlled Analgesia (Resolved)

Description:
Give the patient written information on Patient Controlled Analgesia. Explain how the pump works. Demonstrate pushing the button to give pain medicine to the patient. Caution the patient and other family/visitors that only the patient should press the PCA button for pain relief to decrease the chance of getting too much pain medicine.

Learner Progress: Not documented in this visit.

Point: Epidural Information (Resolved)

Description:
Give the patient written information on Epidural Analgesia. Explain why an epidural is used, how the epidural is placed and how the medication is given. If the epidural is PCA, demonstrate pushing the button to give pain medicine to the patient. Caution the patient and other family/visitors that only the patient should press the button for pain relief to decrease the chance of getting too much pain medicine.

Learner Progress: Not documented in this visit.

Topic: Signs and Symptoms - Acute MI (Resolved)

Point: Recognizing a Heart Attack (MCB) (Resolved)

Description:
Be sure patient reviews video on Coronary Artery Disease

Patient Friendly Description:
Please watch the video and/or read over the documented material and let anyone on your Care Team know if there are any questions by marking below.
If after watching the video and/or reading the material you have questions, please mark below I have question to let the staff know you have additional questions about a topic and they will be in to discuss your questions.

This will inform you of what to expect if you are diagnosed with a Heart Attack.
Learner Progress: Not documented in this visit.

Point: Risk Factors (Resolved)

Description:
Educate the patient/family/caregiver on coronary risk factors. Explain the controllable and non-controllable risk factors to Coronary Artery Disease. Review how to control coronary artery disease by altering the controllable risk factors. Some examples include: controlling blood pressure, reducing fat and cholesterol in the diet, stopping smoking, exercising regularly, maintaining ideal body weight, dealing with stress in an appropriate manner, drinking alcohol and coffee in moderation and controlling blood sugar levels (if applicable).

Learner Progress: Not documented in this visit.

Topic: Acute MI (MCB) (Resolved)

Patient Education (continued)

Education (continued)

Point: Emergency Plan for Heart Attack Symptoms (Resolved)

Description:
Educate the patient/family/caregiver on how to get help immediately if heart attack symptoms occur. The patient should call 911 or the Emergency Medical Service number. Reinforce that the patient should not delay in obtaining help.

Learner Progress: Not documented in this visit.

Point: Home Activity (Resolved)

Description:
Educate the patient/family/caregiver on home activity guidelines that apply after having had a recent heart attack. Do things in moderation, rest about 30 minutes after eating, pace activities, allow for 7-8 hours of sleep at night, start with short walks 3-5 times a day. Consult with Cardiac Rehab staff, if applicable.

Learner Progress: Not documented in this visit.

Point: Limitations to Activity (Resolved)

Description:
Educate the patient/family/caregiver reagrding the following limitations to activity for 4-6 weeks after discharge. No lifting over 10 pounds (weight of a milk jug), no pushing or pulling motions with the arms (sweeping, vacuuming or raking), no driving (may be changed after talking to the doctor), no bathing in very hot or very cold water.

Learner Progress: Not documented in this visit.

Point: Sexual Activity (Resolved)

Description:
Educate the patient/family/caregiver on the following: Wait 4 weeks before resuming sexual activity. If the patient can climb 2 flights of steps, he/she can assume it is ok to resume sexual activity. Choose a comfortable position. Wait at least 1 hour after a meal. If sex brings on angina, stop and rest. Discuss chest pain during sex with the physician. Some medications can affect sexual desire. If this is the case, talk with the physician.

Learner Progress: Not documented in this visit.

Point: Influenza Vaccine (Resolved)

Description:
Educate the patient/family/caregiver on obatining a yearly influenza vaccine.

Learner Progress: Not documented in this visit.

Point: Smoking Cessation (Resolved)

Description:
Educate the patient/family/caregiver on smoking cessation and smoking cessation programs offered in the community. Explain effects smoking and second hand smoke have on the body. Encourage the patient to ask people that smoke around him/her to smoke outside or in another room. Refer patient to Cardiopulmonary Rehabilitation, if applicable.

Learner Progress: Not documented in this visit.

Title: Diabetes (MCB) (Not Started)

Topic: Psycho/Social/Spiritual Support (Not Started)

Point: Stress Management and Support Systems (Not Started)

Description:
Explain the importance of stress management and support systems in diabetes management. Refer to WellStar diabetes support groups, social services, case management or spiritual care, if needed.

Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Point: Anxiety Reduction (Not Started)

Description:
Explain the definition of anxiety, signs and symptoms, and examples of ways to reduce anxiety. Inform patient that Spiritual Care and Social Services are available.

Learner Progress: Not documented in this visit.

Topic: Treatments/Procedures (MCB) (Not Started)

Point: Introduction to Diabetes (MCB) (Not Started)

Description:
Give patient/family/caregiver written information on diabetes. Explain the definition of the type of diabetes with which the patient was diagnosed, how diabetes works in the body, risk factors, signs and symptoms, and if newly diagnosed, diagnostic criteria. Encourage viewing of diabetes on-demand videos when applicable. Refer to inpatient diabetes educator when applicable.

Patient Friendly Description:
You will receive a booklet entitled Diabetes survival skills. There are also two links to documents about Diabetes for you to read over noted below.

Please read over the items and let anyone on your Care Team know there are any questions about the material by marking below that "I HAVE QUESTIONS".

If once you have received the items and understand the material you can mark this as "I understand".
Learner Progress: Not documented in this visit.

Point: Diabetes Type II management (MCB) (Not Started)

Description:
Patient will watch a video that will discuss information on what to expect if they have Diabetes type II.

Patient Friendly Description:
This will inform you of what to expect if you have Diabetes type II.
Learner Progress: Not documented in this visit.

Point: Diabetic long term complications (MCB) (Not Started)

Description:
Patient will have information from Krames on the long term complications of Diabetes Type II.

Patient Friendly Description:
Some information on the long term complications of Diabetes Type II.
Learner Progress: Not documented in this visit.

Topic: Medications (MCB) (Not Started)

Point: Insulin (MCB) (Not Started)

Description:
Educate patient/family/caregiver on the insulin prescribed. Explain how insulin works in the body. Explain the action of insulin, reason for taking, side effects, signs of allergic reaction and when physician should be called. Reinforce that insulin should be taken exactly as the physician has prescribed. Explain the proper storage of insulin, that extreme temperatures can damage insulin and never take insulin that has expired. Explain that the patient's primary care physician may change the dosage depending on the results of blood glucose tests and/or A1C level.

Patient Friendly Description:
This will inform you of why you are prescribed insulin if you have Diabetes Type II.
Learner Progress: Not documented in this visit.

Point: Hypoglycemic Agents (Not Started)

Description:
Educate patient/family/caregiver on the oral and/or injectable hypoglycemic(s) prescribed. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, as well as when the physician should be called. Reinforce that this medication(s) should be taken exactly as the physician has prescribed.

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Point: Giving Insulin Injection (Not Started)

Description:
Explain and demonstrate how the injection is given. Allow enough time for the patient/family/caregiver to practice. Have the patient return-demonstrate the technique using normal saline (vial and syringe only unless sterile demonstration pen is also available). Teach the patient how to choose and rotate injection sites. Instruct patient on safe disposal of used needles and syringes.

Learner Progress: Not documented in this visit.

Point: Drawing up Insulin (Not Started)

Description:
Instruct patient/family/caregiver to wash hands before drawing up insulin. Demonstrate and have the patient return-demonstrate drawing up the correct amount of insulin prescribed. If the patient is going to use an insulin pen, demonstrate use and have the patient return-demonstrate. If the patient is going to mix different types of insulin, demonstrate and have the patient return-demonstrate the correct way to draw up and mix the insulin.

Learner Progress: Not documented in this visit.

Topic: Self Care (MCB) (Not Started)

Point: Exercise (Not Started)

Description:
Encourage patient/family/caregiver to discuss activity limitations, if any, with physician before starting an exercise routine. Stress the importance of regular exercise and activity to control blood sugar levels and weight. Instruct the patient to carry single carohydrates while exercising in case of hypoglycemic reaction. Explain that both concentrated physical activity (such as walking, swimming, running, cycling, strength training) and being more active through the entire day are equally important to blood sugar control and weight management.

Learner Progress: Not documented in this visit.

Point: Blood Glucose Monitoring (MCB) (Not Started)

Description:
Instruct patient/family/caregiver to wash hands before checking blood glucose. Explain and, if possible to use a complementary glucometer, demonstrate how to check and record blood sugars. Instruct the patient to check blood sugars as frequently as ordered by the physician. Explain that stress or illness will increase blood sugar, making it necesary to check blood sugars more often than usual. Instruct patient on blood glucose target ranges and A1C target range. Discuss care of the meter and supplies, including how to obtain supplies. If using a complementary glucometer, have the patient return-demonstrate checking the blood sugar. Instruct the patient on safe disposal of lancets. Refer to inpatient diabetes educator if applicable.

Patient Friendly Description:
Why is it important to check my blood sugar?

Learner Progress: Not documented in this visit.

Point: Diabetic Foot Care (MCB) (Not Started)

Description:
Explain importance of foot care. Patient should have feet examined by a health care provider at least twice a year. Persons with foot problems should have feet examined at every visit. Explain daily foot care. Review importance of wearing well-fitting shoes and stockings/socks. Reinforce the importance of wearing shoes, even indoors, to prevent injury.

Patient Friendly Description:
This will inform you of why you should check your feet if you have diabetes.

Learner Progress: Not documented in this visit.

Point: Diabetes Identification Jewelry (Not Started)

Description:
Encourage the patient to wear a piece of jewelry that identifies patient as a person with diabetes. This will inform medical personnel that patient has diabetes if unable to communicate.

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Topic: Prevention/Discharge (Not Started)

Point: Signs and Symptoms of Hypoglycemia (Not Started)

Description:
Define and explain causes of hypoglycemia. Discuss signs and symptoms.

Learner Progress: Not documented in this visit.

Point: Treatment of Hypoglycemia (Not Started)

Description:
Instruct the patient on how to treat low blood sugar using the Rule of 15. Encourage patient to carry a blood sugar treatment at all time.

Learner Progress: Not documented in this visit.

Point: When to Call the Doctor (Not Started)

Description:
Instruct the patient/family/caregiver to call their health care provider if there are symptoms of hypo- or hyperglycemia or if blood sugars are trending high or low and are not controlled by simple measures.

Learner Progress: Not documented in this visit.

Point: Signs and Symptoms of Hyperglycemia (Not Started)

Description:
Define and explain causes of hyperglycemia. Discuss signs and symptoms (mild, moderate, severe, and ketoacidosis).

Learner Progress: Not documented in this visit.

Point: Prevention of Hyperglycemia (Not Started)

Description:
Encourage patient/family/caregiver to follow healthcare providers' instructions for diet, activity and medications. Explain the importance of good diabetes management and learning to detect and treat hyperglycemia early before it worsens. Refer to registered dietitian, when applicable, for meal planning assistance.

Learner Progress: Not documented in this visit.

Point: Prevention of Hypoglycemia (Not Started)

Description:
Encourage patient/family/caregiver to follow healthcare providers' instructions for diet, activity and medications. Explain the importantce of good diabetes management and learning to detect and treat hypoglycemia early before it worsens.

Learner Progress: Not documented in this visit.

Point: WellStar Outpatient Diabetes Education (Not Started)

Description:
Provide information on WellStar Outpatient Diabetes Education when applicable. Information includes a list of classes offered and how to register.

Learner Progress: Not documented in this visit.

Point: Follow-up Appointments (Not Started)

Description:
Give the patient/family written information on when to make follow-up appointments. Reinforce importance of making and keeping the appointments. If appointments were made during the visit, give the patient a written reminder of the time and location.

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Topic: Diabetic Diet (MCB) (Not Started)

Point: Meal Planning and Portion Sizes (MCB) (Not Started)

Description:
The patient will view documents in Krames talking about meal planning as well learning about serving and portion sizes.

Patient Friendly Description:
This will inform you of ways to stay on track with your diet.

Learner Progress: Not documented in this visit.

Point: Eating well with Diabetes (MCB) (Not Started)

Description:
Patient will watch a video on healthy eating for people with DM.

Patient Friendly Description:
Healthy eating for people with Diabetes.

Learner Progress: Not documented in this visit.

Point: Carbohydrate Counting (MCB) (Not Started)

Description:
Patient will read Krames documents on healthy meals and meal planing for Diabetes.

Patient Friendly Description:
Learn about counting your carbohydrates.

Learner Progress: Not documented in this visit.

Topic: Survival Skills (Not Started)

Point: Review Diagnosis (Not Started)

Description:
Review the diabetes disagnosis, specific to patient's diabetes type.
Diabetes Survival Skills Booklet provided.

Patient Friendly Description:

Learner Progress: Not documented in this visit.

Point: Nutrition (Not Started)

Description:
Importance of consistent nutrition habits.

Learner Progress: Not documented in this visit.

Point: Appointments (Not Started)

Description:
Importance of follow up appointment with the health care provider who will provide diabetes care after discharge.

Learner Progress: Not documented in this visit.

Point: Sick Day (Not Started)

Description:
Sick day management

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Point: Insulin Administration (if applicable) (Not Started)

Description:
Insulin administration and proper use and disposal of needles and syringes. How to schedule outpatient diabetes education. Review self-monitoring of blood glucose and home blood glucose goals.

Learner Progress: Not documented in this visit.

Point: Hyperglycemia (Not Started)

Description:
Definition, recognition, treatment and prevention of hyperglycemia.

Learner Progress: Not documented in this visit.

Point: Hypoglycemia (Not Started)

Description:
Definition, recognition, treatment and prevention of hypoglycemia.

Learner Progress: Not documented in this visit.

Point: Glucose Lowering Medications (Not Started)

Description:
When and how to take blood glucose-lowering medications.

Learner Progress: Not documented in this visit.

Topic: Diabetes Zones for Management (Not Started)

Point: Diabetes Zones for Management reviewed (Not Started)

Description:
Diabetes Zones for Management reviewed.

Learner Progress: Not documented in this visit.

Point: Diabetes Zones for Management handout provided (Not Started)

Description:
Diabetes Zones for Management handout provided.

Learner Progress: Not documented in this visit.

Title: WS Cardiac Rehab (Resolved)

Topic: PCI (Resolved)

Point: Books/Educational Material (Resolved)

Description:
Current standardized written information provided specific to diagnosis, recovery, disease progression and prevention.

Learner Progress: Not documented in this visit.

Point: Exercise (Resolved)

Patient Education (continued)

Education (continued)

Description:
Information regarding the benefits of exercise provided. Exercise guidelines provided for initial recovery from acute heart event and long term goals of exercise.

Learner Progress: Not documented in this visit.

Point: Medications (Resolved)

Description:
Medication compliance encouraged. Organization tools discussed and medication information and resources provided.

Learner Progress: Not documented in this visit.

Point: Risk Factors (Resolved)

Description:
Written and verbal information provided on modifiable and non-modifiable factors associated with increased risk of heart disease and stroke.

Learner Progress: Not documented in this visit.

Point: Activity guidelines (Resolved)

Description:
Appropriate activity and/or limitations for diagnosis specific recovery provided.

Learner Progress: Not documented in this visit.

Point: Signs/symptoms/activate EMS (Resolved)

Description:
Information provided on the signs and symptoms which commonly occur with a heart attack or stroke. Emphasis placed on appropriate activation of EMS with recognition of signs and symptoms.

Learner Progress: Not documented in this visit.

Point: Cardiac Rehab participation/location options (Resolved)

Description:
Cardiac rehabilitation benefits highlighted and participation encouraged.

Learner Progress: Not documented in this visit.

Point: Cardiac Diet/low fat/low sodium (Resolved)

Description:
American Heart Association guidelines provided for a reduced fat and reduced sodium diet.

Learner Progress: Not documented in this visit.

Point: Endocarditis education/card (Resolved)

Description:
Written and verbal instruction provided on endocarditis prevention. Temporary Valve card provided.

Learner Progress: Not documented in this visit.

Point: Outpatient education classes/Heart Smart/Device Advice/Heart of the Matter (Resolved)

Description:
Description and registration details of outpatient education classes provided. Participation encouraged.

Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Title: Cardiac Arrhythmia (MCB) (Not Started)

Topic: Treatment for Atrial Fibrillation/Atrial Flutter (MCB) (Not Started)

Point: Chemical cardioversion (MCB) (Not Started)

Description:
Provide written education on why and how a chemical cardioversion is done. As well as accociated risks.

Patient Friendly Description:
Why and how a chemical cardioversion is done and associated risks.
Learner Progress: Not documented in this visit.

Point: Electrical cardioversion (MCB) (Not Started)

Description:
Provide written education on why and how an electrical cardioversion is done. As well as accociated risks.

Patient Friendly Description:
Why and how a electrical cardioversion is done and associated risks.
Learner Progress: Not documented in this visit.

Point: Ablation (MCB) (Not Started)

Description:
Provide written education on the catheter ablation procedure and discharge instructions.

Patient Friendly Description:
How an ablation is done, and what to do after the procedure.
Learner Progress: Not documented in this visit.

Topic: Prevention/Discharge (MCB) (Not Started)

Point: Anticoagulation (MCB) (Not Started)

Description:
Provide written education on anticoagulation use including contraindications, side effects, interactions, and medication safety.

Patient Friendly Description:
Information on taking blood thinners safely.
Learner Progress: Not documented in this visit.

Point: Discharge with A Fib/Flutter (MCB) (Not Started)

Description:
Provide written education on treatment options, home care, and follow up care for discharging with atrial fibrillation.

Patient Friendly Description:
Information on treatment options, home care, and when to call your healthcare provider after going home with atrial fibrillation/flutter.
Learner Progress: Not documented in this visit.

Point: Atrial fib/flutter: stroke prevention (MCB) (Not Started)

Description:
"Provide written education on risk factors, medication, and prevention of A. Fib.
Hyperlink education materials provided to patient/family/caregiver. "

Patient Friendly Description:
Preventing stroke caused by A. Fib.
Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Topic: What is atrial fibrillation/flutter (MCB) (Not Started)

Point: You have atrial fibrillation (MCB) (Not Started)

Description:
Provide video education on the signs/symptoms of A. Fib, causes, medication(s), risk factors, prevention, and treatment.

Patient Friendly Description:
What to expect if you are diagnosed with A. Fib: causes, symptoms, and treatment.

Learner Progress: Not documented in this visit.

Point: You have Atrial Flutter (MCB) (Not Started)

Description:
Provide written education on the signs/symptoms of A. Flutter, causes, medication(s), risk factors, prevention, and treatment.

Patient Friendly Description:
What to expect if you are diagnosed with A. Flutter: causes, symptoms, and treatment

Learner Progress: Not documented in this visit.

Title: MyChart Bedside Teaching completed (Not Started)

Points For This Title

Point: All MCB content reviewed with patient and teachback completed. The patient verbalized understanding. (Not Started)

Description:
Go over all the Eduction for the patient in the Education activity. The Education that was provided to the patient via MCB was included as well as education that was noted within the Eduction activity as Education that was beneifical to the patient during this hospital stay.

Learner Progress: Not documented in this visit.

Title: Cardiac Surgery (Resolved)

Topic: PCI (Resolved)

Additional Points For This Title

Point: ACTIVITY (Resolved)

Learner Progress: Not documented in this visit.

Point: SIGNS AND SYMPTOMS/ACTIVATE EMS (Resolved)

Learner Progress: Not documented in this visit.

Point: BOOKS/EDUCATION MATERIAL (Resolved)

Learner Progress: Not documented in this visit.

Point: CARDIAC REHAB (Resolved)

Learner Progress: Not documented in this visit.

Point: DIET (Resolved)

Learner Progress: Not documented in this visit.

Point: EXERCISE (Resolved)

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Point: Medications (Resolved)

Learner Progress: Not documented in this visit.

Point: POST OP CARE (Resolved)

Learner Progress: Not documented in this visit.

Point: RISK FACTORS (Resolved)

Learner Progress: Not documented in this visit.

Title: Coronary Artery Disease (MCB) (Not Started)

Topic: WS Cardiac Rehabilitation for Arrhythmia (MCB)--This is CAD and AMI Cardiac Rehab Program Information for the Patient (Not Started)

Point: Exercise for a Healthier Heart (MCB) (Not Started)

Description:
Explain how exercising regularly offers many health rewards. Provide exercise tips to beginning a new exercise routine; Set Small goals and aim for 150 minutes a week.

Patient Friendly Description:
This provides healthy heart tips on why exercise is important.

Learner Progress: Not documented in this visit.

Point: WellStar Cardiac Rehabilitation Program (MCB) (Not Started)

Description:
At WellStar, our cardiac rehab patients are individually assessed to review medical history, evaluate risk factors, analyze functional abilities and set goals. Ongoing assessments are conducted to ensure patients are making progress toward their goals, educational needs are being met, and any problems or concerns are being addressed with the referring physician.

Patient Friendly Description:
This will help you better understand Cardiac Rehabilitation. At WellStar, our cardiac rehab programs provide education, supervised exercise, lifestyle modification and emotional support to help patients increase physical fitness, reduce cardiac symptoms and improve health and wellbeing.

Learner Progress: Not documented in this visit.

Point: Cardiac Rehabilitation: Emotional Issue (MCB) (Not Started)

Description:
Explain how having heart disease can be stressful. Encourage patient not to ignore feelings of sadness, worry, and depression. Patient should know when to ask for help and/or support.

Patient Friendly Description:
This will explain some emotional feelings related to heart disease.

Learner Progress: Not documented in this visit.

Topic: Heart Healthy Diet- DASH Diet (MCB) (Not Started)

Point: Eating Heart Healthy Food: Using DASH Plan (MCB) (Not Started)

Description:
Review diet information and explain that eating a low salt, low fat and low cholesterol diet with plenty of fruits and vegetables can reduce risk of complications from CAD.

Patient Friendly Description:
This will help you follow a healthy eating plan that can reduce your risk of complications associated with Coronary Artery Disease.

Please watch video/read over the material and let anyone on your Care Team know if there are any questions by marking below.

Patient Education (continued)

Education (continued)

If you understand all material, mark I understand below.
Learner Not documented in this visit.
Progress:

Topic: Questions your patient may have for you (MCB) (Not Started)

Point: Questions your patient may have about the AMI (MCB) (Not Started)

Description:
This is information about diet, exercise and medications for patients and it encourages them to ask staff questions.

Patient Friendly Description:
After reading this, you can write down any questions that you have for staff under the Notes section as a reference.
Learner Not documented in this visit.
Progress:

Topic: Coronary Artery Disease (MCB) (Not Started)

Point: Recognizing signs and symptoms of Heart Disease (MCB) (Not Started)

Description:
Provide written education on the signs/symptoms of CAD, causes, medication(s), risk factors, prevention and treatment.

Patient Friendly Description:
This will explain some of the causes of Coronary Artery Disease.
Learner Not documented in this visit.
Progress:

Point: Understanding Coronary Artery Disease (MCB) (Not Started)

Description:
Give patient written information on CAD. Explain the definition of CAD, causes, signs and symptoms.

Patient Friendly Description:
This will inform you of what to expect if you are diagnosed with Coronary Artery Disease (CAD).

Please watch video/read over the material and let anyone on your Care Team know if there are any questions by marking below.

If you understand all material, mark I understand below.
Learner Not documented in this visit.
Progress:

Topic: Risk factors for Heart Disease (MCB) (Not Started)

Point: Tobacco/Smoking Cessation (MCB) (Not Started)

Description:
Give patient written information on Quitting Smoking

Educate the patient/family/caregiver on smoking cessation and smoking cessation programs offered in the community. Explain effects smoking and second hand smoke have on the body. Encourage the patient to ask people that smoke around him/her to smoke outside or in another room. Refer patient to Cardiopulmonary Rehabilitation, if applicable.

Patient Friendly Description:
This will give you some getting started tips to kick the smoking habit.

This will help you plan how to quit the smoking habit.
Learner Not documented in this visit.
Progress:

Title: First-Dose Education (Not Started)

Points For This Title

Point: hydralazine HCl (Not Started)

Patient Education (continued)

Education (continued)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: iohexol (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Point: fentanyl citrate/PF (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: lidocaine HCl/PF (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: ondansetron HCl/PF (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Point: tetracaine HCl/PF (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Title: Congestive Heart Failure (MCB) (Not Started)

Topic: Psycho/Social/Spiritual Support (Not Started)

Point: Stress Management and Support Systems (Not Started)

Description:
Explain the importance of stress management and support systems in diabetes management. Refer to WellStar diabetes support groups, social services, case management or spiritual care, if needed.

Learner Progress: Not documented in this visit.

Point: Anxiety Reduction (Not Started)

Description:
Explain the definition of anxiety, signs and symptoms, and examples of ways to reduce anxiety. Inform patient that Spiritual Care and Social Services are available.

Learner Progress: Not documented in this visit.

Topic: Treatments/Procedures (MCB) (Not Started)

Point: Oxygen (Not Started)

Description:
Educate patient/family/caregiver on why oxygen is needed and how it will be delivered (nasal cannula, mask, etc.). Instruct patient/family/caregiver that the patent should not be smoking while on oxygen.

Learner Progress: Not documented in this visit.

Point: Medical Equipment (Not Started)

Description:
Educate patient/family/caregiver on use of medical equipment and provide educational materials.

Learner Progress: Not documented in this visit.

Point: Introduction to Heart Failure (MCB) (Not Started)

Description:
Give patient written information on congestive heart failure. Explain the definition of CHF, causes, signs and symptoms, expected length of stay and criteria for discharge.

Patient Friendly Description:
This will inform you of what to expect if you are diagnosed with heart failure.

You will be receiving the Congestive Heart Failure red booklet.

Please watch video/read over the material and let anyone on your Care Team know if there are any questions by marking below.

If you understand all material, mark I understand below.
Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Point: Echocardiogram (Not Started)

Description:
Educate patient/family/caregiver on echocardiograms, to include: what the test is, how the test will be performed, and what to expect during the test.

Learner Progress: Not documented in this visit.

Topic: Pain Management (Not Started)

Point: Pain Medication Actions & Side Effects (Not Started)

Description:
Provide medication specific handouts when available.

Learner Progress: Not documented in this visit.

Point: Pain Rating Scale (Not Started)

Description:
Provide patient with information on the Pain Rating Scale. Explain the rating scale of 0 to 10.

Learner Progress: Not documented in this visit.

Point: Non-Pharmacological Comfort Measures (Not Started)

Description:
Explain there are other ways of controlling pain than medication. The following are suggestions: position change, aromatherapy, deep slow breathing, distraction, quiet environment, imagery, heat therapy and/or cold therapy, laughter, massage, music, physical therapy, and touch therapy.

Learner Progress: Not documented in this visit.

Topic: Self Care (MCB) (Not Started)

Point: Eating well with High Blood Pressure (MCB) (Not Started)

Description:
Information provided to patient to explain what their diet should consist of when they have Heart Failure.

Patient Friendly Description:
This will help you make heart healthy eating choices if you have a diagnosis with heart failure.

Learner Progress: Not documented in this visit.

Point: Heart Failure:Being Active (MCB) (Not Started)

Description:
Explain to the patient how to be active with heart failure.

Patient Friendly Description:
This will explain how to safely be active with heart failure.

Learner Progress: Not documented in this visit.

Point: Heart Failure: Dealing with Sleep problems (MCB) (Not Started)

Description:
Provide tips and ideas to help patient sleep better.

Patient Friendly Description:
This will provide tips on sleeping better with heart failiure.

Learner Progress: Not documented in this visit.

Point: Heart Failure: Know your Baselines (MCB) (Not Started)

Patient Education (continued)

Education (continued)

Description:
Explain to patient how to identify their baseline and recognize changes.

Patient Friendly Description:
This will help you understand what's normal for you and how to watch for changes.
Learner Progress: Not documented in this visit.

Point: Heart Failure : Know your Zones (Not Started)

Description:
Review heart failure zones with patient and educate them on how to know which zone they are in each day.
Learner Progress: Not documented in this visit.

Point: Dealing with Heart Failure: Helping the patient cope (MCB) (Not Started)

Learner Progress: Not documented in this visit.

Point: Daily Weights (MCB) (Not Started)

Description:
Give written information about daily weights. Instruct the patient to weigh on the same scale every day at the same time, wearing the same amount of clothing. Explain why it is important to check weight. Inform the patient that gaining weight from fluid build up may be an early sign that heart failure is getting worse. The patient should call a care provider if there is a weight gain of more than 2-3 pounds in one day or 4-5 pounds in five days.

Patient Friendly Description:
Information on the importance of Daily weights.
Learner Progress: Not documented in this visit.

Point: How to check your Heart Rate and Blood Pressure (MCB) (Not Started)

Description:
Give patient written information on how to take a pulse. Explain the definition of a pulse, normal range, reason for taking a pulse, where pulses can be found. Demonstrate how to find a pulse. Once found, instruct the patient to count the beats for a full minute. Tell the patient to keep a record of the pulse rate, date and time taken, which site (right/left, wrist/neck) and strength of beats (weak, strong or missing beats).

Patient Friendly Description:
This will explain the importance of understanding your vital signs and show you how to take them.
Learner Progress: Not documented in this visit.

Topic: WellStar Cardiac Rehabilitation (MCB) (Not Started)

Point: Exercise for a Healthier Heart (MCB) (Not Started)

Description:
Explain how exercising regularly offers many health rewards. Provide exercise tips to beginning a new exercise routine; Set Small goals and aim for 150 minutes a week.

Patient Friendly Description:
This provides healthy heart tips on why exercise is important.
Learner Progress: Not documented in this visit.

Point: WellStar Cardiac Rehabilitation Program (MCB) (Not Started)

Description:
At WellStar, our cardiac rehab patients are individually assessed to review medical history, evaluate risk factors, analyze functional abilities and set goals. Ongoing assessments are conducted to ensure patients are making progress toward their goals, educational needs are being met, and any problems or concerns are being addressed with the referring physician.

Patient Friendly Description:
This will help you better understand Cardiac Rehabilitation. At WellStar, our cardiac rehab programs provide education, supervised exercise, lifestyle modification and emotional support to help patients increase physical fitness, reduce cardiac symptoms and improve health and wellbeing.
Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Topic: Review Plan of Care (Not Started)

Point: Review Plan of Care - Day 5 (Not Started)

Description:
Review plan of care including provider roles, health history, IV and medications, labs and tests, and discharge planning. Take extra time to reiterate to patient that he/she may ask questions at any time and should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time.

Learner Progress: Not documented in this visit.

Point: Review Plan of Care - Day 1 (Not Started)

Description:
Review plan of care including provider roles, health history, IV and medications, labs and tests, and discharge planning. Take extra time to reiterate to patient that he/she may ask questions at any time and should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time.

Learner Progress: Not documented in this visit.

Point: Review Plan of Care - Day 2 (Not Started)

Description:
Review plan of care including provider roles, health history, IV and medications, labs and tests, and discharge planning. Take extra time to reiterate to patient that he/she may ask questions at any time and should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time.

Learner Progress: Not documented in this visit.

Point: Review Plan of Care - Day 3 (Not Started)

Description:
Review plan of care including provider roles, health history, IV and medications, labs and tests, and discharge planning. Take extra time to reiterate to patient that he/she may ask questions at any time and should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time.

Learner Progress: Not documented in this visit.

Point: Review Plan of Care - Day 4 (Not Started)

Description:
Review plan of care including provider roles, health history, IV and medications, labs and tests, and discharge planning. Take extra time to reiterate to patient that he/she may ask questions at any time and should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time.

Learner Progress: Not documented in this visit.

Topic: Medications (MCB) (Not Started)

Point: Heart Failure Medications (MCB) (Not Started)

Description:
Educate patient on the drug type, purpose for medication, and common side effects.

Educate patient on Prescribed Medications

Patient Friendly Description:
This will inform you of medications that you may be taking if you are diagnosed with Heart Failure.

Learner Progress: Not documented in this visit.

Point: ACE Inhibitors (Not Started)

Patient Education (continued)

Education (continued)

Description:
Educate patient/family/caregiver on the ACE Inhibitor prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Angiotensin II Receptor Blockers (Not Started)

Description:
Educate patient/family/caregiver on the Angiotensin II Receptor Blockers prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Aspirin (Not Started)

Description:
Give patient written information on Aspirin. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the doctor should be called. Reinforce that this medication should be taken exactly as the doctor has prescribed.

Learner Progress: Not documented in this visit.

Point: Beta Blockers (Not Started)

Description:
Educate patient/family/caregiver on the Beta Blocker prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Digoxin (Not Started)

Description:
Educate patient/family/caregiver on Digoxin and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed. The physician will order a blood test to monitor the concentration of the drug in the patient's blood. The dose of this medication may be changed according to the results of this test.

Learner Progress: Not documented in this visit.

Point: Diuretics (Not Started)

Description:
Educate patient/family/caregiver on the Diuretic prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Inotropes (Not Started)

Description:
Educate patient/family/caregiver on the Inotropes prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Vasodilators (Not Started)

Patient Education (continued)

Education (continued)

Description:
Educate patient/family/caregiver on the Vasodilator prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Topic: Prevention / Discharge (MCB) (Not Started)

Point: Community Resources (Not Started)

Description:
Give written information on available community resources. Refer to Social Services or Case Management, if needed.

Learner Progress: Not documented in this visit.

Point: Home Health Care Services (Not Started)

Description:
Give patient written information on Home Health Care Services that have been arranged. Review the role of the home care nurse and when to expect the first visit. Refer to Case Management or Social Services, if needed.

Learner Progress: Not documented in this visit.

Point: Follow-up Appointments (Not Started)

Description:
Give the patient/family written information on their next appointment and when to make follow-up appointments. Reinforce importance of making and keeping the appointments. If appointments were made during the visit, give the patient a written reminder of the time and location.

Learner Progress: Not documented in this visit.

Point: Influenza Vaccine (Not Started)

Description:
Educate the patient/family/caregiver on obatining a yearly influenza vaccine.

Learner Progress: Not documented in this visit.

Point: Discharge Medications (Not Started)

Description:
Ensure that there are no barriers to obtain medications prior to discharge. Notify Care Coordination if there are any needs for additional resources prior to discharging the patient.

Learner Progress: Not documented in this visit.

Point: When to Call the Doctor (MCB) (Not Started)

Description:
Provide written documentation instructing the patient to call the doctor if the patient has:

1. Ankles and legs that become more swollen.
2. Shoes and socks that get tight suddenly.
3. Shortness of breath that does not go away with rest.
4. Weight gain of 2 - 3 pounds in one day.
5. Weight gain of 4 - 5 pounds in one week.
6. No energy for normal activities.
7. Dizziness or weakness.
8. Yellowish or blue green vision.
9. Heartbeat changes (feels like a butterfly in the chest).
10. Chest pain.
11. Blurred vision.
12. Passing out.
13. Cough that does not go away.

Patient Education (continued)

Education (continued)

Patient Friendly Description:
Heart Failure symptoms to know and when to call your healthcare provider.
Lifestyle changes to help you feel and live better with Heart Failure.
Learner Not documented in this visit.
Progress:

Point: Review Discharge Plan (Not Started)

Description:
Review the discharge plan with patient and primary care giver including: diet, activity, medications, and special precautions. Refer to Case Management, if needed.

Learner Not documented in this visit.
Progress:

Point: Smoking Cessation (Not Started)

Description:
Educate the patient/family/caregiver on smoking cessation and smoking cessation programs offered in the community. Explain effects smoking and second hand smoke have on the body. Encourage the patient to ask people that smoke around him/her to smoke outside or in another room. Refer patient to Cardiopulmonary Rehabilitation, if applicable.

Learner Not documented in this visit.
Progress:

Point: Diet Instructions for CHF Prevention (Not Started)

Description:
Review diet information and explain that eating a low fat and low cholesterol diet with plenty of fruits and vegetables can reduce their chance of suffering a future heart attack.

Learner Not documented in this visit.
Progress:

Topic: Heart Failure Discharge Instructions (Not Started)

Point: Follow-up Appointments (Not Started)

Description:
Give the patient/family written information on their next appointment and when to make follow-up appointments. Reinforce importance of making and keeping the appointments. If appointments were made during the visit, give the patient a written reminder of the time and location.

Learner Not documented in this visit.
Progress:

Point: Daily Weights (MCB) (Not Started)

Description:
Give written information about daily weights. Instruct the patient to weigh on the same scale every day at the same time, wearing the same amount of clothing. Explain why it is important to check weight. Inform the patient that gaining weight from fluid build up may be an early sign that heart failure is getting worse. The patient should call a care provider if there is a weight gain of more than 2-3 pounds in one day or 4-5 pounds in five days.

Patient Friendly Description:
Information on the importance of Daily weights.
Learner Not documented in this visit.
Progress:

Point: When to Call the Doctor (MCB) (Not Started)

Description:
Provide written documentation instructing the patient to call the doctor if the patient has:

1. Ankles and legs that become more swollen.
2. Shoes and socks that get tight suddenly.
3. Shortness of breath that does not go away with rest.
4. Weight gain of 2 - 3 pounds in one day.
5. Weight gain of 4 - 5 pounds in one week.
6. No energy for normal activities.
7. Dizziness or weakness.
8. Yellowish or blue green vision.
9. Heartbeat changes (feels like a butterfly in the chest).

Patient Education (continued)

Education (continued)

10. Chest pain.
11. Blurred vision.
12. Passing out.
13. Cough that does not go away.

Patient Friendly Description:
Heart Failure symptoms to know and when to call your healthcare provider.
Lifestyle changes to help you feel and live better with Heart Failure.
Learner Not documented in this visit.
Progress:

Point: Review Discharge Plan (Not Started)

Description:
Review the discharge plan with patient and primary care giver including: diet, activity, medications, and special precautions. Refer to Case Management, if needed.

Learner Not documented in this visit.
Progress:

Point: Diet Instructions for CHF Prevention (Not Started)

Description:
Review diet information and explain that eating a low fat and low cholesterol diet with plenty of fruits and vegetables can reduce their chance of suffering a future heart attack.

Learner Not documented in this visit.
Progress:

Title: General Patient Education (MCB) (Not Started)

Topic: Psycho/Social/Spiritual Support (Not Started)

Point: Coping Mechanisms (Resolved)

Description:
Help patient identify healthy coping mechanisms. Refer to Social Service, Case Management, or Spiritual Care, if needed.

Learner Not documented in this visit.
Progress:

Point: Support Systems (Resolved)

Description:
Help patient identify available support systems. Refer to Social Service, Case Management, or Spiritual Care, if needed.

Learner Not documented in this visit.
Progress:

Point: Spiritual/Emotional Needs (Resolved)

Description:
Offer resources to meet spiritual/emotional needs. Refer to Spiritual Care, if needed.

Learner Not documented in this visit.
Progress:

Point: Stress Management and Support Systems (Not Started)

Description:
Explain the importance of stress management and support systems in diabetes management. Refer to WellStar diabetes support groups, social services, case management or spiritual care, if needed.

Learner Not documented in this visit.
Progress:

Point: Anxiety Reduction (Not Started)

Patient Education (continued)

Education (continued)

Description:
Explain the definition of anxiety, signs and symptoms, and examples of ways to reduce anxiety. Inform patient that Spiritual Care and Social Services are available.

Learner Progress: Not documented in this visit.

Topic: Pain Management (MCB) (Resolved)

Point: Encourage Patient to Monitor Own Pain (Resolved)

Description:
Provide patient with information on the Pain Rating Scale. Explain the rating scale of 0 to 10.

Learner Progress: Not documented in this visit.

Point: Discuss Significance of VAS Scores (Resolved)

Description:
Refer to rating score of 0-10.

Learner Progress: Not documented in this visit.

Point: Discuss the Use of Pain Control Measures Before Pain Becomes Severe (MCB) (Resolved)

Description:
Take time to reiterate to patient that he/she should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time before pain becomes severe.

Patient Friendly Description:
Please inform staff that if you are having any difficulty breathing, pain or any discomfort at any time before the pain gets severe.

Please read over the items and let anyone on your Care Team know there are any questions about the material by marking below that "I HAVE QUESTIONS".

If once you have received the items and understand the material you can mark this as "I understand".
Learner Progress: Not documented in this visit.

Topic: Prevention (MCB) (Not Started)

Point: When to Call the Doctor (Not Started)

Description:
Educate patient/family/caregiver on when to call the doctor.

Learner Progress: Not documented in this visit.

Point: Protect Others from Infection (Not Started)

Description:
Educate patient/family/caregiver on respiratory hygiene and cough etiquette. To protect from further infection and to protect others from getting an infection, patient should cover nose and mouth with tissues when coughing. Encourage patient to place used tissues in a plastic bag that will not allow secretions to soak through. Patient should always wash his/her hands after using or handling used tissues.

Learner Progress: Not documented in this visit.

Point: Protect Yourself from Further Infection (MCB) (Not Started)

Description:
Educate patient/family/caregiver that because patient is in a weakened condition he/she needs to avoid others who are sick as to not acquire another illness. Family/caregiver should wear gloves, gown and face shield/eye protection.

Patient Friendly Description:
Information on Flu.

Patient Education (continued)

Education (continued)

Information on Pneumonia and Pneumococcal Vaccination.
Learner Progress: Not documented in this visit.

Point: Falls education, precautions, prevention at home and in the hospital (MCB) (Not Started)

Description:
Patient was given information on preventing falls both while in the hospital and when they are at home.

Patient Friendly Description:
Things to help you prevent falls while you are in the hospital and when you are home.
Learner Progress: Not documented in this visit.

Point: Prevention Deep Vein Thrombosis after surgery (MCB) (Not Started)

Description:
Educate patient/family/caregiver to prevent DVT and PE after Suergery

Patient Friendly Description:
In the days and weeks after surgery, you have a higher chance of developing a deep vein thrombosis (DVT).
This is a condition in which a blood clot or thrombus develops in a deep vein.
They are most common in the leg. But, a DVT may develop in an arm, or another deep vein in the body.
A piece of the clot, called an embolus, can separate from the vein and travel to the lungs.
A blood clot in the lungs is called a pulmonary embolus (PE).
This can cut off the flow of blood to the lungs.
It is a medical emergency and may cause death.
Learner Progress: Not documented in this visit.

Point: Demonstrate Handwashing (MCB) (Not Started)

Description:
Educate patient/family/caregiver on how to perform proper hand hygiene. Explain that hand washing is the single most important step in preventing the spread of germs. Have the patient/family/caregiver demonstrate proper hand washing technique using soap, water, friction, clean nails under running water, and dry hands on clean towel without touching dirty surfaces.

Patient Friendly Description:
This will explain the importance of washing and cleansing your hands to prevent infection.
Learner Progress: Not documented in this visit.

Topic: Self Care (MCB) (Not Started)

Point: General Self Care (Not Started)

Description:
Instruct patient on self care needs. These may include: hygiene, how to take a blood pressure, how to change a dressing, etc.

Learner Progress: Not documented in this visit.

Point: Demonstrate Handwashing (MCB) (Not Started)

Description:
Educate patient/family/caregiver on how to perform proper hand hygiene. Explain that hand washing is the single most important step in preventing the spread of germs. Have the patient/family/caregiver demonstrate proper hand washing technique using soap, water, friction, clean nails under running water, and dry hands on clean towel without touching dirty surfaces.

Patient Friendly Description:
This will explain the importance of washing and cleansing your hands to prevent infection.
Learner Progress: Not documented in this visit.

Topic: Medications (MCB) (Not Started)

Point: Antibiotic Education (Not Started)

Patient Education (continued)

Education (continued)

Description:
If an antibiotic was prescribed, educate patient/family/caregiver on the antibiotics prescribed. Explain how antibiotics work in the body. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed

If a viral diagnosis was made, the patient/family was educated on their viral diagnosis and the reason for no antibiotic this visit.

Learner Progress: Not documented in this visit.

Point: Anticoagulant Therapy (Not Started)

Description:
1-Educate patient/family/caregiver on anticoagulant being prescribed and provide educational materials.
2-Explain action of medication, reason for taking, and importance of adherence to correct medication dose and schedule,
3-Explain potential for adverse drug reactions, signs of allergic reaction, potential for drug-drug and drug-food interactions, and when physician should be called.
4-Reinforce that the medication should be taken exactly as the physician has prescribed.
5-Explain importance of maintaining follow-up appointments and adhering to laboratory testing as prescribed by physician.
6-Explain that the dose of the anticoagulant being prescribed may change depending on the results of the laboratory testing.

Learner Progress: Not documented in this visit.

Point: Insulin (MCB) (Not Started)

Description:
Educate patient/family/caregiver on the insulin prescribed. Explain how insulin works in the body. Explain the action of insulin, reason for taking, side effects, signs of allergic reaction and when physician should be called. Reinforce that insulin should be taken exactly as the physician has prescribed. Explain the proper storage of insulin, that extreme temperatures can damage insulin and never take insulin that has expired. Explain that the patient's primary care physician may change the dosage depending on the results of blood glucose tests and/or A1C level.

Patient Friendly Description:
This will inform you of why you are prescribed insulin if you have Diabetes Type II.

Learner Progress: Not documented in this visit.

Point: Hypoglycemic Agents (Not Started)

Description:
Educate patient/family/caregiver on the oral and/or injectable hypoglycemic(s) prescribed. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, as well as when the physician should be called. Reinforce that this medication(s) should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Non-Steroidal Anti-Inflammatory Drugs (Not Started)

Description:
Educate patient/family/caregiver on the NSAID prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Psychotropic Medications (Not Started)

Description:
Educate patient/family/caregiver on the Psychotropic medication prescribed. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: ACE Inhibitors (Not Started)

Patient Education (continued)

Education (continued)

Description:
Educate patient/family/caregiver on the ACE Inhibitor prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Angiotensin II Receptor Blockers (Not Started)

Description:
Educate patient/family/caregiver on the Angiotensin II Receptor Blockers prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Beta Blockers (Not Started)

Description:
Educate patient/family/caregiver on the Beta Blocker prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Digoxin (Not Started)

Description:
Educate patient/family/caregiver on Digoxin and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed. The physician will order a blood test to monitor the concentration of the drug in the patient's blood. The dose of this medication may be changed according to the results of this test.

Learner Progress: Not documented in this visit.

Point: Diuretics (Not Started)

Description:
Educate patient/family/caregiver on the Diuretic prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Inotropes (Not Started)

Description:
Educate patient/family/caregiver on the Inotropes prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Vasodilators (Not Started)

Description:
Educate patient/family/caregiver on the Vasodilator prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Antibiotics (Not Started)

Patient Education (continued)

Education (continued)

Description:
Educate patient/family/caregiver on the Antibiotics prescribed. Explain how antibiotics works in the body. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Medication purpose, side effects, schedule, administration (MCB) (Not Started)

Description:
Discussed purpose and possible side effects of medication.

Learner Progress: Not documented in this visit.

No active allergies

Cobb Eye Center Post-Op Instructions

Activity

- Do not lift anything over 20 pounds.
- No strenuous activity, this includes swimming until your doctor give you permission.
- Driving a car is permitted depending on your vision. Please check with our doctor before you resume driving.
- You may resume all normal daily activities. For example: reading, watching television, walking, and riding in a car or plane.

Medications

- Resume all your daily medications.

General Information

- Wash your hands before treating your operative eye.
- Wear the protective eye shield over your eye at bedtime and naps until otherwise instructed by your doctor. When putting on your glasses, be careful not to hit your eye with the earpiece.
- Do not touch or rub the upper lid of the operative eye at anytime.
- Unless otherwise instructed by your doctor, keep the patch on your operative eye. It will be removed the day after surgery. You will also be given further instructions on the eye drops and caring for your eye.
- On the day of surgery, you will need someone to drive you home from the surgery center and to our office the next day.
- No eye make-up for 1 week.
- Your eye may feel irritated (like sand is in it) for the first 24-48 hours. You may take Tylenol or Advil to control the discomfort. If over the counter medication does not help, please call our office.

Bathing

- You may bathe or shower. You may shampoo your hair the day after surgery. Keep your operative eye protected from soap and water.

Call You Doctor

- Sudden decrease in you vision.
- Increased redness or pain.

Follow-Up Appointment

- Your first follow-up appointment will be the day after surgery.
- Bring all your eye drops to each follow-up visit.

Other Follow-up
Follow up in office tomorrow and see Cobb Eye Center post op instruction sheet.

You have been diagnosed with or have the risk for stroke. Review the following to reduce your risk of stroke:

Discharge Medications
Taking your medications as prescribed is one of the most vital aspects of reducing your risk for stroke. It is important to know the names of your medications, how they work, how much to take, and when to take them. You should take your medications at the same time every day. Do not stop your prescribed medications or begin taking over-the-counter or herbal medications without first speaking with your physician

General Risk Factors for Stroke
Your care team will discuss your individual risk factors for Stroke and how best to modify and/or treat them.

High blood pressure - High blood pressure is the most important risk factor for stroke. People who have high blood pressure have more than half the lifetime risk of having stroke compared to those who consistently have an optimal blood pressure reading of 120/80.
Tobacco Use - Tobacco use doubles the risk for another stroke. Stop smoking if you smoke
High cholesterol - Cholesterol or plaque build-up in the arteries can block normal blood flow to the brain and cause a stroke and increase risk of heart disease. Maintain healthy cholesterol levels
Diabetes - People with diabetes are up to 4 times as likely to have a stroke as someone who does not have the disease.
Atrial fibrillation - Atrial fibrillation increases your stroke risk 5 times, so it's important to work with a doctor to control it. Eat a healthy diet — maintaining a diet low in calories, saturated and trans fats and cholesterol helps manage both obesity and healthy cholesterol levels in the blood, which also reduces risk for stroke.
Physical activity - Physical activity reduces stroke risk. A recent study showed that people who exercise five or more times per week are less likely to have another stroke. Increase your physical activity.
Alcohol use - Some studies say that drinking more than 2 drinks per day may increase stroke risk by 50 percent. Other studies have indicated that one alcoholic beverage a day may lower a person's risk for stroke, provided that there is no other medical reason for avoiding alcohol. Talk with a doctor about alcohol use and how it can best be controlled to prevent another stroke.

Warning Signs of Stroke
Use FAST to remember warning signs of stroke:
Face - Ask the person to smile. Does one side of the face droop?
Arms - Ask the person to raise both arms. Does one arm drift downward?
Speech - Ask the person to repeat a simple phrase. Is their speech slurred or strange?
Time - If you observe any of these signs, call 9-1-1 immediately.

Symptoms of Stroke
Sudden numbness or weakness of face, arm or leg - especially on one side of the body.
Sudden confusion, trouble speaking or understanding.
Sudden trouble seeing in one or both eyes
Sudden trouble walking, dizziness, loss of balance or coordination.
Sudden severe headache with no known cause.

As part of your treatment plan, please call 770-956-STAR to register for our free Heart Failure Academy program.

Medication List

CONTINUE taking these medications

Cobb Eye Center Post-Op Instructions

Activity

- Do not lift anything over 20 pounds.
- No strenuous activity, this includes swimming until your doctor give you permission.
- Driving a car is permitted depending on your vision. Please check with our doctor before you resume driving.
- You may resume all normal daily activities. For example: reading, watching television, walking, and riding in a car or plane.

Medications

- Resume all your daily medications.

General Information

- Wash your hands before treating your operative eye.
- Wear the protective eye shield over your eye at bedtime and naps until otherwise instructed by your doctor. When putting on your glasses, be careful not to hit your eye with the earpiece.
- Do not touch or rub the upper lid of the operative eye at anytime.
- Unless otherwise instructed by your doctor, keep the patch on your operative eye. It will be removed the day after surgery. You will also be given further instructions on the eye drops and caring for your eye.
- On the day of surgery, you will need someone to drive you home from the surgery center and to our office the next day.
- No eye make-up for 1 week.
- Your eye may feel irritated (like sand is in it) for the first 24-48 hours. You may take Tylenol or Advil to control the discomfort. If over the counter medication does not help, please call our office.

Bathing

- You may bathe or shower. You may shampoo your hair the day after surgery. Keep your operative eye protected from soap and water.

Call You Doctor

- Sudden decrease in you vision.
- Increased redness or pain.

Follow-Up Appointment

- Your first follow-up appointment will be the day after surgery.
- Bring all your eye drops to each follow-up visit.

Other Follow-up
Follow up in office tomorrow and see Cobb Eye Center post op instruction sheet.

You have been diagnosed with or have the risk for stroke. Review the following to reduce your risk of stroke:

Discharge Medications
Taking your medications as prescribed is one of the most vital aspects of reducing your risk for stroke. It is important to know the names of your medications, how they work, how much to take, and when to take them. You should take your medications at the same time every day. Do not stop your prescribed medications or begin taking over-the-counter or herbal medications without first speaking with your physician

General Risk Factors for Stroke
Your care team will discuss your individual risk factors for Stroke and how best to modify and/or treat them.

High blood pressure - High blood pressure is the most important risk factor for stroke. People who have high blood pressure have more than half the lifetime risk of having stroke compared to those who consistently have an optimal blood pressure reading of 120/80.
Tobacco Use - Tobacco use doubles the risk for another stroke. Stop smoking if you smoke
High cholesterol - Cholesterol or plaque build-up in the arteries can block normal blood flow to the brain and cause a stroke and increase risk of heart disease. Maintain healthy cholesterol levels
Diabetes - People with diabetes are up to 4 times as likely to have a stroke as someone who does not have the disease.
Atrial fibrillation - Atrial fibrillation increases your stroke risk 5 times, so it's important to work with a doctor to control it. Eat a healthy diet — maintaining a diet low in calories, saturated and trans fats and cholesterol helps manage both obesity and healthy cholesterol levels in the blood, which also reduces risk for stroke.
Physical activity - Physical activity reduces stroke risk. A recent study showed that people who exercise five or more times per week are less likely to have another stroke. Increase your physical activity.
Alcohol use - Some studies say that drinking more than 2 drinks per day may increase stroke risk by 50 percent. Other studies have indicated that one alcoholic beverage a day may lower a person's risk for stroke, provided that there is no other medical reason for avoiding alcohol. Talk with a doctor about alcohol use and how it can best be controlled to prevent another stroke.

DEPARTMENT OF HEALTH AND HUMAN SERVICES Centers for medicare & Medicaid Services
OMB Approval No. 0938-0692

AN IMPORTANT MESSAGE FORM MEDICARE ABOUT YOUR RIGHTS

AS A HOSPITAL INPATIENT, YOU HAVE THE RIGHT TO:

Receive Medicare covered services. This includes medically necessary hospital services and services you may need after you are discharged, if ordered by your doctor. You have a right to know about these services, who will pay for them, and where you can get them.

- Be involved in any decisions about your hospital stay, and know who will pay for it.
- Report any concerns you have about the quality of care you receive to KEPRO:
  1-844-455-8708
  KEPRO, 5201 W. Kennedy Blvd., Suite 900, Tampa, FL 33609

YOUR MEDICARE DISCHARGE RIGHTS

Planning For Your Discharge: During your hospital stay, the hospital staff will be working with you to prepare for your safe discharge and arrange for services you may need after you leave the hospital. When you no longer need inpatient hospital care, your doctor or the hospital staff will inform you of your planned discharge date.

If you think you are being discharged too soon:

- You can talk to the hospital staff, your doctor and your managed care plan (if you belong to one) about your concerns.
- You also have the right to an appeal, that is, a review of your case by KEPRO. This reviewer was hired by Medicare to look at your case to decide whether you are ready to leave the hospital.
  - **If you want to appeal, you must contact KEPRO no later than your planned discharge date and before you leave the hospital.**
  - If you do this, you will not have to pay for the services you receive during the appeal (except for charges like copays and deductibles).
- If you do not appeal, but decide to stay in the hospital past your planned discharge date, you may have to pay for any services you receive after that date.
- **Step by step instructions for calling the KEPRO and filing an appeal are on page 2.**

To speak with someone at the hospital about this notice, call (770) 443-7068.

Please sign and date here to show you received this notice and understand your rights.

WS Paulding Hospital
An Important Message from Medicare
About Your Rights

STEPS TO APPEAL YOUR DISCHARGE

- **STEP 1:** You must contact the KEPRO no later than your planned discharge date and before you leave the hospital. If you do this, you will not have to pay for the services you receive during the appeal (except for charges like copays and deductibles).
  - Here is the contact information: 1-844-455-8708
    KEPRO, 5201 W. Kennedy Blvd., Suite 900, Tampa, FL 33609

- You can file a request for an appeal any day of the week. Once you speak to someone or leave a message, your appeal has begun.
- Ask the hospital if you need help contacting KEPRO.
- The name of this hospital is **WS Paulding Hospital 110042**
-

- **STEP 2:** You will receive a detailed notice from the hospital or your Medicare Advantage or other Medicare managed care plan (if you belong to one) that explains the reasons they think you are ready to be discharged.

- **STEP 3:** The KEPRO will ask for your opinion. You or your representative need to be available to speak with KEPRO, if requested. You or your representative may give KEPRO a written statement, but you are not required to do so.

- **STEP 4:** The KEPRO will review your medical records and other important information about your case.

- **STEP 5:** KEPRO will notify you of its decision within 1 day after it receives all necessary information.
  - If KEPRO finds that you are not ready to be discharged, Medicare will continue to cover your hospital services.
  - If KEPRO finds you are ready to be discharged, Medicare will continue to cover your services until noon of the day after KEPRO notifies you of its decision.

IF YOU MISS THE DEADLINE TO APPEAL, YOU HAVE OTHER APPEAL RIGHTS:

- You can still ask the KEPRO or your plan (if you belong to one) for a review of your case:
  - If you have Original Medicare: Call the KEPRO listed above.
  - If you belong to a Medicare Advantage Plan or other Medicare managed care plan: Call your plan
- If you stay in the hospital, the hospital may charge you for any services you receive after your planned discharge date.

For more information, call 1-800-MEDICARE (1-800-633-4227), or TTY: 1-877-486-2048.
Additional Information: I have received my second notice and understand my appeal rights.

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0938-0692. The time required to complete this information collection is estimated to average 15 minutes per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: CMS, 7500 Security Boulevard, ATTN: PRA Reports Clearance Officer, Mail Stop C4-26-05, Baltimore, MD 21244-1850.

Diagnoses
Leukocytosis, unspecified type [D72.829]

XR CHEST PA AND LATERAL (2 VIEWS) [852125404]

Resulted: 11/04/19 1141, Result status: Final result

Order status: Completed
Resulted by: Christopher C Oh, MD
Filed by: Interface, Rad Powerscribe 11/04/19 1142
Performed: 11/04/19 1042 - 11/04/19 1051
Accession number: 31967474
Result details
Narrative:

EXAM: PIC XR CHEST PA AND LATERAL (2 VIEWS)

CLINICAL INDICATION: D72.829 (Elevated white blood cell count, unspecified)

COMPARISON: Chest x-ray 6/18/2018

FINDINGS: Sternotomy wires and surgical clips overlie the mediastinum. Pulmonary vascular congestion persists, likely slightly improved from prior. Mild hazy airspace opacity at the left lung base with obscuration of the left heart border may reflect
mild asymmetric edema versus pneumonia, though the appearance is slightly improved compared to prior. No pneumothorax or large pleural effusion. Cardiac silhouette is upper limits of normal in size. No acute osseous abnormality is identified.

The Results Reporting Office (F1) will complete appropriate follow-up actions based on defined processes. F1

Released By: CHRISTOPHER OH, MD 11/4/2019 11:41 AM

Patient Education

Education

Title: Diabetes (MCB) (Not Started)

Topic: Psycho/Social/Spiritual Support (Not Started)

Point: Stress Management and Support Systems (Not Started)

Description:
Explain the importance of stress management and support systems in diabetes management. Refer to WellStar diabetes support groups, social services, case management or spiritual care, if needed.

Learner Progress: Not documented in this visit.

Point: Anxiety Reduction (Not Started)

Description:
Explain the definition of anxiety, signs and symptoms, and examples of ways to reduce anxiety. Inform patient that Spiritual Care and Social Services are available.

Learner Progress: Not documented in this visit.

Topic: Treatments/Procedures (MCB) (Not Started)

Point: Introduction to Diabetes (MCB) (Not Started)

Description:
Give patient/family/caregiver written information on diabetes. Explain the definition of the type of diabetes with which the patient was diagnosed, how diabetes works in the body, risk factors, signs and symptoms, and if newly diagnosed, diagnostic criteria. Encourage viewing of diabetes on-demand videos when applicable. Refer to inpatient diabetes educator when applicable.

Patient Friendly Description:
You will receive a booklet entitled Diabetes survival skills. There are also two links to documents about Diabetes for you to read over noted below.

Please read over the items and let anyone on your Care Team know there are any questions about the material by marking below that "I HAVE QUESTIONS".

If once you have received the items and understand the material you can mark this as "I understand".
Learner Progress: Not documented in this visit.

Point: Diabetes Type II management (MCB) (Not Started)

Description:
Patient will watch a video that will discuss information on what to expect if they have Diabetes type II.

Patient Friendly Description:
This will inform you of what to expect if you have Diabetes type II.
Learner Progress: Not documented in this visit.

Point: Diabetic long term complications (MCB) (Not Started)

Description:
Patient will have information from Krames on the long term complications of Diabetes Type II.

Patient Friendly Description:
Some information on the long term complications of Diabetes Type II.
Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Topic: Medications (MCB) (Not Started)

Point: Insulin (MCB) (Not Started)

Description:
Educate patient/family/caregiver on the insulin prescribed. Explain how insulin works in the body. Explain the action of insulin, reason for taking, side effects, signs of allergic reaction and when physician should be called. Reinforce that insulin should be taken exactly as the physician has prescribed. Explain the proper storage of insulin, that extreme temperatures can damage insulin and never take insulin that has expired. Explain that the patient's primary care physician may change the dosage depending on the results of blood glucose tests and/or A1C level.

Patient Friendly Description:
This will inform you of why you are prescribed insulin if you have Diabetes Type II.

Learner Progress: Not documented in this visit.

Point: Hypoglycemic Agents (Not Started)

Description:
Educate patient/family/caregiver on the oral and/or injectable hypoglycemic(s) prescribed. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, as well as when the physician should be called. Reinforce that this medication(s) should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Giving Insulin Injection (Not Started)

Description:
Explain and demonstrate how the injection is given. Allow enough time for the patient/family/caregiver to practice. Have the patient return-demonstrate the technique using normal saline (vial and syringe only unless sterile demonstration pen is also available). Teach the patient how to choose and rotate injection sites. Instruct patient on safe disposal of used needles and syringes.

Learner Progress: Not documented in this visit.

Point: Drawing up Insulin (Not Started)

Description:
Instruct patient/family/caregiver to wash hands before drawing up insulin. Demonstrate and have the patient return-demonstrate drawing up the correct amount of insulin prescribed. If the patient is going to use an insulin pen, demonstrate use and have the patient return-demonstrate. If the patient is going to mix different types of insulin, demonstrate and have the patient return-demonstrate the correct way to draw up and mix the insulin.

Learner Progress: Not documented in this visit.

Topic: Self Care (MCB) (Not Started)

Point: Exercise (Not Started)

Description:
Encourage patient/family/caregiver to discuss activity limitations, if any, with physician before starting an exercise routine. Stress the importance of regular exercise and activity to control blood sugar levels and weight. Instruct the patient to carry single carohydrates while exercising in case of hypoglycemic reaction. Explain that both concentrated physical activity (such as walking, swimming, running, cycling, strength training) and being more active through the entire day are equally important to blood sugar control and weight management.

Learner Progress: Not documented in this visit.

Point: Blood Glucose Monitoring (MCB) (Not Started)

Description:
Instruct patient/family/caregiver to wash hands before checking blood glucose. Explain and, if possible to use a complementary glucometer, demonstrate how to check and record blood sugars. Instruct the patient to check blood sugars as frequently as ordered by the physician. Explain that stress or illness will increase blood sugar, making it necesary to check blood sugars more often than usual. Instruct patient on blood glucose target ranges and A1C target range. Discuss care of the meter and supplies, including how to obtain supplies. If using a complementary glucometer, have the patient return-demonstrate checking the blood sugar. Instruct the patient on safe disposal of lancets. Refer to inpatient diabetes educator if applicable.

Patient Friendly Description:
Why is it important to check my blood sugar?

Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Point: Diabetic Foot Care (MCB) (Not Started)

Description:
Explain importance of foot care. Patient should have feet examined by a health care provider at least twice a year. Persons with foot problems should have feet examined at every visit. Explain daily foot care. Review importance of wearing well-fitting shoes and stockings/socks. Reinforce the importance of wearing shoes, even indoors, to prevent injury.

Patient Friendly Description:
This will inform you of why you should check your feet if you have diabetes.

Learner Progress: Not documented in this visit.

Point: Diabetes Identification Jewelry (Not Started)

Description:
Encourage the patient to wear a piece of jewelry that identifies patient as a person with diabetes. This will inform medical personnel that patient has diabetes if unable to communicate.

Learner Progress: Not documented in this visit.

Topic: Prevention/Discharge (Not Started)

Point: Signs and Symptoms of Hypoglycemia (Not Started)

Description:
Define and explain causes of hypoglycemia. Discuss signs and symptoms.

Learner Progress: Not documented in this visit.

Point: Treatment of Hypoglycemia (Not Started)

Description:
Instruct the patient on how to treat low blood sugar using the Rule of 15. Encourage patient to carry a blood sugar treatment at all time.

Learner Progress: Not documented in this visit.

Point: When to Call the Doctor (Not Started)

Description:
Instruct the patient/family/caregiver to call their health care provider if there are symptoms of hypo- or hyperglycemia or if blood sugars are trending high or low and are not controlled by simple measures.

Learner Progress: Not documented in this visit.

Point: Signs and Symptoms of Hyperglycemia (Not Started)

Description:
Define and explain causes of hyperglycemia. Discuss signs and symptoms (mild, moderate, severe, and ketoacidosis).

Learner Progress: Not documented in this visit.

Point: Prevention of Hyperglycemia (Not Started)

Description:
Encourage patient/family/caregiver to follow healthcare providers' instructions for diet, activity and medications. Explain the importance of good diabetes management and learning to detect and treat hyperglycemia early before it worsens. Refer to registered dietitian, when applicable, for meal planning assistance.

Learner Progress: Not documented in this visit.

Point: Prevention of Hypoglycemia (Not Started)

Patient Education (continued)

Education (continued)

Description:
Encourage patient/family/caregiver to follow healthcare providers' instructions for diet, activity and medications. Explain the importantce of good diabetes management and learning to detect and treat hypoglycemia early before it worsens.

Learner Progress: Not documented in this visit.

Point: WellStar Outpatient Diabetes Education (Not Started)

Description:
Provide information on WellStar Outpatient Diabetes Education when applicable. Information includes a list of classes offered and how to register.

Learner Progress: Not documented in this visit.

Point: Follow-up Appointments (Not Started)

Description:
Give the patient/family written information on when to make follow-up appointments. Reinforce importance of making and keeping the appointments. If appointments were made during the visit, give the patient a written reminder of the time and location.

Learner Progress: Not documented in this visit.

Topic: Diabetic Diet (MCB) (Not Started)

Point: Meal Planning and Portion Sizes (MCB) (Not Started)

Description:
The patient will view documents in Krames talking about meal planning as well learning about serving and portion sizes.

Patient Friendly Description:
This will inform you of ways to stay on track with your diet.

Learner Progress: Not documented in this visit.

Point: Eating well with Diabetes (MCB) (Not Started)

Description:
Patient will watch a video on healthy eating for people with DM.

Patient Friendly Description:
Healthy eating for people with Diabetes.

Learner Progress: Not documented in this visit.

Point: Carbohydrate Counting (MCB) (Not Started)

Description:
Patient will read Krames documents on healthy meals and meal planing for Diabetes.

Patient Friendly Description:
Learn about counting your carbohydrates.

Learner Progress: Not documented in this visit.

Topic: Survival Skills (Not Started)

Point: Review Diagnosis (Not Started)

Description:
Review the diabetes disagnosis, specific to patient's diabetes type.
Diabetes Survival Skills Booklet provided.

Patient Friendly Description:

Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Point: Nutrition (Not Started)

Description:
Importance of consistent nutrition habits.

Learner Progress: Not documented in this visit.

Point: Appointments (Not Started)

Description:
Importance of follow up appointment with the health care provider who will provide diabetes care after discharge.

Learner Progress: Not documented in this visit.

Point: Sick Day (Not Started)

Description:
Sick day management

Learner Progress: Not documented in this visit.

Point: Insulin Administration (if applicable) (Not Started)

Description:
Insulin administration and proper use and disposal of needles and syringes. How to schedule outpatient diabetes education. Review self-monitoring of blood glucose and home blood glucose goals.

Learner Progress: Not documented in this visit.

Point: Hyperglycemia (Not Started)

Description:
Definition, recognition, treatment and prevention of hyperglycemia.

Learner Progress: Not documented in this visit.

Point: Hypoglycemia (Not Started)

Description:
Definition, recognition, treatment and prevention of hypoglycemia.

Learner Progress: Not documented in this visit.

Point: Glucose Lowering Medications (Not Started)

Description:
When and how to take blood glucose-lowering medications.

Learner Progress: Not documented in this visit.

Topic: Diabetes Zones for Management (Not Started)

Point: Diabetes Zones for Management reviewed (Not Started)

Description:
Diabetes Zones for Management reviewed.

Learner Progress: Not documented in this visit.

Point: Diabetes Zones for Management handout provided (Not Started)

Description:
Diabetes Zones for Management handout provided.

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Title: Cardiac Arrhythmia (MCB) (Not Started)

Topic: Treatment for Atrial Fibrillation/Atrial Flutter (MCB) (Not Started)

Point: Chemical cardioversion (MCB) (Not Started)

Description:
Provide written education on why and how a chemical cardioversion is done. As well as accociated risks.

Patient Friendly Description:
Why and how a chemical cardioversion is done and associated risks.

Learner Progress: Not documented in this visit.

Point: Electrical cardioversion (MCB) (Not Started)

Description:
Provide written education on why and how an electrical cardioversion is done. As well as accociated risks.

Patient Friendly Description:
Why and how a electrical cardioversion is done and associated risks.

Learner Progress: Not documented in this visit.

Point: Ablation (MCB) (Not Started)

Description:
Provide written education on the catheter ablation procedure and discharge instructions.

Patient Friendly Description:
How an ablation is done, and what to do after the procedure.

Learner Progress: Not documented in this visit.

Topic: Prevention/Discharge (MCB) (Not Started)

Point: Anticoagulation (MCB) (Not Started)

Description:
Provide written education on anticoagulation use including contraindications, side effects, interactions, and medication safety.

Patient Friendly Description:
Information on taking blood thinners safely.

Learner Progress: Not documented in this visit.

Point: Discharge with A Fib/Flutter (MCB) (Not Started)

Description:
Provide written education on treatment options, home care, and follow up care for discharging with atrial fibrillation.

Patient Friendly Description:
Information on treatment options, home care, and when to call your healthcare provider after going home with atrial fibrillation/flutter.

Learner Progress: Not documented in this visit.

Point: Atrial fib/flutter: stroke prevention (MCB) (Not Started)

Description:
"Provide written education on risk factors, medication, and prevention of A. Fib.
Hyperlink education materials provided to patient/family/caregiver. "

Patient Friendly Description:
Preventing stroke caused by A. Fib.

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Topic: What is atrial fibrillation/flutter (MCB) (Not Started)

Point: You have atrial fibrillation (MCB) (Not Started)

Description:
Provide video education on the signs/symptoms of A. Fib, causes, medication(s), risk factors, prevention, and treatment.

Patient Friendly Description:
What to expect if you are diagnosed with A. Fib: causes, symptoms, and treatment.

Learner Progress: Not documented in this visit.

Point: You have Atrial Flutter (MCB) (Not Started)

Description:
Provide written education on the signs/symptoms of A. Flutter, causes, medication(s), risk factors, prevention, and treatment.

Patient Friendly Description:
What to expect if you are diagnosed with A. Flutter: causes, symptoms, and treatment

Learner Progress: Not documented in this visit.

Title: MyChart Bedside Teaching completed (Not Started)

Points For This Title

Point: All MCB content reviewed with patient and teachback completed. The patient verbalized understanding. (Not Started)

Description:
Go over all the Eduction for the patient in the Education activity. The Education that was provided to the patient via MCB was included as well as education that was noted within the Eduction activity as Education that was beneifical to the patient during this hospital stay.

Learner Progress: Not documented in this visit.

Title: Coronary Artery Disease (MCB) (Not Started)

Topic: WS Cardiac Rehabilitation for Arrhythmia (MCB)--This is CAD and AMI Cardiac Rehab Program Information for the Patient (Not Started)

Point: Exercise for a Healthier Heart (MCB) (Not Started)

Description:
Explain how exercising regularly offers many health rewards. Provide exercise tips to beginning a new exercise routine; Set Small goals and aim for 150 minutes a week.

Patient Friendly Description:
This provides healthy heart tips on why exercise is important.

Learner Progress: Not documented in this visit.

Point: WellStar Cardiac Rehabilitation Program (MCB) (Not Started)

Description:
At WellStar, our cardiac rehab patients are individually assessed to review medical history, evaluate risk factors, analyze functional abilities and set goals. Ongoing assessments are conducted to ensure patients are making progress toward their goals, educational needs are being met, and any problems or concerns are being addressed with the referring physician.

Patient Friendly Description:
This will help you better understand Cardiac Rehabilitation. At WellStar, our cardiac rehab programs provide education, supervised exercise, lifestyle modification and emotional support to help patients increase physical fitness, reduce cardiac symptoms and improve health and wellbeing.

Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Point: Cardiac Rehabilitation: Emotional Issue (MCB) (Not Started)

Description:
Explain how having heart disease can be stressful. Encourage patient not to ignore feelings of sadness, worry, and depression. Patient should know when to ask for help and/or support.

Patient Friendly Description:
This will explain some emotional feelings related to heart disease.
Learner Progress: Not documented in this visit.

Topic: Heart Healthy Diet- DASH Diet (MCB) (Not Started)

Point: Eating Heart Healthy Food: Using DASH Plan (MCB) (Not Started)

Description:
Review diet information and explain that eating a low salt, low fat and low cholesterol diet with plenty of fruits and vegetables can reduce risk of complications from CAD.

Patient Friendly Description:
This will help you follow a healthy eating plan that can reduce your risk of complications associated with Coronary Artery Disease.

Please watch video/read over the material and let anyone on your Care Team know if there are any questions by marking below.

If you understand all material, mark I understand below.
Learner Progress: Not documented in this visit.

Topic: Questions your patient may have for you (MCB) (Not Started)

Point: Questions your patient may have about the AMI (MCB) (Not Started)

Description:
This is information about diet, exercise and medications for patients and it encourages them to ask staff questions.

Patient Friendly Description:
After reading this, you can write down any questions that you have for staff under the Notes section as a reference.
Learner Progress: Not documented in this visit.

Topic: Coronary Artery Disease (MCB) (Not Started)

Point: Recognizing signs and symptoms of Heart Disease (MCB) (Not Started)

Description:
Provide written education on the signs/symptoms of CAD, causes, medication(s), risk factors, prevention and treatment.

Patient Friendly Description:
This will explain some of the causes of Coronary Artery Disease.
Learner Progress: Not documented in this visit.

Point: Understanding Coronary Artery Disease (MCB) (Not Started)

Description:
Give patient written information on CAD. Explain the definition of CAD, causes, signs and symptoms.

Patient Friendly Description:
This will inform you of what to expect if you are diagnosed with Coronary Artery Disease (CAD).

Please watch video/read over the material and let anyone on your Care Team know if there are any questions by marking below.

If you understand all material, mark I understand below.
Learner Progress: Not documented in this visit.

Topic: Risk factors for Heart Disease (MCB) (Not Started)

Patient Education (continued)

Education (continued)

Point: Tobacco/Smoking Cessation (MCB) (Not Started)

Description:
Give patient written information on Quitting Smoking

Educate the patient/family/caregiver on smoking cessation and smoking cessation programs offered in the community. Explain effects smoking and second hand smoke have on the body. Encourage the patient to ask people that smoke around him/her to smoke outside or in another room. Refer patient to Cardiopulmonary Rehabilitation, if applicable.

Patient Friendly Description:
This will give you some getting started tips to kick the smoking habit.

This will help you plan how to quit the smoking habit.
Learner Not documented in this visit.
Progress:

Title: First-Dose Education (Not Started)

Points For This Title

Point: hydralazine HCl (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Not documented in this visit.
Progress:

Point: iohexol (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Not documented in this visit.
Progress:

Point: nitroglycerin (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Not documented in this visit.
Progress:

Point: Ringer's solution,lactated (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Not documented in this visit.
Progress:

Point: dextrose (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Not documented in this visit.
Progress:

Point: dextrose 50 % in water (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Point: calcium carbonate (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: morphine sulfate (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: hydrocodone/acetaminophen (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: acetaminophen (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: phenylephrine HCl (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: labetalol HCl (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: metoclopramide HCl (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: cyclopentolate HCl (Not Started)

Patient Education (continued)

Education (continued)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: furosemide (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: diclofenac sodium (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: gentamicin sulfate (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: diphenhydramine HCl (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: 0.9 % sodium chloride (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: piperacillin sodium/tazobactam (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: insulin lispro (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: ondansetron (Not Started)

Patient Education (continued)

Education (continued)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: glucagon,human recombinant (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: gadobenate dimeglumine (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: pantoprazole sodium (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: polyethylene glycol 3350 (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: perflutren lipid microspheres (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: fentanyl citrate/PF (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: lidocaine HCl/PF (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Point: ondansetron HCl/PF (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: tetracaine HCl/PF (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: sodium chloride 0.9 % (flush) (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Title: Congestive Heart Failure (MCB) (Not Started)

Topic: Psycho/Social/Spiritual Support (Not Started)

Point: Stress Management and Support Systems (Not Started)

Description:
Explain the importance of stress management and support systems in diabetes management. Refer to WellStar diabetes support groups, social services, case management or spiritual care, if needed.

Learner Progress: Not documented in this visit.

Point: Anxiety Reduction (Not Started)

Description:
Explain the definition of anxiety, signs and symptoms, and examples of ways to reduce anxiety. Inform patient that Spiritual Care and Social Services are available.

Learner Progress: Not documented in this visit.

Topic: Treatments/Procedures (MCB) (Not Started)

Point: Oxygen (Not Started)

Description:
Educate patient/family/caregiver on why oxygen is needed and how it will be delivered (nasal cannula, mask, etc.). Instruct patient/family/caregiver that the patent should not be smoking while on oxygen.

Learner Progress: Not documented in this visit.

Point: Medical Equipment (Not Started)

Description:
Educate patient/family/caregiver on use of medical equipment and provide educational materials.

Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Point: Introduction to Heart Failure (MCB) (Not Started)

Description:
Give patient written information on congestive heart failure. Explain the definition of CHF, causes, signs and symptoms, expected length of stay and criteria for discharge.

Patient Friendly Description:
This will inform you of what to expect if you are diagnosed with heart failure.

You will be receiving the Congestive Heart Failure red booklet.

Please watch video/read over the material and let anyone on your Care Team know if there are any questions by marking below.

If you understand all material, mark I understand below.

Learner Progress: Not documented in this visit.

Point: Echocardiogram (Not Started)

Description:
Educate patient/family/caregiver on echocardiograms, to include: what the test is, how the test will be performed, and what to expect during the test.

Learner Progress: Not documented in this visit.

Topic: Pain Management (Not Started)

Point: Pain Medication Actions & Side Effects (Not Started)

Description:
Provide medication specific handouts when available.

Learner Progress: Not documented in this visit.

Point: Pain Rating Scale (Not Started)

Description:
Provide patient with information on the Pain Rating Scale. Explain the rating scale of 0 to 10.

Learner Progress: Not documented in this visit.

Point: Non-Pharmacological Comfort Measures (Not Started)

Description:
Explain there are other ways of controlling pain than medication. The following are suggestions: position change, aromatherapy, deep slow breathing, distraction, quiet environment, imagery, heat therapy and/or cold therapy, laughter, massage, music, physical therapy, and touch therapy.

Learner Progress: Not documented in this visit.

Topic: Self Care (MCB) (Not Started)

Point: Eating well with High Blood Pressure (MCB) (Not Started)

Description:
Information provided to patient to explain what their diet should consist of when they have Heart Failure.

Patient Friendly Description:
This will help you make heart healthy eating choices if you have a diagnosis with heart failure.

Learner Progress: Not documented in this visit.

Point: Heart Failure:Being Active (MCB) (Not Started)

Description:
Explain to the patient how to be active with heart failure.

Patient Education (continued)

Education (continued)

Patient Friendly Description:
This will explain how to safely be active with heart failure.
Learner Not documented in this visit.
Progress:

Point: Heart Failure: Dealing with Sleep problems (MCB) (Not Started)

Description:
Provide tips and ideas to help patient sleep better.

Patient Friendly Description:
This will provide tips on sleeping better with heart faillure.
Learner Not documented in this visit.
Progress:

Point: Heart Failure: Know your Baselines (MCB) (Not Started)

Description:
Explain to patient how to identify their baseline and recognize changes.

Patient Friendly Description:
This will help you understand what's normal for you and how to watch for changes.
Learner Not documented in this visit.
Progress:

Point: Heart Failure : Know your Zones (Not Started)

Description:
Review heart failure zones with patient and educate them on how to know which zone they are in each day.

Learner Not documented in this visit.
Progress:

Point: Dealing with Heart Failure: Helping the patient cope (MCB) (Not Started)

Learner Not documented in this visit.
Progress:

Point: Daily Weights (MCB) (Not Started)

Description:
Give written information about daily weights. Instruct the patient to weigh on the same scale every day at the same time, wearing the same amount of clothing. Explain why it is important to check weight. Inform the patient that gaining weight from fluid build up may be an early sign that heart failure is getting worse. The patient should call a care provider if there is a weight gain of more than 2-3 pounds in one day or 4-5 pounds in five days.

Patient Friendly Description:
Information on the importance of Daily weights.
Learner Not documented in this visit.
Progress:

Point: How to check your Heart Rate and Blood Pressure (MCB) (Not Started)

Description:
Give patient written information on how to take a pulse. Explain the definition of a pulse, normal range, reason for taking a pulse, where pulses can be found. Demonstrate how to find a pulse. Once found, instruct the patient to count the beats for a full minute. Tell the patient to keep a record of the pulse rate, date and time taken, which site (right/left, wrist/neck) and strength of beats (weak, strong or missing beats).

Patient Friendly Description:
This will explain the importance of understanding your vital signs and show you how to take them.
Learner Not documented in this visit.
Progress:

Topic: WellStar Cardiac Rehabilitation (MCB) (Not Started)

Point: Exercise for a Healthier Heart (MCB) (Not Started)

Description:
Explain how exercising regularly offers many health rewards. Provide exercise tips to beginning a new exercise routine; Set Small goals and aim for 150 minutes a week.

Patient Education (continued)

Education (continued)

Patient Friendly Description:
This provides healthy heart tips on why exercise is important.
Learner Progress: Not documented in this visit.

Point: WellStar Cardiac Rehabilitation Program (MCB) (Not Started)

Description:
At WellStar, our cardiac rehab patients are individually assessed to review medical history, evaluate risk factors, analyze functional abilities and set goals. Ongoing assessments are conducted to ensure patients are making progress toward their goals, educational needs are being met, and any problems or concerns are being addressed with the referring physician.

Patient Friendly Description:
This will help you better understand Cardiac Rehabilitation. At WellStar, our cardiac rehab programs provide education, supervised exercise, lifestyle modification and emotional support to help patients increase physical fitness, reduce cardiac symptoms and improve health and wellbeing.
Learner Progress: Not documented in this visit.

Topic: Review Plan of Care (Not Started)

Point: Review Plan of Care - Day 5 (Not Started)

Description:
Review plan of care including provider roles, health history, IV and medications, labs and tests, and discharge planning. Take extra time to reiterate to patient that he/she may ask questions at any time and should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time.

Learner Progress: Not documented in this visit.

Point: Review Plan of Care - Day 1 (Not Started)

Description:
Review plan of care including provider roles, health history, IV and medications, labs and tests, and discharge planning. Take extra time to reiterate to patient that he/she may ask questions at any time and should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time.

Learner Progress: Not documented in this visit.

Point: Review Plan of Care - Day 2 (Not Started)

Description:
Review plan of care including provider roles, health history, IV and medications, labs and tests, and discharge planning. Take extra time to reiterate to patient that he/she may ask questions at any time and should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time.

Learner Progress: Not documented in this visit.

Point: Review Plan of Care - Day 3 (Not Started)

Description:
Review plan of care including provider roles, health history, IV and medications, labs and tests, and discharge planning. Take extra time to reiterate to patient that he/she may ask questions at any time and should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time.

Learner Progress: Not documented in this visit.

Point: Review Plan of Care - Day 4 (Not Started)

Description:
Review plan of care including provider roles, health history, IV and medications, labs and tests, and discharge planning. Take extra time to reiterate to patient that he/she may ask questions at any time and should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time.

Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Topic: Medications (MCB) (Not Started)

Point: Heart Failure Medications (MCB) (Not Started)

Description:
Educate patient on the drug type, purpose for medication, and common side effects.

Educate patient on Prescribed Medications

Patient Friendly Description:
This will inform you of medications that you may be taking if you are diagnosed with Heart Failure.

Learner Progress: Not documented in this visit.

Point: ACE Inhibitors (Not Started)

Description:
Educate patient/family/caregiver on the ACE Inhibitor prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Angiotensin II Receptor Blockers (Not Started)

Description:
Educate patient/family/caregiver on the Angiotensin II Receptor Blockers prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Aspirin (Not Started)

Description:
Give patient written information on Aspirin. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the doctor should be called. Reinforce that this medication should be taken exactly as the doctor has prescribed.

Learner Progress: Not documented in this visit.

Point: Beta Blockers (Not Started)

Description:
Educate patient/family/caregiver on the Beta Blocker prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Digoxin (Not Started)

Description:
Educate patient/family/caregiver on Digoxin and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed. The physician will order a blood test to monitor the concentration of the drug in the patient's blood. The dose of this medication may be changed according to the results of this test.

Learner Progress: Not documented in this visit.

Point: Diuretics (Not Started)

Description:
Educate patient/family/caregiver on the Diuretic prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Point: Inotropes (Not Started)

Description:
Educate patient/family/caregiver on the Inotropes prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Vasodilators (Not Started)

Description:
Educate patient/family/caregiver on the Vasodilator prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Topic: Prevention / Discharge (MCB) (Not Started)

Point: Community Resources (Not Started)

Description:
Give written information on available community resources. Refer to Social Services or Case Management, if needed.

Learner Progress: Not documented in this visit.

Point: Home Health Care Services (Not Started)

Description:
Give patient written information on Home Health Care Services that have been arranged. Review the role of the home care nurse and when to expect the first visit. Refer to Case Management or Social Services, if needed.

Learner Progress: Not documented in this visit.

Point: Follow-up Appointments (Not Started)

Description:
Give the patient/family written information on their next appointment and when to make follow-up appointments. Reinforce importance of making and keeping the appointments. If appointments were made during the visit, give the patient a written reminder of the time and location.

Learner Progress: Not documented in this visit.

Point: Influenza Vaccine (Not Started)

Description:
Educate the patient/family/caregiver on obatining a yearly influenza vaccine.

Learner Progress: Not documented in this visit.

Point: Discharge Medications (Not Started)

Description:
Ensure that there are no barriers to obtain medications prior to discharge. Notify Care Coordination if there are any needs for additional resources prior to discharging the patient.

Learner Progress: Not documented in this visit.

Point: When to Call the Doctor (MCB) (Not Started)

Patient Education (continued)

Education (continued)

Description:
Provide written documentation instructing the patient to call the doctor if the patient has:

1. Ankles and legs that become more swollen.
2. Shoes and socks that get tight suddenly.
3. Shortness of breath that does not go away with rest.
4. Weight gain of 2 - 3 pounds in one day.
5. Weight gain of 4 - 5 pounds in one week.
6. No energy for normal activities.
7. Dizziness or weakness.
8. Yellowish or blue green vision.
9. Heartbeat changes (feels like a butterfly in the chest).
10. Chest pain.
11. Blurred vision.
12. Passing out.
13. Cough that does not go away.

Patient Friendly Description:
Heart Failure symptoms to know and when to call your healthcare provider.
Lifestyle changes to help you feel and live better with Heart Failure.
Learner Not documented in this visit.
Progress:

Point: Review Discharge Plan (Not Started)

Description:
Review the discharge plan with patient and primary care giver including: diet, activity, medications, and special precautions. Refer to Case Management, if needed.

Learner Not documented in this visit.
Progress:

Point: Smoking Cessation (Not Started)

Description:
Educate the patient/family/caregiver on smoking cessation and smoking cessation programs offered in the community. Explain effects smoking and second hand smoke have on the body. Encourage the patient to ask people that smoke around him/her to smoke outside or in another room. Refer patient to Cardiopulmonary Rehabilitation, if applicable.

Learner Not documented in this visit.
Progress:

Point: Diet Instructions for CHF Prevention (Not Started)

Description:
Review diet information and explain that eating a low fat and low cholesterol diet with plenty of fruits and vegetables can reduce their chance of suffering a future heart attack.

Learner Not documented in this visit.
Progress:

Topic: Heart Failure Discharge Instructions (Not Started)

Point: Follow-up Appointments (Not Started)

Description:
Give the patient/family written information on their next appointment and when to make follow-up appointments. Reinforce importance of making and keeping the appointments. If appointments were made during the visit, give the patient a written reminder of the time and location.

Learner Not documented in this visit.
Progress:

Point: Daily Weights (MCB) (Not Started)

Description:
Give written information about daily weights. Instruct the patient to weigh on the same scale every day at the same time, wearing the same amount of clothing. Explain why it is important to check weight. Inform the patient that gaining weight from fluid build up may be an early sign that heart failure is getting worse. The patient should call a care provider if there is a weight gain of more than 2-3 pounds in one day or 4-5 pounds in five days.

Patient Friendly Description:
Information on the importance of Daily weights.

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Point: When to Call the Doctor (MCB) (Not Started)

Description:
Provide written documentation instructing the patient to call the doctor if the patient has:

1. Ankles and legs that become more swollen.
2. Shoes and socks that get tight suddenly.
3. Shortness of breath that does not go away with rest.
4. Weight gain of 2 - 3 pounds in one day.
5. Weight gain of 4 - 5 pounds in one week.
6. No energy for normal activities.
7. Dizziness or weakness.
8. Yellowish or blue green vision.
9. Heartbeat changes (feels like a butterfly in the chest).
10. Chest pain.
11. Blurred vision.
12. Passing out.
13. Cough that does not go away.

Patient Friendly Description:
Heart Failure symptoms to know and when to call your healthcare provider.
Lifestyle changes to help you feel and live better with Heart Failure.
Learner Progress: Not documented in this visit.

Point: Review Discharge Plan (Not Started)

Description:
Review the discharge plan with patient and primary care giver including: diet, activity, medications, and special precautions. Refer to Case Management, if needed.

Learner Progress: Not documented in this visit.

Point: Diet Instructions for CHF Prevention (Not Started)

Description:
Review diet information and explain that eating a low fat and low cholesterol diet with plenty of fruits and vegetables can reduce their chance of suffering a future heart attack.

Learner Progress: Not documented in this visit.

Title: General Patient Education (MCB) (Not Started)

Topic: Psycho/Social/Spiritual Support (Not Started)

Point: Stress Management and Support Systems (Not Started)

Description:
Explain the importance of stress management and support systems in diabetes management. Refer to WellStar diabetes support groups, social services, case management or spiritual care, if needed.

Learner Progress: Not documented in this visit.

Point: Anxiety Reduction (Not Started)

Description:
Explain the definition of anxiety, signs and symptoms, and examples of ways to reduce anxiety. Inform patient that Spiritual Care and Social Services are available.

Learner Progress: Not documented in this visit.

Topic: Prevention (MCB) (Not Started)

Patient Education (continued)

Education (continued)

Point: When to Call the Doctor (Not Started)

Description:
Educate patient/family/caregiver on when to call the doctor.

Learner Progress: Not documented in this visit.

Point: Protect Others from Infection (Not Started)

Description:
Educate patient/family/caregiver on respiratory hygiene and cough etiquette. To protect from further infection and to protect others from getting an infection, patient should cover nose and mouth with tissues when coughing. Encourage patient to place used tissues in a plastic bag that will not allow secretions to soak through. Patient should always wash his/her hands after using or handling used tissues.

Learner Progress: Not documented in this visit.

Point: Protect Yourself from Further Infection (MCB) (Not Started)

Description:
Educate patient/family/caregiver that because patient is in a weakened condition he/she needs to avoid others who are sick as to not acquire another illness. Family/caregiver should wear gloves, gown and face shield/eye protection.

Patient Friendly Description:
Information on Flu.
Information on Pneumonia and Pneumococcal Vaccination.
Learner Progress: Not documented in this visit.

Point: Falls education, precautions, prevention at home and in the hospital (MCB) (Not Started)

Description:
Patient was given information on preventing falls both while in the hospital and when they are at home.

Patient Friendly Description:
Things to help you prevent falls while you are in the hospital and when you are home.
Learner Progress: Not documented in this visit.

Point: Prevention Deep Vein Thrombosis after surgery (MCB) (Not Started)

Description:
Educate patient/family/caregiver to prevent DVT and PE after Suergery

Patient Friendly Description:
In the days and weeks after surgery, you have a higher chance of developing a deep vein thrombosis (DVT).
This is a condition in which a blood clot or thrombus develops in a deep vein.
They are most common in the leg. But, a DVT may develop in an arm, or another deep vein in the body.
A piece of the clot, called an embolus, can separate from the vein and travel to the lungs.
A blood clot in the lungs is called a pulmonary embolus (PE).
This can cut off the flow of blood to the lungs.
It is a medical emergency and may cause death.
Learner Progress: Not documented in this visit.

Point: Demonstrate Handwashing (MCB) (Not Started)

Description:
Educate patient/family/caregiver on how to perform proper hand hygiene. Explain that hand washing is the single most important step in preventing the spread of germs. Have the patient/family/caregiver demonstrate proper hand washing technique using soap, water, friction, clean nails under running water, and dry hands on clean towel without touching dirty surfaces.

Patient Friendly Description:
This will explain the importance of washing and cleansing your hands to prevent infection.
Learner Progress: Not documented in this visit.

Topic: Self Care (MCB) (Not Started)

Patient Education (continued)

Education (continued)

Point: General Self Care (Not Started)

Description:
Instruct patient on self care needs. These may include: hygiene, how to take a blood pressure, how to change a dressing, etc.

Learner Progress: Not documented in this visit.

Point: Demonstrate Handwashing (MCB) (Not Started)

Description:
Educate patient/family/caregiver on how to perform proper hand hygiene. Explain that hand washing is the single most important step in preventing the spread of germs. Have the patient/family/caregiver demonstrate proper hand washing technique using soap, water, friction, clean nails under running water, and dry hands on clean towel without touching dirty surfaces.

Patient Friendly Description:
This will explain the importance of washing and cleansing your hands to prevent infection.

Learner Progress: Not documented in this visit.

Topic: Medications (MCB) (Not Started)

Point: Antibiotic Education (Not Started)

Description:
If an antibiotic was prescribed, educate patient/family/caregiver on the antibiotics prescribed. Explain how antibiotics work in the body. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed

If a viral diagnosis was made, the patient/family was educated on their viral diagnosis and the reason for no antibiotic this visit.

Learner Progress: Not documented in this visit.

Point: Anticoagulant Therapy (Not Started)

Description:
1-Educate patient/family/caregiver on anticoagulant being prescribed and provide educational materials.
2-Explain action of medication, reason for taking, and importance of adherence to correct medication dose and schedule,
3-Explain potential for adverse drug reactions, signs of allergic reaction, potential for drug-drug and drug-food interactions, and when physician should be called.
4-Reinforce that the medication should be taken exactly as the physician has prescribed.
5-Explain importance of maintaining follow-up appointments and adhering to laboratory testing as prescribed by physician.
6-Explain that the dose of the anticoagulant being prescribed may change depending on the results of the laboratory testing.

Learner Progress: Not documented in this visit.

Point: Insulin (MCB) (Not Started)

Description:
Educate patient/family/caregiver on the insulin prescribed. Explain how insulin works in the body. Explain the action of insulin, reason for taking, side effects, signs of allergic reaction and when physician should be called. Reinforce that insulin should be taken exactly as the physician has prescribed. Explain the proper storage of insulin, that extreme temperatures can damage insulin and never take insulin that has expired. Explain that the patient's primary care physician may change the dosage depending on the results of blood glucose tests and/or A1C level.

Patient Friendly Description:
This will inform you of why you are prescribed insulin if you have Diabetes Type II.

Learner Progress: Not documented in this visit.

Point: Hypoglycemic Agents (Not Started)

Description:
Educate patient/family/caregiver on the oral and/or injectable hypoglycemic(s) prescribed. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, as well as when the physician should be called. Reinforce that this medication(s) should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Point: Non-Steroidal Anti-Inflammatory Drugs (Not Started)

Description:
Educate patient/family/caregiver on the NSAID prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Psychotropic Medications (Not Started)

Description:
Educate patient/family/caregiver on the Psychotropic medication prescribed. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: ACE Inhibitors (Not Started)

Description:
Educate patient/family/caregiver on the ACE Inhibitor prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Angiotensin II Receptor Blockers (Not Started)

Description:
Educate patient/family/caregiver on the Angiotensin II Receptor Blockers prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Beta Blockers (Not Started)

Description:
Educate patient/family/caregiver on the Beta Blocker prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Digoxin (Not Started)

Description:
Educate patient/family/caregiver on Digoxin and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed. The physician will order a blood test to monitor the concentration of the drug in the patient's blood. The dose of this medication may be changed according to the results of this test.

Learner Progress: Not documented in this visit.

Point: Diuretics (Not Started)

Description:
Educate patient/family/caregiver on the Diuretic prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Inotropes (Not Started)

Patient Education (continued)

Education (continued)

Description:
Educate patient/family/caregiver on the Inotropes prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Vasodilators (Not Started)

Description:
Educate patient/family/caregiver on the Vasodilator prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Antibiotics (Not Started)

Description:
Educate patient/family/caregiver on the Antibiotics prescribed. Explain how antibiotics works in the body. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Medication purpose, side effects, schedule, administration (MCB) (Not Started)

Description:
Discussed purpose and possible side effects of medication.

Learner Progress: Not documented in this visit.

CONSENT TO ROUTINE PROCEDURES AND TREATMENTS & FINANCIAL RESPONSIBILITY STATEMENT

Section I **CONSENT TO ROUTINE PROCEDURES AND TREATMENTS**

I consent to routine procedures and treatments at a WellStar Health System "WellStar" facility as an outpatient, inpatient, or emergency department patient, depending on my medical needs. Routine procedures and treatments can include testing (for example, x-rays and blood tests), routine care and procedures (for example, intravenous fluids, injections, or bladder or stomach tubes) and evaluation (for example, interviews and physical exams). However, this consent to routine procedures and treatments does not include consent for other invasive procedures (for example, surgery, amniocentesis, or diagnostic tests such as colonoscopy or those requiring the use of contrast material), consent for blood or blood products, general anesthesia, or my participation in research. These circumstances require a separate consent process. I understand it is the responsibility of my physician or surgeon to obtain any required separate consent(s).

I understand that I may receive treatment and healthcare services given by WellStar employees (such as nurses and technicians) and by physicians and other independent medical professionals on the medical staff of WellStar facilities (for example, Emergency Department physicians, radiologists, and surgeons) who are NOT WellStar employees. I understand that the healthcare services provided by these independent medical professionals, using independent medical judgment, at a WellStar facility in no way create any type of employment, partnership, or other relationship other than as an independent contractor. These independent contractors are responsible for their own actions and WellStar shall not be liable for the acts or omissions of any such independent contractors.

While I am a patient at a WellStar facility, I understand that I may be observed by or receive healthcare services from students enrolled in training programs. Students are supervised by instructors, WellStar employees, or other independent medical professionals on the medical staff of the WellStar facility, depending on the type of training program the students are enrolled in. I understand that I have the right to request that someone other than a student provide my care.

I understand that I retain no property rights to any tissue samples or bodily fluids removed from my body (specimens) as part of procedures or treatment given to me. I further understand that WellStar has no obligation to preserve these specimens; that it will retain or dispose of specimens according to its usual practices.

I understand that I have the right to ask questions about a proposed procedure or treatment (including the identity of any person providing or observing treatment and his or her affiliation with WellStar) at any time. I understand the practice of medicine is not an exact science and diagnosis and outcomes of treatment depend upon my medical condition and may involve risks or even death. I understand that no guarantees can be made as to the outcome of my care.

Section II **MATERNITY PATIENTS**

If I deliver an infant(s) while I am a patient at a WellStar facility, I agree that this same Consent to Routine Procedures and Treatments applies to the infant(s).

Section III **EMERGENCY OR LABORING PATIENTS**

In accordance with federal law, I understand my right to receive an appropriate medical screening examination performed by a physician or other qualified medical professional to determine whether I am suffering from an emergency medical condition. If such a condition exists, stabilizing treatment will be provided within the capabilities of this WellStar facility and its staff, even if I cannot pay for these services, do not have medical insurance coverage, or am not entitled to Medicare or Medicaid.

Eugene George Maurice	
Patient's Signature	Relationship to Patient
Eugene D Maurice	Self

Section IV **ASSIGNMENT OF BENEFITS/FINANCIAL RESPONSIBILITY**

I assign any right I may have to receive payment from a health insurance plan, ERISA, Medicare, Medicaid, Social Security, or other payor(s) for services rendered by WellStar and the medical professionals caring for me during my treatment. I understand that I am financially responsible for all healthcare services, including amounts that are not covered by my health insurance plan or payor, as appropriate, based on the terms of the health plan contracts or the law. For example, the payment of non-covered services, deductibles, and co-payments is the patient's responsibility. For healthcare services provided by independent medical professionals, I understand that I will receive separate bills and that I am responsible for paying them. I agree to provide WellStar with all health insurance coverage information if I choose to use my insurance for payment of services. I agree to respond to all requests for benefit information and complete any forms required by my

All Scans (continued)

Encounter-Level E-Signatures: (continued)

insurance plan. I am responsible for understanding and following the terms of my health insurance plan. I authorize WellStar and its medical professionals to submit appeals for payment, including arbitration and formal complaints, on my behalf as required by my insurance company. I also understand that I am financially responsible for collection costs if my account becomes delinquent and that all delinquent accounts will bear interest at the legal rate, unless prohibited by law. I understand that WellStar may request and use data from third parties such as credit reporting agencies in order to verify demographic data or evaluate financial options.

For Medicare/Medicaid Patients: I certify that the information given by me in applying for payment under Title XVII and XIX of the Social Security Act is correct. I authorize release of any information needed to act on this request. I request that payment of authorized benefits be made on my behalf. I assign payment for the unpaid charges to WellStar or the independent medical professionals providing healthcare services to me. I understand that I am responsible for any remaining balance not covered by other insurance.
If I am signing this form and am not the patient, I understand that I am also responsible for and agree to pay charges not covered by the assignments made in this Section IV, including any Medicare deductibles

Section V **FINANCIAL ASSISTANCE STATEMENT**

It is WellStar's policy to provide medical care at no cost to qualified members of the WellStar-served communities, and to provide significantly discounted medical care to certain qualified members of our communities faced with financial hardship due to medical misfortune, according to policy. I understand that if payment of my bill creates a financial hardship, I may qualify for assistance with all or part of my medical expenses associated with my treatment at a WellStar facility and that I can call 678-838-5750 for more information.

(Patient Initials) 
Section VI **CONSENT TO PHOTOGRAPHY AND VIDEOTAPING**

Sometimes, WellStar facilities and physicians use patient photographs and videos for identification, clinical, educational, or research-related purposes. These photographs, recordings or videos could be in digital or other formats and may be reproduced for scientific or treatment reasons. I consent to having photographs, recordings or videos taken for patient care, educational, research, or other clinical benefits.

Section VII **NOTICE REGARDING RELEASE OF HEALTH INFORMATION**

As explained in WellStar's Notice of Privacy Practices, WellStar may use and disclose medical information including privileged information (i.e. mental health, alcohol/drug abuse or HIV/AIDS), to physicians or other healthcare providers for the purposes of providing treatment, and to payors for the purposes of payment for medical treatment. HIPAA also permits WellStar and its affiliated companies to use medical information for healthcare operations. I expressly authorize WellStar's use and disclosure of my medical information as described in this Section VII.

Section VIII **INPATIENT INFORMATION**

I have received a copy of the Patient Admission Packet that includes "Patient Rights and Responsibilities" and information regarding Advance Care Planning. If I am a Medicare beneficiary, I have also received a notice entitled "Important Message from Medicare."

Section IX **ADVANCE DIRECTIVE**

I have an Advance Directive (Choose One)
Yes:
No: 
If yes: I will provide a copy to WellStar. I have been advised that WellStar does not honor Advance Directives in Pre-admission Testing or in the Outpatient Diagnostics and Treatment setting.

Section X **PERSONAL VALUABLES**

I understand that WellStar is not liable or responsible for lost or damaged personal belongings and valuables (for example, money, jewelry, hearing aids, or dentures) unless placed in a WellStar safe. I will ask family members or friends to take home my personal belongings and valuables. I also understand and will inform the staff if I have dentures, eyeglasses, contact lenses, prosthetics or other items that I need to retain close by for personal functioning to assure safekeeping.

Section XI **CONSENT TO CONTACT**

All Scans (continued)

Encounter-Level E-Signatures: (continued)

By providing a telephone number, I expressly consent and authorize WellStar Health System, any practitioner or clinical provider as well as any of their related entities, agents, or contractors including but not limited to schedulers, marketers, advertisers, debt collectors, and other contracted staff (collectively referred to herein as "Provider") to contact me through the use of any dialing equipment (including a dialer, automatic telephone dialing system, and/or interactive voice recognition system) and/or artificial or prerecorded voice or message. I expressly agree that such automated calls may be made to any telephone number (including numbers assigned to any cellular or other service for which I may be charged for the call) used by or associated with me and obtained through any source including but not limited to any number I am providing today, have provided previously, or may provide in the future in connection with the medical goods and services and/or my account. By providing this express consent, I specifically waive any claim I may have to the making of such calls, including any claim under federal or state law and specifically any claim under the Telephone Consumer Protection Act, 47 U.S.C. § 227. By providing a telephone number, I represent that I am the subscriber or owner or have the authority to use and provide consent to call the number.

By providing a telephone number, I expressly consent to the receipt of text messages from Provider at any telephone number (including numbers assigned to any cellular or other service for which I may be charged for the call) used by or associated with me and obtained through any source including but not limited to any number I have provided previously or may provide in the future in connection with my account. By providing this express consent, I specifically waive any claim I may have for the making of such calls, including any claim under federal or state law and specifically and claim under the Telephone Consumer Protection Act, 47 U.S.C. § 227. By providing a telephone number, I represent that I am the subscriber or owner or have the authority to use and provide consent to call the number.

By providing my email address now or at any time in the future in connection with the medical goods and services provided and/or my account, I expressly opt-in to the receipt of email communications from Provider for or related to the medical goods or services provided, my account, and other services such as financial, clinical, and education information including exchange news, changes to health care law, health care coverage, care followup, and other health care opportunities, goods, and services. By providing this express consent, I specifically waive any claim I may have for the sending of such emails, including any claim under federal or state law and specifically any claim under the CAN-SPAM Act, 15 U.S.C. § 7701, et seq. By providing an email address, I represent that I am the subscriber or owner or have the authority to use and provide consent to contact the email address.

I understand that providing a telephone number and/or email address is not a condition of receiving medical services. I also understand that I may revoke my consent to contact at any time by directly contacting Provider or using the opt-out method that will be identified in the applicable communication. I also understand that it is my responsibility to notify Provider immediately of any change in telephone number or email address.

I confirm that I have read and understood and accept the terms of this document, that I am the patient or patient's representative, and that I am authorized to sign this document and accept its terms.

XR CHEST PA AND LATERAL (2 VIEWS) [855232763]

Resulted: 11/21/19 1238, Result status: Final result

Order status: Completed
Filed by: Interface, Rad Powerscribe 11/21/19 1240
Accession number: 32050615
Narrative:

Resulted by: Mark L Wetherly, MD
Performed: 11/21/19 0959 - 11/21/19 1008
Result details

EXAM: PIC XR CHEST PA AND LATERAL (2 VIEWS)

CLINICAL INDICATION: R93.89 (Abnormal findings on diagnostic imaging of other specified body structures) . Physical exam. Fluid levels versus pneumonia.

COMPARISON: Chest x-ray 6/18/2018 and 11/4/2019

FINDINGS: Prominent cardiac shadow of 54% cardiothoracic ratio, similar to previous exams. Adequate mediastinal contour with atherosclerotic aortic knob. Prior coronary intervention with median sternotomy, bypass clips and radiopaque framework of
coronary stenting. Lung fields look clear. Normal pulmonary vascularity. Adequate pleural contours and skeleton. Median sternotomy wires look similar to the exam 11/4/2019.

Impression:

1. No acute chest radiographic abnormality identified relative to the prior exam of 11/4/2019.

Patient Education

Education

Title: Diabetes (MCB) (Not Started)

Topic: Psycho/Social/Spiritual Support (Not Started)

Point: Stress Management and Support Systems (Not Started)

Description:
Explain the importance of stress management and support systems in diabetes management. Refer to WellStar diabetes support groups, social services, case management or spiritual care, if needed.

Learner Progress: Not documented in this visit.

Point: Anxiety Reduction (Not Started)

Description:
Explain the definition of anxiety, signs and symptoms, and examples of ways to reduce anxiety. Inform patient that Spiritual Care and Social Services are available.

Learner Progress: Not documented in this visit.

Topic: Treatments/Procedures (MCB) (Not Started)

Point: Introduction to Diabetes (MCB) (Not Started)

Description:
Give patient/family/caregiver written information on diabetes. Explain the definition of the type of diabetes with which the patient was diagnosed, how diabetes works in the body, risk factors, signs and symptoms, and if newly diagnosed, diagnostic criteria. Encourage viewing of diabetes on-demand videos when applicable. Refer to inpatient diabetes educator when applicable.

Patient Friendly Description:
You will receive a booklet entitled Diabetes survival skills. There are also two links to documents about Diabetes for you to read over noted below.

Please read over the items and let anyone on your Care Team know there are any questions about the material by marking below that "I HAVE QUESTIONS".

If once you have received the items and understand the material you can mark this as "I understand".
Learner Progress: Not documented in this visit.

Point: Diabetes Type II management (MCB) (Not Started)

Description:
Patient will watch a video that will discuss information on what to expect if they have Diabetes type II.

Patient Friendly Description:
This will inform you of what to expect if you have Diabetes type II.
Learner Progress: Not documented in this visit.

Point: Diabetic long term complications (MCB) (Not Started)

Description:
Patient will have information from Krames on the long term complications of Diabetes Type II.

Patient Friendly Description:
Some information on the long term complications of Diabetes Type II.
Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Topic: Medications (MCB) (Not Started)

Point: Insulin (MCB) (Not Started)

Description:
Educate patient/family/caregiver on the insulin prescribed. Explain how insulin works in the body. Explain the action of insulin, reason for taking, side effects, signs of allergic reaction and when physician should be called. Reinforce that insulin should be taken exactly as the physician has prescribed. Explain the proper storage of insulin, that extreme temperatures can damage insulin and never take insulin that has expired. Explain that the patient's primary care physician may change the dosage depending on the results of blood glucose tests and/or A1C level.

Patient Friendly Description:
This will inform you of why you are prescribed insulin if you have Diabetes Type II.

Learner Progress: Not documented in this visit.

Point: Hypoglycemic Agents (Not Started)

Description:
Educate patient/family/caregiver on the oral and/or injectable hypoglycemic(s) prescribed. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, as well as when the physician should be called. Reinforce that this medication(s) should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Giving Insulin Injection (Not Started)

Description:
Explain and demonstrate how the injection is given. Allow enough time for the patient/family/caregiver to practice. Have the patient return-demonstrate the technique using normal saline (vial and syringe only unless sterile demonstration pen is also available). Teach the patient how to choose and rotate injection sites. Instruct patient on safe disposal of used needles and syringes.

Learner Progress: Not documented in this visit.

Point: Drawing up Insulin (Not Started)

Description:
Instruct patient/family/caregiver to wash hands before drawing up insulin. Demonstrate and have the patient return-demonstrate drawing up the correct amount of insulin prescribed. If the patient is going to use an insulin pen, demonstrate use and have the patient return-demonstrate. If the patient is going to mix different types of insulin, demonstrate and have the patient return-demonstrate the correct way to draw up and mix the insulin.

Learner Progress: Not documented in this visit.

Topic: Self Care (MCB) (Not Started)

Point: Exercise (Not Started)

Description:
Encourage patient/family/caregiver to discuss activity limitations, if any, with physician before starting an exercise routine. Stress the importance of regular exercise and activity to control blood sugar levels and weight. Instruct the patient to carry single carohydrates while exercising in case of hypoglycemic reaction. Explain that both concentrated physical activity (such as walking, swimming, running, cycling, strength training) and being more active through the entire day are equally important to blood sugar control and weight management.

Learner Progress: Not documented in this visit.

Point: Blood Glucose Monitoring (MCB) (Not Started)

Description:
Instruct patient/family/caregiver to wash hands before checking blood glucose. Explain and, if possible to use a complementary glucometer, demonstrate how to check and record blood sugars. Instruct the patient to check blood sugars as frequently as ordered by the physician. Explain that stress or illness will increase blood sugar, making it necesary to check blood sugars more often than usual. Instruct patient on blood glucose target ranges and A1C target range. Discuss care of the meter and supplies, including how to obtain supplies. If using a complementary glucometer, have the patient return-demonstrate checking the blood sugar. Instruct the patient on safe disposal of lancets. Refer to inpatient diabetes educator if applicable.

Patient Friendly Description:
Why is it important to check my blood sugar?

Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Point: Diabetic Foot Care (MCB) (Not Started)

Description:
Explain importance of foot care. Patient should have feet examined by a health care provider at least twice a year. Persons with foot problems should have feet examined at every visit. Explain daily foot care. Review importance of wearing well-fitting shoes and stockings/socks. Reinforce the importance of wearing shoes, even indoors, to prevent injury.

Patient Friendly Description:
This will inform you of why you should check your feet if you have diabetes.

Learner Progress: Not documented in this visit.

Point: Diabetes Identification Jewelry (Not Started)

Description:
Encourage the patient to wear a piece of jewelry that identifies patient as a person with diabetes. This will inform medical personnel that patient has diabetes if unable to communicate.

Learner Progress: Not documented in this visit.

Topic: Prevention/Discharge (Not Started)

Point: Signs and Symptoms of Hypoglycemia (Not Started)

Description:
Define and explain causes of hypoglycemia. Discuss signs and symptoms.

Learner Progress: Not documented in this visit.

Point: Treatment of Hypoglycemia (Not Started)

Description:
Instruct the patient on how to treat low blood sugar using the Rule of 15. Encourage patient to carry a blood sugar treatment at all time.

Learner Progress: Not documented in this visit.

Point: When to Call the Doctor (Not Started)

Description:
Instruct the patient/family/caregiver to call their health care provider if there are symptoms of hypo- or hyperglycemia or if blood sugars are trending high or low and are not controlled by simple measures.

Learner Progress: Not documented in this visit.

Point: Signs and Symptoms of Hyperglycemia (Not Started)

Description:
Define and explain causes of hyperglycemia. Discuss signs and symptoms (mild, moderate, severe, and ketoacidosis).

Learner Progress: Not documented in this visit.

Point: Prevention of Hyperglycemia (Not Started)

Description:
Encourage patient/family/caregiver to follow healthcare providers' instructions for diet, activity and medications. Explain the importance of good diabetes management and learning to detect and treat hyperglycemia early before it worsens. Refer to registered dietitian, when applicable, for meal planning assistance.

Learner Progress: Not documented in this visit.

Point: Prevention of Hypoglycemia (Not Started)

Patient Education (continued)

Education (continued)

Description:
Encourage patient/family/caregiver to follow healthcare providers' instructions for diet, activity and medications. Explain the importantce of good diabetes management and learning to detect and treat hypoglycemia early before it worsens.

Learner Progress: Not documented in this visit.

Point: WellStar Outpatient Diabetes Education (Not Started)

Description:
Provide information on WellStar Outpatient Diabetes Education when applicable. Information includes a list of classes offered and how to register.

Learner Progress: Not documented in this visit.

Point: Follow-up Appointments (Not Started)

Description:
Give the patient/family written information on when to make follow-up appointments. Reinforce importance of making and keeping the appointments. If appointments were made during the visit, give the patient a written reminder of the time and location.

Learner Progress: Not documented in this visit.

Topic: Diabetic Diet (MCB) (Not Started)

Point: Meal Planning and Portion Sizes (MCB) (Not Started)

Description:
The patient will view documents in Krames talking about meal planning as well learning about serving and portion sizes.

Patient Friendly Description:
This will inform you of ways to stay on track with your diet.

Learner Progress: Not documented in this visit.

Point: Eating well with Diabetes (MCB) (Not Started)

Description:
Patient will watch a video on healthy eating for people with DM.

Patient Friendly Description:
Healthy eating for people with Diabetes.

Learner Progress: Not documented in this visit.

Point: Carbohydrate Counting (MCB) (Not Started)

Description:
Patient will read Krames documents on healthy meals and meal planing for Diabetes.

Patient Friendly Description:
Learn about counting your carbohydrates.

Learner Progress: Not documented in this visit.

Topic: Survival Skills (Not Started)

Point: Review Diagnosis (Not Started)

Description:
Review the diabetes disagnosis, specific to patient's diabetes type.
Diabetes Survival Skills Booklet provided.

Patient Friendly Description:

Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Point: Nutrition (Not Started)

Description:
Importance of consistent nutrition habits.

Learner Progress: Not documented in this visit.

Point: Appointments (Not Started)

Description:
Importance of follow up appointment with the health care provider who will provide diabetes care after discharge.

Learner Progress: Not documented in this visit.

Point: Sick Day (Not Started)

Description:
Sick day management

Learner Progress: Not documented in this visit.

Point: Insulin Administration (if applicable) (Not Started)

Description:
Insulin administration and proper use and disposal of needles and syringes. How to schedule outpatient diabetes education. Review self-monitoring of blood glucose and home blood glucose goals.

Learner Progress: Not documented in this visit.

Point: Hyperglycemia (Not Started)

Description:
Definition, recognition, treatment and prevention of hyperglycemia.

Learner Progress: Not documented in this visit.

Point: Hypoglycemia (Not Started)

Description:
Definition, recognition, treatment and prevention of hypoglycemia.

Learner Progress: Not documented in this visit.

Point: Glucose Lowering Medications (Not Started)

Description:
When and how to take blood glucose-lowering medications.

Learner Progress: Not documented in this visit.

Topic: Diabetes Zones for Management (Not Started)

Point: Diabetes Zones for Management reviewed (Not Started)

Description:
Diabetes Zones for Management reviewed.

Learner Progress: Not documented in this visit.

Point: Diabetes Zones for Management handout provided (Not Started)

Description:
Diabetes Zones for Management handout provided.

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Title: Cardiac Arrhythmia (MCB) (Not Started)

Topic: Treatment for Atrial Fibrillation/Atrial Flutter (MCB) (Not Started)

Point: Chemical cardioversion (MCB) (Not Started)

Description:
Provide written education on why and how a chemical cardioversion is done. As well as accociated risks.

Patient Friendly Description:
Why and how a chemical cardioversion is done and associated risks.

Learner Progress: Not documented in this visit.

Point: Electrical cardioversion (MCB) (Not Started)

Description:
Provide written education on why and how an electrical cardioversion is done. As well as accociated risks.

Patient Friendly Description:
Why and how a electrical cardioversion is done and associated risks.

Learner Progress: Not documented in this visit.

Point: Ablation (MCB) (Not Started)

Description:
Provide written education on the catheter ablation procedure and discharge instructions.

Patient Friendly Description:
How an ablation is done, and what to do after the procedure.

Learner Progress: Not documented in this visit.

Topic: Prevention/Discharge (MCB) (Not Started)

Point: Anticoagulation (MCB) (Not Started)

Description:
Provide written education on anticoagulation use including contraindications, side effects, interactions, and medication safety.

Patient Friendly Description:
Information on taking blood thinners safely.

Learner Progress: Not documented in this visit.

Point: Discharge with A Fib/Flutter (MCB) (Not Started)

Description:
Provide written education on treatment options, home care, and follow up care for discharging with atrial fibrillation.

Patient Friendly Description:
Information on treatment options, home care, and when to call your healthcare provider after going home with atrial fibrillation/flutter.

Learner Progress: Not documented in this visit.

Point: Atrial fib/flutter: stroke prevention (MCB) (Not Started)

Description:
"Provide written education on risk factors, medication, and prevention of A. Fib.
Hyperlink education materials provided to patient/family/caregiver. "

Patient Friendly Description:
Preventing stroke caused by A. Fib.

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Topic: What is atrial fibrillation/flutter (MCB) (Not Started)

Point: You have atrial fibrillation (MCB) (Not Started)

Description:
Provide video education on the signs/symptoms of A. Fib, causes, medication(s), risk factors, prevention, and treatment.

Patient Friendly Description:
What to expect if you are diagnosed with A. Fib: causes, symptoms, and treatment.

Learner Progress: Not documented in this visit.

Point: You have Atrial Flutter (MCB) (Not Started)

Description:
Provide written education on the signs/symptoms of A. Flutter, causes, medication(s), risk factors, prevention, and treatment.

Patient Friendly Description:
What to expect if you are diagnosed with A. Flutter: causes, symptoms, and treatment

Learner Progress: Not documented in this visit.

Title: MyChart Bedside Teaching completed (Not Started)

Points For This Title

Point: All MCB content reviewed with patient and teachback completed. The patient verbalized understanding. (Not Started)

Description:
Go over all the Eduction for the patient in the Education activity. The Education that was provided to the patient via MCB was included as well as education that was noted within the Eduction activity as Education that was beneifical to the patient during this hospital stay.

Learner Progress: Not documented in this visit.

Title: Coronary Artery Disease (MCB) (Not Started)

Topic: WS Cardiac Rehabilitation for Arrhythmia (MCB)--This is CAD and AMI Cardiac Rehab Program Information for the Patient (Not Started)

Point: Exercise for a Healthier Heart (MCB) (Not Started)

Description:
Explain how exercising regularly offers many health rewards. Provide exercise tips to beginning a new exercise routine; Set Small goals and aim for 150 minutes a week.

Patient Friendly Description:
This provides healthy heart tips on why exercise is important.

Learner Progress: Not documented in this visit.

Point: WellStar Cardiac Rehabilitation Program (MCB) (Not Started)

Description:
At WellStar, our cardiac rehab patients are individually assessed to review medical history, evaluate risk factors, analyze functional abilities and set goals. Ongoing assessments are conducted to ensure patients are making progress toward their goals, educational needs are being met, and any problems or concerns are being addressed with the referring physician.

Patient Friendly Description:
This will help you better understand Cardiac Rehabilitation. At WellStar, our cardiac rehab programs provide education, supervised exercise, lifestyle modification and emotional support to help patients increase physical fitness, reduce cardiac symptoms and improve health and wellbeing.

Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Point: Cardiac Rehabilitation: Emotional Issue (MCB) (Not Started)

Description:
Explain how having heart disease can be stressful. Encourage patient not to ignore feelings of sadness, worry, and depression. Patient should know when to ask for help and/or support.

Patient Friendly Description:
This will explain some emotional feelings related to heart disease.
Learner Progress: Not documented in this visit.

Topic: Heart Healthy Diet- DASH Diet (MCB) (Not Started)

Point: Eating Heart Healthy Food: Using DASH Plan (MCB) (Not Started)

Description:
Review diet information and explain that eating a low salt, low fat and low cholesterol diet with plenty of fruits and vegetables can reduce risk of complications from CAD.

Patient Friendly Description:
This will help you follow a healthy eating plan that can reduce your risk of complications associated with Coronary Artery Disease.

Please watch video/read over the material and let anyone on your Care Team know if there are any questions by marking below.

If you understand all material, mark I understand below.
Learner Progress: Not documented in this visit.

Topic: Questions your patient may have for you (MCB) (Not Started)

Point: Questions your patient may have about the AMI (MCB) (Not Started)

Description:
This is information about diet, exercise and medications for patients and it encourages them to ask staff questions.

Patient Friendly Description:
After reading this, you can write down any questions that you have for staff under the Notes section as a reference.
Learner Progress: Not documented in this visit.

Topic: Coronary Artery Disease (MCB) (Not Started)

Point: Recognizing signs and symptoms of Heart Disease (MCB) (Not Started)

Description:
Provide written education on the signs/symptoms of CAD, causes, medication(s), risk factors, prevention and treatment.

Patient Friendly Description:
This will explain some of the causes of Coronary Artery Disease.
Learner Progress: Not documented in this visit.

Point: Understanding Coronary Artery Disease (MCB) (Not Started)

Description:
Give patient written information on CAD. Explain the definition of CAD, causes, signs and symptoms.

Patient Friendly Description:
This will inform you of what to expect if you are diagnosed with Coronary Artery Disease (CAD).

Please watch video/read over the material and let anyone on your Care Team know if there are any questions by marking below.

If you understand all material, mark I understand below.
Learner Progress: Not documented in this visit.

Topic: Risk factors for Heart Disease (MCB) (Not Started)

Patient Education (continued)

Education (continued)

Point: Tobacco/Smoking Cessation (MCB) (Not Started)

Description:
Give patient written information on Quitting Smoking

Educate the patient/family/caregiver on smoking cessation and smoking cessation programs offered in the community. Explain effects smoking and second hand smoke have on the body. Encourage the patient to ask people that smoke around him/her to smoke outside or in another room. Refer patient to Cardiopulmonary Rehabilitation, if applicable.

Patient Friendly Description:
This will give you some getting started tips to kick the smoking habit.

This will help you plan how to quit the smoking habit.
Learner Not documented in this visit.
Progress:

Title: First-Dose Education (Not Started)

Points For This Title

Point: hydralazine HCl (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Not documented in this visit.
Progress:

Point: iohexol (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Not documented in this visit.
Progress:

Point: nitroglycerin (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Not documented in this visit.
Progress:

Point: Ringer's solution,lactated (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Not documented in this visit.
Progress:

Point: dextrose (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Not documented in this visit.
Progress:

Point: dextrose 50 % in water (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Point: calcium carbonate (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: morphine sulfate (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: hydrocodone/acetaminophen (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: acetaminophen (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: phenylephrine HCl (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: labetalol HCl (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: metoclopramide HCl (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: cyclopentolate HCl (Not Started)

Patient Education (continued)

Education (continued)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: furosemide (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: diclofenac sodium (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: gentamicin sulfate (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: diphenhydramine HCl (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: 0.9 % sodium chloride (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: piperacillin sodium/tazobactam (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: insulin lispro (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: ondansetron (Not Started)

Patient Education (continued)

Education (continued)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: glucagon,human recombinant (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: gadobenate dimeglumine (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: pantoprazole sodium (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: polyethylene glycol 3350 (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: perflutren lipid microspheres (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: fentanyl citrate/PF (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: lidocaine HCl/PF (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Point: ondansetron HCl/PF (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: tetracaine HCl/PF (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Point: sodium chloride 0.9 % (flush) (Not Started)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learner Progress: Not documented in this visit.

Title: Congestive Heart Failure (MCB) (Not Started)

Topic: Psycho/Social/Spiritual Support (Not Started)

Point: Stress Management and Support Systems (Not Started)

Description:
Explain the importance of stress management and support systems in diabetes management. Refer to WellStar diabetes support groups, social services, case management or spiritual care, if needed.

Learner Progress: Not documented in this visit.

Point: Anxiety Reduction (Not Started)

Description:
Explain the definition of anxiety, signs and symptoms, and examples of ways to reduce anxiety. Inform patient that Spiritual Care and Social Services are available.

Learner Progress: Not documented in this visit.

Topic: Treatments/Procedures (MCB) (Not Started)

Point: Oxygen (Not Started)

Description:
Educate patient/family/caregiver on why oxygen is needed and how it will be delivered (nasal cannula, mask, etc.). Instruct patient/family/caregiver that the patent should not be smoking while on oxygen.

Learner Progress: Not documented in this visit.

Point: Medical Equipment (Not Started)

Description:
Educate patient/family/caregiver on use of medical equipment and provide educational materials.

Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Point: Introduction to Heart Failure (MCB) (Not Started)

Description:
Give patient written information on congestive heart failure. Explain the definition of CHF, causes, signs and symptoms, expected length of stay and criteria for discharge.

Patient Friendly Description:
This will inform you of what to expect if you are diagnosed with heart failure.

You will be receiving the Congestive Heart Failure red booklet.

Please watch video/read over the material and let anyone on your Care Team know if there are any questions by marking below.

If you understand all material, mark I understand below.

Learner Progress: Not documented in this visit.

Point: Echocardiogram (Not Started)

Description:
Educate patient/family/caregiver on echocardiograms, to include: what the test is, how the test will be performed, and what to expect during the test.

Learner Progress: Not documented in this visit.

Topic: Pain Management (Not Started)

Point: Pain Medication Actions & Side Effects (Not Started)

Description:
Provide medication specific handouts when available.

Learner Progress: Not documented in this visit.

Point: Pain Rating Scale (Not Started)

Description:
Provide patient with information on the Pain Rating Scale. Explain the rating scale of 0 to 10.

Learner Progress: Not documented in this visit.

Point: Non-Pharmacological Comfort Measures (Not Started)

Description:
Explain there are other ways of controlling pain than medication. The following are suggestions: position change, aromatherapy, deep slow breathing, distraction, quiet environment, imagery, heat therapy and/or cold therapy, laughter, massage, music, physical therapy, and touch therapy.

Learner Progress: Not documented in this visit.

Topic: Self Care (MCB) (Not Started)

Point: Eating well with High Blood Pressure (MCB) (Not Started)

Description:
Information provided to patient to explain what their diet should consist of when they have Heart Failure.

Patient Friendly Description:
This will help you make heart healthy eating choices if you have a diagnosis with heart failure.

Learner Progress: Not documented in this visit.

Point: Heart Failure:Being Active (MCB) (Not Started)

Description:
Explain to the patient how to be active with heart failure.

Patient Education (continued)

Education (continued)

Patient Friendly Description:
This will explain how to safely be active with heart failure.
Learner Not documented in this visit.
Progress:

Point: Heart Failure: Dealing with Sleep problems (MCB) (Not Started)

Description:
Provide tips and ideas to help patient sleep better.

Patient Friendly Description:
This will provide tips on sleeping better with heart faillure.
Learner Not documented in this visit.
Progress:

Point: Heart Failure: Know your Baselines (MCB) (Not Started)

Description:
Explain to patient how to identify their baseline and recognize changes.

Patient Friendly Description:
This will help you understand what's normal for you and how to watch for changes.
Learner Not documented in this visit.
Progress:

Point: Heart Failure : Know your Zones (Not Started)

Description:
Review heart failure zones with patient and educate them on how to know which zone they are in each day.

Learner Not documented in this visit.
Progress:

Point: Dealing with Heart Failure: Helping the patient cope (MCB) (Not Started)

Learner Not documented in this visit.
Progress:

Point: Daily Weights (MCB) (Not Started)

Description:
Give written information about daily weights. Instruct the patient to weigh on the same scale every day at the same time, wearing the same amount of clothing. Explain why it is important to check weight. Inform the patient that gaining weight from fluid build up may be an early sign that heart failure is getting worse. The patient should call a care provider if there is a weight gain of more than 2-3 pounds in one day or 4-5 pounds in five days.

Patient Friendly Description:
Information on the importance of Daily weights.
Learner Not documented in this visit.
Progress:

Point: How to check your Heart Rate and Blood Pressure (MCB) (Not Started)

Description:
Give patient written information on how to take a pulse. Explain the definition of a pulse, normal range, reason for taking a pulse, where pulses can be found. Demonstrate how to find a pulse. Once found, instruct the patient to count the beats for a full minute. Tell the patient to keep a record of the pulse rate, date and time taken, which site (right/left, wrist/neck) and strength of beats (weak, strong or missing beats).

Patient Friendly Description:
This will explain the importance of understanding your vital signs and show you how to take them.
Learner Not documented in this visit.
Progress:

Topic: WellStar Cardiac Rehabilitation (MCB) (Not Started)

Point: Exercise for a Healthier Heart (MCB) (Not Started)

Description:
Explain how exercising regularly offers many health rewards. Provide exercise tips to beginning a new exercise routine; Set Small goals and aim for 150 minutes a week.

Patient Education (continued)

Education (continued)

Patient Friendly Description:
This provides healthy heart tips on why exercise is important.
Learner Progress: Not documented in this visit.

Point: WellStar Cardiac Rehabilitation Program (MCB) (Not Started)

Description:
At WellStar, our cardiac rehab patients are individually assessed to review medical history, evaluate risk factors, analyze functional abilities and set goals. Ongoing assessments are conducted to ensure patients are making progress toward their goals, educational needs are being met, and any problems or concerns are being addressed with the referring physician.

Patient Friendly Description:
This will help you better understand Cardiac Rehabilitation. At WellStar, our cardiac rehab programs provide education, supervised exercise, lifestyle modification and emotional support to help patients increase physical fitness, reduce cardiac symptoms and improve health and wellbeing.
Learner Progress: Not documented in this visit.

Topic: Review Plan of Care (Not Started)

Point: Review Plan of Care - Day 5 (Not Started)

Description:
Review plan of care including provider roles, health history, IV and medications, labs and tests, and discharge planning. Take extra time to reiterate to patient that he/she may ask questions at any time and should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time.

Learner Progress: Not documented in this visit.

Point: Review Plan of Care - Day 1 (Not Started)

Description:
Review plan of care including provider roles, health history, IV and medications, labs and tests, and discharge planning. Take extra time to reiterate to patient that he/she may ask questions at any time and should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time.

Learner Progress: Not documented in this visit.

Point: Review Plan of Care - Day 2 (Not Started)

Description:
Review plan of care including provider roles, health history, IV and medications, labs and tests, and discharge planning. Take extra time to reiterate to patient that he/she may ask questions at any time and should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time.

Learner Progress: Not documented in this visit.

Point: Review Plan of Care - Day 3 (Not Started)

Description:
Review plan of care including provider roles, health history, IV and medications, labs and tests, and discharge planning. Take extra time to reiterate to patient that he/she may ask questions at any time and should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time.

Learner Progress: Not documented in this visit.

Point: Review Plan of Care - Day 4 (Not Started)

Description:
Review plan of care including provider roles, health history, IV and medications, labs and tests, and discharge planning. Take extra time to reiterate to patient that he/she may ask questions at any time and should always let staff know if he/she is having difficulty breathing, pain or any discomfort at any time.

Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Topic: Medications (MCB) (Not Started)

Point: Heart Failure Medications (MCB) (Not Started)

Description:
Educate patient on the drug type, purpose for medication, and common side effects.

Educate patient on Prescribed Medications

Patient Friendly Description:
This will inform you of medications that you may be taking if you are diagnosed with Heart Failure.

Learner Progress: Not documented in this visit.

Point: ACE Inhibitors (Not Started)

Description:
Educate patient/family/caregiver on the ACE Inhibitor prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Angiotensin II Receptor Blockers (Not Started)

Description:
Educate patient/family/caregiver on the Angiotensin II Receptor Blockers prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Aspirin (Not Started)

Description:
Give patient written information on Aspirin. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the doctor should be called. Reinforce that this medication should be taken exactly as the doctor has prescribed.

Learner Progress: Not documented in this visit.

Point: Beta Blockers (Not Started)

Description:
Educate patient/family/caregiver on the Beta Blocker prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Digoxin (Not Started)

Description:
Educate patient/family/caregiver on Digoxin and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed. The physician will order a blood test to monitor the concentration of the drug in the patient's blood. The dose of this medication may be changed according to the results of this test.

Learner Progress: Not documented in this visit.

Point: Diuretics (Not Started)

Description:
Educate patient/family/caregiver on the Diuretic prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Point: Inotropes (Not Started)

Description:
Educate patient/family/caregiver on the Inotropes prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Vasodilators (Not Started)

Description:
Educate patient/family/caregiver on the Vasodilator prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Topic: Prevention / Discharge (MCB) (Not Started)

Point: Community Resources (Not Started)

Description:
Give written information on available community resources. Refer to Social Services or Case Management, if needed.

Learner Progress: Not documented in this visit.

Point: Home Health Care Services (Not Started)

Description:
Give patient written information on Home Health Care Services that have been arranged. Review the role of the home care nurse and when to expect the first visit. Refer to Case Management or Social Services, if needed.

Learner Progress: Not documented in this visit.

Point: Follow-up Appointments (Not Started)

Description:
Give the patient/family written information on their next appointment and when to make follow-up appointments. Reinforce importance of making and keeping the appointments. If appointments were made during the visit, give the patient a written reminder of the time and location.

Learner Progress: Not documented in this visit.

Point: Influenza Vaccine (Not Started)

Description:
Educate the patient/family/caregiver on obatining a yearly influenza vaccine.

Learner Progress: Not documented in this visit.

Point: Discharge Medications (Not Started)

Description:
Ensure that there are no barriers to obtain medications prior to discharge. Notify Care Coordination if there are any needs for additional resources prior to discharging the patient.

Learner Progress: Not documented in this visit.

Point: When to Call the Doctor (MCB) (Not Started)

Patient Education (continued)

Education (continued)

Description:
Provide written documentation instructing the patient to call the doctor if the patient has:

1. Ankles and legs that become more swollen.
2. Shoes and socks that get tight suddenly.
3. Shortness of breath that does not go away with rest.
4. Weight gain of 2 - 3 pounds in one day.
5. Weight gain of 4 - 5 pounds in one week.
6. No energy for normal activities.
7. Dizziness or weakness.
8. Yellowish or blue green vision.
9. Heartbeat changes (feels like a butterfly in the chest).
10. Chest pain.
11. Blurred vision.
12. Passing out.
13. Cough that does not go away.

Patient Friendly Description:
Heart Failure symptoms to know and when to call your healthcare provider.
Lifestyle changes to help you feel and live better with Heart Failure.
Learner Not documented in this visit.
Progress:

Point: Review Discharge Plan (Not Started)

Description:
Review the discharge plan with patient and primary care giver including: diet, activity, medications, and special precautions. Refer to Case Management, if needed.

Learner Not documented in this visit.
Progress:

Point: Smoking Cessation (Not Started)

Description:
Educate the patient/family/caregiver on smoking cessation and smoking cessation programs offered in the community. Explain effects smoking and second hand smoke have on the body. Encourage the patient to ask people that smoke around him/her to smoke outside or in another room. Refer patient to Cardiopulmonary Rehabilitation, if applicable.

Learner Not documented in this visit.
Progress:

Point: Diet Instructions for CHF Prevention (Not Started)

Description:
Review diet information and explain that eating a low fat and low cholesterol diet with plenty of fruits and vegetables can reduce their chance of suffering a future heart attack.

Learner Not documented in this visit.
Progress:

Topic: Heart Failure Discharge Instructions (Not Started)

Point: Follow-up Appointments (Not Started)

Description:
Give the patient/family written information on their next appointment and when to make follow-up appointments. Reinforce importance of making and keeping the appointments. If appointments were made during the visit, give the patient a written reminder of the time and location.

Learner Not documented in this visit.
Progress:

Point: Daily Weights (MCB) (Not Started)

Description:
Give written information about daily weights. Instruct the patient to weigh on the same scale every day at the same time, wearing the same amount of clothing. The patient should call a care provider if there is a weight gain of more than 2-3 pounds in one day or 4-5 pounds in five days.

Patient Friendly Description:
Information on the importance of Daily weights.

Patient Education (continued)

Education (continued)

Learner Progress: Not documented in this visit.

Point: When to Call the Doctor (MCB) (Not Started)

Description:
Provide written documentation instructing the patient to call the doctor if the patient has:

1. Ankles and legs that become more swollen.
2. Shoes and socks that get tight suddenly.
3. Shortness of breath that does not go away with rest.
4. Weight gain of 2 - 3 pounds in one day.
5. Weight gain of 4 - 5 pounds in one week.
6. No energy for normal activities.
7. Dizziness or weakness.
8. Yellowish or blue green vision.
9. Heartbeat changes (feels like a butterfly in the chest).
10. Chest pain.
11. Blurred vision.
12. Passing out.
13. Cough that does not go away.

Patient Friendly Description:
Heart Failure symptoms to know and when to call your healthcare provider.
Lifestyle changes to help you feel and live better with Heart Failure.
Learner Progress: Not documented in this visit.

Point: Review Discharge Plan (Not Started)

Description:
Review the discharge plan with patient and primary care giver including: diet, activity, medications, and special precautions. Refer to Case Management, if needed.

Learner Progress: Not documented in this visit.

Point: Diet Instructions for CHF Prevention (Not Started)

Description:
Review diet information and explain that eating a low fat and low cholesterol diet with plenty of fruits and vegetables can reduce their chance of suffering a future heart attack.

Learner Progress: Not documented in this visit.

Title: General Patient Education (MCB) (Not Started)

Topic: Psycho/Social/Spiritual Support (Not Started)

Point: Stress Management and Support Systems (Not Started)

Description:
Explain the importance of stress management and support systems in diabetes management. Refer to WellStar diabetes support groups, social services, case management or spiritual care, if needed.

Learner Progress: Not documented in this visit.

Point: Anxiety Reduction (Not Started)

Description:
Explain the definition of anxiety, signs and symptoms, and examples of ways to reduce anxiety. Inform patient that Spiritual Care and Social Services are available.

Learner Progress: Not documented in this visit.

Topic: Prevention (MCB) (Not Started)

Patient Education (continued)

Education (continued)

Point: When to Call the Doctor (Not Started)

Description:
Educate patient/family/caregiver on when to call the doctor.

Learner Progress: Not documented in this visit.

Point: Protect Others from Infection (Not Started)

Description:
Educate patient/family/caregiver on respiratory hygiene and cough etiquette. To protect from further infection and to protect others from getting an infection, patient should cover nose and mouth with tissues when coughing. Encourage patient to place used tissues in a plastic bag that will not allow secretions to soak through. Patient should always wash his/her hands after using or handling used tissues.

Learner Progress: Not documented in this visit.

Point: Protect Yourself from Further Infection (MCB) (Not Started)

Description:
Educate patient/family/caregiver that because patient is in a weakened condition he/she needs to avoid others who are sick as to not acquire another illness. Family/caregiver should wear gloves, gown and face shield/eye protection.

Patient Friendly Description:
Information on Flu.
Information on Pneumonia and Pneumococcal Vaccination.
Learner Progress: Not documented in this visit.

Point: Falls education, precautions, prevention at home and in the hospital (MCB) (Not Started)

Description:
Patient was given information on preventing falls both while in the hospital and when they are at home.

Patient Friendly Description:
Things to help you prevent falls while you are in the hospital and when you are home.
Learner Progress: Not documented in this visit.

Point: Prevention Deep Vein Thrombosis after surgery (MCB) (Not Started)

Description:
Educate patient/family/caregiver to prevent DVT and PE after Suergery

Patient Friendly Description:
In the days and weeks after surgery, you have a higher chance of developing a deep vein thrombosis (DVT).
This is a condition in which a blood clot or thrombus develops in a deep vein.
They are most common in the leg. But, a DVT may develop in an arm, or another deep vein in the body.
A piece of the clot, called an embolus, can separate from the vein and travel to the lungs.
A blood clot in the lungs is called a pulmonary embolus (PE).
This can cut off the flow of blood to the lungs.
It is a medical emergency and may cause death.
Learner Progress: Not documented in this visit.

Point: Demonstrate Handwashing (MCB) (Not Started)

Description:
Educate patient/family/caregiver on how to perform proper hand hygiene. Explain that hand washing is the single most important step in preventing the spread of germs. Have the patient/family/caregiver demonstrate proper hand washing technique using soap, water, friction, clean nails under running water, and dry hands on clean towel without touching dirty surfaces.

Patient Friendly Description:
This will explain the importance of washing and cleansing your hands to prevent infection.
Learner Progress: Not documented in this visit.

Topic: Self Care (MCB) (Not Started)

Patient Education (continued)

Education (continued)

Point: General Self Care (Not Started)

Description:
Instruct patient on self care needs. These may include: hygiene, how to take a blood pressure, how to change a dressing, etc.

Learner Progress: Not documented in this visit.

Point: Demonstrate Handwashing (MCB) (Not Started)

Description:
Educate patient/family/caregiver on how to perform proper hand hygiene. Explain that hand washing is the single most important step in preventing the spread of germs. Have the patient/family/caregiver demonstrate proper hand washing technique using soap, water, friction, clean nails under running water, and dry hands on clean towel without touching dirty surfaces.

Patient Friendly Description:
This will explain the importance of washing and cleansing your hands to prevent infection.

Learner Progress: Not documented in this visit.

Topic: Medications (MCB) (Not Started)

Point: Antibiotic Education (Not Started)

Description:
If an antibiotic was prescribed, educate patient/family/caregiver on the antibiotics prescribed. Explain how antibiotics work in the body. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed

If a viral diagnosis was made, the patient/family was educated on their viral diagnosis and the reason for no antibiotic this visit.

Learner Progress: Not documented in this visit.

Point: Anticoagulant Therapy (Not Started)

Description:
1-Educate patient/family/caregiver on anticoagulant being prescribed and provide educational materials.
2-Explain action of medication, reason for taking, and importance of adherence to correct medication dose and schedule,
3-Explain potential for adverse drug reactions, signs of allergic reaction, potential for drug-drug and drug-food interactions, and when physician should be called.
4-Reinforce that the medication should be taken exactly as the physician has prescribed.
5-Explain importance of maintaining follow-up appointments and adhering to laboratory testing as prescribed by physician.
6-Explain that the dose of the anticoagulant being prescribed may change depending on the results of the laboratory testing.

Learner Progress: Not documented in this visit.

Point: Insulin (MCB) (Not Started)

Description:
Educate patient/family/caregiver on the insulin prescribed. Explain how insulin works in the body. Explain the action of insulin, reason for taking, side effects, signs of allergic reaction and when physician should be called. Reinforce that insulin should be taken exactly as the physician has prescribed. Explain the proper storage of insulin, that extreme temperatures can damage insulin and never take insulin that has expired. Explain that the patient's primary care physician may change the dosage depending on the results of blood glucose tests and/or A1C level.

Patient Friendly Description:
This will inform you of why you are prescribed insulin if you have Diabetes Type II.

Learner Progress: Not documented in this visit.

Point: Hypoglycemic Agents (Not Started)

Description:
Educate patient/family/caregiver on the oral and/or injectable hypoglycemic(s) prescribed. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, as well as when the physician should be called. Reinforce that this medication(s) should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Patient Education (continued)

Education (continued)

Point: Non-Steroidal Anti-Inflammatory Drugs (Not Started)

Description:
Educate patient/family/caregiver on the NSAID prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Psychotropic Medications (Not Started)

Description:
Educate patient/family/caregiver on the Psychotropic medication prescribed. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: ACE Inhibitors (Not Started)

Description:
Educate patient/family/caregiver on the ACE Inhibitor prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Angiotensin II Receptor Blockers (Not Started)

Description:
Educate patient/family/caregiver on the Angiotensin II Receptor Blockers prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Beta Blockers (Not Started)

Description:
Educate patient/family/caregiver on the Beta Blocker prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Digoxin (Not Started)

Description:
Educate patient/family/caregiver on Digoxin and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed. The physician will order a blood test to monitor the concentration of the drug in the patient's blood. The dose of this medication may be changed according to the results of this test.

Learner Progress: Not documented in this visit.

Point: Diuretics (Not Started)

Description:
Educate patient/family/caregiver on the Diuretic prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Inotropes (Not Started)

Patient Education (continued)

Education (continued)

Description:
Educate patient/family/caregiver on the Inotropes prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Vasodilators (Not Started)

Description:
Educate patient/family/caregiver on the Vasodilator prescribed and provide educational materials. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Antibiotics (Not Started)

Description:
Educate patient/family/caregiver on the Antibiotics prescribed. Explain how antibiotics works in the body. Explain the action of medication, reason for taking, side effects, signs of allergic reaction, and when the physician should be called. Reinforce that this medication should be taken exactly as the physician has prescribed.

Learner Progress: Not documented in this visit.

Point: Medication purpose, side effects, schedule, administration (MCB) (Not Started)

Description:
Discussed purpose and possible side effects of medication.

Learner Progress: Not documented in this visit.

CONSENT TO ROUTINE PROCEDURES AND TREATMENTS & FINANCIAL RESPONSIBILITY STATEMENT

Section I **CONSENT TO ROUTINE PROCEDURES AND TREATMENTS**

I consent to routine procedures and treatments at a WellStar Health System "WellStar" facility as an outpatient, inpatient, or emergency department patient, depending on my medical needs. Routine procedures and treatments can include testing (for example, x-rays and blood tests), routine care and procedures (for example, intravenous fluids, injections, or bladder or stomach tubes) and evaluation (for example, interviews and physical exams). However, this consent to routine procedures and treatments does not include consent for other invasive procedures (for example, surgery, amniocentesis, or diagnostic tests such as colonoscopy or those requiring the use of contrast material), consent for blood or blood products, general anesthesia, or my participation in research. These circumstances require a separate consent process. I understand it is the responsibility of my physician or surgeon to obtain any required separate consent(s).

I understand that I may receive treatment and healthcare services given by WellStar employees (such as nurses and technicians) and by physicians and other independent medical professionals on the medical staff of WellStar facilities (for example, Emergency Department physicians, radiologists, and surgeons) who are NOT WellStar employees. I understand that the healthcare services provided by these independent medical professionals, using independent medical judgment, at a WellStar facility in no way create any type of employment, partnership, or other relationship other than as an independent contractor. These independent contractors are responsible for their own actions and WellStar shall not be liable for the acts or omissions of any such independent contractors.

While I am a patient at a WellStar facility, I understand that I may be observed by or receive healthcare services from students enrolled in training programs. Students are supervised by instructors, WellStar employees, or other independent medical professionals on the medical staff of the WellStar facility, depending on the type of training program the students are enrolled in. I understand that I have the right to request that someone other than a student provide my care.

I understand that I retain no property rights to any tissue samples or bodily fluids removed from my body (specimens) as part of procedures or treatment given to me. I further understand that WellStar has no obligation to preserve these specimens; that it will retain or dispose of specimens according to its usual practices.

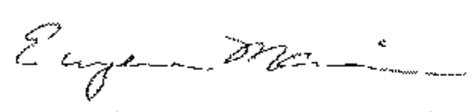
I understand that I have the right to ask questions about a proposed procedure or treatment (including the identity of any person providing or observing treatment and his or her affiliation with WellStar) at any time. I understand the practice of medicine is not an exact science and diagnosis and outcomes of treatment depend upon my medical condition and may involve risks or even death. I understand that no guarantees can be made as to the outcome of my care.

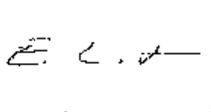
Section II **MATERNITY PATIENTS**

If I deliver an infant(s) while I am a patient at a WellStar facility, I agree that this same Consent to Routine Procedures and Treatments applies to the infant(s).

Section III **EMERGENCY OR LABORING PATIENTS**

In accordance with federal law, I understand my right to receive an appropriate medical screening examination performed by a physician or other qualified medical professional to determine whether I am suffering from an emergency medical condition. If such a condition exists, stabilizing treatment will be provided within the capabilities of this WellStar facility and its staff, even if I cannot pay for these services, do not have medical insurance coverage, or am not entitled to Medicare or Medicaid.

Eugene George Maurice	
Patient's Signature	Relationship to Patient
	




Section IV **ASSIGNMENT OF BENEFITS/FINANCIAL RESPONSIBILITY**

I assign any right I may have to receive payment from a health insurance plan, ERISA, Medicare, Medicaid, Social Security, or other payor(s) for services rendered by WellStar and the medical professionals caring for me during my treatment. I understand that I am financially responsible for all healthcare services, including amounts that are not covered by my health insurance plan or payor, as appropriate, based on the terms of the health plan contracts or the law. For example, the payment of non-covered services, deductibles, and co-payments is the patient's responsibility. For healthcare services provided by independent medical professionals, I understand that I will receive separate bills and that I am responsible for paying them. I agree to provide WellStar with all health insurance coverage information if I choose to use my insurance for payment of services. I agree to respond to all requests for benefit information and complete any forms required by my

All Scans (continued)

Encounter-Level E-Signatures: (continued)

insurance plan. I am responsible for understanding and following the terms of my health insurance plan. I authorize WellStar and its medical professionals to submit appeals for payment, including arbitration and formal complaints, on my behalf as required by my insurance company. I also understand that I am financially responsible for collection costs if my account becomes delinquent and that all delinquent accounts will bear interest at the legal rate, unless prohibited by law. I understand that WellStar may request and use data from third parties such as credit reporting agencies in order to verify demographic data or evaluate financial options.

For Medicare/Medicaid Patients: I certify that the information given by me in applying for payment under Title XVII and XIX of the Social Security Act is correct. I authorize release of any information needed to act on this request. I request that payment of authorized benefits be made on my behalf. I assign payment for the unpaid charges to WellStar or the independent medical professionals providing healthcare services to me. I understand that I am responsible for any remaining balance not covered by other insurance.
If I am signing this form and am not the patient, I understand that I am also responsible for and agree to pay charges not covered by the assignments made in this Section IV, including any Medicare deductibles

Section V **FINANCIAL ASSISTANCE STATEMENT**

It is WellStar's policy to provide medical care at no cost to qualified members of the WellStar-served communities, and to provide significantly discounted medical care to certain qualified members of our communities faced with financial hardship due to medical misfortune, according to policy. I understand that if payment of my bill creates a financial hardship, I may qualify for assistance with all or part of my medical expenses associated with my treatment at a WellStar facility and that I can call 678-838-5750 for more information.

(Patient Initials) 
Section VI **CONSENT TO PHOTOGRAPHY AND VIDEOTAPING**

Sometimes, WellStar facilities and physicians use patient photographs and videos for identification, clinical, educational, or research-related purposes. These photographs, recordings or videos could be in digital or other formats and may be reproduced for scientific or treatment reasons. I consent to having photographs, recordings or videos taken for patient care, educational, research, or other clinical benefits.

Section VII **NOTICE REGARDING RELEASE OF HEALTH INFORMATION**

As explained in WellStar's Notice of Privacy Practices, WellStar may use and disclose medical information including privileged information (i.e. mental health, alcohol/drug abuse or HIV/AIDS), to physicians or other healthcare providers for the purposes of providing treatment, and to payors for the purposes of payment for medical treatment. HIPAA also permits WellStar and its affiliated companies to use medical information for healthcare operations. I expressly authorize WellStar's use and disclosure of my medical information as described in this Section VII.

Section VIII **INPATIENT INFORMATION**

I have received a copy of the Patient Admission Packet that includes "Patient Rights and Responsibilities" and information regarding Advance Care Planning. If I am a Medicare beneficiary, I have also received a notice entitled "Important Message from Medicare."

Section IX **ADVANCE DIRECTIVE**

I have an Advance Directive (Choose One)
Yes:
No: 
If yes: I will provide a copy to WellStar. I have been advised that WellStar does not honor Advance Directives in Pre-admission Testing or in the Outpatient Diagnostics and Treatment setting.

Section X **PERSONAL VALUABLES**

I understand that WellStar is not liable or responsible for lost or damaged personal belongings and valuables (for example, money, jewelry, hearing aids, or dentures) unless placed in a WellStar safe. I will ask family members or friends to take home my personal belongings and valuables. I also understand and will inform the staff if I have dentures, eyeglasses, contact lenses, prosthetics or other items that I need to retain close by for personal functioning to assure safekeeping.

Section XI **CONSENT TO CONTACT**

All Scans (continued)

Encounter-Level E-Signatures: (continued)

By providing a telephone number, I expressly consent and authorize WellStar Health System, any practitioner or clinical provider as well as any of their related entities, agents, or contractors including but not limited to schedulers, marketers, advertisers, debt collectors, and other contracted staff (collectively referred to herein as "Provider") to contact me through the use of any dialing equipment (including a dialer, automatic telephone dialing system, and/or interactive voice recognition system) and/or artificial or prerecorded voice or message. I expressly agree that such automated calls may be made to any telephone number (including numbers assigned to any cellular or other service for which I may be charged for the call) used by or associated with me and obtained through any source including but not limited to any number I am providing today, have provided previously, or may provide in the future in connection with the medical goods and services and/or my account. By providing this express consent, I specifically waive any claim I may have to the making of such calls, including any claim under federal or state law and specifically any claim under the Telephone Consumer Protection Act, 47 U.S.C. § 227. By providing a telephone number, I represent that I am the subscriber or owner or have the authority to use and provide consent to call the number.

By providing a telephone number, I expressly consent to the receipt of text messages from Provider at any telephone number (including numbers assigned to any cellular or other service for which I may be charged for the call) used by or associated with me and obtained through any source including but not limited to any number I have provided previously or may provide in the future in connection with my account. By providing this express consent, I specifically waive any claim I may have for the making of such calls, including any claim under federal or state law and specifically and claim under the Telephone Consumer Protection Act, 47 U.S.C. § 227. By providing a telephone number, I represent that I am the subscriber or owner or have the authority to use and provide consent to call the number.

By providing my email address now or at any time in the future in connection with the medical goods and services provided and/or my account, I expressly opt-in to the receipt of email communications from Provider for or related to the medical goods or services provided, my account, and other services such as financial, clinical, and education information including exchange news, changes to health care law, health care coverage, care followup, and other health care opportunities, goods, and services. By providing this express consent, I specifically waive any claim I may have for the sending of such emails, including any claim under federal or state law and specifically any claim under the CAN-SPAM Act, 15 U.S.C. § 7701, et seq. By providing an email address, I represent that I am the subscriber or owner or have the authority to use and provide consent to contact the email address.

I understand that providing a telephone number and/or email address is not a condition of receiving medical services. I also understand that I may revoke my consent to contact at any time by directly contacting Provider or using the opt-out method that will be identified in the applicable communication. I also understand that it is my responsibility to notify Provider immediately of any change in telephone number or email address.

I confirm that I have read and understood and accept the terms of this document, that I am the patient or patient's representative, and that I am authorized to sign this document and accept its terms.
